Modular NC high pressure vice Titan 2

Slides induction hardened. Side, top and bottom faces ground.

Feature:

Clamps for the modular clamping system.

Increased force travel for secure clamping of blanks in combination with a pull-down function.

Jaws secured with M12 socket head screws.

8 mm lost clearance when pulled down, 3 mm for Gripp.

Clamping can be achieved close to the neutral line.

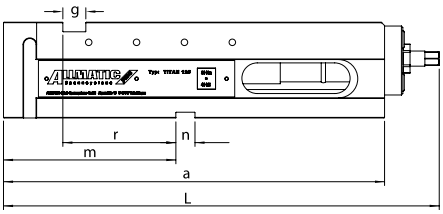
Jaws are compatible with earlier models.

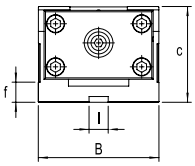
Outlet for chips and coolant. Precise location slots.

Tapped holes for component backstop and for extension.

Maximum clamping force 40 kN.

Size 125K; 125M – With 25H6 M10 holes at 200 mm pitch for zero-point clamping system.





Function: **Clamping exclusively with adjustable torque wrench(maximum 30 Nm).**
Using special high pressure spindle and mechanical power intensifier.

Feature:

Size 125K– 160M – Can be installed vertically.

Advantage: Precise and powerful multi-function high-pressure vice.

- Reliable clamping of blank parts, thanks to the extra long stroke of the high-pressure spindle.
- Precision machined finished parts, base body machined all round.

Application: **For conventional clamping, grip clamping and pull-down clamping.** Clamping of **flame-cut and saw-cut blanks** by **hardened replaceable gripper elements piercing** into the workpiece. Suitable for all materials up to tensile strength of 1000 N/mm². Can be used horizontally or laterally.

Supplied with: Includes bi-hex socket 14 AF, 4 stepless adjustable clamps.

Optional extras:

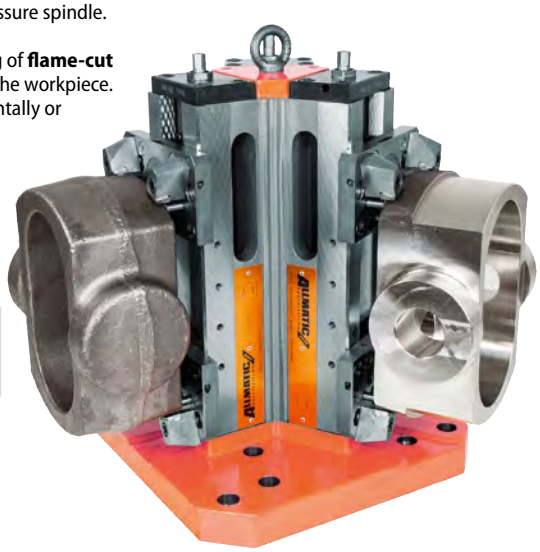
- Jaws No. 361331 – 361970.
- Torque wrench No. 656050 size 60.
- Adapter plate for quick jaw change Xtric No. 361293 and 361294 size 125.
- Adapter plates No. 361297 and 361298 size 125

Size 125K; 125M – Clamping stud No. 360025.

Note:

Size 160M – Clamp capacity extension available using base body No. 360420 size 160.

Size 125K–125L – Clamp capacity extension available using base body No. 360420 size 125.



Here is an example of clamping a casting using a carrier jaw with pull-down grip elements.

Modular NC high-pressure vice LCV 125 G for conventional and gripp clamping

Top and bottom faces ground. **With 25H6 M10 holes at 200 mm pitch for zero-point clamping system.**

Application: Due to the 2.5 mm power stroke of the spindle, suitable for conventional clamping using stepped jaws and Gripp jaws.

Supplied with: Including stepped jaws (No. 361400 125; 361348 125), 4 pcs. gripper inserts (No. 361160 7); 4 pcs. gripper inserts (No. 361240 1) and clamping claws (No. 360750 125/160).

Optional extras: Jaws (see No. 361331–361970), torque wrench No. 656050 size 60, clamping stud No. 360025.

High pressure machine vices

- Base body with **longitudinal and transverse tenon slots** enables **fast and exact alignment** of the vice in longitudinal and transverse directions.
- High quality spheroidal cast iron, hardened, ground workpiece mounting face and ground guides.
- Maintenance-free high pressure spindle with constant pressure level due to low-wear fully mechanical power intensifier.
- Required clamping force pre-selectable: No high pressure at 0 setting. Continuous tests have shown that the power intensifier can withstand 1 million working strokes without harm.
- **No fall-off in clamping force. Fast alignment** with 2 loose tenons in the precisely manufactured slot in the **vice base.**
- Interchangeable jaws, hardened and ground(with serrated faces).
- Height tolerance – 0.03 mm.

Application:
- For **vibration-free, absolutely reliable clamping at maximum cutting and feed rate forces.**
- Consistent support height allows efficient working with several vices alongside each other.
- **Clamping using crank.** High clamping forces can be achieved with low physical effort due to maximum 2 spindle rotations.

Supplied with: 4 table clamps, 1 pair serrated jaws, crank handle.

Garant High-pressure machine vice

- The base body with longitudinal and transverse slot ensures the vice is aligned quickly and precisely in both directions.
- The maintenance-free high-pressure spindle ensures a constant pressure level thanks to a wear-resistant, fully mechanical power intensifier.
- High-quality spheroidal cast iron with hardened, ground workpiece mounting face and precision-ground guides.
- The desired clamping pressure can be preselected – without high pressure in position 0.
- No loss of clamping force.
- Interchangeable jaws, hardened and ground.
- Height tolerance ± 0.03 mm.
- Fast alignment with two loose tenons in the precisely manufactured vice slot.

36 2240

Application:
- For vibration-free and absolutely reliable clamping with the highest possible cutting and feed rate forces.
- The uniform support height allows efficient working with several vices at the same time.
- The clamping action is performed using a crank. High clamping forces are achieved with minimal force in a maximum of two spindle revolutions.

Supplied with: 4 table clamps, 1 pair smooth jaws, crank handle.

HOLEX High pressure machine vices

- Base body and movable upper sliding blocks made of spheroidal graphite iron GGG 60, slides hardened and ground.
- Hydro-mechanical power intensifier with precise clamping force pre-selection.
- Maintenance-free and fully enclosed high-pressure spindle.
- As standard with hardened and ground smooth clamping jaws.
- Base plate with **longitudinal and cross slots** provides for **quick and precise alignment** of the vice in longitudinal and transverse directions.

36 2075

Application: For vibration-free, reliable clamping under high cutting and feed rate forces. Quick clamping by hand crank.

Supplied with: 1 pair grooved jaws (rear face smooth), hand crank.

Optional extras: Replacement jaws No. 362076; 362077; 362079, swivel base No. 362073.

Stationary machine vice

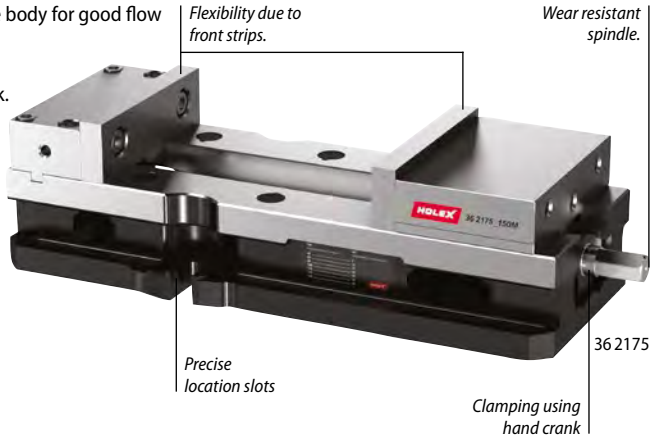
Sturdy base body of cast iron, slides and base area hardened. Cleaning holes in the base body for good flow of chips. Less component lift-off thanks to special transfer of force in the mobile jaw.

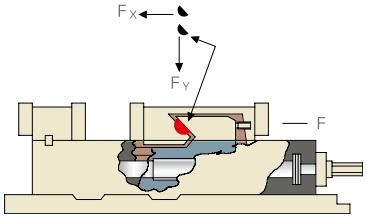
Application: Versatile clamping unit for machining centres.

Supplied with: Incl. 2 pcs. top jaws, 2 pcs. front jaws No. 362181 and 1 pc. hand crank.

Optional extras: Front jaws No. 362177 – 362183, crank No. 362190, spare-parts set No. 362199. Mounted with Tee bolts No. 375300 and aligned with tenons No. 375365.

Note:
Alignment dimensions not compatible with those of other manufacturers.
Size 150M – Metric version – screws and threads in metric version, drive hexagon = 19 mm AF.
Size 150I – Inch version – screws and threads in imperial version, drive hexagon = 3/4 inch AF.





Representation of the force transfer in the mobile jaw.

Garant Jaws with positioning pins (pneumatically operated)

- Hardened steel, Tenifer gas nitrided (tolerance ± 0.01 mm).
- Simple to fit on the vice.
- Pins pushed in mechanically.
- Compressed air operation via valves on both sides.
- The fixed and movable jaws are identical.
- Requires a 5.5 bar compressed air supply

Suitable for:

36 2622 Size 125 – **GRESSEL** Gripos GPS125, Gripos GPS125-VS, Gripos 2, Grepos-5S/5X-S, Grefors, S2 Duogrip, C2, Ecopos.

Application: Quick changeover for different machining operations.
- Quick and fully repeatable positioning accuracy.
- Eliminates tedious fitting of jaw inserts.

Supplied with:

36 2627 – 1 fastening screw.

Actuation from both sides with a compressed air gun replaces the previous procedure of using the push-out pin with its obstructive contour.

Positioning pins pushed in manually.

Individual contours can be clamped.

HOLEX Quick-release vices

- Quick adjustment of the movable jaws.
- **Jaws through hardened and ground.**
- **Time-consuming cranking not necessary.**
- **Precise clamping due to long flat guide.**
- **Clamping of component with just one hand.**
- One jaw with horizontal and vertical prismatic profiles for round material, one jaw smooth.
- Both jaws are stepped at the top to clamp flat parts.
- With two side support faces.
- Positive locking.

Accuracy: Within **0.03 mm.**
Material: Body and movable jaw made of sturdy special cast iron.
Application: **For quick clamping of components on drilling machines and measuring machines.**

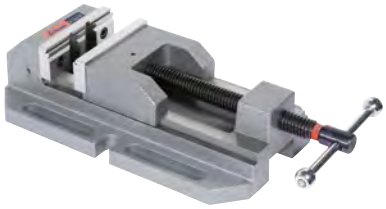
Garant Manual vices for drilling machines

- **Sturdy design with strong spindle.**
- **Jaws through hardened and ground.**
- **Precise clamping due to long flat guide.**
- One jaw with horizontal and vertical prismatic profiles for round material, one jaw smooth.
- Both jaws are stepped at the top to clamp flat parts.

36 5038 –
- Patent-pending **integrated eccentric quick clamping** for a secure grip on the drilling machine table.
- The **quick clamping** in the area of the grooves makes it possible to process the clamped workpiece flexibly and efficiently at any desired position on the **entire** drilling machine table without re-clamping.

Accuracy: Within **0.10 mm.**
Material: Body and movable jaw made of special cast iron.
Application: For clamping components on drilling machines.
Supplied with:
36 5038 – Clamp wrench and three Tee-nuts in sizes 12;14 and 16 mm.

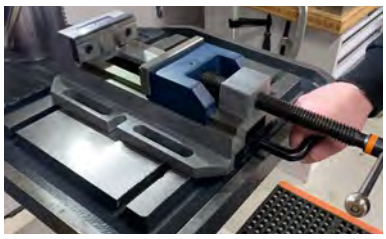


36 5035

36 5038

Eccentric quick clamping on the underside of the vice.

Open and lock the clamping using the supplied clamp wrench.



Easily and securely clamped for machining.

HOLEX Manual vice for drilling machines

- **Sturdy and handy design.**
- **Jaws through hardened and ground.**
- **Consistent overall length** (the spindle retracts into the handle)
- Universal fastening capability due to long holes.
- Movable jaw with guides at the sides.
- Fixed jaw with three vertical prismatic and one horizontal prismatic section.

Accuracy: Within **0.20 mm.**
Material: **Cast iron body.**
Application: For clamping components on drilling machines.

HOLEX 3-sided manual vice for drilling machines

- **Can be used horizontally, vertically or laterally.**
- **Sturdy and handy design.**
- **Jaws through hardened and ground.**
- **Uniform total length.** (spindle retracts into handle!)
- Universal fastening capability due to long holes.
- Movable jaw with guides at the sides.
- Fixed jaw with three vertical prismatic and one horizontal prismatic section.
- With detachable crank.

Accuracy: Within **0.20 mm**.
Material: **Cast iron body.**
Application: For clamping components on drilling machines.

Garant Magnetic jack

- For use as an additional support point to avoid vibration of the workpiece.
- Ideal in combination with vices.
- Simple and accurate positioning for vertical and horizontal clamping.
- With knurled surface for manual adjustment of height and width across flats, for more positive support.
- Captive support elements.
- Point support available in any position.

Suitable for: All vices, can be used as a support in all clamping situations.
Material: Spring steel
Application: For avoiding vibration, especially when clamping thin workpieces.

Garant Sets of magnetic parallels

Accuracy: Height tolerance ± 0.01 mm; width tolerance ± 0.02 mm.
Hardness: 50-55 HRC.
Advantage:
- Flexible use thanks to integral rod magnet on the underside.
- Reduction in set-up time.

Sets of parallels

Parallel blocks in various thicknesses – upright

Precision ground as pairs.

36 6702 – GARANT – **precision version.** Pairing tolerance ≤ 0.004 mm, width / height tolerance ≤ 0.007 mm, extremely precise flatness and rectangularity. Parallels stored in special plastic stand. Hardness: 60 HRC.

36 6704 – HOLEX – standard version. Height and pairing tolerance 0.01 mm. Stored in a wooden box (as shown on the illustration). Hardness: 60 HRC.

Application: In high precision work for parallel mounting of components in machine vices or jigs.

Note: Sizes 125 – 200: In 1 mm increments, except 9 mm, all other dimensions achievable. See the spare parts list for spare holders.

HOLEX Sets of parallels

Accuracy: Plan parallelism height tolerance ± 0.01 mm; **hardness:** 57 HRC. Insert the clamping clips into the clamp blocks and click them on to the vice.

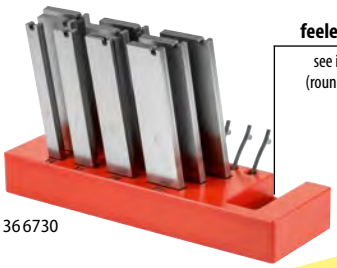
Suitable for: All GARANT, Allmatic NC high pressure vices with tenon width (dimension A) 39 mm ± 0.1 mm.

Advantage: The clamp blocks remain in position during machining and after the high pressure vice has been opened.

Supplied with: Supplied with plastic stand, 10 pairs of inserts, 4 clamping clips

Optional extras: Spare clamping levers No. 366731 in the spare parts list.

Note: Check dimension A on the high pressure vice!



Storage for feeler gauge stock
see illustration below (round or rectangular).

Garant Clamping system for contour and form clamping

System consisting of base plate and clamping/sacrificial plate. Base plate is mounted on the zero point clamping system at 200 mm pitch, or directly on to the machine table. The clamping/sacrificial plate is mounted on the base plate and the negative of the component contour is introduced individually. Alternatively, simple clamping elements from Mite-Bite, AMF, KIPP, Halder and similar can be mounted on the clamping/sacrificial plate for component clamping.

36 8010_180

Baseplate

Anodised aluminium.

Size 180 – Pitch 200 mm.
Size 360 – Pitch 200 mm and cross pitch 200 mm.

Suitable for: Zero point clamping systems with 200 mm pitch or 200 mm cross pitch (for size 360).

Supplied with:

Size 180 – 4 fitted screws M8, 4 blanking screws.
Size 360 – 8 fitted screws M8, 8 blanking screws.

Optional extras: Clamping stud No. 360025 18M12.

Clamping claws

- The contour of the claw generates a slight pull-down force.
- The low clamping height saves material.
- Higher cutting values due to positive clamping.

Application: Ideal for multiple clamping.

37 0034 – For use as a stop in jigs in conjunction with Pitbull clamps No. 370025; 370030 or eccentric clamps No. 370001; 370005; 370008.

Supplied with: 1 clamping claw with screw.

Our partner for standard parts

The Hoffmann Group supplies the entire range on short lead times ex manufacturer's stock.

And much more...

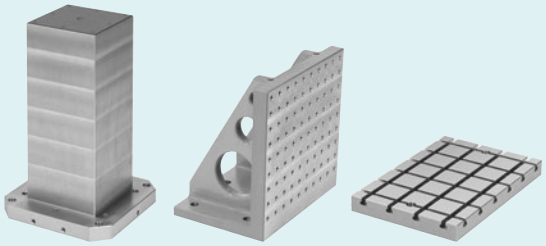
More than 75,000 items. Over 6,000 of them from the field of clamping technology.

- All standard parts and consumables.
- All modular clamping systems.
- Special solutions to customer's drawings available on request.

Order from the Hoffmann Group simply and conveniently using the KIPP item number.

Mix of universal KIPP clamping element products:

Base elements and attachment elements for modular workpiece design:



Side clamp with cam

Material: Housing made of tempered steel, gunmetal finished.

Advantage:
- Compact design.
- Quick and easy clamping of components with pull-down.

Application: For lateral clamping of narrow and wide workpieces. Clamping force is introduced by eccentric adjustment with an additional pull-down effect.

Clamping cams

Material: Heat treatable steel, burnished

Advantage:
- Compact design.
- Quick and easy clamping of components.

Application: For lateral clamping of narrow and wide workpieces.
The workpiece is clamped by tightening the fixture clamp with a spanner.

Application example

Centring clamps

37 0053 – Form A with countersunk screw.
37 0054 – Form B with cylinder head screw.

Material: Heat treatable steel, burnished Hardened (33-39 HRC).

Advantage:
- Pull-down effect.
- Quick and easy clamping of components.

Application: For centring and clamping a workpiece in the hole.
High clamping forces are achieved by the wedge surfaces.

Note: During the clamping process, the clamping force acts on specific points of the hole wall.

Self-aligning pads

- Body made of heat treatable steel, phosphated.
- Sphere locked to prevent twisting.
  37 0057 – Sphere of carbide.

37 0055/0056/0058/0059/0065/0066 – Sphere of ball-bearing steel.

37 0060/0061/0062/0063/0068/0069 – Resets to the home position independently.

Application: Serve as stop, contact and pressure piece in jig and fixture making.

Note:

37 0069 – Can be combined with clamping hooks No. 370073 and 370074.

37 0055–0068 – Can be combined with swing clamps No. 370085 – 370086 or clamping hooks No. 370073 and 370074.

Clamping hook with collar

37 0075 – Screw head recessed in the clamping hook.
37 0076 – Screw head resting on clamping hook when mounting.
37 0070/0075 – With countersunk screw.

Application: For space-saving clamping of workpieces.

37 0070/0071/37 0072 – Screwed directly into a grid hole, no countersinking required.
For space-saving clamping of workpieces.
37 0073/0074 – For higher clamping forces and greater stability.
37 0075/0076 – For installation in individual clamping devices.

Optional extras:
37 0075/0076 – Springs and socket-head screws on request

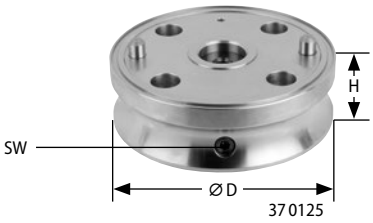
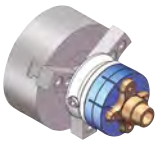
Mechanical collet

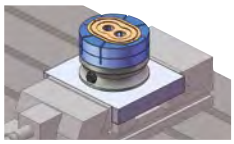
Material: Heat treatable steel, nickel plated

Application:
- To accept collets for **internal clamping and external clamping**.
- Collets are positioned on the arbor with 2 cylindrical dowels, and thereby secured against twisting.



External Ø D		mm	65	90	120	160
37K 37 0125	Adapter for mechanical collet		(eShop)	(eShop)	(eShop)	(eShop)
Height H		mm	35	40	45	50
Width across flats AF		mm	8	8	10	10



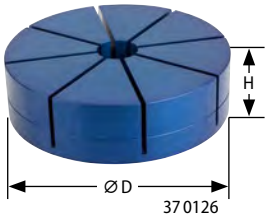


Collets

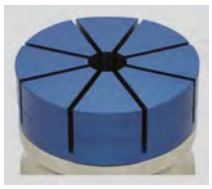
- For clamping workpieces with complex contours for 5-face machining.
- Minimum clamping depth of 2 mm.
- Clamping stroke 0.3 mm.

Material: High-tensile aluminium.

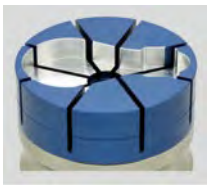
Supplied with: Clamping ring for machining.



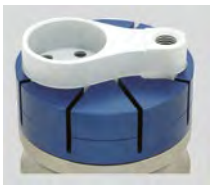
External Ø D		mm	65	90	120	160
37K 37 0126	Collet mechanical **External clamping**		(eShop)	(eShop)	(eShop)	(eShop)
Height H		mm	25	35	40	45
Maximum machining depth T		mm	10	15	20	25



1. Prepare collet



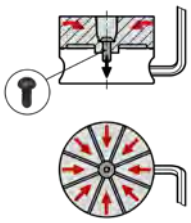
2. Machine collet



3. Insert the workpiece

4. Tighten the clamping cylinder

When tightening the clamping cylinder, the collet is pulled downwards (pull-down). At the same time, the 8 collet segments move into the middle and the workpiece is clamped.



Wedge clamps

Material: Double wedge and clamping segments heat-treatable steel, hardened, black.

Application:
- Wedge surfaces produce high clamping forces.
- Wedge clamps can be used in tapped holes or T-slots.
- When the clamping screw is screwed in, the clamping segments press against the workpieces.
- A slot in the double wedge allows for movement and tolerance adjustment. Movement distance: M8 = ± 0.5 mm; M10 and M12 = ± 1.0 mm; M16 = ± 1.5 mm.
- Wedge clamps are suitable for multiple clamping.
- 37 0031/0032 – Machining allowance enables adjustments to match the contour.

Note:
37 0031/0032 – The machining allowance per jaw is 3 mm for the M8X25 version and 5 mm for the M10X25, M12X40 and M16X60 versions.

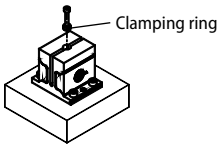
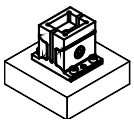
Machinable jaws

- 2 workpieces can be clamped.
- Maximum clamping stroke 0.5 mm.

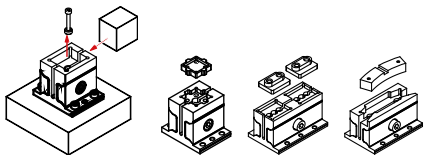
Material: Clamping wedges of heat treatable steel.
Supplied with: Including clamping for machining.



1. Insert the clamping ring:
Tighten the clamping screw



2. Machine the jaws:



3. Clamping the workpiece:
Release the clamping screw and remove the clamping ring using the socket-head screw. Insert the workpiece into the contour and tighten the clamping screw.

Garant Compact clamp

Material: Body and pressure arm of heat treatable steel.

Advantage:
- Compact design, dirt-repellent and chip-repellent.
- Height scale permits quick pre-setting of the clamping height.
- Captive pressure piece. Pressure piece adapters are attached by a magnetic insert.
- Easy assembly using the clamping arm.

Supplied with: Compact clamp, T-nut for width 14 mm and screw M12.

Optional extras: Pressure piece set No. 370148.

Tapered clamps wih adjusting support screw

37 0680 – Clamp painted.
Clamping height steplessly adjustable via screw (without clamping lever).
37 0685 – Quenched and tempered steel, painted, screw strength 8.8.
37 0690 – Hardened, black.

Material:
37 0680 – Quenched and tempered steel, screw strength 8.8 or 10.9 (depending on size).

Application:
37 0685 – To achieve the **lowest clamping height, turn the clamp around.**

Supplied with:
37 0690 – Complete with adjusting screw.
37 0680/0685 – Adjusting screw and T-bolt DIN 787 (No. 375300).

Note:
37 0690 – T-bolt, No. 375301 must be ordered separately.

Steplessly adjustable clamps

The clamp and Tee bolt form a single unit (no loose parts). The shape of the clamp provides for infinitely variable adjustment without additional blocks.
Material: Quenched and tempered steel, galvanised, screw strength 8.8 or 10.9 (depending on size!).
Application: For quick and reliable clamping of various component heights on milling machines.
Supplied with: T-bolt DIN 787 (No. 375300).

Screw jacks with flat support

Self-locking trapezoidal thread spindle with end stop.

Screw jacks with steel base

37 3500 – Quenched and tempered steel, painted.
Size 200 – Extra heavy version for large workpieces.
37 3505 – Body and spindle hardened, black, thread - trapezoidal.

Note: From size 52 with centring hole ∅ 12 mm for jack pads No. 375000 – 375030.

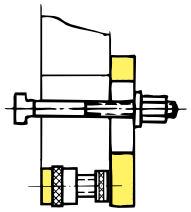
37 3505

Screw jacks with magnetic base

The permanent magnet in the base of the screw jack ensures simple, lasting and precise positioning of the workpiece **on vertical faces.**

Size 88F – Modular version. Height extension up to a maximum of 350 mm, in combination with the spacer ring No. 373555.

Note: With centring hole ∅ 12 mm for jack pads No. 375000 - 375010.



With magnet;permanent and precise positioning for vertical clamping.

37 3550

Height setting screw jacks

- **For precision alignment** using fine pitch thread M 30×1.5. The fixed slide pad **prevents the component from rotating and moving** during alignment.
- The parallel pins supplied are ∅ 12×50 mm and ∅ 12×80 mm; they can be inserted in the centring hole, increasing the overall height by 30 or 60 mm.
- If centring jack pad No. 375030 is placed under the screw jack, a **support height of up to approx. 1370 mm can be achieved** in combination with other screw jacks.

Note: Flat component support face with centring hole ∅ 12 mm for jack pads No. 375000 – 375030.

37 4480

Wedge blocks (height wedges)

Very rigid design; spheroidal graphite cast iron and hardened steel. **The ground wedge surfaces provide for precision and even height adjustment** with an accuracy better than 0.1mm. Either the knurled screw or a hexagon socket wrench can be used for height adjustment. The double action results in a long stroke and precise vertical movement without lateral displacement.

Application: **Particularly for working with heavy cast or forged parts** on large machine tools after marking-out.

Supplied with: **Interchangeable ball jack pad No. 375000.**

Note: Flat component support face with centring hole ∅ 12 mm for jack pads No. 375000 – 375030.

Ball jack pad

37 4900

HALDER Our partner for clamping elements

The Hoffmann Group supplies the entire range on short notice ex manufacturer's stock.

Order from the Hoffmann Group simply and conveniently using the HALDER item number.

Machine and fixture parts

Groove systems

Standard components for fixture systems

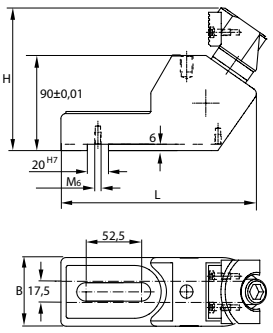
And much more…

HALDER Frame clamp

Clamping elements with replaceable jaws.

Advantage:
- Angled arrangement of the movable jaws creates a pull-down effect.
- Solid construction of vibration-damping spheroidal graphite iron (GGG60).
- Optimum compatibility to the workpiece.
- Few interference contours.

Supplied with: 1 pc. interchangeable jaw (serrated / smooth).



37 0135

37 0136

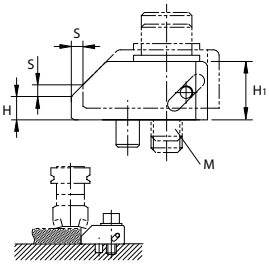
Toe clamp

Especially low-height and compact design. Pull-down effect due to oblique guidance wedge.

Material: Quenched and tempered steel.

Application: For lateral clamping of particularly flat components directly on the jig insert.



37 5006

Heavy-duty clamping jaws

Very sturdy, high version with strong pull-down and clamping forces. The angled clamping mechanism ensures that the component is securely clamped down on to the table. The interchangeable jaws are reversible, the smooth side for machined, the serrated side for unmachined components.

Material: Basic body made of malleable cast iron, jaws case-hardened.

Application: **For lateral clamping of high components with high clamping force.**

Flat clamp – Mini-Bulle

Particularly flat design (see table: height above upper table edge). By grinding down the clamp, an even lower clamping height can be achieved and the depth tolerance of the T-slot can be adjusted. The component is firmly pressed against the table due to the wedge effect of the clamp.

Material: Hardened steel, burnished finish.

Application: **For lateral clamping of particularly flat components** directly on the machine table.

Supplied with: Hexagon key L-wrench ISO 2936 C.

Note: Only supplied in pairs!

Low height clamping jaws – Bulle

Flat design, no protruding T-bolts. Clamps at any angle to table slot. When the side screw is tightened, the component is securely clamped down on to the table by the wedge effect.

Material: Hardened steel, burnished finish.

Application: **For lateral clamping of flat plates** directly on the machine table.

Supplied with: 2 fastening screws, DIN 912, 10.9, T-nuts, and hexagon key L-wrench ISO 2936 C.

Note: Only supplied in pairs!

Flat clamps

Low design, position the flat clamp on the workpiece. Then tighten the securing screws for the machine table. The workpiece is clamped by turning the clamping screw.

Material: Hardened steel, burnished finish.

Application: **For lateral clamping of especially thin components,** in order to perform complete machining operations without interference contours. Can be used both horizontally and vertically.

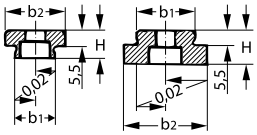
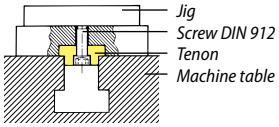
High precision tenons for aligning appliances and tools

Precision ground all round, resulting in quick alignment times for appliances, vices etc., which are to be aligned parallel to the table slots of machine tools. A dial indicator is thus no longer required.

Material: Steel C 15, case-hardened.

375365





Stepped fixed tenons for screw attachment

Accuracy: **Dimension b = fit h6.**

Application: **These T-nuts are screwed in pairs into the standard 20 mm-wide tenon slots of jigs.** By changing the T-nuts it is possible to work **on several machines with different slot widths** with one jig each.

Note: **Size 20** see No. 375370

T-nuts

Standard:

37 5315/5320 – **DIN 508**

Material:

37 5315 – Quenched and tempered steel, strength 10.

37 5316 – Hardened, black.

37 5320 – Quenched and tempered steel, unhardened (= blank, without thread).

Application:

37 5320 – Blanks for production of T-nuts with non-standard threads.

37 5315/5316 – For combination with studs or bolts.

Note: Full load-bearing capacity only when threaded for the **entire** nut length.

37 5315

T-nuts, long version

Material:

37 5325 – Quenched and tempered steel, strength 10.

37 5326 – Annealed, black.

Application: Particularly suitable for high precision machines, to protect table slots.

AMF Rhombus T-bolts

- Forged and milled
- T-slots, rolled thread.
- Hardened to strength class 10.9.

Application: Later insertion of an additional clamping point is made easier on long tables. The T-bolt is inserted into the T-slot from above.

Washers, extra strong

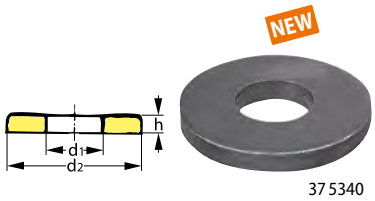
Extra strong, flat-pressed and hardened, edges bevelled.

37 5341 – Hardened, black.

Standard:

37 5340 – **DIN 6340**

Application: Particularly suitable for clamps.
Especially for making jigs and fixtures.



37 5340

Spherical seat washers and collared washers

Form C and D case-hardened, form G quenched and tempered.

Standard: **DIN 6319** (form G similar to DIN 6319).

Application: Angular compensation up to 3° when used in sets.

37 5355 – Form D may only be used over holes, so that the washer is in full contact.

37 5360 – Due to its large diameter, form G is suitable even for clamping over the slot of forked clamps.

Parallel table backstops

With minus tolerance h7, compatible with machine slots with tolerance H8. Height tolerance IT5.

Material: Hardened steel.

Application:
- **As backstops in machine table slots.**
- **As parallel blocks** in clamping fixtures. For further parallel blocks see No. 366400 - 366750.

Cover strips for T-slots

Aluminium profile strip, **1 m long.**

Application:
- Laborious cleaning of table slots is no longer necessary if empty slots are covered up with cover strips beforehand.
- Cover strips can easily be removed after machining.

Note: Can be cut to the required length using a fine saw blade.

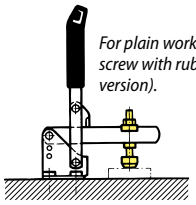
Vertical toggle clamp with adjustable contact screw

37 6510 – With vertical base for fixing to ribs and for welded structures.
37 6520 – With angled base for side attachment.
37 6500–6508 – With horizontal base for fixing to base plates etc.

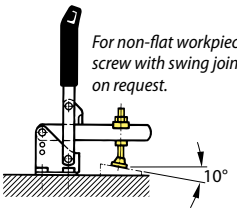
37 6500/6505/6510/6520 –

- Compact design due to new handle.
- Ergonomic 2-component handle, very comfortable to use due to enlarged hand rest.
- Captive contact screw.
- Finger protection thanks to safety clamping mechanism no trap points.

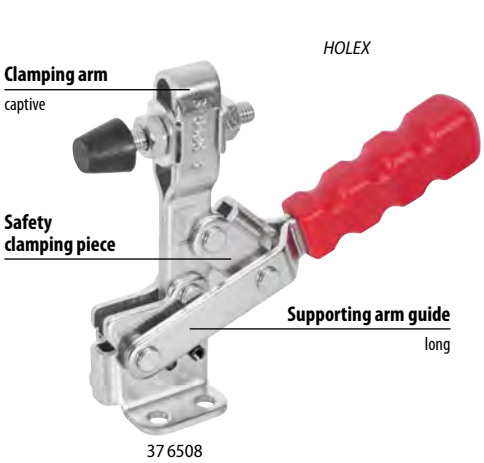
Application: **For quick clamping and releasing of parts in series production** or for installation as part of special clamping jigs. Suitable for clamping during drilling, reaming, grinding, bending, welding, fitting etc.



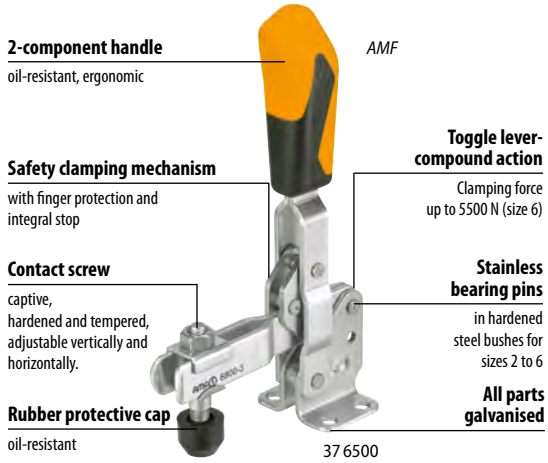
For plain workpieces: Contact screw with rubber cap (standard version).



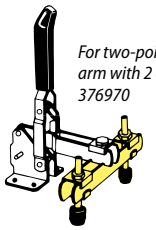
For non-flat workpieces: Contact screw with swing joint available on request.



37 6508



37 6500



For two-point clamping: Cross arm with 2 contact screws No. 376970

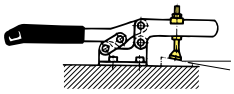
Horizontal toggle clamp

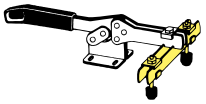
Captive contact screws.

Application: **For quick clamping and releasing of parts in series production** or for installation as part of special clamping jigs. Suitable for clamping during drilling, reaming, grinding, bending, welding, fitting etc.

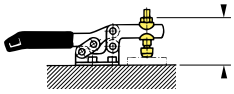
With horizontal base for fixing to base plates etc.
37 6615 – Reinforced version with increased retaining strength
37 6610–6620 – Compact design due to new handle.



For uneven components:
contact screw with joint, on request.



For two-point clamping:
Cross arm with 2 contact screws No. 376970 can be found in our spare parts list.



For flat workpieces:
Contact screw with rubber cap (standard version) with low overall height.

Horizontal toggle clamp with patented safety-locking mechanism

- Rivet made of stainless steel.
- Case-hardened bearing bushes.
- Bearings greased.
- Complete with hardened and galvanised contact screw.
- More compact design due to new handle.
- Ergonomic 2-component handle, very comfortable to use due to enlarged hand rest.
- Captive contact screws.

Application: Particularly suitable for use where vibrations occur and for overhead applications due to patented safety-locking in closed and open state.

ESD quick clamp

- Handle and protective cap made from electrostatically dissipative material.
- The quick-action clamps are within the ideal resistance range for a "gentle discharge".
- Maximum protection of electrostatically sensitive components.
- Specially developed for work in ESD protected areas (EPA) – according to the standard DIN EN 61340-5-1.

Complete range of ESD clamps on request.

Push-pull toggle clamp short type

Hardened shoulder screws.

37 6700 – ■ Compact design due to new handle.
■ Ergonomic 2-component handle, very comfortable to use due to enlarged hand rest.
37 6725 – ■ Ergonomic handle made of oil-resistant plastic.

Application: ■ Direct fixing to sheet metal fixing points.
■ Connected to jig body with threaded end of arm.

Optional extras:
37 6700 – Angled base No. 376730.
37 6725 – Angled base No. 376735.

Note: ■ Available in stainless steel on request.

Heavy-duty push-pull toggle clamps (push and pull back clamps)

- Very sturdy design, with slide-ram guide.
- Slide-ram and hand lever move together.
- Body of malleable cast iron.
- Lever parts and slide ram made of quenched and tempered steel, galvanised and passivated.
- Hardened contact screw.

Application:
- For quick clamping / releasing in series production.
- As push or pull clamp.
- For incorporation within special jigs and fixtures.
- Suitable for clamping during drilling, reaming, grinding, bending, welding, fitting etc.

Quick-action table clamp

Steplessly variable, fixed or pivoted. Type BS – the clamping action is released by tightening the clamping handle further then pressing the release lever (clamp then releases easily). Type GRS – the spindle is located away from the head, allowing free access to the work area.

Application: For use on machine tables for fast and reliable clamping and releasing when manufacturing individual parts.

Optional extras: Socket-head screw to DIN 912, T-nuts No. 375315; 375320; 375325 to DIN 508.

Garant Lifting magnet LM

- Manually operated magnets for individual use. Compact, robust design with high-performance neodymium permanent magnets.
- Optimum performance even with large air gaps, no stray fields.
- Certified, individually tested break-away force guarantees 3-fold safety for the user (see test certificate).
- Fully encapsulated compact and lightweight lifting magnet with safety-locking mechanism.
- Solid construction with easy action on/off switch.
- Magnet adhesion surface with 2 longitudinal poles.
- Easy-action lever with safety-locking mechanism.
- High-quality workmanship in timeless GARANT design, in conjunction with well-thought-out features to satisfy user requirements and safety requirements.

Description: Lifting magnets are the ideal solution for safe and efficient handling of ferromagnetic materials. Whether in Production departments, warehouses or construction sites – these powerful tools offer maximum performance and easy handling.

Advantage:
- Impressive lifting capacity, up to several kilogrammes depending on the model.
- Equipped with a sturdy magnet system and a safety-locking mechanism that prevents unintentional release.
- No external power required for permanent magnets – ideal for mobile applications.
- Compact design ensures easy operation and storage.

Application:
- Loading and unloading of machine tools
- Safe lifting and transportation of flat and round materials up to 1300 kg.
- For steel or cast iron parts, plates, rods or pipes.
- For use in warehouses, foundries / steelworks, storage of steel, tool-making, and production areas.

Note: Air gap < 0.1 mm for steel material! Switch on the load lifting magnet only on magnetic surfaces! The geometry of the workpiece to be lifted should be chosen to suit the safety concept. Test certificate for break-away forces available on request. Annual testing required by law according to DIN EN 13155. Return form available in the eShop.

High power magnetic technology enables compact sizes with higher holding forces than conventional lifting magnets.

Electro permanent magnet clamping plates

- Innovative and patented monoblock design for maximum stiffness and reliability.
- **Quick attachment of the electrical connections.**
- Threaded sockets of high-tensile material in each pole.
- Sturdy due to monoblock design and use of integral pole plates.

Advantage:
- Vibration-free machining protects the tool and the machine.
- Five-axis machining without interference contours.
- Full exploitation of the machine travel.
- Significant reduction in set-up times.
- Unaffected by power failures.
- Quick and precise plane-parallel milling.
- Uniform clamping force over the entire clamping area.
- Low installed height
- Very high holding forces
- Quick and easy positioning of workpieces.

Application: For use in mould-making, tool-making and machine tool building.

Supplied with: Including ST200FA control unit with 5-pole plug, for controlling a magnetic clamping plate.

Optional extras: Pole extension No. 382010.

Note: **Installation package for actuating multiple electro-permanent magnetic clamping plates available on request!**
The power cable is supplied without any connection plug.
Mains connection 400 V / 50 Hz.

Garant Permanent magnet plate

- Alu casing for mounting on top or for incorporation.
- Stop strips on 3 sides.
- 2 switch points.
- Milled-in grip handle.
- 4 ZeroClamp holes provided at 200 pitch.
- Lamellae made of 3 mm brass / 12 mm steel.

Application: For clamping medium-sized to large workpieces for grinding, milling and spark erosion.

Supplied with: Hexagon socket.

Note: Suitable GARANT ZeroClamp clamping stud 360025 18M16 or 18M16/138.

SAV Permanent magnetic clamping plate with neodymium magnets

- **Neodymium magnet system for strong clamping force.**
- ON-OFF control by hand-operated lever.
- In the OFF state a weak opposing field **assists removal** of the components.
- With longitudinal and transverse stops.
- Lamellae made of 3 mm brass / 12 mm steel.
- Magnetic field without straying, ensuring no magnetisation of tools.

Application:
- **Suitable for heavy machining** such as roughing.
- For small, medium, and large components even with rough or uneven surfaces.

Primarily for milling!

- **Neodymium magnet system for strong clamping force.**
- Through transverse pole pitch.
- Uniform clamping force over entire width **and side faces of the pole area.**
- Lamellae made of 0.5 mm brass / 1.4 mm steel.

Application:
- For grinding and spark erosion machines.
- **Universal clamping of small and medium-sized components of any thickness.** (Particularly suitable for thin components).
- Consistent clamping force over entire width **and side faces** guaranteed.

Primarily suitable for grinding/erosion applications!

SAV Sine tables with permanent magnetic clamping plate

- **Neodymium magnet system for strong clamping force.**
- With permanent magnetic clamping plate No. 380500.
- Tilting about the longitudinal axis.
- Tilt range 0 – 45°. Angular accuracy ±5 s. Baseplate thickness at 0° = 3 mm. Plane parallelism ±0.005 / 100 mm.
- Pole pitch 0.5 mm brass / 1.4 mm steel.
- Very high precision combined with extremely low height.

Application: For grinding and spark erosion machines.

Supplied with: Wooden box and sine conversion table from degrees / minutes to mm.

[SAV] Permanent magnet clamping blocks with fine pole pitch

Size MH202; MH202S – Three magnetic clamping faces.
Size MH202S; MH203S – $SmCo_5$ magnets permit extremely high clamping forces for materials that are difficult to machine.
Size MH203; MH203S – Two magnetic clamping faces.

Application: For profiling and machining small workpieces such as punches etc.

Note: Permanent magnet, not switchable.

[SAV] Lamellae pole blocks

- Steel-brass connection.
- Longitudinal and transverse pole pitch. Level or Vee profile.
- Lamellae made of 1 mm brass / 3 mm steel, adhesively bonded without tie rods.
- Lamellae pole blocks are themselves non-magnetic.
- Height tolerance ± 0.5 mm.

Application:
- For use only in connection with magnetic clamping plates for machining irregularly-shaped components.
- Pole blocks can be machined to any desired profile.

Improved version – without tie rods

Garant Power demagnetiser DM1

- Pole plate of laminated silicon sheet metal with low inductive eddy current losses.
- **Power supply 230 V / 50 Hz or 115 V / 60 Hz** (selectable).
- Protection class IP21 (fully enclosed device).
- **Duty cycle 100 %** (continuous operation).

Application:
- Demagnetisation by moving component once or more times in the same direction over the pole plate; the component must always be moved over the entire length of the pole plate.
- For demagnetising components after magnetic clamping.
- Sturdy design (die-cast aluminium body) ensures durable use even when roughly handled.

Garant Tesla meter measuring device for measurement of magnetism

- Light and compact design. Housing protected against dirt.
- Automatic measuring range selection. Display either in Tesla or Gauss.
- Static and dynamic measurements.
- Magnetic pole display N/S. Zero setting.

Application: For measuring residual remanence, magnetic flux density and field distribution on magnetic clamping plates.

Supplied with: Supplied with a leather case and 4 × AA batteries.

Note: If wear occurs, the sensor No. 380866 size 1 can easily be reordered and exchanged.

Type		1

Garant Vacuum clamping plates, with Venturi nozzle

Aluminium, steel blue anodised. Operating pressure 3.5 – 8 bar. The final vacuum is approx. 80 mbar (92 % vacuum). Integral noise muffler reduces the noise generation. Height tolerance ± 0.5 mm.

38 4900 Size VR1 – Supplied with 2 ZeroClamp holes, 12M10, pitch 200 mm.

Advantage: **Low-cost entry-level system**. Low maintenance costs. Ready for immediate use.
Size VR1; VS1 – Can quickly and easily be converted to **vacuum pump operation**.

Application: For vacuum clamping **without** a vacuum pump.
Size VRV0; VSV0 – For use on **machine vices**. Especially thin components can be clamped flexibly and with little trouble.

Supplied with: Back-stop discs, compressed air hose ∅ 10 mm (1 m), Venturi nozzle (1 pc.).
38 4900 – Sealing cord ∅ 4 mm (10 m).
38 4905 – Rubber adapter mat (1×).
Size VR1; VS1 – Hose adaptor (1×), plug LW 12 (1×), stepless adjustable clamps (2×).

Note: When using Venturi nozzles, we advise against machining using coolant emulsion.

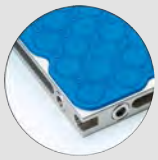
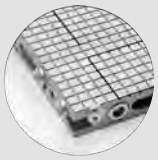
WITTE Vacuum clamping technology

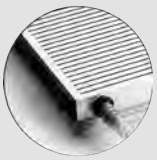
For vacuum clamping, a vacuum is produced under the workpiece to be clamped so that the workpiece is clamped to the clamping plate by the pressure differential. The surface structure, the size of the workpiece, and the pressure differential are crucial for the clamping force / movement resistance force of the workpiece.

Vacuum clamping technology is suitable for milling, grinding, turning, inspecting, spark eroding, measuring, coating, laser cutting, polishing, drilling, deburring, engraving, and assembly.

Advantages of vacuum clamping:
- Clamping of pressure-sensitive workpieces, therefore no damage or distortion to the component.
- Clamping of very thin sheets or films.
- 5-face machining in a single clamping.
- No vibration during machining.
- Reduced clamping times due to quick clamp / quick release process (< 1 second).
- Non-magnetic materials can be clamped.

Patented Vac-Mat system	Modular pitch vacuum plates	Slit Vacuum plate	Grid plates/slit plates Venturi system
			






A wide spectrum of shapes of workpieces can be clamped. Thin soft re-usable plastic mats with elastic lips on the upper face and fine holes in the centre. High clamping forces, clamping faces with high coefficient of friction. Milling of external and internal contours can be performed, yielding precise and clean burr-free cut edges on the workpiece.	For heavy-duty machining of simple-shaped workpieces with rough surfaces. Sealing cords compensate minor surface irregularities and bulges. High clamping forces, universal application, secure clamping of unmachined workpiece surfaces, since the clamping face has a high coefficient of friction.	Clamping is achieved using rubber adapter mats or covering films. These are placed between the workpiece and the vacuum plate. The mat is perforated to match the outline of the workpiece. The outstanding coefficient of friction offers good resistance to the movement forces that arise during machining.	For clamping full-surface components. Ensure the least possible "leakage air" entering the system Vacuum generation is easily performed using the available compressed air. The integral Venturi system requires an operating pressure of 3.5–6 bar. As compressed air accelerates it creates a suction effect (vacuum) within the nozzle. The final vacuum is a pressure of approx. 80 mbar (92% vacuum). The air consumption is 30 – 42 NL/min. Suction volume is approx. 96 l/min.

The selection criterion for vacuum power units and pumps is the size of the clamping area:

Clamping area	< 0.12 m²	< 0.15 m²	< 0.5 m²	< 1.0 m²	< 2.0 m²	< 3.0 m²
Suction power	5 m³/h	10 m³/h	16 m³/h	21 m³/h	63 m³/h	100 m³/h

The Hoffmann Group is constantly expanding its sustainable product range. The GARANT GreenPlus product range facilitates sustainability in workshops and production – coupled with the highest standards of safety, quality and performance.

Regrinding

Good for you

It is already worth it from the first regrind. Overall, you can expect amazing savings of up to 85 %. And all with the original regrind quality, to the original geometry and on the original production machines.
There are no compromises here.
In addition: Of course, we also provide you with excellent regrinding results for your third-party brands!

Good for the environment

Reusing the tool saves valuable resources and avoids unnecessary waste. In addition, the shorter transport distances also ensure lower CO2 emissions.
A good contribution to environmental protection.

Just good all round

Pick-up and delivery service, coating service, measurement certificate service, labelling service.
An all-round worry-free package has never been so easy – and with maximum cost transparency.
For you, this means the highest precision and reliability as quickly as possible.

SIMPLE. RELAXED. PRODUCTION.

By taking measures to boost efficiency, you simply get more out of your production site.

Do you recognise these too?

- High error rate
- Lengthy set-up times
- Constant tool wastage
- Hassle from needing to document everything
- Pressure from competition

Then arrange an appointment with your Hoffmann Group process consultant today.
Working together with you, we will unlock untapped potential in your production site –
giving you more time and money and greater peace of mind!

Handbooks, data calculators

Machining handbook

11 0010 – The **machining handbook** is a comprehensive, **2-part** reference book, **consisting of** Basics **No. 110015** and detailed information for the cutting data **No. 110020**. Here, the ambitious machining professional will find all the important information about materials and their machinability – compact, not favouring any specific manufacturer, and in a clear format.

11 0015 – Theoretical basic principles of machining, individually.

11 0020 – Cutting data tables for Catalogue 50, single.

Note:

11 0015 – The machining theory handbook is also available in the languages Czech, Hungarian and Romanian.
Please contact your Hoffmann representative if you require a copy.

Reference books

11 0955 – The **Metal workshop tables book** is an indispensable reference source for all metal-working trades. (size DE: German **with** formulary, size EN: English **without** formulary). Mathematical and physical data, materials engineering, construction, manufacturing and control engineering, standard parts, NC programming. DIN A5, more than 400 pages.

11 0956 – Like no. 110955 with formulae and digital activation code for download.

11 0957 – The tutorial **metalworking reference book** is a reference book for education and training in the machine tool trades. The 8 chapters correspond to the elements of the education and training syllabus. Includes digital activation code for download.

Calculation aids, display units

11 0960 – **Drilling data calculator** (in the German language) as double-sided calculation disc ∅ 130 mm of high quality plastic for determining speeds and feeds in different materials. Gives all individual values (cutting speed, spindle speed, feed rate) together with cycle times.

11 0965 – The **speeds and feeds calculator** in German (DE) and English (EN) quickly and easily finds **the correct speeds and feeds for all GARANT milling cutters and lathe tools:** n = 10 – 30,000 rpm.

11 0966 – **The tolerance slide** quickly and easily determines the upper and lower values of the ISO tolerance bands (up to nominal size 180 mm). The base body is printed on both sides and carries a read-off runner. Of high quality plastic. The **legends are printed in several languages** (German, English, French) for international use.

11 0971 – **The Tolerator indicates all tolerance values** according to ISO recommendation R286 – 1962 up to nominal size 500 mm. The legends are printed in **several languages** for international use. The housing protects it from dirt.
Size: 110×60×30 mm.

11 0972 – **The Filetor** indicates the **thread name,** the **range, and** all the respective **defined sizes.**

Garant TQ torque screwdriver with T-handle, fixed, automatic triggering

Torque screwdriver with easy-grip 2-component T-handle. The torque is fixed. Toolholder with permanent magnet.

Standard: Tested to DIN EN ISO 6789.

Function: When the torque is reached the screwdriver triggers **with clearly audible and perceptible signal**. The long-travel indication gives the user an unmistakable signal that the set torque has been reached.

Application: In conjunction with **1/4 inch bits** with **C 6.3** or **E 6.3 shank,** e.g. **Torx Plus® bit** No. **674252.** Ideal for precise tightening of indexable inserts to the specified torque.

Note: Supplied **without** bit.

Cutting compound, cutting oil, cooling lubricant concentrate, and grinding oil

General-purpose lubrication stick solid and cutting compound soft

Cutting compound for spot application. Straightforward application(dip or apply). Adheres to the cutting edge and only becomes liquid in use; very good lubrication properties, very high pressure stability.

08 4120 – Lubrication stick for spot application.
08 4160 – Soft cutting compound.

Application: Multi-purpose compound for **tapping, reaming, milling, broaching, and sawing.** Indispensable when cutting **difficult materials** such as stainless and heat-resistant steels, nickel alloys, titanium, and similar alloys.

Cutting oils

08 4205 – Application by brush, spray can, spray bottle or lubrication system.
08 4205–4220 – Cutting oil for the most demanding applications. Recommended for mixing with normal mineral-based cutting oil (but not with water-soluble oils).
08 4210–4225 – Application by brush, spray can, spray bottle or lubrication system.

Application: Multi-purpose for **all machining operations** (turning, milling, drilling, tapping, reaming, broaching and sawing) and also for **forming**. Indispensable when cutting **difficult materials** such as stainless and heat-resistant steels, nickel alloys, titanium, and similar alloys. Ideal for **non-ferrous metals.**

08 4220 – **High viscosity product** based on mineral oil, very well suited for thread tapping, good adherence.
08 4225 – **Strongly clinging cutting oil foam** for spot application to the cutting zone. Contains no sulphur or mineral oils, can be precisely applied, and washed off with water.
08 4205/4210 – **Ideal when minimum lubrication is required,** due to being free of mineral oil.

Cooling lubricant and grinding oil concentrate for mixing with water

Cooling lubricant for **demanding applications**, **free of hydrochlorous acid, formaldehyde and boric acid.** High-pressure additives prevent displacement of the lubricating film; it remains on the cutting tool in molecular concentrations even under the most severe loading.

08 4241 – High performance cooling lubricant concentrate, suitable for **internal coolant supply** (ICS) and high-pressure applications.
08 4242 – **High-performance cooling lubricant concentrate HPC VEG** is a boric-acid-free, water-miscible cooling lubricant with excellent long-term stability, an outstanding rinsing effect and low foaming. **Not a hazardous substance!** (Boron-free and amine-free).
08 4243 – **High-performance cooling lubricant concentrate Plus** is a boron-free and amine-free, water-miscible cooling lubricant containing mineral oil and has been specially formulated for heavy-duty machining on aluminium and high-alloy steels. Non-ferrous metals should only be machined after conducting preliminary tests. Emulsions with **high-performance cooling lubricant concentrate Plus** have a long service life, provide excellent corrosion protection and are particularly skin-friendly. **Shelf life: 12 months.**
08 4244 – **High-performance cooling lubricant concentrate and sawing oil WM** is a general-purpose, water-miscible cooling lubricant which is ideally suited to general machining. **Shelf life: 12 months. Not a hazardous substance!**
08 4270 – High performance **grinding concentrate** transparent for a clear view when grinding a wide variety of materials. **Mixing ratio 1: 40** (2.5%).

Advantage: Concentrates **protect against rust**, do not attack paintwork, and are **physiologically harmless**, as well as very **resistant to bacterial contamination**, and kind to the skin.

Application:
08 4242/4244 – Suitable for internal coolant supply (ICS) and high-pressure applications.

Note:
08 4241/4270 – Jokisch slide oils and machine bed oils are available on request.

High pressure nozzles for cooling lubricants

High-pressure nozzle for up to 90 bar High-pressure cooling and pivoting range of 70°, up to 110°.
Housing of high quality plastic granules.

- For space-saving insertion in the existing hose system.
- Nozzle with 360° rotation.
- Various pipe lengths.

Application: **For retrofitting** into the existing system.
Quick cutting when machining at high speeds thanks to high-pressure cooling.

08 4440

Garant Micro-lubrication system, patented

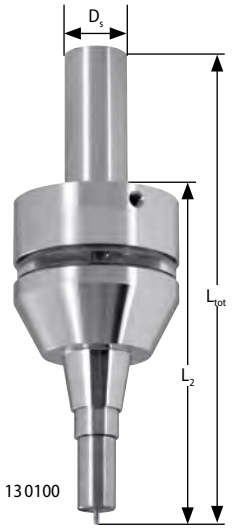
Sturdy stainless steel body with **3-chamber pressure system** for dispensing the lubricant very accurately.

Advantage:
- Very easy to operate.
- No problematic, inaccurate manual lubrication.
- Process reliability and longer tool life.

Application: **Can be used horizontally and vertically in machining centres**. For all thread cutting oils up to 570 mm²/s viscosity (see No. 084210 and 084220). The oil is precisely distributed mechanically and hydraulically on to the tapping hole wall. Because the **micro lubrication system** efficiently uses only very small **quantities of oil,** an impairment of the consistency of the emulsion is prevented. It thus saves the significant expense of changing over to emulsion with a high fat content, which is essential for process reliability when tapping.

Supplied with: Micro lubrication system, main cylinder type S, and one each nozzle type DL and GL filling injector.

Note: ■ For accessories and spare parts see the spare parts list.



Type		S
130100	Micro-lubrication system	eShop

Cutting oils – universally suitable for machining

Cutting oils from Jokisch

084210–4220:
Ideal for the
GARANT micro-lubrication system 130100.

084220:
High-viscosity product based on mineral oil, very well suited for thread tapping, good adherence.

084220_20

084210_20

Chlorine-free, no hazardous substance!

084210_0,5

Cooling lubricants in thread production:

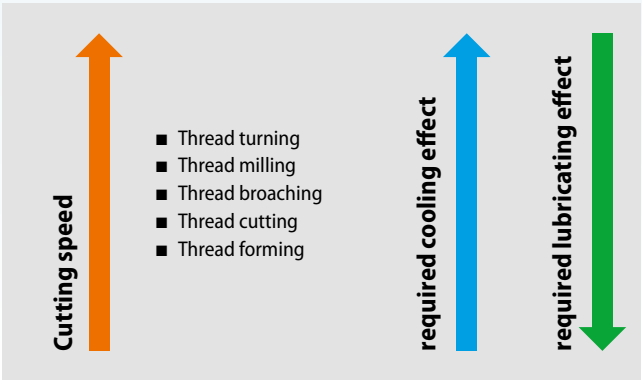
Selection of and recommendation for cooling lubricants:

Cooling lubricants are primarily used for the following:

- **Cooling**
- **Lubricating**
- **Chip evacuation**

weighted according to the machining procedure (see graphic on the right).

Example for thread forming: Due to the low cutting speed, a lower cooling effect but a very high lubricating effect are required. It is also imperative to pay attention to the type of cooling lubricant.



To determine the intended cooling lubricant and the process, the respective specification in the application table under the products is used:

Example and explanation*							
	Oil lubrication		Minimal quantities of lubricant		Compressed air supply	○	Suitable only under restricted conditions
	Emulsion (for taps with at least 8% grease)		Dry machining	●	Suitable		Unsuitable

**In addition, the recommendations in the product description must be observed.*

Can / drum mixer for emulsions

The mixer with the **universal screw fastening set** fits all commercially-available jerrycans and drums.
A needle valve allows the **mixing ratio to be set precisely.**
High repetition accuracy, mixing volume up to 370 l/h,
connections 1/2 inch (water feed and mixer outlet),
3/8 inch (concentrate inlet).
With safety non-return valve.

Cooling lubricant oxygenation pump

Pump for increasing the working life of cooling lubricants.
Strongly recommended by trade associations. Suitable for continuous operation.

Application: For oxygenation of cooling lubricants. Up to 150 litres.
Prevents the oil film from closing on the surface,
thereby suppressing the growth of moulds and bacteria.
Ideal in combination with belt skimmer No. 084360.

Air delivery		l/h	180

Accessories for the application of cutting oils and cooling lubricant concentrates

Speed-adjustable belt skimmer in low-hazard 12 V low voltage design (with mains adapter)
for mobile use wherever it is needed.
No tools required for fitting; a permanent magnet clamps it to the body of the machine.

Application: Oil belt skimmers are used to **skim off unwanted oils** and chip grit from cooling lubricants.
This **eliminates bacterial build-up** effectively, increases the **life time** of the coolant
significantly and reduces the resulting **smells and vapours.**

Application example

Maintenance system for cooling lubricants

Advantage:
- Simultaneously removes tramp oils and solids.
- Works independently using the bypass principle, without the need for staff.
- Stops the formation of odours and the risk of infection.
- Longer service life for lubricants and tools.
- Lower disposal costs.

Flow drilling

Description: The polygon contour of the carbide flow drill generates frictional heat which plasticises all types of metal materials. This allows closed apertures to be created in a variety of thicknesses of materials, without chips, in just a few seconds.

Advantage:
- Large savings of time and costs compared to conventional processes (such as drawn-on nuts).
- Generates no chips or swarf; supersedes rivet nuts, weld nuts and press nuts.
- Solid basis for threads with high pull-out forces.
- For all popular material thicknesses and thread sizes (threads to DIN 13).

Flow drilling sets

Supplied with:

08 2710/2715 –
- 1 Special chuck MT2 with cooling ring.
- 1 hook spanner and 1 open-ended spanner.
- 4 ER25 collets in sizes suitable for M4 – M12.
- 1 flow drill in the selected thread size.
- 1 Flowtap fluteless tap in the selected thread size.
- 1 bottle special parting agent for flow drilling, with brass brush (FDKS100; 100 g).
- 1 bottle special thread forming oil, with bristle brush (FTMZ100; 100 ml).
- 1 system case with brief user guide (comprehensive user manual available as PDF download).

Note: Other versions and sets for special applications (such as for thin sheet metal) available on request.
For suitable fluteless taps see items No. 139115 ff.

Flow drill for aluminium

Special flow drill with hard carbon coating for production of **core holes in aluminium** preliminary to thread forming. Coated aluminium profiles can be drilled without separating agent, without the risk of scratching or scorching the paint. The geometry and an extremely smooth surface coating prevent vibration and noise, and material pick-up.

Note: Other versions and sets for special applications (such as for thin sheet metal) available on request. Use fluteless taps without oil grooves.
See items No. 139115 ff for suitable fluteless taps.

Thread repair DIN 8140

High-strength HeliCoil®plus thread inserts for through bolts, of **stainless steel with high wear-resistance, low thread friction** in close tolerances, **high surface quality** as well as **corrosion** and **heat resistance.** The flexible construction allows an even distribution of load and tension forces and thus allows creation of very high quality **permanent** screw connections with **ideal force transfer** for all **working loads** (static, dynamic). Uncomplicated quick insertion, resulting in an internal thread that can be used from both ends.

Application: For economic **repair of damaged** or **worn threads** and as a design element for **thread reinforcement** in materials which have low shear strength (e.g. aluminium, aluminium-magnesium alloys).

Note:
- For suitable plug gauges for thread checking see No. 486000 onwards.
- Self-locking inserts, inserts with other dimensions and UNC/UNF thread inserts are available on request.

Thread repair sets

08 2800 – Complete repair set, for one each metric thread size in a plastic case.
08 2805 – HSS one-pass hand tap for through holes.
08 2807 – HSS machine taps, straight flutes, 4-turn lead chamfer for through holes or blind holes with deep-drilled tapping hole in tolerance class 6H.

Supplied with:

08 2800 –
- 1 HSS hand tap
- 1 insertion spindle.
- 1 plastic case L×W×H 180×165×45 mm (up to size M8) 245×225×50 mm (size M10 and above).
- 20 each (up to size M6) or 10 each (size M8 and above) stainless steel thread inserts for through bolts in each length (1×D / 1.5×D / 2×D).

08 2800 Size M2–M12 – 1 drill.
1 tang breaker.

Note: For TiCN coated HSS-E-PM machine taps see No. 133560 and No. 138210.

Thread repair set

Thread repair set composed of various repair sets for metric ISO threads.

Size M2,5-M6 – **320 pieces:**(20 each inserts 1×D; 1.5×D; 2×D – M2.5; M3; M4; M5; M6)

Size M5-M12 – **230 pieces:**
(20 each inserts 1×D; 1.5×D; 2×D - M5; M6)
(10 each inserts 1×D; 1.5×D; 2×D - M8; M10; M12)

Supplied with: Helicoil®plus thread inserts of various dimensions and lengths, 5 jobber drills, 5 HSS hand taps, 5 insertion spindles, 5 tang breakers, 1 plastic case (L×W×H) 420×340×120 mm.

Note: For TiCN coated HSS-E-PM machine taps see No. 133550 and No. 138200.

Thread inserts

08 2808 – Insertion tool for HeliCoil®plus thread inserts.

08 2810–2818 – Metric thread inserts of stainless steel wire, which resemble springs.
Free-running thread, turn for turn, the drive tag is broken off at the notch (design fracture point) after installation.
Optimised shape with innovative introduction zone that allows the insert to be attached and turned like a screw to insert it.

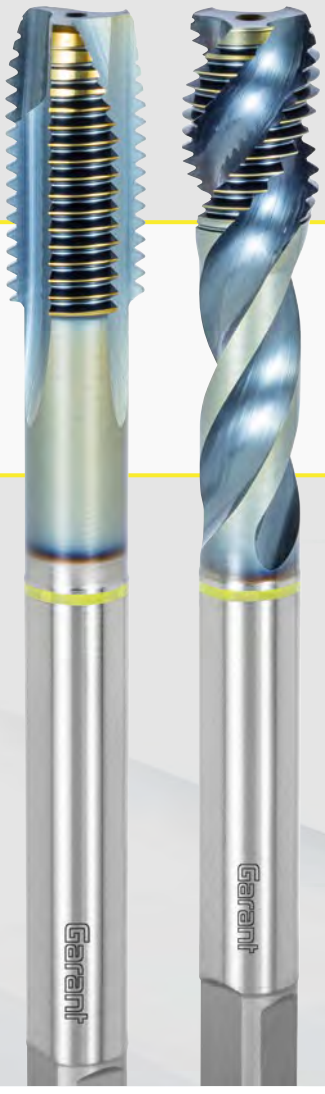
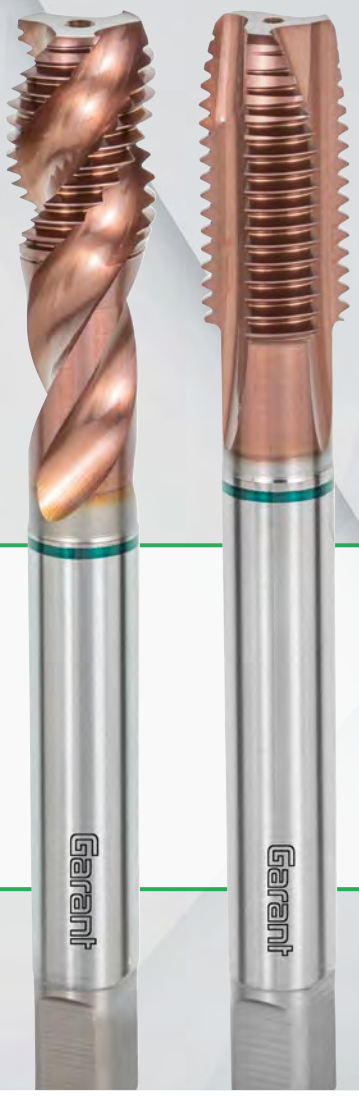
Garant MASTER TAP HIGH-PERFORMANCE TAPS FOR WIRE INSERTS.



Taps can be found in the Hoffmann Group Catalogue 1 Machining and clamping technology.

GARANT Master Tap Alu – the professional.

- Maximum dynamic response.
- Maximum process reliability.
- Maximum performance.



GARANT Master Tap – the all-round talent.

Master Tap taps combine very high process reliability with maximum universality.
Be it steel, stainless steel, aluminium or cast iron – the special geometry ensures optimum chip formation, thus increasing efficiency.

13 3555/8205 – 3560/8210
For production of EG mounting thread according to metric ISO thread DIN 8140 for STI wire thread inserts (Screw Thread Insert)

Marking tool

35 8725 – Body of tool steel with Weldon shank.

35 8740/8752 – Body of aluminium with Weldon shank. Stepless adjustment of the pre-load force. Character depth 0.1 - 0.3 mm.

Advantage:

35 8725 – Cleaning of the workpiece surface by compressed air channels with different approach angles max. 10 bar. Adjustment of the font width by adjusting the contact force, no different needle radii required! High wear resistance of the marking tip due to **rolling ball.** No burr formation.

35 8725/8740/8752 – Surface sealing without weakening or damaging the material. Inscription speed corresponds to the maximum feed rate. High wear resistance, with long working life for the special needles. Suitable for inscriptions on round surfaces. Can be used on the lathe. High process reliability. Needles easily withdrawn, therefore **quick needle change.** Irregularities up to 7 mm in the workpiece surface (depending on profile) can be compensated.

Application:

35 8725/8740/8752 – For marking on a wide variety of materials such as aluminium, titanium, steel, bronze, copper, brass, plastics etc. Smaller needle tips allow inscriptions on harder surfaces up to 57 HRC.

Supplied with:

35 8725 – Supplied with 1x marking tip No. 358729.

35 8740 – size 12 – including **3 needles** No. 358745 size 0.3 – 0.5 – 0.8.
Size 20 –including **3 needles** No. 358745 size 0.3 – 0.6 – 1.0.

Note:

35 8752 – Order marking needle No. 550468; 550469 **separately**.

Disc brushes

Disc brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**. Very long working life.

Advantage:
- Workpiece post-processing **directly after the machining process.**
- **Reproducible results** due to continuous exposure of the abrasive grit.
- **Process reliability** thanks to high stability and accuracy of the shape.
- Quick and secure **mounting** without further accessories.
- Very high **concentricity**.

Application: On **CNC machining centres** and when used by **robots,** preferably **wet grinding** with cooling lubricant. Machining of flat components: precise **deburring, edge rounding, finish machining** after milling, **surface finishing** e.g. of sealing and mating faces.

Note: Special versions available on request.

SiC

Wheel brushes

Round brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**.
Very long working life. Nylon bristles with very high **silicon carbide grit content** for general-purpose use.

Advantage:
- Workpiece post-processing **directly after the machining process.**
- **Reproducible results** due to continuous exposure of the abrasive grit.
- **Process reliability** thanks to high stability and accuracy of the shape.
- Quick and secure **mounting** without further accessories.
- Very high **concentricity.**

Application: On **CNC machining centres** and when used by robots, preferably **wet grinding** with cooling lubricant. **For grinding side faces and inner faces:** precise deburring (e.g. threads), edge rounding, delicate work after milling, surface finishing.

Note: Special versions available on request.

Brush Ø	Speed recommended (when wet grinding) (rpm)	Maximum speed (rpm)	Feed rate (mm/min)	Infeed (mm)

Cleaning ball - cleaning the machine space and the workpiece

Advantage:
- Attractively priced unit for flexible automation of the machine.
- Quick automatic cleaning for maximum machine utilisation.
- Machine ancillary times reduced to a minimum.
- Increase safety for the machine operator.
- 360° working range.
- For installation in any toolholder with through-coolant capability.

Garant Cleaning propeller - cleaning the machine space and the workpiece

- Robust design.
- Opening and closing the vane by the speed of the spindle.
- **Marked ends to the vanes**, for optimum visibility.
- For installation in any toolholder with through-coolant capability.

Size 160 – The machine must be started at 2000 rpm and slowly increased to 6000 rpm – 12000 rpm.

Size 260 – The machine must be started at 2000 rpm and slowly increased to 5000 rpm – 8000 rpm.

Advantage:
- Efficient cleaning of clamping equipment, workpieces and work tables.
- Removal of accumulated chips and blowing out pockets of water.
- Perfect complement to the automated work process.

Optional extras:

Size 160 – Spare cleaning propeller No. 358951 1K and 4K.
Size 260 – Spare cleaning propeller No. 358951 1 and 4.

Garant Bar holder

- New type of bar holder concept – permits both lateral and frontal gripping.
- It permits automatic use in machine operation and programmed cycles, with hydraulic actuation of the grippers by coolant pressure (3 – 50 bar).
- High-quality components: anodised aluminium base body, wearing components of hardened and ground steel or hard machined steel.
- Unique mechanism with double ball guidance and double piston principle for maximum wear resistance and capability to handle heavy workpieces (traction 26 kg, lifting 16 kg).

Advantage:
- No traces of scratches on the component (even when gripping finished parts).
- Lateral gripping – the gripper can be brought extremely close to the lathe chuck.
- Movement of heavy weights.
- Extremely flexible – various bolt-on adapters allow the gripper to be used on both VDI turrets and also BMT turrets. Jaws interface 1/16 inch × 90°, thus standard top jaws can be used. (BMT only with boring bar holder)
- The pressure and hence the gripping force are configurable to an extent (75 – 100 %).
- Exceptionally low-maintenance.

319711

Application: Drawing the bar into the machine, including for machines without a bar loader. Finished components can be automatically removed and handed over from the headstock to the tailstock. Clamping range (with jaws No. 319718) 8 – 65 mm.

Optional extras: Adapters No. 319713; 319714; 319716 and top jaws No. 319718.

Note: For programming instructions see the operating instructions.

HOLEX Bar holder

- Anodised housing of high-tensile aluminium with diamond dust-coated roller bodies.
- Steplessly adjustable from 1 – 70 mm.
- Suitable for round, hexagonal and square material.
- Integral adjustment aid with scales.
- General-purpose cylindrical bar holder.

Advantage: For quick adjustment to the material diameter.
Application: Suitable for disc turrets and radial turrets.
Supplied with: Bar gripper with roller bodies, interchangeable jaws and L-wrench for hexagon socket screws for changing the roller bodies and interchangeable jaws.

Note: Suitable VDI adaptor in the spare parts list, see No. 319707 size 20 / 30.

Garant Magnetic gripper

- Optimised and **safe working procedure.**
- **Collision protection** when approaching thanks to **compression spring safety compensation** of 10mm.
- By exchanging the inserts, individual workpiece geometries can be automatically separated, transported and stored.
- Machine running times without long interruptions.
- High efficiency due to optimised utilisation.
- Significantly less contamination by oil mist.
- Permits **unmanned operation**.
- Reduces the risk of injuries.
- Can be used in all commonly-used Weldon arbors.

Application: The tool can lift and release ferro-magnetic workpieces.
Activation of the magnet by coolant (IKZ) or compressed air.
Positive engagement of the machined workpiece by closure with the matching contour of the exchangeable plate, for transport to the desired destination within the machine room.

Supplied with: Supplied with exchangeable plate 358716 with height 20 mm.
Supplied with spring and clamping screw for the Weldon arbor.

Interchangeable insert for magnetic gripper

35 8716 – Exchangeable plates in polyamide PA6.
35 8717 – Exchangeable plate in aluminium.

Application: Introduction of the matching contour of the finished workpiece for close-fitting parting off (max. 50 rpm) and transport of the component.
Connection to the magnetic gripper by 4 screws.

Note: The exchangeable plates can also be made in-house.
As well as the introduction of workpiece geometries for machining, additive printing processes can also be used.

Garant Magnetic gripper – automation for your existing machine

- Lifting and rotating ferromagnetic workpieces.
- The magnet is activated by the headstock by means of coolant or compressed air.
- Can be used in all commonly-used Weldon arbors.
- Individual machining of the interchangeable inserts to suit your workpiece geometries.

Collet adaptor ... 945, 956
Collet chuck CP ... 944 - 945, 974, 990
Collet chuck ER ... 942 - 943, 945 - 946, 970, 972 - 973, 983, 988 - 989, 991, 1008, 1061, 1066, 1069, 1143, 1274
Collet chuck - heavy-duty chuck ... 946, 975, 992
Collet chuck OZ ... 946
Collet chuck set ER ... 943, 989, 1066
Collet mechanical ... 1223
Collet set ... 1014 - 1016, 1021
Combination drill / thread mill ... 339 - 340
Combination face mill adapter ... 947, 970, 976, 984, 993
Combination four-jaw chuck ... 1043
Compact clamp ... 1225 - 1226
Compact clamp (parts) ... 1224 - 1226
Component backstop ... 1041, 1060, 1153, 1185, 1243
Connection block for clamping system ... 1150, 1159
Constant speed face drivers ... 1099, 1101
Contact cooling ... 1123
Contact point ... 1139 - 1140, 1142
Contact point (edge) ... 1137
Contact point for 3D edge finder ... 1140
Contact point for centre finder ... 1138
Coolant hose ... 1268 - 1269
Coolant insert ... 1123
Coolant nozzle for clamping toolholder ... 1058, 1067, 1081
Coolant pipe for HSK arbors ... 163, 1025
Coolant pipe for VDI arbors ... 1059
Coolant pipe socket ... 1025
Coolant retrofit kit ... 1048
Cooling lubricant (cleaning accessories) ... 1272
Cooling lubricant (filling) ... 1271
Cooling unit ... 1122
Copying boring bar ... 834 - 838
Copy milling cutter ... 590 - 597, 600, 602, 604 - 607, 609 - 610, 612 - 614, 617, 678, 682 - 688
Core drill ... 74
Core drill (accessories) ... 73 - 74
Core drill arbor ... 73 - 74
Core drill for metal core drilling machine ... 73 - 74
Core drill set ... 70, 191 - 195, 199
Corner rounding cutter ... 413, 550, 562
Corrosion protection oil ... 1043, 1266 - 1267
Counterbore ... 214 - 216
Counterbore cutting insert ... 160, 217
Counterbore holder ... 217
Counterbore pilot pin ... 216, 218
Counterbore set ... 216, 218
Counterbore with pilot ... 214 - 215
Counterbore with pilot arbor ... 217
Counterbore with pilot set ... 216
Countersink ... 202 - 206, 208 - 214
Countersink (indexable insert) ... 221 - 223, 653, 655
Countersink case empty ... 203 - 204, 216
Countersink cutting insert ... 160, 217
Countersink holder ... 217
Countersink milling cutter ... 630, 651 - 655
Countersink pilot pin ... 218
Countersinks ... 202 - 206, 208 - 216, 220
Countersink set ... 202 - 206, 208 - 209, 216, 218
Cover plate for clamping system ... 1145 - 1146
Cover strip for T-slot ... 1243
CP clamping nut ... 1023
CP clamping wrench ... 1024
CP collet chuck ... 944 - 945, 974, 990
Crank for high-pressure vice ... 1186, 1204, 1206
Curved turning tool ... 929 - 931
Cut-off milling cutter ... 665, 667 - 670, 707 - 708
Cutter holder for spindle nose ... 190, 192 - 193, 195, 198
Cutter holder for turning ... 832, 834 - 835
Cutter insert ... 190
Cutting edge cleaner ... 1129
Cutting head for grooving ... 862 - 863, 881 - 882, 891 - 897
Cutting head for thread turning ... 813
Cutting head for turning ... 811 - 814
Cutting head holder ... 811, 862 - 863, 891
Cutting plate - engraving ... 657

D

Data clip ... 1125
Data transmission unit ... 1141
D-bit ... 929
Deburrer ... 556 - 561
Deburring countersink ... 202, 220
Deburring countersink (manual) ... 212
Deburring countersink set ... 202
Deburring milling cutter ... 554 - 555, 562 - 563
Deep clamping jaw ... 1234
Deep hole drill ... 58 - 61, 65 - 66, 146 - 148
Demagnetiser ... 1258
Detector (level) ... 1271
Dial indicator ... 1136
Die ... 357 - 361
Die case ... 362 - 363
Dies ... 357 - 361
Die set ... 362
Die stock ... 368, 1060
Digital refractometer ... 1271
Disc brush ... 1278
Display (level) ... 1271
Display unit (digital) ... 195
Double cutter ... 189
Double wedge clamp ... 1218, 1224, 1233
Dovetail milling cutter ... 412, 553, 627, 630, 637, 641, 647, 649, 651 - 652, 654 - 655, 659, 664
Draw-in collet ... 1102
Drill 10×D ... 137
Drill 12×D ... 138 - 141
Drill 16×D ... 146 - 147
Drill 20×D ... 146 - 148
Drill 25×D ... 146 - 147
Drill 3×D ... 107
Drill 30×D ... 146 - 147
Drill 4×D ... 90, 92, 97 - 99, 103, 105
Drill 40×D ... 148
Drill 5×D ... 82, 108, 128
Drill 50×D ... 148
Drill 6×D ... 109, 111 - 112, 114, 120 - 122, 125, 127
Drill 8×D ... 130 - 131, 133 - 134
Drill adaptor ... 1109
Drill bush drill ... 59, 65
Drill - case empty ... 41, 56, 71
Drill - centre drill ... 30 - 33, 72, 78
Drill chuck ... 1115, 1117
Drill chuck (micro) ... 969
Drill chuck (parts) ... 1119 - 1121
Drill chuck (rim gear) ... 1115, 1117
Drill chuck (short) ... 957, 970, 981, 1001, 1010
Drill chuck adapter ... 1118
Drill chuck insert shank ... 1118 - 1119
Drill chuck jaws ... 1115

Drill chuck key ... 1118
Drill chuck keyless ... 1113 - 1117
Drill chuck micro drill adapter ... 1118
Drill chuck removal fork ... 1116
Drill chuck self-tightening ... 1113 - 1117
Drill - core drill for metal core drilling machine ... 73 - 74
Drill - cutter insert ... 161, 164, 169
Drill drift ... 1120
Drill drift (MT) ... 1120
Drill head for indexable drill ... 185
Drill head indexable insert ... 158, 172, 175, 177 - 179, 183, 187 - 189
Drill - hole cutter ... 72
Drill - indexable drill ... 171, 173 - 174, 176, 180, 182, 184 - 186
Drilling (without chips) ... 1273 - 1274
Drilling machine vice ... 1211 - 1212
Drilling out tool (tap) ... 369
Drill - interchangeable head ... 159 - 160, 163, 167 - 168
Drill - paste ... 70
Drill set ... 36, 41 - 43, 45, 54 - 56, 70 - 71
Drill - spotting drill ... 34 - 35, 78 - 79, 81, 158
Drill - subland drill ... 66 - 69, 71, 153 - 155
Drill - taper sheet and tube drill ... 70
Drill - twist drill ... 37 - 44, 46 - 47, 49 - 53, 57 - 66, 81 - 82, 84 - 99, 102 - 103, 105, 107 - 114, 116 - 118, 120 - 125, 127 - 143, 146 - 150, 152
Drill values calculator ... 1265
Driven tool ... 1068 - 1070, 1072 - 1074
Drive plate for face driver ... 1099 - 1100
Drive ring ... 1025
Drive slot arbor ... 1099, 1101
Drum mixer ... 1271
Duo high pressure clamp ... 1190

E

Eccentric fixing clamp ... 1217
eco grooving toolholder ... 870 - 872
eco retrofit kit ... 1048
Edge cleaner ... 1129
Edge finder ... 1137, 1139
Edge finder (3D) ... 1139 - 1140, 1142
Edge finder (parts) ... 1137 - 1138, 1140
Edge finder spring ... 1137
Ejector pin ... 73 - 74

ER collet chuck ... 942 - 943, 945 - 946, 970, 972 - 973, 983, 988 - 989, 991, 1008, 1061, 1066, 1069, 1143, 1274
ER collet chuck set ... 943, 989, 1066
ER collet set ... 1014 - 1015
ET collet ... 1018
Exchangeable head drill ... 159 - 160, 163, 167 - 168
Extension arm for compact clamp ... 1226
Extension base for centring vice ... 1154, 1169 - 1170
Extension base for clamping system ... 1146, 1157
Extension base for high-pressure vice ... 1195
Extension for ABS ... 201
Extension for high-pressure vice ... 1186
Extension for HSK ... 1078
Extension for hydraulic chuck ... 959
Extension for indexable face mill ... 947
Extension for machine tap ... 1111 - 1112
Extension for PSC ... 1080
Extension for shrink-fit chuck ... 967
External clamping toolholder ... 726 - 729, 735 - 737, 741 - 743, 746, 749 - 750, 753 - 754, 759, 763 - 766, 774 - 776, 786 - 787, 789, 792 - 793, 796 - 798, 807, 852, 855
External contact point spring ... 1137
External probe ... 1137, 1139 - 1140, 1142

F

Face driver ... 1099, 1101
Face driver (parts) ... 1099 - 1100
Face mill ... 391 - 392, 570
Face milling cutter 593 - 597, 600, 602, 604 - 607, 609 - 610, 612 - 614, 616 - 619, 621 - 623, 625, 627, 682 - 688, 690 - 693
Face torus milling head ... 675
Ferrite disc ... 1123
Ferrite plate for shrink-fit unit ... 1123
Five-axis vice ... 1174, 1182 - 1183
Five-axis vice (accessories) ... 1154, 1157, 1168, 1174 - 1175, 1179 - 1181, 1184, 1200 - 1201
Flanged nut for lathe chuck ... 1034
Flange for lathe chuck ... 1045
Flat clamps ... 1234
Flow drilling ... 1273 - 1274
Flow drilling for aluminium ... 1273
Fluteless tap ... 332 - 338
Force testing machine ... 1135
Formulary ... 1265
Forwards and reverse milling head ... 678
Forwards counterboring mill ... 221 - 222, 653, 655
Four-jaw lathe chuck ... 1043
Front jaw ... 1178, 1184, 1203, 1206, 1208

G

Gauge ... 962, 996, 1062
Gear rim chuck key ... 1118
Gear scroll chuck ... 1028 - 1029, 1031 - 1032
Grease gun (accessories) ... 994
Grinding brush (tool) ... 1279
Grinding vice ... 1210
Gripper jaw ... 1156, 1159, 1176 - 1177, 1182, 1194, 1200
Gripper jaw insert for jaw ... 1177, 1198, 1209
Gripper jaw insert set for jaw ... 1195
Gripp insert for clamping rail ... 1154, 1198
Groove slotting ... 915, 917
Groove slotting accessories ... 916, 918
Grooving bar ... 931
Grooving - cutter insert ... 833
Grooving - cutting head ... 862 - 863, 881 - 882, 891 - 897
Grooving insert ... 833, 861, 866, 875 - 877, 882 - 884, 900
Grooving - insert bar ... 860 - 861, 866 - 869, 880, 898 - 899
Grooving tool ... 860 - 861, 866 - 869, 880, 898 - 899, 929, 931
Grooving toolholder ... 865 - 874, 878, 880 - 881, 884, 886 - 889, 894, 896 - 897, 899, 901

H

Hand crank for high-pressure clamp ... 1186
Hand deburrer ... 212
Hand reamer ... 226 - 229
Hand taper pin reamer ... 228 - 229
Hard milling ... 462 - 463, 535 - 537, 541 - 542
HD chuck ... 958, 960 - 961, 964, 978 - 980, 998 - 1001, 1009, 1065
Heavy-duty chuck ... 946, 975, 992
Heavy-duty chuck collet ... 1020
Height cylinder ... 1222
Hexagon die ... 358, 360
High-performance drill ... 88 - 89
High precision milling cutter ... 492
High-pressure clamp ... 1191
High-pressure machine vice ... 1186 - 1190, 1192, 1196 - 1198, 1204 - 1206
High pressure nozzle ... 1268

High-pressure vice angled gear drive ... 1186 - 1188
High-pressure vice clamping claw ... 1189, 1204
High-pressure vice crank ... 1186, 1204, 1206
High-speed spindle ... 1066, 1143
HiPer-Drill base body ... 159 - 160
HiPer-Drill interchangeable head ... 160 - 161
HiRunER precision ER collet chuck ... 942, 973, 988
Holder for carbide inserts ... 889
Holder for quick-change boring bars ... 820
Hole deburrer set ... 203 - 206, 208 - 209
Hole saw arbor ... 73 - 74
Hole saw centre drill ... 72
Hole saw ejector pin ... 73 - 74
Hook toggle clamp ... 1249, 1251
Horizontal toggle clamp ... 1245, 1247 - 1248
Hose system ... 1268 - 1269
Hot air gun ... 1269
HP clamping nut ... 1023
HPC milling cutter ... 403, 408, 436 - 437, 452, 454 - 455, 465 - 467, 469 - 470, 473 - 474, 490 - 491, 493, 498 - 501, 510, 519, 521, 523 - 524, 526, 528, 547 - 548, 626
HP collet ... 1016
HP collet set ... 1016
HSK coolant pipe ... 163, 1025
HSK taper cleaner ... 1120
HSK-T arbor ... 1077 - 1078
HSK-T blank ... 1078
HSS drills ... 37 - 44, 46 - 47, 49 - 53, 57 - 66
HSS milling cutter ... 395, 397 - 398, 400 - 402, 404 - 411
HSS tool bit ... 928 - 929
HSS turning tool ... 929 - 931
HW extension ... 196
HW mounting ... 196
HW reducer ... 196
Hydraulic chuck ... 958, 960 - 961, 964, 978 - 980, 998 - 1001, 1009, 1065
Hydraulic chuck extension ... 959
Hydraulic chuck intermediate socket ... 959, 1062

I

Imperial die ... 360
Imperial fluteless tap ... 337 - 338
Imperial machine tap ... 261 - 262, 291 - 294, 320 - 325
Imperial tap and die set ... 363
Indexable drill ... 171, 173 - 174, 176, 180, 182, 184 - 185
Indexable drill - base body ... 186
Indexable drill - centring tip ... 186
Indexable end mill ... 395, 397 - 411, 428 - 430, 432 - 434, 436 - 503, 564 - 565, 567 - 568, 570, 572, 673
Indexable face mill ... 588, 593 - 594, 596 - 597, 600, 605, 607, 610, 612 - 614, 616 - 619, 621 - 623, 625 - 629, 631 - 635, 638, 642, 645, 647, 649, 681, 683, 685, 687 - 688, 690 - 699, 701 - 703, 705 - 707
Indexable index countersink ... 221 - 223, 653, 655
Indexable insert angle/chamfer mill ... 627, 630, 637, 641, 647, 649, 651 - 652, 654 - 655
Indexable insert - circular milling ... 658 - 664
Indexable insert copy mill ... 590 - 597, 600, 602, 604 - 607, 609 - 610, 612 - 614, 617, 682 - 688
Indexable insert drill base body ... 186
Indexable insert drill head ... 951, 977, 996
Indexable insert - drilling ... 172, 175, 177 - 179, 183, 187 - 189
Indexable insert end mill ... 588, 626 - 629, 631 - 638, 641 - 642, 644 - 645, 647, 649 - 650, 681, 694 - 699, 701 - 703, 705 - 707
Indexable insert - engraving ... 657
Indexable insert face mill ... 616, 618 - 619, 621 - 623, 625, 627, 690 - 693
Indexable insert - grooving ... 861, 864 - 866, 875 - 877, 879, 882 - 884, 886 - 888, 900, 902
Indexable insert holder for spindle nose ... 192 - 193, 195, 198
Indexable insert holder set ... 759, 766 - 767, 769, 778 - 779, 782
Indexable insert - milling ... 221, 223, 589, 591 - 592, 594, 598 - 599, 601, 603, 605, 608, 611, 614 - 618, 620 - 622, 624 - 626, 628, 630 - 634, 636, 639, 643, 646, 648, 650 - 653, 656, 666, 668, 671 - 672, 681, 683, 685 - 687, 689 - 697, 700 - 701, 704 - 706, 709
Indexable insert set ... 158, 849, 877, 883
Indexable insert side and face mill ... 665, 667 - 670
Indexable insert - spot drilling ... 158
Indexable insert - thread milling ... 352, 354, 356
Indexable insert - thread turning ... 844 - 849, 855
Indexable insert T-slot mill ... 666, 707 - 708
Indexable insert - turning ... 195, 730 - 734, 737 - 741, 743 - 748, 751 - 752, 755 - 758, 760 - 763, 769 - 773, 782 - 786, 788, 791, 795 - 796, 804 - 806, 815 - 819, 821 - 825, 827, 927
Indexable milling insert ... 221, 223, 589, 591 - 592, 594, 598 - 599, 601, 603, 605, 608, 611, 614 - 618, 620 - 622, 624 - 626, 628, 630 - 634, 636, 639, 643, 646, 648, 650 - 653, 656, 666, 668, 671 - 672, 681, 683, 685 - 687, 689 - 697, 700 - 701, 704 - 706, 709
Indexable milling insert for tapping ... 352, 354, 356
Insert - drilling ... 172, 175, 177 - 179, 183, 187 - 189
Insert for pre-setting device ... 1129
Insert - grooving ... 861, 866, 875 - 877, 882 - 884, 900
Insertion tool (thread repair) ... 1276
Insert - milling ... 221, 223, 589, 591 - 592, 594, 598 - 599, 601, 603, 605, 608, 611, 614 - 618, 620 - 622, 624 - 626, 628, 630 - 634, 636, 639, 643, 646, 648, 650 - 653, 656, 666, 668, 671 - 672, 681, 683, 685 - 687, 689 - 697, 700 - 701, 704 - 706, 709
Insert - spot facing ... 158
Insert - thread milling ... 352, 354, 356
Insert - thread turning ... 844 - 849, 855
Insert - turning ... 195, 730 - 734, 737 - 741, 743 - 748, 751 - 752, 755 - 758, 760 - 763, 769 - 773, 782 - 786, 788, 791, 795 - 796, 804 - 806, 815 - 819, 821 - 825, 827, 927
Inside jaw ... 1031 - 1032
Interchangeable handle for clamping head ... 1102
Interchangeable head angle/chamfer mill ... 678
Interchangeable head drill insert ... 161, 164, 169
Interchangeable head end mill ... 675 - 678
Interchangeable pliers for clamping head ... 1102
Intermediate sleeve short taper ... 950, 968, 1078, 1080
Internal cooling jobber drill ... 98, 120
Internal thread toolholder ... 833, 837 - 838
Internal toolholder ... 729 - 730, 737, 741, 747, 750, 755, 766 - 768, 776 - 781, 787, 789 - 790, 793 - 794, 798 - 804, 808 - 809, 820 - 825, 827, 830, 839, 853 - 855
Internal toolholder set ... 759, 766 - 767, 769, 778 - 779, 782
Internal turning tool ... 929 - 931
ISO indexable insert - drilling ... 172, 175, 177 - 179, 183, 187 - 189
ISO indexable insert - milling ... 221, 223, 589, 591 - 592, 594, 598 - 599, 601, 603, 605, 608, 611, 614 - 618, 620 - 622, 624 - 626, 628, 630 - 634, 636, 639, 643, 646, 648, 650 - 653, 656, 666, 668, 671 - 672, 681, 683, 685 - 687, 689 - 697, 700 - 701, 704 - 706, 709
ISO indexable insert - spot drilling ... 158
ISO indexable insert - thread turning ... 844 - 849, 855
ISO indexable insert - turning ... 195, 730 - 734, 737 - 741, 743 - 748, 751 - 752, 755 - 758, 760 - 763, 769 - 773, 782 - 786, 788, 791, 795 - 796, 804 - 806, 815 - 819, 821 - 825, 827, 927
ISO precision turning ... 822 - 824
ISO tolerances display unit ... 1265
ISO turning 0° ... 727 - 730, 736 - 737, 741 - 743, 746 - 747, 749 - 750, 754 - 755, 763
ISO turning 7° ... 765 - 769, 775 - 782, 786 - 787, 789 - 790, 792 - 794, 797 - 798, 801 - 804

J

Jaw blank ... 1156, 1192
Jaw cutting attachment ... 1044 - 1045
Jaw for drill chuck ... 1115
Jaw for geared scroll chuck ... 1035 - 1037
Jaw for heavy-duty chuck ... 1037 - 1041
Jaw for lathe chuck ... 1030 - 1032, 1035 - 1041
Jaw for vice ... 1156, 1159, 1165 - 1167, 1171, 1175 - 1177, 1179 - 1180, 1182 - 1183, 1188 - 1189, 1192 - 1195, 1199 - 1203, 1205 - 1209
Jaw for vice (parts) ... 1177, 1180, 1195, 1198, 1203, 1209
Jaw for zero point clamping system ... 1152 - 1154
Jobber drill 37 - 44, 46 - 47, 49 - 53, 57 - 66, 81 - 82, 84 - 99, 102 - 103, 105, 107 - 114, 116 - 118, 120 - 125, 127 - 143, 146 - 150, 152
Jobber drill long and extra long ... 37 - 44, 46 - 47, 49 - 53, 57 - 66
Jobber drill set ... 36, 41 - 43, 45, 54 - 56
Joint plug ... 1078, 1080

K

Keyless drill chuck ... 1113 - 1117
Keyway nut ... 1209
Keyway push broach ... 919 - 920
Knuckle arm stand ... 1140
Knurling wheel ... 905 - 906, 908

L

Labelling ... 1277
Laminated chuck block ... 1257
Lathe centre ... 1087 - 1101
Lathe centre insert ... 1088
Lathe chuck ... 1028 - 1029, 1031 - 1032, 1034, 1043
Lathe chuck jaw ... 1030 - 1032, 1035 - 1041
Lathe chuck swarf protection ... 1029
Lathe chuck t-nut ... 1040
Lathe chuck workpiece stop ... 1041
Length setting gauge ... 1125, 1135

Length stop for lathe chuck 1045
Level detector 1271
Level display 1271
Lever clamp .... 1245 - 1251
Lifting magnet 1253
Load attachment device 1253
Lock pin ....1153, 1168, 1181, 1189, 1204, 1208, 1228 - 1229
Lubricating grease 994
Lubricating system (oil) 994, 1270
Lubrication aid (accessories) 994

M

Machine reamer .... 229 - 231, 234, 237 - 238, 240 - 241
Machine tap (blind hole) ....261 - 262, 291 - 294, 302, 306, 309, 313, 319 - 325, 327, 329 - 330
Machine tap (through hole) ....258 - 261, 265 - 290, 292, 295, 297 - 319
Machine taper pin reamer .... 228 - 229
Machine tap set .... 364 - 366
Machine vice (centring) .... 1155, 1158, 1163 - 1164, 1171 - 1172, 1191
Machine vice (high-pressure) .... 1186 - 1190, 1192, 1196 - 1198, 1204 - 1206
Machine vice (modular) .... 1208 - 1209
Machine vice (parts) ....1186 - 1188, 1195, 1204, 1206
Machine vice (precision) 1210
Machine vice jaw .... 1156, 1159, 1165 - 1167, 1171, 1175 - 1177, 1179 - 1180, 1182 - 1183, 1188 - 1189, 1192 - 1195, 1199 - 1203, 1205 - 1209
Machine vice swivel base 1204
Magnet 1253
Magnetic chuck 1256
Magnetic clamping block 1257
Magnetic clamping plate .... 1254 - 1256
Magnetic filter 1272
Magnetic stand 1253, 1283
Magnetic strip for clamping rail ....1153 - 1154
Maintenance system for cooling lubricants 1272
Mandrel 1218
Manual countersink 212
Manual reamer set 227
Manual tap set 364
Manual vice ....1211 - 1212
Master Steel drill 97
Master Tap machine tap. .276, 281 - 283, 287, 289, 292, 294, 308, 311 - 313, 317 - 318, 322, 324, 365 - 366
Measuring device 1258
Measuring stand 1140
Mechanical collet 1223
Metal band saw blade .... 373, 375 - 381
Metal filter 1272
Metal saw blade ....372 - 373
Metal slitting saw blade .... 382 - 390
Metric die ....357 - 359
Metric die set 362
Metric fluteless tap ....332 - 336
Metric machine tap set .... 364 - 366
Metric tap and die set .... 362 - 363
Micro drill 87
Micro drill adapter 1118
Micro drill chuck 969
Micro lubrication system 994, 1270
Micro mill 430, 531, 570
Micro-precision turning ....832 - 833
Milling chuck 940
Milling collet .... 680, 1013 - 1021, 1065
Milling cutter 665
Milling cutter - angle/chamfer mill .... 627, 630, 637, 641, 647, 649, 651 - 652, 654 - 655, 678
Milling cutter - ball nose slot drill ....413, 529, 531 - 538, 540 - 545, 547 - 549, 569, 576 - 577
Milling cutter - chamfer mill ....554 - 555, 562 - 563
Milling cutter - circular mill 658, 663
Milling cutter - combination drill/thread mill .... 339 - 340
Milling cutter - copy mill590 - 597, 600, 602, 604 - 607, 609 - 610, 612 - 614, 617, 678, 682 - 688
Milling cutter - corner rounding mill 413, 550, 562
Milling cutter - deburrer .... 554 - 563
Milling cutter - dovetail mill 412, 553
Milling cutter - end mill ... 395, 397 - 411, 428 - 430, 432 - 434, 436 - 503, 564 - 565, 567 - 568, 570, 572, 636, 673
Milling cutter - end torus mill ....504, 506 - 508, 510, 512 - 528, 568 - 569, 573, 575 - 576, 674
Milling cutter - engraving burr ....554 - 555
Milling cutter - face mill ....595 - 597, 602, 612 - 614, 616 - 619, 621 - 623, 625, 627, 684 - 688, 690 - 693
Milling cutter - forwards counterbore .... 221 - 222, 653, 655
Milling cutter - plunge mill ....590 - 592
Milling cutter - reverse counterbore 223
Milling cutter - router 565
Milling cutter - shell end mill .... 391 - 392, 570
Milling cutter - side and parting-off mill .... 394, 665, 667 - 670, 707 - 708
Milling cutter - slot drill ....395 - 397
Milling cutter - thread mill ....341 - 353
Milling cutter - torus mill ... 504, 506 - 508, 510, 512 - 515, 519 - 528, 568 - 569, 573, 575 - 576, 674 - 675
Milling cutter - T-slot / slot mill ....411 - 412, 551 - 553, 666, 707 - 708
Milling cutter - Vee groove mill 412, 553
Milling head - copy milling 678
Milling head - end milling ....675 - 678
Milling head - torus milling 675
Milling insert - circular milling .... 658 - 664
Milling spigot .... 947 - 949, 970, 976 - 977, 984, 993 - 995, 1009, 1069
Mini countersink 214
Mini flat clamp 1234
Mini indexable insert - turning ....830 - 831, 839 - 840, 890
Mini milling cutter 399, 447
Modular counterboring system arbor 217
Modular parting-off toolholder 893
Modular vice .... 1208 - 1209
Modular vice clamp 1208
Modular vice modular element 1209
Morse taper hand reamer 229
Morse taper jobber drill .... 37 - 44, 46 - 47, 49 - 53, 57 - 66
Morse taper sleeve 1048, 1119
Mould-making collet chuck 942, 991
Mounting for saw blades 389, 1121
Mounting shank for drill chuck ....1118 - 1119
Movable jaw 1208
MTC drill .... 171, 173 - 174, 176, 180, 182, 184 - 185
MTC milling cutter 410, 440, 442, 453, 477, 499, 502 - 503, 542, 637 - 638, 644 - 645, 649 - 650
Multi-chamfer step drill .... 32, 67 - 69, 155
Multi-function oil ....1043, 1266 - 1267
Multi-point clamping rail ....1152 - 1153
Multi-step drill 71

N

NC high pressure vice .... 1186 - 1190, 1192, 1196 - 1198
NC spotting drill ....34 - 35, 78 - 79, 81, 158
Needle marker 1277
Needle marker (parts) 1277
Neodymium magnetic clamping block 1257
Nitrate test strips 1271
Nozzle 1268
NPT tap ....329 - 330
Nut for stud .... 1239 - 1240
Nylon round brush 1279

O

One-way milling cutter 399
Open jaw plug-in head 1179
Oxygenation pump for cooling lubricant 1272
OZ collet 1021
OZ collet chuck 946
OZ collet set 1021

P

Pair of parallels individual 1166, 1215
Pair of parallels set ....1213 - 1214
Parallel reamer .... 226 - 227, 230 - 232, 234 - 238, 240 - 241, 244 - 246
Parallel reamer set .... 226 - 227, 232
Parallels 1166, 1215
Parallels set ....1213 - 1214
Parallel stop 1243
Partial profile set 883
Parting-off insert .... 861, 866, 875 - 877, 882, 900
Parting-off tool ....860 - 861, 866 - 869, 880, 898 - 899
Parting-off toolholder 865 - 873, 878, 880 - 881, 884, 886 - 888, 893 - 894, 896 - 897, 899, 901, 1048
Paste (drilling) 70
PCD milling inserts 626

Permanent magnet clamping block ... 1257
Permanent magnet clamping plate ... 1254 - 1256
pH test strips ... 1271
Pilot for counterbore ... 216, 218
Pin jaw ... 1207
Pitbull clamp ... 1219
Pivot jaw ... 1203
Plain clamp (parts) ... 1228, 1231
Plain washer ... 1239
Plug-in adapter reducer ... 950, 968, 1078, 1080
Plug-in head (torque wrench) ... 1179
Plug-in shank for drill chuck ... 1118 - 1119
Plunge milling cutter ... 590, 592
Pointed turning tool ... 929 - 931
Pole extension ... 1254
Polygon milling insert ... 658 - 662
Portable refractometer ... 1271
Power clamp ... 1224
Power saw blade ... 372 - 373, 382 - 390
PPC milling cutter ... 548 - 549
Precision boring head ... 190 - 195, 197 - 199
Precision boring head adapter ... 190, 192
Precision boring head bridge ... 191, 193, 198 - 199
Precision boring head indexable insert toolholder ... 192 - 193, 195, 198
Precision boring head precision cartridge ... 197
Precision boring head reducing adapter ... 190, 196
Precision boring set ... 191 - 195, 199
Precision cartridge for spindle nose ... 197
Precision clamp ... 1174, 1182 - 1183, 1210
Precision copy turning ... 832, 834 - 838
Precision dial comparator ... 1136
Precision thread turning ... 833, 837 - 838
Precision turning ... 830 - 840, 890
Pre–setting device ... 1126, 1128, 1130
Pressure clamp ... 1245, 1249 - 1251
Pressure meter ... 1066
Pressure piece for compact clamp ... 1224 - 1226
Prismatic jaw ... 1188, 1192, 1205 - 1209
Profile router bit ... 658, 663
Profile slotting ... 923 - 925
Pro Steel drill ... 125
Protective screen (face) ... 1134
PSC adapter (VDI) ... 1064
PSC holder ... 1080
Pull-down jaw ... 1200, 1207
Pull–down roller jaws ... 1207
Pull stud ... 1011 - 1012
Pull-stud wrench ... 1010
Push broach (parts) ... 919
Push-out collet chuck ... 1102
Push–pull toggle clamp ... 1245, 1249 - 1251

Q

Quick-change coupling for clamping system ... 1150
Quick-change drill-tap chuck ... 1108
Quick-change tapping head ... 1108
Quick-change tapping head (thread) ... 1106 - 1107, 1110, 1112 - 1113
Quick-change tapping head insert ... 1108 - 1110
Quick-change tapping head intermediate piece ... 1111
Quick-change toolholder ... 1046 - 1048
Quick-change toolholder clamping sleeve ... 1046, 1064
Quick-change toolholder MT sleeve ... 1048
Quick-change toolholder Vee block insert ... 1047
Quick-release vice ... 1211

R

Radii indexable insert ... 927
Radiused turning tool insert ... 927
Radius milling insert ... 659 - 660
Radius turning tool ... 927
Rc machine tap ... 330
Ready reckoner ... 1265
Reamer ... 226 - 232, 234 - 238, 240 - 241, 244 - 246
Reamer cutting insert ... 247
Reamer set ... 226 - 227, 232
Reamer spare blade ... 227
Reamer spare nut ... 227
Reaming head ... 247
Recess boring bar ... 929 - 931
Reducer for ABS ... 200
Reducer for pre-setting device ... 1129
Reducer for SK ... 950
Reducer ring for circular saw blade ... 387
Reducers for quick-change tapping heads ... 1107
Reducing adapter for spindle nose ... 190, 196
Reducing adapter for VDI arbors ... 1063
Reducing sleeve (slotted) ... 959, 1062
Reducing sleeve for Morse taper ... 950, 975, 990, 1119
Refractometer ... 1271
Repair kit (thread) ... 1275 - 1276
Reverse counterbore ... 223
Riser blocks for compact clamps ... 1225 - 1226
Roller bearing wrench ... 1024
Roller burnishing tool ... 909 - 913
Roughing end mill ... 392, 403, 406, 408, 410, 462 - 463, 470, 473 - 474
Round brush ... 1279
Round tool bit ... 928
Router (solid carbide milling cutter) ... 565

S

Safety clamping wrench ... 1045
Saw blade ... 373, 375 - 381
Saw blade arbor ... 389, 1121
Saw blade reducer ring ... 387
Saw blade - side mill ... 665
Screw alignment stand ... 1232
Screw clamp for welding table ... 1252
Screw for compact clamp ... 1226
Screw for geared scroll chuck ... 1040
Screw for lathe chuck ... 1040
Screw head counterbore ... 202 - 206, 208 - 216
Screw-in adapter for collets ... 956
Screw-in adapter for shrink-fit arbor ... 956
Screw jack ... 1231 - 1232
Screw jack and pads ... 1233
Scroll jaws ... 1030 - 1032, 1036
Sealed collet ... 1013, 1015 - 1016
Sealing washer for chuck ... 1021, 1024
Segment jaw ... 1038 - 1039
Self-aligning pads ... 1221
Self-centring chuck ... 1034
Self-centring knurling tool ... 903 - 908
Semi-roughing end mill ... 392
Separating agent (thread tapping) ... 1273
Set of die stocks ... 369
Set of tap holders ... 369
Setting device (parts) ... 1125, 1129, 1135
Sheet metal drill ... 41
Shell end mills ... 391 - 392, 570, 634, 636, 638, 642, 645, 649 - 650, 705 - 707
Shim for toolholder ... 851, 1048
Short taper flange ... 1045
Shrink-fit arbor - screw-in adapter ... 956
Shrink fit chuck extension ... 967
Shrink-fit chucks ... 942, 962 - 966, 981 - 982, 984, 1002 - 1006, 1010
Shrink-fit unit ... 1122, 1124
Shrink-fit unit (parts) ... 1122 - 1123
Side lock arbor 939 - 941, 969, 971, 983, 986 - 988, 1006 - 1007, 1069 - 1070, 1078, 1080, 1280
Side milling cutter ... 394, 665, 667 - 670, 707 - 708
Side milling insert ... 614 - 615, 634, 636, 665, 668, 683, 685 - 687, 694, 709
Sine table magnetic ... 1256
Sintered plate for shrink-fit unit ... 1123
SK face mill arbor ... 947 - 949, 976 - 977, 984, 993 - 995, 1009, 1069
Skimmer (belt) ... 1272
SK keyless drill chuck ... 957, 970, 981, 1001, 1010
Slot cutter ... 412, 666, 707 - 708
Slot drill ... 395 - 397, 649
Slot milling plate ... 658 - 663, 665
Smooth rolling rollers ... 909 - 910
Smooth rolling tool ... 909 - 913
Socket for coolant pipe ... 1025
Solid carbide drill ... 78 - 79, 81 - 82, 84 - 99, 102 - 103, 105, 107 - 114, 116 - 118, 120 - 125, 127 - 143, 146 - 150, 152, 369
Solid carbide milling cutter ... 433, 436, 438 - 442, 444 - 446, 449 - 451, 454 - 455, 458 - 461,

466, 469, 473 - 474, 477, 480, 486, 488 - 492, 494, 496, 498 - 499, 502 - 503, 510, 513, 519, 521, 523 - 524, 526, 528, 531, 534 - 537, 541 - 544, 547 - 550, 562, 564 - 565, 572 - 573, 575 - 576
Solid carbide side milling cutter 394
Spade drill tips ..... 159 - 160, 163 - 164, 167 - 168
Spare contact point for 3D edge finder 1140
Spare spring 1280
Spare stud for lathe chuck 1034
Special drill CRP/GRP 108
Speed of rotation measurement unit 1129
Speeds and feeds calculator 1265
Spherical seat washer 1239
Spigot ..... 947 - 949, 970, 976 - 977, 984, 993 - 995, 1009, 1069
Spigot (parts) 1025
Spindle clamping 1130
Spindle nose ..... 190 - 195, 197 - 199
Spindle nose adapter 190, 192
Spindle nose bridge ..... 191, 193, 198 - 199
Spindle nose indexable insert bracket ..... 192 - 193, 195, 198
Spindle nose precision cartridge 197
Spindle nose reducing adapter 190, 196
Spindle nose set ..... 191 - 195, 199
Splitting nut 1240
Spotting drill ..... 34 - 35, 78 - 79, 81, 158
Square tool bit 928
Square top jaw ..... 1208 - 1209
Stainless steel milling cutter ..... 466 - 467, 502, 524
Steel conduits tap 298
Steel toolholder ..... 1046 - 1048
Stepped drill ..... 66 - 69, 71, 153 - 155
Stepped drill set 71
Stepped jaws ..... 1037 - 1038, 1040, 1189, 1193, 1199, 1201 - 1202, 1206
Stepped strip for jaw 1203
Stop for T-slots 1244
Stop for turning chuck 1045
Stop for vice 1153, 1185
Straight turning tool 930
Stub drill 42, 63
Stub drill set ..... 41 - 42
Stub stepped drill ..... 66 - 69, 154 - 155
Subland drill ..... 215 - 216
Subland drill arbor 217
Subland drill set 216, 218
Support (cabinet) 1123, 1129
Support screw 1228
Swivel base 0° ..... 730 - 734, 737 - 741, 743 - 745, 747 - 748, 751 - 752, 755 - 758, 761 - 763
Swivel base 11° 823
Swivel base 15° 822, 824
Swivel base 5° 795
Swivel base 7° ..... 195, 769 - 773, 782 - 786, 788, 791, 795, 805 - 806, 816, 818 - 819, 823, 825
Swivel base for vice 1204

T

Tailstock centre ..... 1087 - 1098, 1100
Tap (blind hole) ..... 261 - 262, 291 - 294, 320 - 325
Tap (manual) ..... 258 - 262, 265 - 294, 300 - 325
Tap (through hole) ..... 258 - 261, 265 - 290, 298, 300 - 319
Tap and die set ..... 362 - 363
Tap bit 264
Tap cartridge 366
Tap driver (blind hole) ..... 261 - 262, 291 - 294, 320 - 325
Tap driver (manual) ..... 258 - 259, 261 - 263, 364
Tap driver (through hole) 269
Taper arbor 200
Taper clamping sleeve 1121
Taper countersink set ..... 203 - 206, 208 - 209
Taper drill 61
Tapered sheet and tube drill 70
Taper extractor 1120
Taper reamer ..... 228 - 229
Taper shank for drill chuck ..... 1118 - 1119
Taper sheet and tube drill 70
Taper sheet and tube drill set 70
Taper sleeve 1119, 1121
Taper wiper 1120
Tap extension ..... 369, 1111 - 1112
Tapping (accessories) 1273
Tapping chuck ..... 1106 - 1107, 1109 - 1110, 1112 - 1113
Tapping chuck (parts) 1109
Tapping collet 1105
Tapping head ..... 1105 - 1106
Tapping head collet 1105
Tapping head insert ..... 1108 - 1110
Tapping head intermediate piece 1111
Tapping head quick–change set ..... 1107 - 1108
Tapping hole subland drill ..... 32, 66 - 67, 153 - 155
Tap set ..... 262 - 263, 364 - 366
Tap shank ..... 853 - 855
Tap wrench 368
T-bolt ..... 1236, 1238, 1241 - 1242
Tensioner (chain) 1226
Test mandrel 962, 996, 1062
Test strips 1271
Thread calculator 1265
Thread cutting set ..... 362 - 363
Thread drill 369
Threaded copy milling cutter ..... 588, 590, 592 - 593, 595 - 597, 600, 602, 604, 606 - 607, 609, 612 - 613, 617, 627, 629, 633, 635, 642, 645, 650 - 651, 658, 675 - 678, 681 - 682, 684, 686 - 688, 697 - 698, 702 - 703
Threaded insert ..... 1275 - 1276
Threaded ratchet 367
Thread forming ..... 1273 - 1274
Thread forming oil 1273
Threading toolholder 852, 855
Threading tool holder cutting head 813
Thread mill ..... 339 - 353, 355, 658, 663
Thread milling insert ..... 352, 354, 356, 661 - 662, 664
Thread reinforcement ..... 1275 - 1276
Thread repair ..... 299 - 300, 331, 1275 - 1276
Thread tapping ..... 1273 - 1276
Thread turning - cutter insert ..... 833, 837 - 838
Thread turning - insert ..... 831, 833, 837 - 838, 844 - 849, 855
Thread turning insert set 849
Thread turning - shim 851
Three-jaw self-centring scroll chuck 1034
Through hole stepped drill ..... 67 - 69, 155
Tightening screw 1025
T-nut ..... 1150, 1209, 1226, 1235, 1237 - 1238
T-nut for heavy-duty chuck 1040
T-nut for scroll chuck 1040
Tool arbor adapter for clamping system ..... 1169 - 1170, 1216
Tool arbor - BMT ..... 1055, 1075 - 1076
Tool arbor - collet chuck ..... 942 - 946, 970, 972 - 975, 983, 988 - 992, 1008, 1061, 1066, 1069, 1143, 1274
Tool arbor - data clip 1125
Tool arbor - HSK and PSC ..... 810, 1081 - 1086
Tool arbor - hydraulic chuck ..... 958, 960 - 961, 964, 978 - 980, 998 - 1001, 1009, 1065
Tool arbor - indexable insert drill arbor 951, 977, 996
Tool arbor - micro drill chuck 969
Tool arbor - reducing adapter 950, 975, 990
Tool arbor - short drill chuck 957, 970, 981, 1001, 1010
Tool arbor - shrink-fit chuck ..... 942, 962 - 966, 981 - 982, 984, 1002 - 1006, 1010
Tool arbor - side lock arbor 939 - 941, 969, 971, 983, 986 - 988, 1006 - 1007, 1069 - 1070, 1078, 1080, 1280
Tool arbor - threaded copy mill ..... 247, 679 - 680, 951 - 955, 978, 997 - 998, 1009
Tool arbor - VDI ..... 1052 - 1057, 1060 - 1062, 1067, 1281 - 1282
Tool blank ..... 928 - 929
Tool fitting aid ..... 968, 1067, 1131 - 1134
Tool for long-bed lathes ..... 1068, 1070, 1072 - 1074
Tool holder (parts) 1061
Toolholder axial ..... 1077 - 1079, 1081
Toolholder blank 951, 973, 996, 1078
Toolholder diagonal 1077, 1079
Toolholder for turning tools 931
Toolholder radial ..... 1077 - 1079, 1081
Toolmaker's collet chuck 942, 991
Tool measuring 1126, 1128, 1130
Tool mounting for high-pressure clamp 1186
Tool mounting for parting-off tool ..... 866 - 869, 880, 894, 896 - 897, 899
Tool mounting for shrink-fitting unit 1123
Tool shrink-fitting unit 1122, 1124
TopCut arbor ..... 247, 679 - 680, 951 - 954, 978, 997 - 998, 1009
Top jaw ..... 1030, 1032, 1035 - 1039, 1156, 1159, 1165 - 1167, 1171, 1176 - 1177, 1179 - 1180, 1182 - 1183, 1208 - 1209
Torque screwdriver 1266
Torus cutter ..... 504, 506 - 508, 510, 512 - 515, 519 - 528, 568 - 569, 573, 575 - 576, 674 - 675

TPC milling cutter 443, 458, 465, 480, 482, 485, 512
Trapezoidal tap 263, 299
Trapezoidal tool bit 928
Triangular milling insert ..... 659 - 660, 662 - 664
T-slot brush 1244
T-slot cutter ..... 666, 707 - 708
T-slot stop 1244
T-tap wrench with ratchet 367
Turning jig ..... 1044 - 1045
Turning tool ..... 929 - 931
Turning tool - boring bar for grooving 874, 881, 884, 889, 899
Turning tool - boring bar for thread turning ..... 853 - 855
Turning tool - boring bar for turning ..... 729 - 730, 737, 741, 747, 750, 755, 766 - 768, 776 - 781, 787, 789 - 790, 793 - 794, 798 - 804, 808 - 809, 820 - 825, 827, 830, 839
Turning tool - boring bar set for turning ..... 759, 766 - 767, 769, 778 - 779, 782
Turning tool - cutter holder for precision turning ..... 832, 834 - 835
Turning tool - cutting head for grooving ..... 862 - 863, 881 - 882, 891 - 897
Turning tool - cutting head for thread turning 813
Turning tool - cutting head for turning ..... 811 - 814
Turning tool - cutting head holder ..... 811, 862 - 863, 891
Turning toolholder ..... 1046 - 1048
Turning tool - shim 851
Turning tool - toolholder for grooving ..... 865, 870 - 873, 878, 880 - 881, 884, 886 - 888, 901
Turning tool - toolholder for radial turning 927
Turning tool - toolholder for thread turning 852, 855
Turning tool - toolholder for turning ..... 726 - 729, 735 - 737, 741 - 743, 746, 749 - 750, 753 - 754, 759, 763 - 766, 774 - 776, 786 - 787, 789, 792 - 793, 796 - 798, 807, 1081 - 1086
Twist-out ring for clamping head 1102

U

U-clamp ..... 1227 - 1230
UNC die 361
UNC tap and die set 363
UNF tap and die set 363
Universal milling cutter 437, 542
Universal square holding arm ..... 1077 - 1079, 1081
UN tap ..... 262 - 263, 295 - 298, 325 - 328

V

Vacuum clamping technology 1259, 1261
Vacuum clamping technology (parts) ..... 1259 - 1260
Vacuum plate 1259, 1261
Vacuum pump 1261
Varia system insert 1069
VDI adapter ..... 1281 - 1282
VDI blanking plug 1061
VDI for PSC adapter 1064
VDI tool holder ..... 1052 - 1057, 1060 - 1062, 1067, 1281 - 1282
Vee block base 1047
Vee head for alignment wedge 1233
Vertical toggle clamp 1246
Vice 1102, 1104
Vice (centring) ..... 1155, 1158, 1163 - 1164, 1171 - 1172, 1191
Vice (hand) ..... 1211 - 1212
Vice (high-pressure) ..... 1186 - 1190, 1192, 1196 - 1198, 1204 - 1206
Vice (modular) ..... 1208 - 1209
Vice (parts) ..... 1041, 1166 - 1167, 1186 - 1188, 1195, 1204, 1206, 1212
Vice (precision) 1210
Vice clamping element 1208
Vice jaw (parts) 1177, 1180, 1195, 1198, 1203, 1209
Vice swivel base 1204

W

Washer 1239
WD-40 ..... 1043, 1266 - 1267
Welding table screw clamp 1252
Weldon element 1109
Weldon side lock arbor ..... 939 - 941, 969, 971, 986 - 987, 1007
Whistle Notch side lock arbor 941, 987, 1007
Wiper 1120
Wiper (taper) 1120
Wiper edge insert ..... 589, 620, 626, 628, 630, 639, 643, 646, 648, 650, 672, 701, 704 - 706
Wire thread insert ..... 1275 - 1276
Woodruff keyseating cutter ..... 411, 665, 667 - 670, 707 - 708
Workbench (support) 1123, 1129
Workpiece clamp ..... 1217 - 1224, 1233
Workpiece cover for jaw 1180
Workpiece identification 914, 1277
Workpiece labelling 914, 1277
Workpiece stop for lathe chuck 1041
Workshop gripper ..... 1281 - 1282
Wrench for pull studs 1010

Z

ZeroClamp clamping system ..... 1145 - 1146, 1149 - 1151
Zero point button ..... 1136 - 1137
Zero point clamping rail (parts) 1154, 1198
Zero point clamping system ..... 1145 - 1146, 1157, 1169 - 1170, 1216
Zero point clamping system (parts) ..... 1148 - 1151, 1153 - 1154, 1165, 1169
Zero-point clamping system jaw ..... 1152 - 1154
Zero setting device ..... 1136 - 1137

ISO system of standardised fits for shafts

(see DIN ISO 286-2)
Size limits in µm (= 0.001 mm).

In the standardised shaft system, all shafts are given h tolerances. The largest dimension of a shaft is taken as both the zero line and the nominal size. The smallest dimension is smaller than the nominal size by the amount of the tolerance.

Industrial Tooling and Equipment by Hoffmann Group

Information on deliveries

Electrical equipment (ElectroG)

Old equipment must be disposed of separately to household waste. Any (rechargeable) batteries and lamps (bulbs) that are not fixed in place must be removed and disposed of separately in an environmentally friendly manner. As a retailer, we are legally obligated to take back old equipment free of charge. It can be returned to us when it is not being used any more. It will then be disposed of properly or recycled in line with the legal regulations.

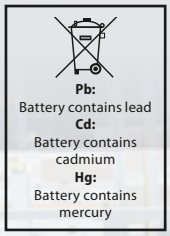
The icon with the bin crossed out indicates that the device must not be disposed of with household waste once it reaches the end of its service life, and instead must be disposed of at an approved collection or disposal point.

The end user themselves is responsible for deleting any personal data that may be on the old equipment intended for disposal.

We are registered with the German electronic waste recycling register "Stiftung **E**lektro-**A**ltgeräte **R**egister" (**EAR**) under registration number DE35368485.

Batteries and rechargeable batteries (BattG)

End users are legally obligated to return old (rechargeable) batteries. (Rechargeable) batteries can be returned to us free of charge after reaching the end of their service life. This ensures that you comply with your legal obligations and help to protect the environment. We will recycle the materials in an environmentally responsible manner. In order to prevent short circuits, mask off any exposed battery poles before returning the products.



The "Collect batteries separately" icon indicates that batteries must be disposed of at special recycling points rather than with general household waste. Batteries containing substances like mercury (Hg), cadmium (Cd) or lead (Pb) are also marked with a chemical identifier.

Like all other batteries, lithium batteries must never be disposed of with general rubbish.

German Packaging Act (VerpackG)

The German Packaging Act (VerpackG) obligates us to participate in a dual system for waste recycling and disposal, which is why we take part in the "Der Grüne Punkt" (The Green Dot) system. We are registered in the LUCID packaging register under number DE3394933750264.

According to the German Packaging Act (VerpackG), we are obligated to take back transport packaging free of charge pursuant to Art. 15 Paragraph 1 Sentence 1. This must be done at the location where it is actually handed over or in its immediate vicinity. If this cannot be done, you are able to send the packaging back to us.

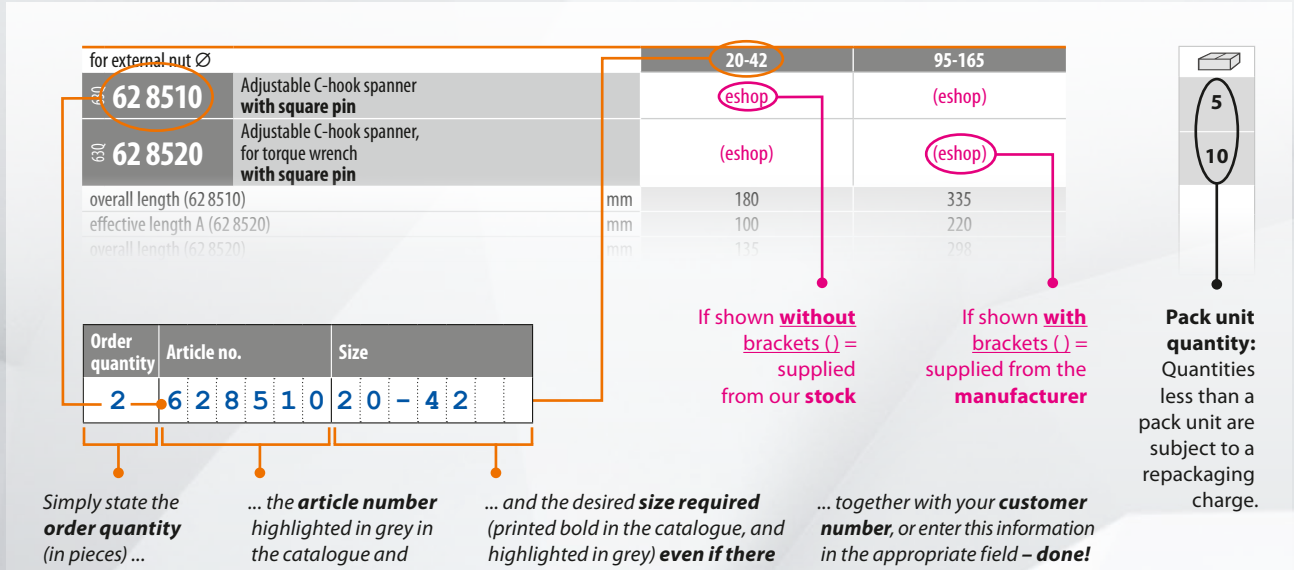
We restrict the volume of packaging to whatever is really necessary and we promote re-usable materials.

Information on express delivery

For some products, we are prevented by law from offering express delivery (by air freight) outside Germany. These products are therefore indicated by a special note in the catalogue. Certain products cannot currently be delivered to some countries.

IT'S SO SIMPLE:
CHOOSE YOUR ORDERING CHANNEL.
PLACE THE ORDER. DONE.

Place your order quickly and conveniently in the eShop, by e-mail, fax, or phone.
Find further information on page 2.



*Simply state the **order quantity** (in pieces) ...*

*... the **article number** highlighted in grey in the catalogue and printed in bold ...*

*... and the desired **size required** (printed bold in the catalogue, and highlighted in grey) **even if there is only one size listed ...***

*... together with your **customer number**, or enter this information in the appropriate field – **done!***

Attention:
All electronic devices are fitted with a German plug. Call for US availability.

Please note:

- We provide the very best delivery capability for our entire catalogue range (except items with prices in brackets). Delivery in Germany and Austria possible within 24 h (up to 31.5 kg).
- For items with prices in brackets ( ), the manufacturer's delivery conditions are applicable and the items are supplied from the manufacturer.
- The catalogue and its layout and item numbering system are protected by copyright.
- The alloy metal surcharge (LZ) is already included in the price.

Reprinting and reproduction of any kind – even as extracts – is permitted only with written permission from Hoffmann SE, 81241 Munich.
Further details about the changes to our prices and products and the full version of our general terms and conditions can be found at www.hoffmann-group.com/company/agb
The catalogue is fully recyclable!

OUR PROMISE: THE PERFECT TOOL FOR YOU. YOUR BENEFIT: STREAMLINED PROCESSES.

Measurement tools and hand tools for every application: We provide comprehensive support with personal advice, the right products and related services.

We focus on your applications. As your first port of call when it comes to industrial workplaces, we bring together over 100 years of experience as a tooling specialist to make life as easy as possible for you. That starts with personal advice so that you always find exactly the right solution for your project as well as the right product from our comprehensive range of hand tools and measurement tools. Our tools are also flexible and easy to handle – an example here is the ability to network our measurement tools.

We set the standard when it comes to making procurement simple. We create the right eBusiness solutions for you, meaning you can buy your quality tools with ground-breaking simplicity.

We offer personal, customized service online and in-person so you can stay focused on your projects.

OPTIMIZE YOUR PROCESSES. WITH OUR SOLUTIONS.

We support you every step of the way.

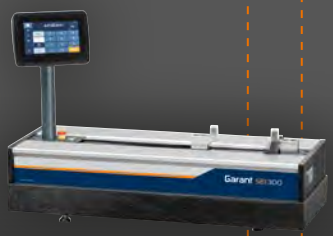
INSTALLATION

HCT

Hoffmann Group Connected Tools:
Bluetooth®-capable measuring tools and an innovative HCT app for quick documentation and data transmission.



GARANT Setting Bench:
85% time savings when setting measuring tools.

GARANT vibratoryfinishing machine GMT35:
Reduce your process and production times thanks to automatic reworking of your workpieces.

QUALITY ASSURANCE

Our eShop:
Save valuable time during ordering while enjoying maximum flexibility.

The availability of our products differs across regions. Simply contact us.

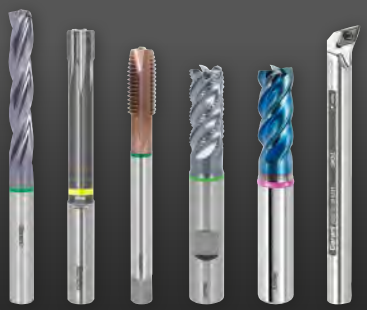
QUOTE DRAFTING

ORDER PLANNING

GARANT industrial vending solutions:
Ensure efficient C-parts management and goods or tool issuing.

WORK PLANNING

GARANT VG1 pre-setting device:
Guarantees efficient and precise measurement and pre-setting of machining tools.



GARANT Master range:
Our best drilling, thread-cutting, milling and turning tools. For high demands in different materials and applications.

PRODUCTION

SIMPLY AT A GLANCE: OUR RANGE. FOR YOU.

These are our products, solutions and services – simply everything to make you even more successful.

A top range of selected tools, best price-performance ratio

- **Approx. 120,000 state-of-the-art quality tools** carefully pre-selected for you.
- Product management available around the **world**.
- Catalogue available in **17 languages**, in printed form, online and as an app.

Personal, flexible and digital services

- eTool
- ToolScout
- Regrinding service
- Calibration service
- Workstations and storage planning and installation
- Textile customisation
- Wear test support and measurement
- Protection plans
- Connected Metrology

Maximum reliability

- **99% Availability of products** (excluding projects)
- **Perfect delivery accuracy.**
- **95%** of our customers class us as a preferred supplier.

Efficient eBusiness solutions

- eShop for **quick and secure ordering**.
- **Electronic catalogue** in 17 languages.
- simple system – **procurement market place** for C items with over 80 million items.
- Electronic data interchange for efficient business processes.
- GARANT Tool24 and HOLEX 24seven industrial vending solutions.

Hoffmann Group

Competent support team

- **Throughout** Europe.
- Consistent support from field sales, key account managers, application technicians, metrology technicians, technical advisers for workstations and storage, technical advisers for occupational safety, eBusiness experts, technical advisers in internal sales.
- A total of **more than 1,400** qualified and motivated technical advisers.

Garant Our system brand

- **The range:** More than 55,000 top certified tools of the highest quality for all application areas.
- **GARANT expertise:** Developed with users, suppliers and 12 of our own technology centres.
- **A success story:** At your side every day for more than 50 years, and recognised with more than 55 awards.
- **The quality promise:**
  10-year warranty on GARANT products.*

Market leader for quality tools

- **Number 1** in Europe.
- **Global** availability.

HOLEX Our quality brand

- **A wide range:** More than 17,000 tools forevery standard application.
- **Focus on functionality:** Exactly those products that you really need.
- **Solid and proven:** Industrial quality for everyday use.

* 10-year warranty on materials and manufacture of GARANT products when used as intended, excluding regular wear as a result of mechanical stress and excluding workstations and storage solutions installed in containers as well as all electronic components.

WE GIVE ADVICE ON MEASUREMENT TECHNOLOGY, DOWN TO THE SMALLEST DETAIL.

We offer expert measurement technology services.

To bring your projects to life:

Personal consulting from metrology specialists

- Professional **advice that is not tied to a specific manufacturer**, at your own site.
- Sophisticated **measurement technology concepts** from a single source.
- Always the right solution – from hand measuring tools to high-quality measurement technology.

Garant
STOSSGESCHÜTZT

Garant

WHEN IT COMES TO PURCHASING TOOLS AND EQUIPMENT, WE GIVE YOU PEACE OF MIND.

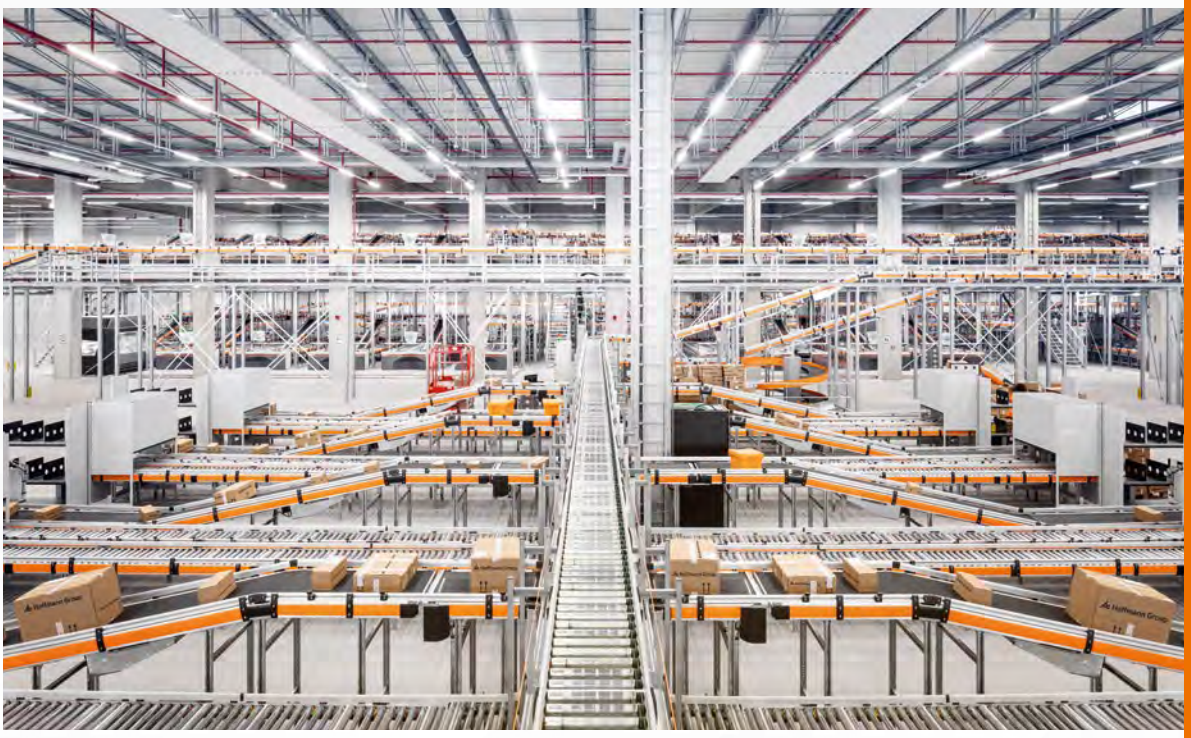
Your success builds on everything running smoothly in procurement. We ensure this happens with the highest delivery capability and perfect delivery accuracy.

We believe delivery capability is a big deal.

Which is why we are building big, too

To be able to supply you with goods reliably in the future, we have created something big: LogisticCity – the most powerful tooling logistics solution.

LogisticCity is a crucial step towards networked digital logistics which fully exploits the technological opportunities available today. This reliably ensures our outstanding delivery performance for you on a long-term basis, even in times when we have to react constantly to changing market conditions.

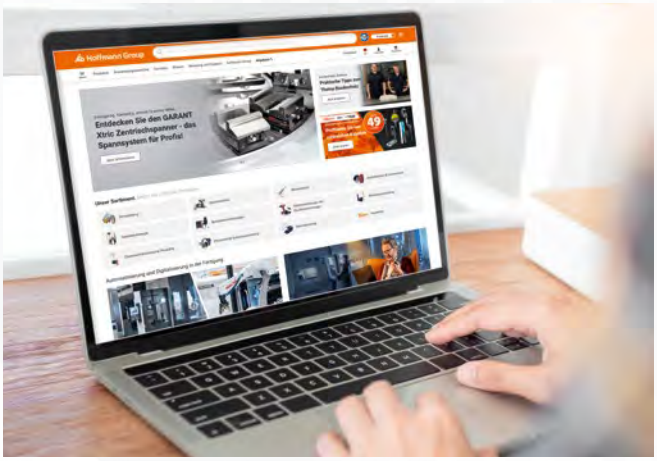


Hoffmann Group LogisticCity:
Taking logistics to the next level

- **100,000 m²** of logistics area, fully automatic warehouse with **500,000** container and **30,000** pallet spaces, **14 kilometres** of conveyor systems, **40,000 packages** a day.
- LogisticCity, **Europe's largest toollogistics centre** in Nuremberg.
- Numerous logistics sites **worldwide**.

SIMPLE, FAST AND RELIABLE PROCUREMENT.

Take advantage of our procurement solutions to optimise your processes. We will be happy to advise you and find tailored solutions perfectly matched to your needs.



Our eShop:
Intuitive, flexible and fast

The simple way to **order online** and **request quotations**.

All functions at a glance.

Your measuring tool is securely packed and sent to you.

A1 Cal	**Green:** Processing time from receipt of order approx. 10 **working days.**
I1 Cal	**Blue:** Processing time from receipt of order approx. 15 **working days.**
i Cal	Prices on request.

The new-product calibrations quoted are performed to the applicable standards/guidelines as factory calibrations (e.g. VDI / VDE / DGQ 2618 onwards).
Accredited (DAkkS) calibrations: Tracing back to national standards guarantees international validity and recognition.
All new-product calibrations are calibrated according to the standard. Other options can also be offered if required.

Please note this information when ordering new items including calibration.

Ordering a measuring tool with additional labelling (if desired):
→ Order service No. 018940 and state the desired identification number.

Calibrated measuring tools are supplied with inspection stickers:
Inspection sticker with calibration date → Date of the calibration that has been carried out.
Inspection sticker with recalibration date → state the desired inspection cycle.

HOLEX 2D barcode scanner

1D and 2D barcode scanner.
Scanner very quickly decodes many types of 1D and 2D barcodes, including QR, Data Matrix, PDF417, UPC/EAN Add on 2 or 5, Code 128, Code32/Code39 etc.
Easy and quick connection via USB interface through plug & play.
No driver necessary. Multiple scanning modes can be programmed.

Size C – Cable connection

Size W – Wireless barcode scanner with built-in memory of more than 2600 codes for scanning without a connection. 2.4 GHz wireless and USB cable connection. Rechargeable battery with large capacity.

Precise as always, easier than ever: The Hoffmann Group Connected Tools.

The state-of-the-art Bluetooth-capable devices from the Hoffmann Group Connected Tools family are easy to use and make life easier in many ways.

Hoffmann Group Connected Tools: Precise, simple, error-free.

- **Greater freedom of movement:** No messy data transmission cables.
- **Very high reliability:** No read errors or transmission errors.
- **Save time thanks to simple documentation:** At the push of a button, the measuring result is transmitted directly to your application (such as Excel or Word) or you export the test report directly via the app as a .csv file to your database.

1. Measurement is performed.
2. Measured data is saved and evaluated in the HCT app.
3. Measured data can be sent as a.csv file.

Data transmission can be performed via **HID** (Human Interface Device) or the **HCT app**!

All tools can also be used without the HCT app!

All products in the HCT family are indicated by this symbol.
More information on the tools on the next few pages.

HOLEX Digital calipers

Large high-contrast digital display. The measuring faces are precision-lapped.

41 2812 – With plastic housing, **for left-handed use.**
41 2821 Size 100 – Incremental measuring system without absolute scale.
Size 150HM – With **carbide measuring faces** on jaws and tips.
41 2805 Size 150/2818 Size 150/2821 Size 150–300 – Digital caliper with **absolute scale**, no zeroing required. Electronics switch off automatically after approx. 5 minutes and switch on again as soon as the tool is moved.

- Very high accuracy due to the glass scale.
- The electronics are decoupled from the casing and incorporated directly in the sliding part. The gauging force is transmitted directly to the measurement jaws. This reduces the liability of the caliper to errors and increases the working life.
- With sturdy metal body.

Supplied with:
41 2805 – Battery No. 081560 size CR1632.
41 2812 Size 150/2821 Size 100 – Battery No. 081560 size LR44.

Size 4,5 – Digital calipers > 150 mm measurement range or jaw thickness up to 4.5 mm.

Supplied with: 3 pairs of measuring tips with measuring discs Ø 6 mm, Ø 10 mm, Ø 12.5 mm,
2 pairs of measuring tips with anvil cones Ø 9 mm, 60° and Ø 12 mm, 60°,
1 pair of measuring tips with measuring cylinders Ø 1.5×9 mm, 1× hexagon key L-wrench.
Size 3,5 – 2 pairs of contact point carriers long and short,
1 spring system for constant gauging force.
Size 4,5 – 1 pair measuring tip carriers, long.

Garant Digital calipers to protection class IP67

Digital calipers to IP67with data output. **Easy-to-read, high-contrast LCD display with 11.5mm character height.**
Very long battery running time due to modern energy-efficient measurement system.
The system switches automatically into power-saving mode after 20 minutes; moving the caliper reactivates it.
There is no loss of the measurement value or zero point.
2-component body with **non-slip Haptoprene surface**.
The calipers are resistant to water, coolant, oil, and dust – even when fitted with a data cable.
The measuring faces are precision-lapped. With preset (dimension selection in advance).
41 2690 Size 300 – without depth gauge

Supplied with: 1 battery No. 081560 size CR2032.
Optional extras: Data cable No. 498948, keyboard interface No. 498963.
Spare part: Data output cap No. 412237 size D, battery holder No. 412237 size B.

Mahr Digital calipers to protection class IP67

Clearly legible, high-contrast LCD display. Inductive, waterproof measuring system. The REFERENCE measuring system saves and retains the set zero position, even after being switched on again. The lock function prevents measurement errors arising from accidentally touching the control buttons. The measuring faces are precision-lapped.

Size 300 – Without depth gauge.

41 2742 Size 200 – With square depth gauge.

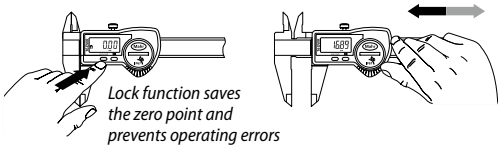
Supplied with: 1 battery No. 081560 size CR2032

Optional extras:

41 2742–2744 – Data cable No. 498940.

Advantages of the reference lock system:

Particularly energy-efficient: up to 3 years battery life.



Lock function saves the zero point and prevents operating errors

Ready to measure as soon as the slide is moved.

Garant Digital workshop calipers protection class IP67

Digital workshop caliper IP67. **Easy-to-read, high-contrast LCD display with 11.5mm character height.**
Very long battery running time due to modern energy-efficient measurement system.
The system switches automatically into power-saving mode after 10 minutes; moving the caliper reactivates it.
There is no loss of the measurement value or zero point.
2-component body with **non-slip Haptoprene surface.**
The measuring faces are precision-lapped.

41 5371/5373 – Compatible with the optional HCT (Hoffmann Group Connected Tools) mobile app (available free of charge for Android and iOS) and the HCT Windows app (available for Windows). Can also be used via a Human Interface Device (HID).

Supplied with:

Size 300 – Supplied with 1 batteries No. 081560 size CR2032.

Spare part:

Size 300 – Battery holder No. 412237 size B.

Hartig

Large precision external micrometers

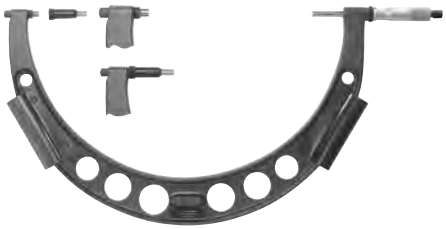
Stable light metal cast frame, hammer finish with hand temperature protection, friction clutch, and locking device. Precision lapped, carbide-tipped measuring faces.
The screw-on rear anvil extension is lapped and carbide-tipped; it doubles the measuring range.
Inner scale sleeve with scales for both measurement ranges.

Size 100-200 – Version with steel hoop.

Advantage: Very large measuring range. After the rear anvil extension has been fitted, the micrometer is immediately ready for use. No additional setting block required. Direct reading of the 1/100 mm on the large scale barrel.

Supplied with: Micrometer with 1 rear anvil extension. Without setting standard.

Note: Versions up to 2000 mm measurement range available on request.



Measuring range		mm	100-200	200-300	300-400	400-500	500-600	600-700	700-800	800-900	900-1000

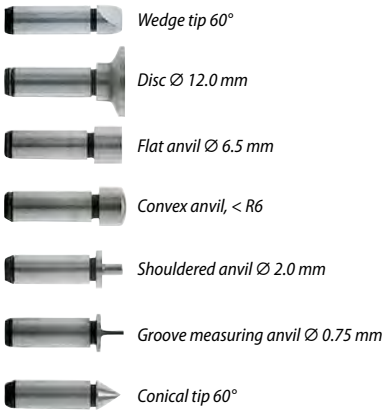
HOLEX Universal external micrometer with interchangeable anvils

Universal external micrometer with non-rotating spindle. Lapped measuring faces. Socket ∅ 5×15 mm. Steel frame forged and enamelled. Quick-change anvils. Zeroing by clamping slide sleeves.
Supplied with: 7 pairs of interchangeable anvils.



Wedge tip 60°
Disc ∅ 12.0 mm
Flat anvil ∅ 6.5 mm
Convex anvil, < R6
Shouldered anvil ∅ 2.0 mm
Groove measuring anvil ∅ 0.75 mm
Conical tip 60°

Hartig

External thread micrometers

Hardened and ground measuring spindle with bore for the measuring tips. Glare-free satin chrome-plated barrel. With sensitive ratchet (friction lock) and quick drive for rapid adjustment. Heat-insulated frame.

Application: **For practical measurement of flank Ø of external threads.** One pair of anvils (Vee and cone) fits several pitches, providing the flank angle remains unchanged.

Supplied with: From size 25–50 with 1× 60° setting standard; without thread measurement inserts.

Optional extras: Vee and cone anvils No. 421652.

Note: Further measurement ranges available on request.

For Vee and cone anvils see No. 421652.

Martin+Tschopp

Thread measurement wires with holders, measurement wire series as per ZEISS

The thread measurement wires are hardened and precision lapped, the holders are matt chrome-plated. A snap ring in the mounting bore ensures secure easy-twist seating on the measuring spindle.

Application: For determining the flank Ø of external threads using the three-wire method in conjunction with an external micrometer or a length measurement bench.

Supplied with: A set consists of a holder with one measurement wire and a holder with two measurement wires, in a plastic box.

Note: **When ordering, please specify the Ø of the measuring spindle** (6.35 mm / 6.5 mm / 6.8 mm / 7.5 mm / 8.0 mm).

42 2490

Steinmeyer Digital snap gauge

For high-precision measurement of components.
Suitable for series testing of turned and milled parts.

Advantages:
- Very high measurement accuracy and repetition accuracy.
- High repetition accuracy due to constant gauging force.
- Reliable measurement due to internal temperature monitoring.
- Can be use flexibly on the machine or in the inspection room.
- Numeric display of the measured values at high resolution (reading: 0.1µm).

Further information can be found in the measurement technology competence brochure.

No. 42 4925 – for checking smaller, delicate components.

No. 42 4935 – for inspection in harsh manufacturing environments.

No. 42 4930 – the large measuring face of 10 mm ensures stable contact with the test piece.

Micrometer with dial comparator

Measuring spindle through-hardened and ground. With fine-lapped **carbide measuring faces.**Spindle and anvil made of stainless steel. One piece frame and spindle guide. Button for retracting the measurement anvil for repetitive measurements. With adjustment screw for zeroing. Tolerance pointers for good/ reject measurements. With hand temperature protection. Lever for spindle clamping.

Accuracy: **Precision dial comparator 1 µm – micrometer measurement deviation E MPE ±2 µm.**

Supplied with:

42 2510 – Adjustment wrench.

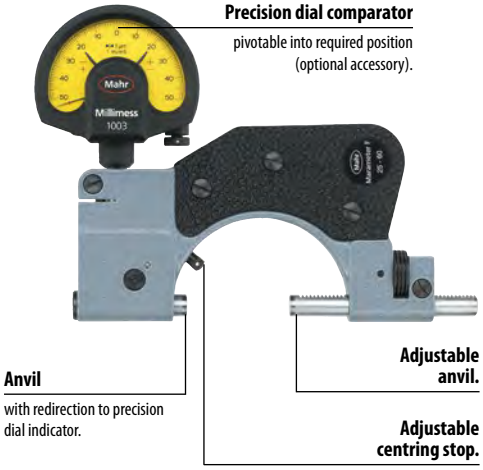
Mahr Indicating snap gauges Marameter

Powerful, forged steel frame with thermal insulation. Anvils made of stainless, hardened steel.
Anvil spring mounted, can be pulled back by a lever to insert the component.
Anvil adjustable over the measuring range by rack and knurled screw. Setting by gauge blocks.
Adjustable centring back-stop for setting component centre.
Constant measuring force ensured by built-in measuring force spring.
Can be used with all dial gauges (not included in the price) with 8 mm clamping shank.
Dial comparators No. 434674 sizes 25/0.5 and 50/1 are preferred.
Out-of-tolerance component values can be read numerically on the dial indicator.

Supplied with: **Without** dial indicator, **with a** wooden box.

Optional extras: Setting dimensions, precision dial comparator No. 434674.
Cast stand, measuring instrument holder type Fk for transmitting the lifting movement in the measurement axis, measuring probes.



42

With carbide-tipped measuring faces.

Mahr Micromar internal micrometers for large diameters

Standard | 0 45 | ▶ S4 Cal ◀

Measuring range from 100 mm

Lightweight, kink-proof tubular construction. Measuring spindle through hardened and ground. **Measuring faces hardened and hemispherical ground.** One adjustable measuring face. Jaws, control elements, and reading parts satin chrome-plated. **Immediately ready for use without adjustment.**

Accuracy: (4 + L / 100) µm.

Supplied with: Micrometer, extensions No. 427950.

Garant 2-point quick measuring devices DM1

Solid construction for use directly on turning / milling centres. For checking internal and external diameters, concentricity, grooves, and wall thicknesses, with a **repeatability of 2 µm.**
Can be used with any dial indicator or precision dial indicator with shank ∅ 8 h6 mm and maximum body ∅ 62 mm (supplied without dial indicator).

Advantage: Short measuring and set-up times, robust and easy to maintain.

Supplied with: Measuring device fully assembled;
2 pairs of TiN-coated disc anvils (1× ∅ 8 mm / 1×∅ 13 mm),
3 × key L-wrenches (3, 4 and 5 AF).

Mahr Universal measuring instruments Multimar

A3 Cal

Strong tubular structure, ground and hard chrome-plated. Two caliper jaws for holding various measuring tips. Measuring range can be extended by 75 mm by reversing the caliper jaws. Can be used with any dial indicator or precision dial indicator with shank Ø 8 h 6 mm (supplied without dial indicator).

- **High measuring reliability and repetition accuracy thanks to high-precision ball bearing guide.**
- Heat protection handles
- Gauging force direction selectable for external and internal measurement.
- Constant gauging force ensured by built-in gauging force spring.

2-point bore measuring system MicroGauge set

2-point bore measuring system for high-precision measurement of bores between 0.95 – 10.35 mm. The compact format and low weight (no more than a ball-point pen) facilitates measurement of small precision components. Hard chrome plated spherical measurement contacts. Clear LCD display with switchable resolution down to 0.0005 mm. Data output via RS232 or USB proximity. Dust-tight and proof against jets of water (IP65).

Supplied with: With 1 battery No. 081560 357, setting rings with UKAS calibration certificates.

Optional extras: Data cable No. 498948

Note: Available as individual micrometers or as a set, depth stops available on request. Diatest probes can be connected using an additional adapter.

Mitutoyo Digital internal micrometers for three-point measurement

Direct reading from clear digital display. Reliable and accurate measuring – without vernier.
"Function Lock" prevents accidental displacement of the zero point.
Low power consumption. With battery charge status and error display.

42 9110

Preset
To set the internal micrometer to the initial value of the measuring range;
programming of up to 2 pre-selected values.

Data storage key
The measured results can be stored by pressing this button
(for example, in inconvenient measuring positions).

Zero point / absolute measurement
Zeroing in any position, e.g. for tolerance measurements.
Absolute zeroing is restored by pressing the button again.

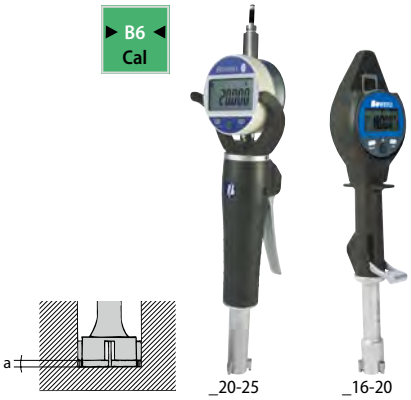
Bowers Group Digital XTL bore gauges with Bluetooth®



_20-25 _16-20

3-point XT internal micrometer series for blind hole measurement from size 12.5–16.
Fixed carbide measuring jaws, from size 12.5–16 with carbide inserts. Large, sharp contrast digital display.
Reliable measurement without a vernier. Excellently suitable for measuring vertical holes.

Function:
- mm / inch selection.
- Setting 2 preset values.
- On / Off data storage button.

Supplied with: Measuring lever, micrometer head with UKAS test certificate, 1 battery No. 081560 size CR2032.

Optional extras: Data cable No. 498950 (from size 20), No. 498951 (up to size 20), setting rings No. 484030, extensions No. 428510.

Standard | Digimatic | Absolute System

Mitutoyo Digital bore gauges Boremat

3-point bore gauge Boremat for blind hole measurement. Large LCD display with 11 mm character height for clear and error-free reading. **Display can be rotated 330°**. The measuring probes centre the micrometer automatically in the bore and ensure easy handling. The measuring probes are adjusted without any error by a **carbide cone**.

Function:
- **Data storage button** saves the measurement result (for instance in inaccessible measurement positions).
- **Zero point / absolute size** enables zeroing at any position.
- **Good / Reject display** for easy checking against tolerance values.
- **Quick adjustment** for quick spanning of the distance to be measured.

Advantage: Very quick measurement with high repetition accuracy due to pistol grip and constant measuring force.

DIN 876

Natural granite surface plate for measuring and inspection

Specially selected natural granite.

- Free from defects, homogeneous structure.
- Resistant to deflection and to warping.
- Absolutely rustproof and resistant to acids, low thermal conductivity.
- Micro-fine surface treatment (diamond lapped). Tolerances tighter than recommended limits.
- Ground outside edges, visually true.
- For static determination of position, contact points (steel ball inserts) are fitted to the underside.
- Harder than hardened steel (Mohs hardness scale 6 – 7), non-magnetic and electrically non-conductive.

Accuracy: Final manufacturing and inspection take place in computer-controlled climatic rooms. The used measuring equipment guarantees the exact connection to national and international calibration laboratories.

43 0200 – **DIN 876/1 – diamond lapped** for workshop and production.
43 0400 – **DIN 876/00 – High precision diamond lapped** for measuring room.
43 0190/0300 – **DIN 876/0 – Precision diamond lapped** for inspection.

Supplied with: **Supplied with test certificate, transport packing.**

43 0190 Size 630×400–2000×1000 – Including steel ball inserts.
43 0190 Size 400×250–400×400 – Including rubber feet.

Note: **On request:** Stainless steel screw inserts, steel T-slot rails (steel T-slot rails not available for No. 430190), accuracy 000, other sizes, intermediate sizes. Delivery excluded.

PLANOLITH Steel T-slot rail

Made of special low-torsion steel, glare-free satin chrome-plated surface, bonded to the granite plate so that it cannot move.

Accuracy: 0.01 mm / 1000 mm, version B. With tenon and T-slot, ground. The nominal dimension 14 mm is only approximate, accessories such as tailstocks etc. need to be ground precisely to the actual slot pitch.

Note: When ordering, please specify the position of the T-slot rail in the surface and take into account the minimum thickness of the granite plate. Prices for intersecting and end face T-slots on request.

Garant GRIDLINE GridLine Vario workbench, mobile with granite surface plate, casing 24 G

Mobile measurement workstation with granite surface plate.
Natural granite surface plate for measuring and inspection, accuracy class 0.
Precision diamond lapped for inspection work. Free of flaws; homogeneous structure. Resistant to deflection and to warping. Absolutely rustproof and resistant to acid, low thermal conductivity. **Supplied with M8 tapped hole.**
Worktop of dark Eluplan, 50 mm thick; 2 mm thick plastic surface finish, proof against abrasion and impacts. The coating is anti-static and largely resistant to dilute acids and alkalis. The tough hard surface is particularly suitable for sensitive components. All edges ABS veneered. **Mobile support legs** of square hollow section, each with 2 ball-bearing fixed wheels and castors, Ø 125 mm, with treadless polyurethane tyres. Castors with brakes for the wheels and the castor heads.
Back panels and storage shelves of sheet metal.

43 1315 Size 1500/5 – 24G cabinet casing, 600 mm wide, of sheet metal, can be locked centrally with cylinder lock. 100% full extension drawers with differential runners, single-handed individual drawer release system and 75kg load capacity.

Colour: Body RAL 7035 light grey, drawer fronts RAL 7016 anthracite, powder-coated. Suspension for granite table RAL 7016 anthracite, drawer body RAL 7035 light grey (not configurable).

Supplied with: Supplied with granite table 630 x 400 mm, accuracy class 0, M8 tapped hole. Fully assembled.

43 1315 Size 1500/5 – Supplied with cabinet casing with drawers.

Note:	For accessories see our Workstations and Storage catalogue volume 3.

Shock-resistant dial indicators 1/100 mm reading

Dimensions to DIN EN ISO 463, issue June 2006. **Shock-resistant** precision dial indicators. Clamping shank ∅ 8 mm h6, hardened and ground. Outer ring of dial face can be rotated to zero the dial. Outer ring with 2 adjustable tolerance pointers. Central pointer for 1/100 mm reading, small pointer on sub-scale for 1 mm reading.

43 2000 – **Shock-resistant by gear rack sleeve. Full metal version** with plastic dial glass.

43 2110 – **Protected against shocks to the gears.** With metal outer ring and metal back.

43 2120 – **Shock-resistant by rack sleeve.** Chrome-plated protective casing with integrated back.

Optional extras: Special contact points No. 434900; 434910; 434915.

Garant Digital dial indicators DI 1 with 1/100 or 1/1000 mm reading

Digital dial indicator with very large (12 mm), high-contrast LCD display. Immediately ready for use when switched on due to reference system. The REFERENCE measuring system saves and retains the set zero position, even after being switched on again. The lock function prevents measurement errors arising from accidentally touching the control buttons.

Function: Display can be zeroed in any position, reversible direction of measurement, buttons can be locked to prevent inadvertent operation, auto-off (selectable). Reactivation by movement or by pressing a key; the reference data is retained at all times.

43 4010 – Preset of any value.

Supplied with: Dial indicator with screw-on protective aluminium cap on the end of the measuring pin, alternatively a lift-off cap can be fitted. 1 battery No. 081560 size CR2032.

Optional extras: Spare and special contact points No. 434900; 434910; 434915, lifting cable No. 434930, data cable No. 498940.

Mitutoyo Digital ABSOLUTE dial indicator 1/100 mm reading

A multifunctional standard dial indicator. Reliable and easy to use.

- Bidirectional communication is possible, e.g. for parameterisation via PC (Digimatic S1 interface).
- With ABSOLUTE system. One-off setting of the start position, which remains the absolute zero point until the battery has to be replaced.
- Easy reading of the values due to a large digital/analogue display.
- Model available with digital digit increments of 0.5 µm.
- Simple calculations and peak value identification are possible.
- Equipped with a warning function for the calibration plan.
- The GO/±NG assessment is performed by adjusting the upper and lower tolerance.
- Alarm for low voltage, setting error, sensor error, display overflow etc.
- Display can be rotated 330°.
- A function lock protects the dial indicator against unauthorised use.

Supplied with: Digital dial indicator including 1 pc. CR2032 battery.

Optional extras: Data cable No. 497081, spare and special contact points No. 434900; 434910; 434915.

Display can be rotated up to 330°.

TESA Digital dial indicator DIALTRONIC with 1/1000 mm reading

Digital dial indicator with combined scale and digital display (10 mm character height) and mechanical tolerance marks. Display / button panel can be rotated up to 270°.

Function: Zero setting/preset, measurement value output, reversible direction of measurement, blocking of the measured value, standby mode, determination of the lower and upper tolerances, dynamic measurement min / max / max-min, selection ref 1 or ref 2 (preset and stored tolerance), multiplication factor, button lock against unintentional operation, data output, selection of the resolution (0.01 or 0.001 mm).

43 4275/4276 – With built-in Bluetooth®.

Supplied with: 1 battery No. 081560 size CR2032.

Optional extras: Data cable No. 498928, spare and special contact points No. 434900; 434910.

Mitutoyo Digital dial indicators ID-N / ID-B 1/1000 mm reading

Handy, versatile, and robust digital dial indicator with integral tolerance display (with or without measured value). The slim profile makes them particularly suitable for incorporation in jigs where space is restricted. The display can be turned through 180° to allow reading from both sides. **Short circuiting the Digimatic cable pins 1 and 6 allows one or a series of dial indicators to be set to zero or to a pre-selected value.**

Size 5 – Reading from above.
Size 12,5 – Reading from the front.

Supplied with: 1 battery No. 081560 size 357.
Optional extras: Data cable No. 498428, special contact points No. 434900; 434910; 434915.

Ideal for jigs where space is restricted.

Mitutoyo Digital dial indicators with 0.5/1000 mm reading

Multifunctional standard dial indicator. Reliable and easy to use.

- Bidirectional communication is possible, e.g. for parameterisation via PC (Digimatic S1 interface).
- With ABSOLUTE system. One-off setting of the start position, which remains the absolute zero point until the battery has to be replaced.
- Simple calculation and peak value identification are possible.
- Equipped with a warning function for the calibration plan.
- The GO/±NG assessment is performed by adjusting the upper and lower tolerance.

Supplied with: 1 battery No. 081560 size 2032.
Optional extras: Data cable No. 497081, special contact points No. 434900; 434910; 434915.

Mitutoyo Digital dial indicator ID-F 0.5 µm reading

Large character digital display and additional analogue display. Mains operated, therefore suitable for continuous measurement.
Measuring probe with carbide ball, thread M2.5×0.45.

Advantage:
- Bi-directional Digimatic S1 interface.
- Red/green LCD backlight for visual GO/±NG tolerance evaluation.
- Analogue bar display.
- MAX/MIN-RANGE (Runout value) function with a frequency of 500 scans/s.
- External power supply via AC power supply unit.
- High accuracy.

Supplied with: Supplied with power connection cable No. 497661, AC power supply unit DC 6V / 2A (CEE version Germany).

Optional extras: Data cable No. 497081, special contact points No. 434900; 434910; 434915.

Mitutoyo Digital dial indicators ID-H 1/1000 or 0.5/1000 reading

Error-free reading from large character digital display and supplementary analogue display.
Mains operated, therefore suitable for continuous measurements.
Strong housing; precision bearing plunger spindle.

Function:
- Colour changes when out of tolerance.
- MAX / MIN data storage.
- Maximum value memory (no need to search for the turning point).
- Zero point display, e.g. for tolerance measurements.
- Selectable direction of measurement.
- Capable of remote control and data reporting.
- Remote control (special accessory).

Supplied with: Connection cable power supply unit 220V / 9V / 500 mA.
Optional extras: Data cable No. 498430, remote control, Digimatic Presetter.

Mahr MarCator digital dial indicator 0.1/1000 mm reading

High-precision digital dial indicator with very large numeric display and integrated tolerance display thanks to clear, coloured LEDs and display symbols for classifying the measured values.
Hardened glass front with wear-free touch control fields, display can be rotated 280°.
With bidirectional data output and integral i-wi radio system for easy cordless transmission of measured data to any PC.

43 4661 – **Dynamic measurement functions (MAX / MIN / MAX-MIN):**
- For concentricity and flatness testing or seeking the reversal point.
- Additional scale display, either line indicator or dynamic bar.

Function: PRESET (3 values), tolerance and warning limits (3 tolerances), coloured LED display depending on mode: Good / reject / rework / warning limits, ABS (display can be set to zero without losing the reference to PRESET), factor (multiplier for measuring distance), LOCK function (general button lock in menu), DATA (data transmission) / HOLD (freeze the current measured value).

Supplied with: 1 battery No. 081560 size CR2450.
Optional extras: Data cable No. 498941.

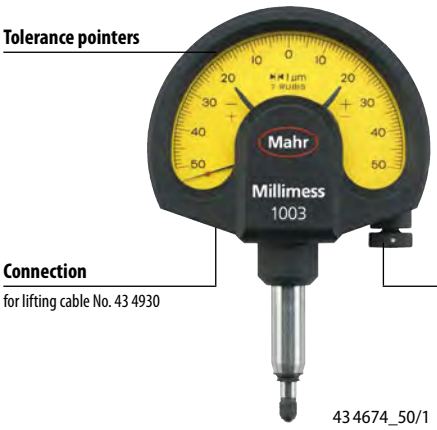
Mahr

Precision dial comparators Millimess

Sapphire mounted, all-in-one mechanism, particularly robust for use in the manufacturing area.
Low hysteresis due to virtually play-free gauging pins on ball guides.
Resistant to lateral forces.
One-piece housing for maximum stability and accuracy.
Shock resistance due to transmission lever which lifts up in the event of overload
Constant measuring force by straight spring.
Large overrun for convenient insertion of the component. Lifting key or lifting cable (special accessories) can be connected.
Clearly legible scale.
2 Tolerance pointers for presetting the permitted tolerance range.
Application: As a dial bore gauge for series and individual inspections.



43 4674_50/1

Optional extras: Lifting cable No. 434930.

Internal clamping screw set, 5 pieces

Description:
- Internal clamping screw made from stainless steel (1.4301/1.4305).
- Innovative solution for quick and easy securing of cylindrical components (e.g. dial indicators, round bars or pipes).
- Such components can easily be clamped or released by tightening or relaxing the internal clamping screw.
- The overhang length of components clamped in the cylindrical bore of the internal clamping screw can be varied steplessly.

Application:
- Metrology: quick and easy clamping of dial indicators in measuring devices.
- Machine building: means of clamping cylindrical objects.
- Sensor systems: attachment to flat surfaces.

Supplied with: Pack consisting of 5 clamping screws.

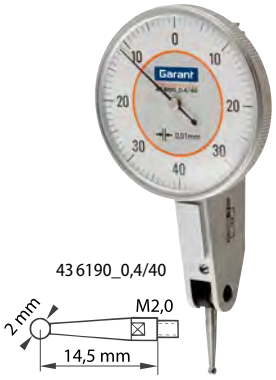
Lever dial indicators

High-precision lever dial indicator with jewel-mounted mechanism, in handy, robust design. Housing and dovetail block are of one piece, which means that mounting is particularly rigid. Corrosion protection due to matt chrome-plated housing.

Application: As an accurate dial bore gauge for testing variations from nominal size, testing concentricity, internal measurements, testing of parallelism, and flatness as well as for aligning components.

Optional extras: Square holder No. 436511, centring holder No. 436512, articulated holder No. 359680.

Spare part: Spare contact point with carbide or ruby ball tip can easily be ordered from www.hoffmann-group.com.



Lever dial indicators

DIN 2270

With 1/100 reading.

43 6206 – With ruby ball.

Supplied with: Clamping spigot ∅ 8 mm.

43 6341 – Additional clamping spigot ∅ 4 mm.

Note: **Additional information DIN 2270: Graduations 0.01** – deviation range 10 µm, total deviation range 13 µm, hysteresis error 3 µm.

Lever dial indicators with long contact point

Lever dial indicator with **long contact point. 1/100 reading.**

43 6230 – Large measuring range of 3 mm. The same direction of rotation (clockwise) of the pointer in both directions of measurement.

43 6265 – Housing without dovetails. With changeover lever for changing the direction of measurement. Mounting shank screwed in.

Size 0,5/38 – Contact point length 32.3 mm.

Advantage:

43 6265 – ■ Measuring direction toggle switch to easily change the measuring direction.
■ Precision gears with jewel bearing ensure smooth and precise measurement.

Supplied with: Clamping spigot ∅ 8 mm.

Note:

43 6225 – **Additional information DIN 2270: Graduations 0.01** – deviation range 10 µm, total deviation range 13 µm, hysteresis error 3 µm.

Mahr Millimar C1200 compact length measuring gauge

Compact casing with high-resolution, sharp contrast TFT colour display. Connection for 1 inductive probe. Display can be tilted steplessly for the optimum viewing angle The direction of reading can be switched over. Selectable mains and battery operation.

Function:
- Dynamic measurement functions: Max, Min, Max-Min.
- Centring of the display at the centre of the tolerance limits.
- Password protection for the menu

Application: As display for one inductive probe for simple measurement tasks (+ A, – A). Ideal for stationary and portable use in the workshop and manufacturing shop.

Size 1200M – For inductive probes compatible with Mahr.

Size 1200T – For inductive probes compatible with Tesa.

Supplied with: Supplied with plug-in power supply (115 – 230 V, 50 – 60 Hz).

Optional extras: Data cable No. 498938.

TESA Portable display unit TWIN-T10

IP 63

Sturdy portable display unit with scale and digital display for inductive measurement probes. Clear and error-free reading thanks to the highly detailed scale display. 5× zoom mode. Very long running time of more than 300 hours. Optimum handling due to ergonomic design and soft touch surface.

Function: Zeroing (offset), +A, -A, memory function, Max, Min, Max-Min, measurement of limit values, data output, ASCII commands. Ideal for stationary and portable use in the workshop and manufacturing shop.

Application: Display unit for TESA inductive measurement probe.

Supplied with: Including 4×batteries No. 081561 size LR6.

Optional extras: Radio No. 498916 transmitter, data cable No. 498918, software No. 498925; 498926.

Height	mm	38
Weight	kg	0.5

TESA µFinder Set No. 434718 size 31 for parallelism and straightness measurements and for alignment of machines.

µFinder set

Mobile high-precision set for parallelism and straightness measurements, and for alignment of machines in quality control and service.

Supplied with: Supplied with instruction handbook, portable TWIN-T10 display unit No. 434716 size T10, 4× batteries No. 081561 size LR6, small magnetic stand, case.

Size 22 – Including axial contact point No. 434777 size GT22.

Size 31 – Including lever contact point No. 434779 size GT31.

Clamping shank ∅ h6	mm	8	

TESA Display unit for precision measurements

Display unit for measured values with easy-to-read 7-inch colour touch screen. Simultaneous display of multiple measurements possible via the ports for inductive contact points or the USB inputs. 4 display modes are available for optimum reading of the results. TESA contact points are recognised automatically.

Size TWT20 – Recording of measurements with 4300 measurements per second. Simultaneous display of 2 values.
Size TWT40 – Optimised recording of measurements with 6500 measurements per second. Simultaneous display of 4 values.

Function:
- Basic formulas (+A, -A, +B, -B and combinations from A and B).
- Dynamic measurements (min., max., max.–min., average, etc.).
- Adjustable tolerances with OK/NOK display.
- Function for classification integrated (8 max.).
- Data output via RS232, USB or Bluetooth®.

Application: Ideal for inspection work in the inspection laboratory and in production.

Supplied with: Incl. mains cable for screwing on to the display, adapters for EU, ZH, UK and US.

Note: Twin T20 nano display unit for visualization of Heidenhain contact point available on request.

NEW

MARPOSS Measured value display unit DUO

Compact measured value display unit with 4.3-inch touch screen/colour display and measured value memory function. Connection for 2 inductive contact points (switchable between half-bridge or full-bridge). Device also compatible with Tesa contact points. Up to 4 features can be displayed at the same time. Data export in DFQ or CSV format via the USB interface.

Function:
- Dynamic measured value functions: Max, Min, Max-Min, (Min-Max)/2, average.
- Three-colour bar display and digital measured value display.
- 2 circuit inputs and 2 circuit outputs, potential-free (for instance for measured value uploading, good/reject).
- Scaling is adjusted automatically to suit the tolerance limit.

Application: As display for simple measurement tasks (+A, –A) and calculation based on both results (such as A+B, A–B, 0.5A+B). For use in the workshop and production.

Supplied with: Including USB power adaptor, base.

Optional extras: Optional expansion with plug-in cards on fieldbus interface: Profibus, Profinet or Ethernet/IP.

43 4735

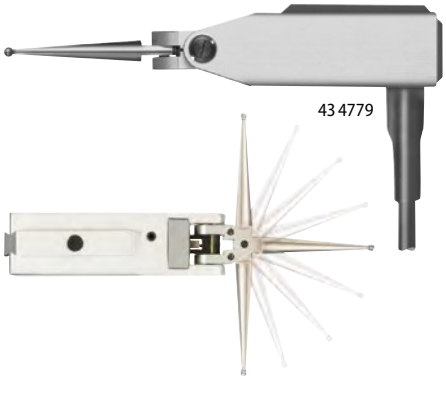
TESA Inductive lever dial indicator

Adjustable-angle measuring tip for measurements in two directions. Ball-bearing lifting system with mass balancing. Collision-protection by means of two slip clutches. Measuring probe with Ø 2 mm carbide ball – can **pivot through 180°**. Independent change of sensing direction, without change of arithmetic sign. Case with two dovetail bars.

Application: Ideal for measurement of parallelism and straightness, and for alignment of machines.



43 4779

Type		GT31

IP 65 | i Cal

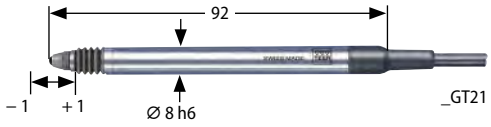
TESA Inductive probes

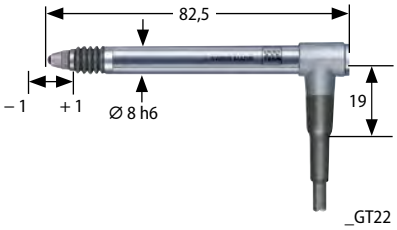
Versatile precision length measuring probes.

- **Precision ball-bearing longitudinal measuring pin.**
- **High precision due to electronic measurement signal amplification.**
- Clamping shank Ø 8 mm, can be clamped on the entire length.
- Due to ball bearings, resistant to fluctuations in temperature and lateral forces.
- Outstanding electro magnetic screening.

The TESA length measurement probe is characterised by excellent repeatability, consistency and a long working life.

Application: Universally applicable for all high precision measurement tasks, particularly in workshop and manufacturing shop areas.





Standard probes

Size GT21M – Compatible with Mahr display units.

IP 64 | i Cal

Mahr Millimar inductive probe

Inductive length measuring probe with Mahr or Tesa semi-base attachment compatibility. Very robust, on ball guides and shielded against EMC influences by nickel-iron alloy. Very high linearity over the entire measurement range.

43 4750 – Vacuum lifter.

43 4760 – Angular cap for radial cable exit. Integral cap allows angular setting of the cable.

Application: Universally applicable for all high precision measurement tasks, particularly in workshop and manufacturing shop areas.

43 4750 – Ideal for measuring devices - because the plug connection is directly on the probe.

Supplied with: Operating instructions, connection cable (2.5m).

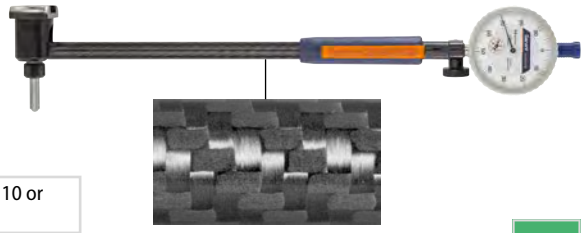
Precision bore gauges for Ø 18 – 300 mm



Precision two-point dial bore gauge with spring-loaded centring disc. **Lightweight,** stable version with **CRP elements**, hence reduced **thermal expansion** and increased **corrosion protection.** Hand heat insulation on the frame additionally reduces the effects of temperature. Smooth and precise transmission of the contact point travel by a curved segment. Fixed contact point with hardened steel ball allows adjustment to different Ø.

Application: For precise measuring of bores in terms of Ø, roundness, and cylindricity as well as measurements of internal profiles.

Note: When using precision dial indicators, an additional extension No. 434920 size 10 or contact point No. 434900 size 16 is required.

Supplied with: Precision bore gauge complete in a wooden case (without dial indicator).

Optional extras: Precision dial comparator No. 434674, inductive precision dial comparator No. 434671, dial indicator with anticlockwise scale 434807 size 10, digital dial indicator 434322, setting rings No. 484030.

OSIMESS internal precision bore gauges for bores of 1 – 12 mm

43 5010 – OSIMESS internal precision bore gauge for small bores from 1 mm.
DLC-coated tips (from size 4.5-7.5). The tapered form of the gauging pin, under the measuring force of the precision bore gauge, expands the slotted probe. **Repetition accuracy 1 µm.**

Size 1,5-4,2 – Probes of **carbide.**

Application:

43 5010 – Determination of deviation from nominal value and shape errors such as run-out or conicity.

Supplied with:

43 5010 – Probes, carbide gauging pins, standard holder (display unit and setting rings not included).

Optional extras:

43 5010 – Precision dial comparator No. 434674, digital precision dial comparator No. 434671, dial indicator with anticlockwise scale No. 434807 size 10, digital dial indicator No. 434322, measuring table No. 435020.

Note: Versions up to 20 mm measurement range and for blind holes available on request.

S/STL

Bore plug gauges OD

OD bore plug gauges are mechanical two-point dial bore plug gauges for highest requirements. Hardened gauging sleeve. For bores of 3 – 100 mm. Centring by the gauging sleeve prevents tilt errors and therefore ensures maximum precision irrespective of the user. No need to seek the return point. Dial indicators with shank ∅ 8 h6 can be used as displays.

- Repetition accuracy 1 µm.
- Robust and reliable.
- Minimum measuring time with maximum measuring reliability.
- Thread connection bore gauge/ holder M10×1.

43 5155/5157/5159 –Measuring sleeve made of stainless steel against corrosion.

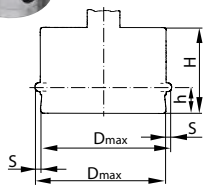
Application: For bores of 3 – 100 mm. For quality assurance in series production, manual or automatic measuring.

Supplied with: Gauging sleeve with two radially movable 180° offset carbide measuring bars.

Optional extras: Precision dial comparator No. 434674, inductive precision dial comparator No. 434671, dial indicator with anticlockwise scale 434807 size 10, digital dial indicator 434322, holder for plug gauges No. 435160, setting rings No. 484030. Measuring depth extensions, angle pieces and depth stops on request.

Note: When ordering, please state **additionally** the exact bore tolerances, for example:
No. 435154 size 6–12 **10H7,**
No. 435154 size 6–12 **10 + 0.15 / – 0.01,**
No. 435154 size 6–12 **9.990 / 10.15.**
When using precision dial indicators, an additional extension No. 434920 size 10 or probe No. 434900 size 16 is required.

- **Plug gauges for large bores (up to ∅ 500), recesses, grooves, also in 3-point version available on request.**
- **Tolerance range 10 µm or fine fit quality 5 and finer on request.**
- **Measuring range > 0.2 mm on request.**
- **Measuring contacts with larger radius as well as in ruby, ceramic and DLC-coated are available.**



S: Measuring range = 0.2 mm

Depth stop for serial measurements available on request.

Contour measurement gauges Novometer

Novometer contour measurement gauge for measuring internal diameters of round, oval or regular polygon bores. For measuring **resilient components**.

Note:	Version with digital display or with slip clutch for reproducible gauging force available on request. Version for measuring external diameters available on request. Stationary version with table available as a support for the workpiece. Novometer with reading of 0.01 mm available on request.

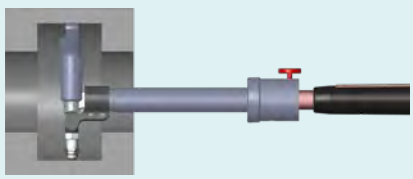
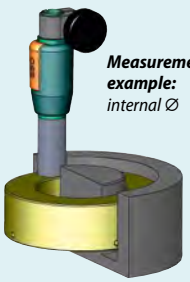
Special designs

Measuring gauge for various internal geometries on request.



Measuring without oscillation

Measurement example: *external ∅*



Measurement example: *internal ∅*

Internal profile gauge KT

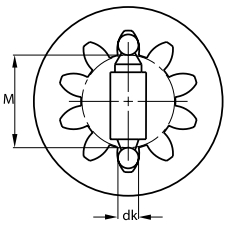
43 5125_22–55

Two-point dial bore gauge, based on the **Schwenk version.** For measuring internal profiles and splines, serrations and splined hub profiles. High accuracy and reliability due to segment deflection of the contact point travel. Wide measurement range covered by interchangeable measuring tips. The measuring inserts have an internal thread for fitting ball tips. The carbide balls on the spherical tips are available from ∅ 0.5 mm in 0.001 mm increments (tolerance < 2µm).

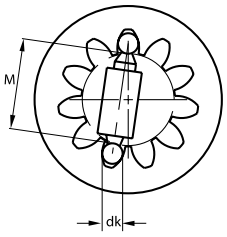
Supplied with: Gauge holder with probe rods and measuring tips, without spherical tips and display unit.

Optional extras: Spherical inserts with carbide balls, precision dial comparator No. 434674, inductive precision dial comparator No. 434671, dial indicator with anticlockwise scale 434807 size 10, digital dial indicator 434322.

Note: Version as a plug gauge for quicker and more reliable measuring without fluctuation.



Application example for even number of teeth.



Application example for odd number of teeth.

IFM chamfer gauges

IFM internal taper measuring gauge with 90° anvil cone for **determining the largest internal taper Ø.** The hardened anvil cone cross is inserted into the internal taper. The largest Ø is determined by pressing until reaching the stop.

Supplied with: Dial indicator.

Note: Special versions with other taper angles available on request. Measuring devices for measuring the chamfer length available on request. Dial indicator and base body available separately.

Garant Digital height gauge HG1

Discover the new GARANT HG1 height gauge No. 44 5355.
Easy measurement of holes, slots and many other features.

Outstanding handling.
- Dynamic thumbwheel for quick and precise positioning.
- Ergonomic handles with integral air bearing button for easy movement on the measuring plate.

Easy touch operation.
- Large touch control panel for very simple, easy operation using large operating buttons.
- Quick and reliable execution of measurements and calculations.

Excellent evaluation possibilities.
- Logs can be saved directly as a PDF.
- Wireless transmission of lists of measured values to wireless printer.

Setting bench SB 1

Easy and convenient-to-use horizontal adjustment device with touch screen that is suitable for the workshop for setting internal and external measurement devices. The device is high-quality and has a solid granite base and high-precision guides. The highly accurate motor control regulates the set values in real time even with a variety of gauging forces. Multilingual software. USB interfaces for printers and scanners.

Function:
- Input of internal and external dimensions possible in millimetres or inches.
- Integrated tolerance calculator with quick selection of minimum, maximum and average values.
- Saving of favourites for repeated setting of measuring tools.
- the history is recorded and can be accessed at any time.
- Wireless data transmission of the configured pre-set values (nominal dimensions) including tolerances to the GARANT HCT dial indicator (with No. 498999 size STICK).

Supplied with: Supplied with power supply unit, dust cover, factory calibration, instruction handbook, transport restraints.
Size 1500 – Delivery excluded.

Optional extras: Adapter No. 439910; 439912; 439915; 439916, printer No. 085505, 2D barcode scanner No. 439930 size 1950GHD, socket strip No. 081163; 081179, No. 498999 STICK for HCT function, digital dial indicator HCT No. 434336; 434342.

Note: Limit value of measurement deviation (MPE) according to VDI/VDE/DGQ/DKD 2618 sheet 17.2. Permissible ambient conditions 20°C ±3 K, measured with calibrated standards or standard measuring equipment using the integrated temperature compensation. For newer setting benches on the market, the HCT function can be extended using a software update – please contact our measurement engineers.

HÖRGER & GÄSSLER Hydraulic magnetic measuring stands

Hydraulic measuring stand with central clamping. One hand remains free for configuring the dial indicator. All joints are rigidly clamped by the central button. Patented mechanism generates high pressure so that the hand wheel needs only slight force to close it. Oil hydraulics protected against oil leakage by double seals. Clamping force can be steplessly adjusted. **Jointed arms** 360° rotatable on the dial indicator holder and 180° pivotable. **Dial indicator holder** for dial and digital indicators with shank ∅ 8 mm or dovetail.

Note:	Hydraulic measuring stands can withstand large fluctuations in temperature when the **clamp is open**. However a certain time is required for the temperature of the oil to equalise. When the **clamp is closed** the maximum fluctuation in temperature without major fluctuations in pressure is 15 °C. These can lead to damage to the stand or to the object that is clamped.

Suitable spare parts in the eShop for the respective item

44 0790

Hydraulic stand with magnetic base

44 0790 – Additionally with **fine rotational adjustment** on the magnetic base; high stability even at high measurement forces.

44 0795 – Additionally with sensitive **hydraulic fine adjustment** on the magnetic base for **high-precision** applications.

44 0840 – Only column **without** base.

44 0790–0800 – **Magnetic base** with Vee sole. Powerful permanent magnet. Rotary switch for turning the magnetic force on and off. The magnetic force acts through the flat back and the Vee sole of the base.

Supplied with:

44 0795 – Magnetic base No. 440865 size 1

44 0800 Size 220–300 – Magnetic base No. 440868 size 1.

44 0800 Size 400; 550 – Magnetic base No. 440868 size 2.

Optional extras:

44 0840 Size 400; 550 – Magnetic bases No. 440868 size 2 and No. 440865 size 1.

Garant Hydraulic magnetic measuring stands

Hydraulic measuring stand with central clamping - all joints are rigidly clamped by means of the central rotary knob. Oil hydraulics protected against oil leakage by double seals. Clamping force can be steplessly adjusted. **Large rubberised hand wheel** (∅ 54 mm) for easy tightening and releasing the clamp. Jointed arms on the dial indicator mounting rotates 360°, can be twisted 180° and suitable for dial indicators with shank ∅ 6 and 8 mm or dovetail.

44 0600 – Stand with magnetic base with **ergonomic rotary switch**. High performance ferrite magnet with ground contact faces on the back and ground Vee underneath for placing on shafts and cylindrical bodies. **Plastic enclosure** of the magnetic base for easy handling, enhanced shock protection and thermal insulation.

Supplied with:

44 0600 Size 300 – Jointed arm No. 440610 300 and magnetic base No. 440620 1.

Size 400 – Jointed arm No. 440610 400 and magnetic base No. 440620 1.

Note: Hydraulic stands can withstand large fluctuations in temperature when the clamp is open. However a certain time is required for the temperature of the oil to equalise. When the clamp is closed the maximum fluctuation in temperature without fluctuations in pressure is 15 °C. These can lead to damage to the stand or to the object that is clamped.

Universal measuring stands

3-point clamping of the measuring arm with very short clamping travel for high ease of use. Very low applied force generates sustained stable clamping.
Generously dimensioned frame for very high system stiffness. **Vario** dial indicator holder for shank ∅ 6 mm, 8 mm, 3/8 inch, lever dial indicator with dovetail slide and dial indicators with loop at rear.

44 1190 – **Fine adjustment at the indicator holder.**

44 1195 – **Fine adjustment at the magnetic base.** Advantage when adjusting µm lever dial indicators, as the column is not affected by the force applied.

Optional extras: Measuring microscope No. 440401.

Concentricity test benches

Measuring stand:
With fine setting adjustment and holder bore 8 H7. The cross arm is full adjustable for height and in all lateral directions.
Tailstocks:
adjustable. Left tailstock with fixed centre, right tailstock with axially movable quill.
Measuring bench:
Precision ground, with 2 T-slots. To take the tailstocks (tolerance H7) or the stand.
Flatness to DIN 876/1.

Application: For measuring round and plane accuracy as well as for comparative tests of parallelism and diameter.

Supplied with: Bench, measuring stand.

Size 50; 100; 150 – Tailstocks without Vee blocks.

Size 75 – Tailstocks with 90° Vee blocks at the top for holding off-centred or overhanging parts (max. workpiece ∅ 20 mm).

SPRETZER Bench centre RPGP with Vee blocks

Hardened and ground base plate with 2 clamping slots. Stepless movement of the Vee blocks (with carbide coating), the scrolling device, and the jointed stand. Universal stop, which is ground flat and can be mounted perpendicularly in relation to the Vee blocks. The **Vee angle of 108°** allows even polygonal parts to be inspected. Pivoting jointed stand for dial indicator or lever indicator.

Application: Inspection of axial and radial run-out of rotation parts.

Supplied with: Base plate with 2 Vee blocks and a stop, scrolling device, and jointed stand (without dial indicator)

Optional extras: Jointed stand with T-nut No. 443295. Scrolling and Vee blocks No. 443050 – 443160 with Tee-nut width 10 h6. Height-adjustable Vee blocks on request.

SPREITZER Bench centre RPGR with scroll plates

Hardened and ground base plate, bearing body of high-tensile aluminium. Movable scroll plates for high loadings; one of the scroll plates is adjustable for parts with different diameters (up to 60 mm). For correct use an **additional** jointed stand for mounting the dial indicator or lever dial indicator is **required**.

Accuracy: Concentricity **0.002 mm.**
Application: Inspection of axial and radial run-out of rotation parts up to ∅ 240 mm.
Supplied with: Base plate with 2 scroll plates; 1 of the scroll plates adjustable for parts with different diameters (without jointed stand and dial indicator).
Optional extras: Jointed stand with T-nut No. 443295.

SPREITZER Bench centres RPG Centreless

Robust design with pre-loaded roller bearings.
Type RPG for inspections in series production with 2 pivoting holders and 1 measuring slide (apart from size 30).

Accuracy: Concentricity **0.002 mm.**
Application: For inspection tasks on external, internal, and flat faces of rotating parts.
Size 30 – Due to the compact design particularly suitable for use on shadowgraphs, optical coordinate measuring machines and contour measurement gauges.
Supplied with: Key and oilstone (without dial indicator).
Optional extras: Cross slide for measurement of flat surfaces.
Measurement slide with centres or coated rollers.
Jointed arm with measuring tool mount.
Carbide-coated rollers.
Electrical drive with variable transformer.
Pneumatic pivoting arm with tensioning roller.

Note: All types are available on request with a different type of roller (grooved rollers or cylindrical rollers).

Height gauges and marking-out systems

Standard | Digimatic | ▶ E1 ◀ Cal

Direct reading from clear digital display. Battery operation with very low current consumption.
Data storage key – The measured result can be stored by pressing a key. All critical parts are hardened. Great stability by two parallel hardened columns with rack teeth on the inner faces (size. 1000 has 3 columns).
2 preset values permit reference values to be saved (e. g. granite table and workpiece).
Carbide tipped scriber. Sturdy base with hardened and lapped surface. Crank on the back of the display housing for quick adjustment and a hand wheel for fine adjustment.

Supplied with: 1 battery No. 081560 size 357, 1 cover, 1 carbide tipped scriber No. 443510.

Optional extras: Square holder No. 445180 for holding dial indicators and lever indicators, centring gauge No. 445250, protractor No. 453500, holder No. 453520, and data cable No. 497080.

TESA TESA-HITE MAGNA digital height gauges

High accuracy, **very robust,** manually adjustable height gauges. Dynamic component contact with consistent measuring force. Easy to use, due to large numeric display and symbols for measurement functions.

- **TESA Magna µ magnetic measuring system for use in particularly rough environmental conditions.**
- Large clear display screen with 21 mm character height and intuitive symbols. Colour display and backlighting for better legibility.
- Very long battery life for cordless measurements.
- User-friendly with **multi-lingual context help** in the active functions.
- Significantly faster measurement of the return points (min, max, ∅) by use of **patented Quickcenter Dynamic technology.**

Advantage: Particularly suitable for **use in production areas. Highly immune to the effects of contamination by both solids and liquids.** Front face of the panel protected to IP65, measurement system protected to IP55.

Application: For measuring heights and steps, diameters, hole spacings, slot widths and deviations from parallelism etc.

Supplied with: Base unit with control panel, standard contact point carrier, mains cable, standard contact point with carbide ball ∅ 5 mm, 110 – 240 V power supply unit, rechargeable LI-ion battery. **SCS calibration certificate.**

Optional extras: Various accessories available on request. Contact point set No. 445266 and No. 445267, TLC-BLE radio remote control No. 498921, data cable No. 498918.

Mitutoyo Digital height gauge QM-Height

High-accuracy compact height gauge with manual adjustment and easy-to-read monochrome LCD display. Many measurement and analysis functions for data processing. Quick and easy selection of functions and all leading calculations of internal and external diameters, as well as distances. Unlimited speed of positioning. Improved battery life.

44 5234 – **Air pad for easy, jerk-free movement.**

Application: Ideal for the workshop and inspection room.

Supplied with: Supplied with ball contact point 5 mm ∅, calibration block, 4 batteries No. 081561 size LR6.

Optional extras: Contact point, marking out scriber, data cable and mains adaptor.

TESA Digital height gauge TESA MICRO-HITE

TESA MICRO-HITE manually adjustable digital height gauge for comprehensive measurements in 1D or 2D coordinate measuring systems.

- Incrementally graduated glass scale with reference point.
- Automatic correction of systematic measurement variations ensures very high accuracy. Coefficient of linear expansion equals that of steel.
- Switchable air support cushion
- User-friendly with **multi-lingual context help** in the active functions.

Hybrid control panel

- Backlit keyboard with clear simplified presentation and clear information.
- Convenient and flexible operation with parallel use of the keyboard and touch display.
- Ergonomic posture due to flexible adjustment of the control panel.

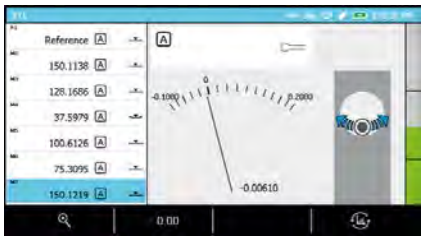
Software / measuring functions

- Comprehensive measurement facilities such as parallelism, angular measurements, simple 2D measurements, etc.
- Integral computer.
- Automatic calculation of measurement results by repeated use of programs stored as functions.
- Input facility for customer-specific tolerances. ISO tolerances are automatically incorporated in the software. **Direct and clear information to the user regarding OK/reject**.
- Easy generation of test reports.

Advantage: Significantly faster measurement of the return points (min, max, ∅) by use of the patented Quick-Center technology. All measurements shown visually for information in noisy environments.

Supplied with: TESA MICRO-HITE base unit incl. control panel, standard contact point carrier, standard contact point with contact rod and 5 mm ∅ measurement ball, reference piece, electric pump (fitted) for air pad for the gauge base, battery cartridge (rechargeable Lithium-ion battery), mains adaptor (charger), mains cable. **SCS calibration certificate.**

Optional extras: USB printer No. 445293; printer paper No. 445294; data cable No. 498918 size USB; Data-Direct software No. 498925; Stat-Express software No. 498926; radio transmitter TESA BLE No. 498921 size BT; spare battery No. 445443 size AKKU; dust cover; comprehensive range of accessories (such as for measuring squareness) available on request.



Simple measurement of the return points by Quick-Centre technology.

Quick and easy measurement of series production.

44 5285_600

Mitutoyo Digital 2D height gauge LH-600F

- Perfect combination of multi-functionality and the **highest accuracy** in this device class.
- Intuitive operation thanks to self-explanatory menu system, including 21 languages.
- 8.4 inch touch screen with colour display and backlight.
- Pneumatic drive mechanism.
- Automatic execution of taught-in part programs.
- Outstanding visualisation of GO/±NG tolerance comparisons.
- Autonomous operation using rechargeable battery. Running time: approx. 4 hours. Second rechargeable battery can be retrofitted.
- DIGIMATIC input for digital indicators.
- DIGIMATIC output for U-Wave or printer.
- Print the measurement results using the document printer / Digimatic printer No. 498701 or transfer them to the PC via wireless communication (USB cable / USB stick).

Size 600FG – With handle for better handling of the device.

Supplied with: Includes ball contact point ∅ 5 mm with holder, calibration block, mains adapter, 1 pc. NiMH rechargeable battery and cover.

TESA Digital height gauge TESA MICRO-HITE + M with motorised drive

TESA MICRO-HITE motorised digital height gauge for comprehensive measurements in 1D or 2D coordinate measuring systems.

- Incrementally graduated glass scale with reference point. Patented opto-µ reading system.
- Automatic correction of systematic measurement variations ensures very high accuracy. Coefficient of linear expansion equals that of steel.
- Very high repetition accuracy due to constant gauging force.
- Switchable air support cushion
- User-friendly with **multi-lingual context help** in the active functions.

Software / measuring functions

- Comprehensive measurement facilities such as parallelism, angular measurements, simple 2D measurements, etc.
- Integral computer.
- Easy generation of test reports.

Digital height gauges

Measuring system:

- Incremental optical measurement system gives outstanding measuring accuracy and reliability.
- Air bearings system for easy movement without jerking.
- Easy measuring procedures due to motorised measurement slides.
- Integrated rechargeable battery for cordless measurements.
- Temperature compensation using internal temperature sensor.

Control and display unit:

- Large, clear touch display with backlight.
- User guidance via self-explanatory icons in several languages.
- Facility for setting additional zero points on the component.
- Additional measuring device can be connected to the Mahr-Connect interface.
- Future-proof as it can be updated.
- Automatic stand-by circuit (no loss of measured values).

Functions:

- Approaching at bottom/top.
- Protrusion width/slot spacing incl. protrusion/slot centre.
- Bore/shaft diameter incl. bore/shaft centre.
- Reversal point of bores (top/bottom).
- Reversal point of shaft (top/bottom).
- Calculate spacing/symmetry.
- Dynamic measurement functions.
- Squareness measurement.
- Straightness measurement.
- Measurement programmes.
- Processing of measurement data.
- Direct print-out on USB or wireless printer.
- Measurement reports in PDF format or can be saved as a CSV file.

44 5355/5375 – In addition:

- Quick measuring keys and thumbwheel for quick movement of the measurement slide and easy start of the measurement.
- Quick-mode function.
- Further functions: Measure in 2D mode, cone measurement, automatic distance calculation, set a 3rd zero point, enter fits according to ISO (e.g. "H7").

Supplied with: Control and display unit. Carrier No. 445410 size T6, contact point No. 445420 size K6/51, adjustment block, USB cable, safety guard, power supply unit, lithium-ion battery and instruction manual.

Optional extras: Wireless printer set No. 499017 size PRINTER, iwi radio receiver No. 498912 size STICK (2 pcs. required), contact point set No. 445400, data connection cable No. 498941 size DK-M1, carrier No. 445410 size TI, dial indicator No. 434671.

Straight edges

Hardened, ground, and precision lapped straight edge. Wedge shaped cross section tapering to a point for inspection even in corners, grooves, cut outs etc. With plastic insulated handle to protection against body heat.

46 0095 – Made of **stainless** steel. **Both bevels anti-glare matt finished.**
46 0100 – Made of aged special steel, both bevels burnished (anti-glare).

Note: The straightness tolerance of the measuring edge refers to a displacement range of ± 15° to the symmetry plane.

Roll-up steel tape measure

Stainless steel tape with wear-resistant stove-enamelled markings.

- 46 1992 – With a handy belt clip.
- Size 2H; 3H – With hinged hook.

Function:

- 46 1830 – Retracts easily at the push of a finger.
- 46 1992 – **Runs out automatically at the push of a button** and stops when the button is released.

Advantage: The convex camber allows the tape to lie **flat** on the desk, so that dimensions can be read and transferred easily and without errors.

The ruler retracts easily at the push of a finger.

Measuring tapes in capsule or frame

Capsule: Indestructible plastic casing with soft finish surface. Storage is provided in the casing for the crank arm and the pull ring. Can be converted for left-hand use.
Frame: Light metal frame with ball bearing mounted fast winding and folding crank.

46 5500 – Size 30 upwards with Vee side pieces.

46 2900/4500/3050/4850/3100/4900 – **Tape:** Patented tape start, **flextop coating.** Tape coating, made of transparent, highly flexible plastic, reliably prevents the tape from breaking at the start.

46 2900/4500 – **White steel measuring tape.** Hardened tape, phosphated coating provides corrosion resistance, with wear-resistant synthetic resin coating. Good legibility. With mm graduations throughout.

46 3050/4850 – **Stainless tape** of hardened chromium-nickel steel, transparently enamelled. Scale printed with clear, easy-to-read figures and graduations. Break-proof, with good flexibility. With cm graduations (first 20 cm graduated in mm).

46 3100/4900 – **Polyamide coated steel measuring tape.** Break-proof, with good flexibility. Non-buckling spring steel. **High abrasion resistance,** weather-proof and resistant to many chemicals and oils. With mm graduations throughout.

46 3300/5500 – **Glass fibre measuring tape. Extremely** buckling-resistant **and flexible,** weather-proof, and resistant to many chemicals. **Electrically non-conducting.** Good legibility. With cm graduations.

46 4500–4900 – Sizes 20 and 30 with straight side pieces, size 50 / size 100 with Vee side pieces.

Note: Additional versions with 100 m length, or with inch graduations, or with start of scale type B / C available on request.

Measuring tape CJU for measuring external circumferences and ∅

G2 Cal

Steel measuring tape **CJU** for measuring external circumferences and ∅ of spherical bodies. The spring steel strip is laser scaled on the front with 2 scales, one for circumference and the other for ∅. Graduations 1 mm. **Vernier reading 0.1 mm.** Scale graduation error limits to DIN 866.

46 5682/5684 – **V2A version** made of stainless spring steel.

Advantage:

46 5684 – Easy handling and centring capability thanks to broad contact face. Increased stability. Quicker and more reliable measuring.

Note: Measuring tapes C with reading 0.05 mm and measuring tapes with black coating available on request. Fixed version CJU on request.

Laser distance meter DISTO™

mm/Inch

Impact resistant plastic casing with easy-to-use keypad with symbols. High quality **Leica glass lens** in an particularly temperature-resistant and sturdy **magnesium casing.** Illuminated and rotating colour display for optimum legibility. Laser class 2 tested in accordance with ISO 16331-1.

Size D2 – Small and handy laser distance measuring tool, especially for indoor work.

Size X3 – The **integral 360° inclination sensor** shows the inclination of an object when the casing is placed directly on it, thus permitting indirect height measurement. Multi-function endpiece for measuring from corners. A robust rubber membrane protects the lens and also provides protection if dropped from a small height.

Size D5 – Powerful distance meter with integrated point finder camera for easy aiming over long distances or when outdoors. Patented gesture control with 2.4-inch colour display, XL end piece.

Size X6 – Integrated point finder camera for easy aiming when indoors and outdoors. 2 m drop resistance, patented gesture control with 2.8-inch touch colour display, XL end piece, measuring button on the side.

Supplied with: Protective holder and wrist strap.

Size D2 – Supplied with 2 batteries No. 081561 size LR3.

Size X3 – Supplied with 2 batteries No. 081561 size LR6.

Size D5; X6 – USB-C cable and integrated Li-ion rechargeable battery.

Note: Data transfer via Bluetooth® Smart; also by smartphone using Leica "DISTO™ Plan" app (Android from version 8.1, Apple from iOS 16.2). Easy generation of sketches.

Simple creation of dimensioned sketches and inserting dimensioning into a photo using the DISTO Plan app.

BOSCH Laser distance meters

Laser distance measurement device with robust, shock-resistant casing, splash-proof and dust-proof. Illuminated three-row display for optimum legibility. Laser class 2 to IEC 825-1.

Size GLM50-27C – Simple operation with improved user interface and illuminated display. Plug-in function. The integral 360° inclination sensor shows the inclination of an object when the casing is placed directly on it, thus permitting indirect height measurement. Create a digital floor plan, import existing floor plans, edit them and export the result together with simple building site dimensioning. Quick and efficient data transmission and documentation thanks to Bluetooth® connectivity and Bosch MeasureOn app.

Size GLM150-27C – Save images in the internal memory and transfer images to the PC via USB. Integrated Li-ion battery makes for very flexible working and improves sustainability.

Size GLM100-25C; GLM150-27C – Precision over long distances. Measurements transmitted via Bluetooth® to the new MeasureOnApp.

Supplied with: Includes protective case.

Size GLM40 – With batteries 081551 LR3.

Size GLM150-27C – Incl. Li-ion battery + micro-USB cable.

Size GLM50-27C; GLM100-25C – Incl. batteries No. 081551 LR6.

Optional extras: Measuring stand No. 468558.

L-BOXX

BOSCH Location device

Reliable location even of buried objects up to 120 mm deep. Three detection modes (plasterboard, metal, live cables) for different applications. Reliable detection of objects, giving a visual and acoustic signal.
Point measurement enables location even on very small surfaces. Optical indication of direction for precise localisation of the object centre.

Application: Detectable materials: Ferrous metals, non-ferrous metals, wooden frameworks, live cables. Additionally detectable material: Plastic pipes filled with water.

Supplied with: Li-ion battery, quick charger, L-Boxx

Garant Light metal spirit level with digital clinometer

Electronically measures the angle and displays it digitally. The measuring computer can be calibrated both horizontally and vertically in mere seconds. Can also be used conventionally thanks to one horizontal and one vertical level.

Advantage:
- Lithium-ion battery can be charged via USB-C.
- Automatic screen rotation.
- Sturdy anodised aluminium profile.
- Prismatic measuring face.
- Acoustic guidance.
- Dustproof and waterproof.
- Integrated digital circular level.

Supplied with: Rechargeable battery supplied. In a stable, transparent plastic screw tube.

Optional extras:
- USB charger No. 081601 size HC105.
- USB charging cable No. 081603 size USB-C.

Garant Shaft spirit levels

Sturdy housing of high quality special casting; Vee base with ground contact surfaces in the angle (important for marking out, aligning, etc.). All measuring faces are exactly parallel to the axis of the vial. One longitudinal and one transverse vial each of glass. With insulated handles on the housing and protective glass over the vials.

Adjustment of the longitudinal vial:
An adjustment screw allows the longitudinal vial to be reset to the 0 position easily and without play, with no need for disassembly.

Standard: **DIN 877**

Accuracy: **1** = with very high sensitivity longitudinal vial **0.02 mm/m.**
2 = with high sensitivity longitudinal vial **0.1 mm/m.**
4 = with normal sensitivity longitudinal vial **0.4 mm/m.**

Application: For aligning surfaces, shafts, machines etc.

Leica Geosystems Self-levelling cross-hair laser Leica LINO

Robust, ergonomic plastic casing; proof against dust and splashed water.

Size L2; L2G – Pulse function with power-saving mode. **Very long working life** of up to 44 h due to Li-ion battery. The magnetic adapter can be attached to any wall that has steel elements. **The magnet can be freely pivoted and easily released.** Locking for inclined projections and for protection in transport.

46 8481 Size L2G/8486 Size L6GS; L6G – **With green laser lines for optimum visibility. Up to 400% better visibility than red laser lines.**

Size L6RS–L6G – Self-levelling multi-mains laser with 3× 360° laser lines. One horizontal and two vertical 360° laser lines. Laser lines thin, sharp and clearly visible. Laser power can be set in 3 stages for better visibility or longer operating time. Self-levelling over long distances in the event of inclined positions. Time saving by easy setting up of the zero point. Fixed zero point thanks to integral base. Simple and precise alignment of the laser lines by ±10°. Memory function of personal settings. Dust-proof and splash-proof. The triple power-supply concept permits uninterrupted work. Can optionally be operated with Li-ion battery, AA batteries or power supply unit.

Supplied with:

46 8486 Size L6RS – 3× battery No. 081561 LR6, laser target plate, bag.

Size L6GS – Li-ion battery, charger with mains adaptor, laser target plate, bag.

Size L6G – Li-ion battery, charger with mains adapter, battery holder, laser target board, magnetic adapter TWIST 250, wall adapter UAL 130, fall protection rope, case.

Size L2; L2G – Supplied with adapter, Li-ion battery, charger, battery holder, target board and case.

BMI Universal laser autoMAGIC

Cross-hairs and 5-beam laser combined in a single device, **self-levelling via a magnetically damped pendulum system.** Pulsed laser lines horizontal and vertical, can be adjusted separately or jointly. Plumb-line lasers upwards and downwards; 3 horizontal laser beams forwards, to the left, and to the right; all laser beams are at an 90° angle to each other. Lockable for generating "oblique lines" and for protection during transport.

Supplied with: Magnetic wall bracket with threads for attachment to stands, laser target board, carrying case, and 3 batteries No. 081561 size LR6.

Type		5SP

Digital hand-held tachometers

mm / Inch | i Cal

Non-contact measurement by reflector strip, contact measuring by means of mechanical adapter tip, memory selectable using MODE button for maximum value, minimum value, or most recent value. Switches off automatically 30 seconds after the last key action.

Application: **Rotational speed measurement:**
– optical 1 to 99999 rpm non-contact,
– mechanical 0.1 to 19999 rpm with contact tip.
Speed measurement (with measuring wheel).
– 0.10 to 1999 m/min
Length measurement (with surface disc).
– 0.00 bis 99999 m

Supplied with: Includes mechanical adapter, measuring wheel (0.1 m) No. 471180, hollow measuring tip No. 471190, drive cone centre No. 471170, measuring wheel (6 inch), reflector strips No. 471150, case, 2 batteries No. 081561 size LR6.

Hand-held stroboscope with particularly high light intensity

I2 Cal

High adjustment accuracy and stability thanks to dynamic response of the control wheel. High light intensity thanks to energy-efficient electronic circuitry and high-performance Xenon flash lamp. Memory function (last value is saved when switching off the device). Trigger input for synchronising the flash sequence. Stand connection on the casing. Battery life of min. 2 hours.

Application: For measuring very small objects or in inaccessible locations – without interrupting ongoing operations. Ideal for measuring rotational speed and for inspecting parts that move at a high frequency.

Supplied with: Incl. carrying case, charger with 4 country adapters and trigger signal plug.

BENNING Socket tester

Quick and easy check of earthed plug sockets for correct connection. Wiring errors such as missing PE, N and L lines as well as mixing up of L and PE lines are clearly displayed via 3 LEDs. Easily understandable status table gives information about the correct connection (OK, green) and the type of error (red) of the earthed plug socket.

- Active PE test with contact electrode and LC display warns about the presence of a dangerous touch voltage (>50 V) at the earth conductor connection (PE).
- Test button for triggering 30 mA FI/RCD earth leak trip switches.
- Clear display via LEDs and LC display.

Application: Socket test, 30 mA test FI/RCD earth leak trip switches.

BENNING Non-contact phase and cable break tester

For quick and easy phase testing at sockets, junction boxes, switches and lamps. Locates cable breaks in insulated cables.

Standard: **DIN EN 61010-1.**

Function:

47 3282 Size VT1 – IP40: Protected against penetration by foreign bodies with Ø > 1 mm, however tools and wires should be kept away, and offers no protection against water.

Size VT2 – IP53: Protected against splashed water from directions up to 60° when in normal operating position and protected against penetration of dust into the inside (protected against dust), also completely protected against touching.

Application: Phase testing, testing of insulated cables and testing for broken cables.

47 3280 – Additional phase sequence testing.

47 3282 Size VT2 – Also magnetic field testing on valves, switches, relays, pumps and magnetic field coils.

Supplied with: 2 batteries No. 081561 size LR3.

Device type		TRITESTPRO
47 3270	Phase sequence indicator **TRITEST pro**	eShop
Display phase voltage		L1, L2, L3 (LED)
Three-phase sequence display		right-hand / left-hand (LED)
Voltage range AC	V	400 – 500 (50 Hz-60 Hz)
Overvoltage category		CAT III 300 V
Article no of the battery / rechargeable battery fitted		081561 LR6

BENNING Continuity and semiconductor tester

High-resistance and low-resistance continuity testing with 3-stage LED display and sound intensity of the test buzzer. External voltage and polarity display, single-pole and contactless phase testing. The buzzer sound intensity (3-stage/ OFF) and illumination intensity (4-stage) are adjustable. With high-power LED torch.

Standard: **IEC / EN 61010-1, (DIN VDE 0411-1).**

Application: Testing electrical wiring, systems, devices and components.

Supplied with: Includes 4 mm test probes, magnetic holder and belt clip.

Optional extras: Batteries 081561 size LR6.

47 3260

Device type		DUTESTPRO
47 3260	Continuity tester **DUTEST pro**	eShop

External voltage display AC / DC	V	6 – 400; pulsing warning tone
single-pole phase test		via 4 mm test lead /non-contact via detector
Article no of the battery / rechargeable battery fitted		081561 LR6

HOLEX Continuity and semiconductor tester

Compact tester in sturdy two-component housing, visual and acoustic indications. Easy to use due to crocodile clips, includes separate indicator lamp (red and green) for continuity and polarity testing at long distances, overvoltage protection 250 V.

Standard: **EN 61326-1:2013.**

Application: Continuity testing of dead electrical wiring, etc. Polarity measurements of semiconductor elements such as diodes, transistors, etc.

Supplied with: 1 battery 081551 size 6LR61.

BENNING Digital current clamps

Robust and ergonomic plastic casing with illuminated LCD display. Reliable AC and DC measurements without breaking the operating circuit. Recording of measured value and maximum value, relative measurement.

Standard: **IEC / EN 061010-1 (DIN VDE 0411-1).**

Application: Digital service multimeters for a wide range of applications. These provide a high level of safety and other additional functions.

Size CMP2 – Very high resolution of 10 mA AC in the 40 A measurement range. Integral Volt sensor (NCV) provides non-contact phase voltage signals and detects broken leads in cables (visual/acoustic). Inrush current measurement (INRUSH), low-pass filter (LPF), ZERO function.

Size CM2-1 – AutoV function for automatic AC/DC detection. Low input impedance (LoZ) to suppress "reactive voltages". Low-pass filter (HFR 800 Hz) for measurements on pulsed motor drives. Voltage sensor for non-contact phase and cable-break testing. Memory (HOLD, MAX/MIN). Zero setting.

Size CM10-1 – For professional use in industry, service and manual crafts. Capacitance measurement, diode testing. Data logger, memory, Bluetooth, app. Switch-on current measurement (INRUSH), low-pass filter (HFR), voltage sensor, ZERO function.

Size CM11 – Ideal for trouble-shooting in electrical systems, controls, equipment and vehicle electrics. Precise measurement of small AC/DC currents (stray currents, differential currents and leakage currents).

Supplied with: Batteries, probe leads, compact protective case, operating instructions.

BENNING Multimeter

▶ I3 ◀ Cal
▶ I7 ◀ Cal

Sturdy plastic casing with large-format, 3½ inch, 4 inch or 4¾ inch LCD display.

Standard: **IEC / DIN EN 061010-1 (DIN VDE 0411-1).**

Application: Digital service multimeters for a wide range of applications. These provide a high level of safety and other additional functions.

Size MMP3 – Digital multimeter, pocket-sized. Small and narrow (132×86×19 mm) - only 130 g in weight.

Size MM2 – Precise current measurement ranges (200 µA and 2/20/200 mA) for ionization current measurement on the gas burner and for testing the sacrificial anode in the boiler (heating and air conditioning technicians).

Size MM5-2 – Microampere measurement range for ionisation current measurement, continuity testing with buzzer and red LED for noisy environments.

Size MM7-2 – AutoV function for automatic AC/DC changeover and measurement range selection, LoZ function with low input impedance, quick continuity test, socket check with warning (fuse protection).

Size MM10-PV – For precise and reliable measurements on PV systems and applications with high system voltages in industry, manual trades and service. Data logger, memory, Bluetooth, app, AutoV for automatic voltage detection, LoZ and low-pass filter (HFR).

Size MM2-3; MM2-1 – The entry-level category into professional measurement technology. Optimum price-performance ratio. Quick continuity test, socket check with warning (fuse protection).

Supplied with: Batteries, probe leads, compact protective case, operating instructions.

Size MM5-2 – Wire temperature probe, rubber protective surround with magnetic hanger.

Size MM10-PV – Wire temperature probe, rubber protective surround, crocodile clips, TA PV measurement adapter.

Size MM2; MM2-1 – Rubber protective surround.

Size MM2-3; MM7-2 – Wire temperature sensor, rubber protective frame.

Multimeter

Ergonomic plastic housing with integral holster. Large LCD display for good legibility. Reliable and easy to use – **warning if the test leads are connected wrongly.**

Size 115 – Thanks to its simple operation, it is ideal for use in mobile services.

Size 177 – Additional LED backlight.

Size 179 – Additional LED backlight and temperature measurement.

Size 87V – Precise voltage and frequency measurements of motor drives with frequency inverters and other electrical devices on which harmonics overlay the fundamental frequency. Integral low-pass filter.

Size 175–179 – The leading measuring tools for troubleshooting electrical and electronic systems for professional technicians. Robust, reliable and precise.

Standard: **IEC 61010, ANSI/ISA S82.02.01, CSA C22.2-1010.1**

Application: Digital service measuring instruments with additional functions for numerous applications and the highest level of safety.

Supplied with: Includes battery 081561 6LR61, test leads and removable insulating caps.

Size 179; 87V – Temperature sensor.

BENNING Appliance tester ST725

Testing of devices with mains-voltage circuit elements such as electronically-controlled devices/tools, devices for information technology and communications technology, and for devices which cannot be fully tested without applying mains voltage, in accordance with VDE 0701-0702, DGUV regulations 3.

Application: **Automatic testing procedure** with pass / fail indication for devices of classes I, II and III, and line test. VDE limit values are pre-installed. **Measured values memory** for 999 test objects can be read via the micro-**USB** port. Download software for creating test reports in MS Excel. Integral real-time clock for storing measured values with test date. Protective conductor current / contact current by means of differential current / direct measurement method with (mains mode) and leakage current measurement method (battery mode).

Supplied with: Case, test lead with crocodile clip, mains power cord, light-current mains power cord, batteries 6× No. 081561 LR6, micro-USB cable, download software (CD) and operating instructions.

Optional extras: Printer

BENNING Insulation resistance measurement device IT101

▶ I11 ◀ Cal

Insulation resistance measurement device for insulation and low-resistance measurements **on electrical systems, appliances, cables, motors, and generators.**

Function: Leakage current, polarisation index (PI), absorption factor (DAR), automatic discharge function, zero balancing of the measurement cables.

Application: **Measurements:** Amongst others low-resistance, insulation resistance (test voltages: 50 V, 100 V, 250 V, 500 V, 1000 V) and calculation of the resulting leakage current, resistance with 200 mA test current for testing earth continuity conductor connections, polarisation index, dielectric absorption factor, voltage, resistance.
Special features: Limit values can be selected for ISO measurement, green LED for OK, red LED for test / external voltage, switchable test prods for triggering the measurement process, memory for 100 values per measurement function, automatic discharge of capacitive voltages, zero balancing of the measurement cables, lock function.

Supplied with: Carrying case, test leads, crocodile clips, switchable test prods, rubber protective surround and 4 batteries No. 081561 size LR6.

FLUKE Thermal imaging camera

Sturdy high-performance thermal imaging camera for visible depiction of infra-red radiation.

- **Picture-within-picture mode:** Simple troubleshooting thanks to simultaneous display of the visual image and the thermal image.
- **Fluke Connect:** Simple saving of measurements and images via WLAN.

Size PTI120 – **Small compact design in pocket format.**
LC touchscreen 8.9 cm (3.5 inch) for easy operation and troubleshooting.

Size TC01A – Mobile version for connecting to Android.

Application: For preventative maintenance and monitoring of both mechanical and electrical systems or production processes. Particularly suitable for maintenance, building trades, heating and ventilation installations, together with facilities management and building services.

Supplied with:

Size PTI120 – Supplied with lithium ion battery, USB cable, carrying loop and carrying case.

Smart probes

Compact measuring devices optimised for the smartphone. All measured data are transmitted directly to the free testo Smart Probes app (system requirement: iOS 8.3 or Android 4.3 or later / Bluetooth® 4.0) and can be read by a mobile terminal, converted into a report and then sent out directly by e-mail.

- Simultaneous display of up to 6 Smart Probes.
- Wireless reading of the measured values on your mobile device.
- Variations of the measured values can be displayed as a graph or as a table.
- Measured data reports can be supplemented by photos.

Note:	Further smart probes (thermometer, clamp thermometer, differential pressure measuring device and high-pressure measuring device) available on request.

Infra-red temperature measuring device

Infrared temperature measuring device with smartphone operation. Contactless infra-red measurement of the surface temperature. Measuring spot marking by very easily visible 8-dot laser circle. Simple selection of the emission grade from the stored material list. Pictorial documentation with measured values and measuring spot marking.

Supplied with: 4 batteries No. 081561 LR3 and calibration certificate.

Data logger for temperature and moisture

Robust and compact 2-channel data loggers with large back-lit display. Internal memory for 1 million measured values. High data security, even when the battery is flat. Measurement interval adjustable between 10 seconds and 24 hours. Battery life ≥3 years (measurement interval 15 min, 25 °C). Two standard interfaces (mini-USB and SD card) for easy programming and reading the logged data by direct connection to a PC.

Size 175T2 – Connection for 1 external temperature sensor (type NTC).
Size 175T3 – Port for 2 external temperature sensors (type K and T) No. 474120, 474140 or 474150.
Size 175H1 – Additional measurement and logging of the relative humidity.

Supplied with: With wall bracket, lock, 3 batteries No. 081561 size LR3, and calibration certificate; ComSoft Basic V5 software available for downloading free of charge.

Optional extras: USB cable 474183 size USB.
Size 175T2 – Temperature sensor (type NTC) on request.

testo Saveris 2 wireless data logger system

The testo Saveris 2 wireless data logger system is a simple, flexible and secure solution for monitoring the temperature and moisture values together with the CO_2 concentration in stores, cold stores and work rooms as well as process sequences.
The wireless data logger reliably displays temperature, moisture and CO_2 concentration at configurable intervals and transmits the measured values via WLAN to the testo cloud, where they can be evaluated and monitored at any time.

Advantages:

- All measured data are available at all times.
- Reports by e-mail, SMS or alarm limits or push communications when alarm limits are breached.
- Simple and automatic monitoring of critical processes.
- Data transmission via WLAN.
- Fee-free online data storage (testo cloud).

Noise level meter

Noise level meter, accuracy class 2 to IEC 60942.

Function: Frequency evaluation to characteristic curves A and C; current measured value; partial measurement ranges; evaluation over time (switchable between: FAST 125 ms / SLOW 1 s); min / max memory.

Application: The ideal tool for everyday use, whether air conditioning or heating systems, measurement of machine noise or noise of an incinerator.

Supplied with: Supplied with microphone, windshield, screwdriver for calibration and battery No. 081561 size 6LR61.

Note: Noise level **calibrator** available on request.

ALLURIS

Digital force gauges, tension – compression

- Sturdy force gauges in a handy aluminium die-cast housing for compressive and tensile forces from 0.001 to 2500 N.
- Overload protection up to 500% and protected measurement shaft.
- Attachment thread for additional handles.
- Precise positioning in test stands by a guide pin.

47 8980 – ■ Ready for use at all times thanks to the free-standing photo-voltaic power supply.
47 8983–8987 – ■ High measurement rate for precise recording of peak values to determine fracture or tearing forces.
47 8985/8987 – ■ Measured value memory with statistical analysis and limit value monitoring.
■ **USB interface** for data transmission to a PC.

Advantage:

47 8985 – Measurement data software for evaluation in MsExcel. COM-Bridge software for direct data transmission from the measuring device to the Windows PC.
47 8987 – Data evaluation and test bench control in combination with motorised test stands. **Supplied with DAkkS calibration certificate.**

Application: **Measurement of compressive and tensile forces in quality assessment and production.** For use as a mobile manual measurement gauge both in outdoor areas and in test stands or jigs. Attachment thread integrated into the housing permit attachment in test stands or mounting of additional handles.

Supplied with: Force gauge in a protective case. Screw-on accessories for force transfer (flat head, slot head, cone, hook). Quick-start instructions.
47 8985 – Software FMI-Connect.
47 8987 – Software FMI-AnalyzePro+.

FMT-220 vertical test stand with handwheel

- Robust aluminium/stainless steel design can accept loading up to 2500 N, with additional guide rail.
- Perfect guidance for compressive and tensile force measurement, thanks to the additional linear unit.
- Precise positioning by means of a height-adjustable spindle lift gearbox with handwheel.
- Bench top with attachment facilities for clamps or slotted plates.
- Very flexible mounting plate for digital draw bar pulling force gauges.
- Side handwheel can be replaced by a motor unit.

Application: For simple non-speed-dependent tests on materials and components in quality assurance and production.

Supplied with: Vertical test stand with handwheel drive, including attachment points for force measurement devices and operating instructions (force measurement devices must be ordered separately).

Optional extras: Digital draw bar pulling force gauges No. 478980 – 478987. A motorised option can be retrofitted. T-slot plate including 4 Tee nuts FMT-937 on request.

Manual pull-tester FMT-W30

- Manual pull-tester with manual lever for determining the tensile strength of all non-soldered (crimped) cable connections.
- Space-saving, non-slip and sturdy bench-top device with hardened non-scratch base plate.
- Cordless, so always ready for use.
- Interchangeable mounting adapters with 12 different slot widths cover all popular sizes of cable.

Application: Testing cable connections to IEC, DIN, EN, BS, UL, SAE, MIL and NASA standards.

Supplied with: Pull-tester complete with test adapter and terminal pull-off jig, USB interface and instruction manual.

Optional extras: Various exchangeable adapters available, FMT_W_Connect evaluation software.

MetLogix GMBH

Digital force gauge, tension – compression

Universal force gauge with colour display for precisely measuring tensile and compressive forces. Sturdy die-cast housing.

- Displays the current force value and peak value.
- Programmable function keys.
- Monitoring of tolerance limits with visual and acoustic display.
- Memory for storing measurements.
- Statistical evaluation of saved values.
- Interface for exporting data.
- Display can be switched between N, gf, kgf, lbf, ozf.

47 9027 –
- Measured values can be transmitted via Bluetooth®.
- Average force over time.

Supplied with: Carrying case, charging plug with USB connecting cable, accessories (pressure pad, hook, tip, fin, V-slot, extension).

Optional extras: Manual test stands No. 479029.

WIKA Load cells

Hydraulic load cell with directly attached pressure gauge for static and quasi-static force measurement.
Body and piston stainless steel, pressure gauge of pressed brass with memory pointer. Protected against contamination with foreign particles and water spray (IP43).

47 9100 – 3×M5 tapped hole in the cell base for attachment.

Advantage: When used in accordance with instructions, a leaktightness warranty of 5 years is given.

Application: In machine tool building.

47 9110 – Particularly suitable for **measurements on vices.**

47 9115 – Particularly suitable for **use in three-jaw chucks.**

Supplied with: Display unit, manufacturer's certificate of conformity, and transport case.

WIKA Digital load cells

Hydraulic load cell with digital pressure gauge. Robust and straightforward design, ideally suited to rough operating conditions. 4 1/2-digit backlit display for directly displaying the force value enables the force value to be optimally read off.
The additional graphical display with memory pointer indicates the tendency of the instantaneous load force. Min./max. memory and tare function can be called up independently of the main display. To ensure simple and interference-resistant data transmission, the CPG1200 has a micro USB port; 3 pcs. M5 tapped hole in the cell base for attachment.

Advantage: When used in accordance with instructions, a leaktightness warranty of 5 years is given.

Supplied with: Display unit, 3 batteries No. 081561 size LR6, manufacturer's certificate of conformity, and transport case.

HOLEX Spring balance – contactors

Sturdy metal housing in practical design; hammer finish. Clear dial face with double scale for measuring in both directions. With pointer and memory pointer.

Accuracy: ± 0.01×(measuring range + measured value).

Application: For electrical engineering and fine mechanical work, e.g. setting the contact pressure of relay springs, checking the brush pressure on motors or for adjusting tension or compression springs.

PESOLA Spring balances 60 g to 50 kg or spring force gauges 3 N to 500 N

Precision balances with high accuracy ± 0.3% of the load. Taring range up to 20% of the capacity. Any measuring position (apart from No. 479410 - only vertical). Zeroing and 20 % tare via the adjustment screw. Top and bottom mountings can be rotated by 360°.

47 9420/9422 – With drag pointer and handle.

Supplied with: Plastic case and instruction manual.

Optional extras: Conversion kit into spring force gauge No. 479421.

- **Formulation:** separate memory for weight of the tare vessel and of the formulation ingredients (net total).
- **KERN Universal Port (KUP):** allows the connection of external KUP interface adapters, such as RS-232 or USB, for exchanging data and control commands, without installation effort.

Supplied with: Mains adapter 230 V / 50 Hz and protective hood.

Optional extras: External rechargeable battery, data cable, printer, interface adapter such as RS-232, USB on request.

KERN Counting scales

- Precision counting scales with automatic reference optimisation (progressive refinement of the average value of the item weight).
- Target item count and target weight programmable to give an acoustic signal.
- Cumulative item counter for totalling identical items by total quantity and overall weight.
- Reference quantities or reference weight.
- Selectable mains and battery operation.
- **CAL calibration programme:** For calibrating the accuracy (requires an external calibration weight which is available on request).
- Display switching between items and weight.

47 9541 – Checkweighing display: Acoustic or visual feedback if weighing is outside a pre-determined limit value.

47 9542 – **Counting system** consisting of **reference scales and quantity scales (platform scales)** with a 2.0 m connection cable.

Supplied with:

47 9541 – Mains adapter 230 V / 50 Hz, battery and protective hood.

47 9542 – Mains adapter 230 V/ 50 Hz and protective hood for reference scales.

Optional extras:

47 9542 – Internal battery, signal lamp available on request.

47 9541 *Visual checkweighing signal*

KERN Basic platform / parcel scales

- Robust parcel scales for the dispatch department.
- Simple operation by 4 keys.
- Display unit with character height 25 mm can be placed away from platform; can be positioned or mounted using approx. 2 m long flexible cable.
- Suitable for mains and battery operation, auto-off after 3 minutes.

Supplied with: Mains adapter and wall bracket for display unit.

Optional extras: 6 batteries No. 081561 size LR6, stand for the display unit available on request.

KERN Calibration weights on request

Calibration weights for installing and checking the accuracy of scales available in various accuracy classes as individual weights or sets of weights from 1 mg to 50 kg.

On request also with DAkkS calibration.

RS232C IP 65

KERN Platform scales with buildtype approval for verification

- Robust stainless steel platform scales can be used as parcel, industrial, and counting scales.
- Dual-range scales with automatic changeover between the ranges (more precise display in the lower half of the weighing range).
- Display unit with numeral height 24 mm can be remote from platform; can be stood or mounted using flexible cable.
- High mobility due to optional battery operation and compact design.
- Provides an **optical and acoustic signal** to support portioning, metering or sorting within the tolerance range.
- **Percentage determination:** Enable weighing out to a prescribed value (100%) and determination of deviations from that set value.
- **Quantity counting:** Easy counting function allows quick counting of large numbers. Reference quantities selectable 5, 10, 25, 50 pieces.
- **CAL calibration programme:** For setting the accuracy (external calibration weight required for this available on request).

47 9608 – Platform scales **with buildtype approval for verification** (optional verification can be ordered under No. 479609.) A wide variety of (optional) data interfaces permit easy transfer of weighing data. Optional formulations available: Separate memory for weight of the tare vessel and of the formulation ingredients (net totals).

Supplied with: Supplied with mains adapter, table base including wall bracket, protective hood.

Optional extras:

47 9608 Size 30 – Calibration No. 479609 size 30

Size 60L; 150 – Calibration No. 479609 size 300

Note:

47 9608 – For proper verification, the installation location of the scales must be stated. When ordering scales, please also order verification No. 479609 and state the installation location.

KERN High resolution platform scales

- Robust platform scales can be used as parcel, industrial, and counting scales.
- Display unit with numeral height 21 mm can be remote from platform; can be stood or mounted using flexible cable.
- Robust platform with a protective hood over the display unit.
- Simple, self-explanatory user guidance with (yes/no) dialogue in the display.
- Selectable mains or battery operation (battery available on request).
- Units of weight (e. g. screw weight) can be freely programmed.
- With automatic reference optimisation for exact counting.
- **Adjustment programme CAL:** For accuracy adjustment (required calibration weight available on request).
- **Quantity counting:** Reference quantities selectable 1, 5, 10, 20 pieces.
- Display selectable between pieces and weight.
- **Numeric tare preference** for well-known container weight. Useful for filling quantities.
- **Percentage determination:** Display of deviation from the reference weight in % instead of in grammes.
- KERN Universal Port (KUP): allows the connection of external KUP interface adapters (not included) such as RS-232, USB for exchanging data and control commands, without installation effort.

Supplied with: Mains adapter 230 V / 50 Hz and protective hood.

Optional extras: Internal and external rechargeable battery, calibration weight, wall attachments, printer, stand and interface adapter such as RS-232, USB on request.

Weld seam gauges

47 7590 – Simple weld seam gauge of aluminium. Measuring range flat seams 0 – 5 mm. Measuring range corner seams 2 – 15 mm.

47 7600 – Measuring range 20 mm, reading 0.1 mm. Slide with clamping screw. Stainless steel.

47 7620 – Measuring range 0 – 20 mm. Reading accuracy 0.1 mm. Reading using reference line in the reading window. Measurement error largely eliminated by single-sided positioning of the gauge. Stainless steel. **Integral straight edge from 0 – 90 mm.**

47 7700 – 12 blades, held fan-shaped by a ring (3 / 3.5 / 4 / 4.5 / 5 / 5.5 / 6 / 6.5 / 7 / 8 / 10 / 12 mm).

Application:

47 7590 – For quick measurement of flat and corner seams.

47 7600 – For measuring flat and fillet welding seams.

47 7620 – For easy and quick measurement of the weld seam height. For measuring the flank angle α.

47 7700 – For checking welding seams in right-angled corners.

Standard

Feeler gauge shim strips in rolls – to tolerance T3

Cold rolled, hard spring feeler strip steel of maximum precision.
From size 0.02, the strip thickness is continuously marked and cannot be wiped off (exception: for No. 478502 from size 0.08).
Stored in a practical dispenser; pull out like a tape measure.
The desired length can be cut from the 5 or 10 m long strip.

47 8450–8504/8515–8525 – **C-steel –** Carbon steel, material No. 1.1274, cold rolled, hardened, bright surface. **(size 0.01 and 0.02 stainless)**.

47 8505/8507/8530/8540 – **Non-rusting** acid-resistant stainless steel, material No. 1.4310 (or 1.4301 for thickness 0.005–0.05 mm), cold rolled, spring hardened, bright surface.

Application: In jig and tool building for aligning and adjusting machine parts, as a shim for aligning components, for tolerance measurements of all kinds, for checking fits and guides, for setting up printing rollers.

Supplied with:

47 8525 – From size 0.8 supplied in a roll / ring.
47 8530/8540 – From size 0.3 supplied in a roll / ring.

Feeler gauge shim strip set in a wall rack – in tolerance T3

15-piece set in a metal wall rack. Feeler gauges in plastic boxes.
Supplied with: Fastening material and feeler gauge holder No. 478510.

Type			0,01-0,25	0,3-1

Shim stocks 50 mm / 100 mm / 150 mm wide

Cold rolled, hard spring feeler strip steel of maximum precision. Shim thickness is marked and cannot be wiped off. Stored in sturdy boxes.

47 8750 – **C-steel** carbon steel, material No. 1.1274, cold rolled, hardened, bright surface (size 0.02 stainless).
47 8755/8760 – **Stainless** and acid resistant steel, material No. 1.4310 (or 1.4301 for thickness 0.02 and 0.05 mm), cold rolled, spring hardened, bright surface.

Application: **Setting** tools; **adjusting** devices; **balancing** tolerances; **shimming** components; **aligning** machines; **setting up** forms; **adjusting** bearing play; **adjusting** drive alignments; **setting** shear knives; **aligning** components etc.

Supplied with:
47 8750 – 1 pack with 10 shim stocks.
47 8755/8760 – 1 pack with 5 shim stocks.

Mitutoyo Gauge block set, steel

Made of carefully selected, aged special steel. Particularly wear-resistant due to controlled hardness (HV 800). **Carefully hardened and hand lapped. Edges slightly bevelled. Manufacturer's test certificate traceable back to national standards:** Each gauge block is provided with its own unique identity number. The actual deviation from the nominal dimensions is recorded in the test certificate. The absolute actual dimension is therefore known.

48 0200 – **Tolerance class 0** as a master standard to check workshop gauges. For setting gauges to very high accuracies.
Size 8 – **Set with long dimensions**, 25 – 200 mm in 25 mm steps.
48 0300 – **Tolerance class 1** for checking standards, gauges and for setting length gauges as well as for normal inspection work in the inspection room.

Garant Advantages of GARANT ceramic gauge blocks

Ideal for daily use in manufacture:

- Stainless.
- No need to degrease before use.
- No need to grease after use.
- Insensitive to shock and impact.
- Twice as hard as steel.
- 10 times higher wear resistance.
- Highly resistant to alkalis, acids, oil and grinding water.
- Non-magnetic.
- No galling.
- Low thermal conductivity.

DIN EN ISO 3650 | S17 Cal

HOLEX Gauge block set, steel workshop quality

Made of aged special steel. Hardened (HRC 64 – 66) with slightly bevelled edges. Lapped gauge faces.
With free test certificate traceable to national standards:
Each gauge block is provided with its own unique identity number. The actual deviation from the nominal dimensions is recorded in the test certificate. The absolute actual dimension is therefore known.

48 0450 – **Tolerance class 1** for checking standards and gauges.
48 0500 – **Tolerance class 2** workshop gauges for production.

Gauge block set ceramic

Made of ultra-pure ceramic zirconium dioxide (ZrO_2) manufactured in a sintering process.

- **Hardness:** With approx. 1350 HV about twice as hard as steel.
- **Tensile strength:** Up to approx. 70 % of the flexural strength of steel. Insensitive to shock and impact.
- **Wear resistance: Lasts about 10 times longer than steel.** No burr formation. No plastic deformation. Scratches and small defects have no influence on the measured result. The surface remains slip capable longer than steel.
- **Handling / care:** Highly resistant to alkalis, acids, oil, and grinding water. **No need for time-intensive degreasing before use and re-greasing after use which is required for steel.** Low weight is an advantage for large sizes.
- **Temperature characteristics:** Coefficient of expansion (9.5 ±1.0) 10^{-6} K^{-1} similar to that of steel. Low thermal conductivity.
- **Anti-magnetic:** Cannot be magnetised.
- **Slip capability:** The homogeneous, high density structure gives optimum holding, even to steel, and easy slip capability. Galling is excluded.
- **Test certificate:** Each gauge block is provided with its own unique identity number. The actual deviation from the nominal dimensions is recorded in the test certificate. The absolute actual dimension is therefore known. **Manufacturer's test certificate traceable back to national standards.**

Application:

48 1300 – **Tolerance class 0** as a standard for checking working gauge blocks or high precision equipment.
48 1250/1310 – **Tolerance class 1** as working and adjusting master for gauge checking. For inspection rooms.

Individual gauge blocks

All gauge blocks are marked with an individual identification number.
Size 0.5 to 10 – cross section = 30×9 mm. Size 11 to 500 – cross section = 35×9 mm.

48 1030 – **Tolerance class 0** as a master standard to check workshop gauges. For setting gauges to very high accuracies. **Including traceable test certificate.**

48 1060 – Made of high purity industrial ceramic (Zirconium Dioxide ZrO_2).

48 1030/1050/1070 – Of special alloy steel, carefully hardened and stress-relieved.
Size 0.5 to 10 – cross-section = 30×9 mm.
Size 11 to 500 – cross-section = 35×9 mm.

Flatness		µm	0.1

Sets of test pins in a wooden case

Of high quality gauge steel, hardened (60 ± 2 HRC) and tempered. The test pin sets are arranged in a wooden case for ease of location, with labelled holes (from 1.5 mm ∅ the pins are also directly marked). Test pin length 40 mm up to ∅ 0.99 mm, 70 mm above that. From ∅ 0.1 mm to ∅ 2.49 mm on both sides with chamfer, from ∅ 2.5 mm one side with chamfer.

Application: For work on jig boring machines or in jig and tool making, e. g. for measuring bore tolerances, for checking positions of bores, checking the spacing tolerances of two bores, gearwheel or thread dimensions as well as for angle and profile inspections etc.

Tolerance class 1	Pin ∅ ± 0.001 mm cylindricity ± 0.0005 mm

"Go" / "No Go" plug gauge set

Content: 7 pieces, 1× "Go" / "No Go" plug gauge No. 484000 each in size 3, 4, 5, 6, 8, 10, 12 all in tolerance class H7.

Nominal size range	mm	3-12
48 4005	Plug gauges set H7	eShop

48 4005

Gauges from the Hoffmann Group – made in Germany

- Precision gauges from Germany's most renowned manufacturers.
- Aged gauge steel for the highest possible dimensional accuracy.
- Excellent wear performance due to optimum surface quality.
- High hardness for a long service life.

► L6 ◄
Cal

Plug gauges with intermediate size and ISO fit or numerical tolerance

Measuring body made of first class gauge steel, hardened, stress-relieved, ground, and lapped.

The "Go" ends of these working gauges have a wear allowance to DIN 7164.
Plug gauges with intermediate size and ISO fit, e.g. No. 484025 **2.37 H6** or numerical tolerance, e.g. No. 484025 **28 +0.01 / -0.02.**

Standard: Tolerance and dimensions to **DIN 1938-1, DIN 2245-1 and DIN 7164.**

Note:
- Please state the exact nominal ∅ with tolerance band (A-ZC) and quality (6-13) or numeric tolerance (±).
- Intermediate size plug gauges are just double-ended plug gauges in fractional sizes!
- For whole number (even) ∅ with ISO fits see No. 484000; 484020; 484040 or on request.
- For acceptance gauges (without wear allowance) see No. 484027.

Type	48B 48 4025 Double-ended plug gauge with intermediate sizes **with wear allowance**	Nominal size mm
A	(eShop)	2 – 2.999
B	(eShop)	3 – 10
C	(eShop)	10.001 – 14
D	(eShop)	14.001 – 18
E	(eShop)	18.001 – 24
F	(eShop)	24.001 – 30
G	(eShop)	30.001 – 40

Setting rings

Setting rings (checking rings) of first class gauge steel, hardened, stress-relieved, ground and lapped. **Each setting ring is engraved with the actual size.** Manufacturer's tolerance for the bore is JS4.

Standard: To **DIN 2250 C.**

Application: For general applications, e.g. for setting and testing measuring tools.

Note: **Other intermediate sizes up to 320 mm can be easily ordered, e.g. 484030 size 82.**

Garant **Setting Bench SB 1**

Horizontal setting device with touch screen suitable for the workshop environment **for setting internal and external measurement devices.**

Advantages:

- Easy and **convenient operation**.
- Large intuitive operating display.
- **Integral tolerance calculator** when the nominal size and fit are input.
- **Generation of favourites** for repeated setting of measuring tools.
- **High cost-effectiveness: Approx. 85 % time saving** compared to setting with gauge blocks.

DIN 13 | MF

Thread gauges for metric ISO fine threads

The ground first thread lead chamfer (from 1 mm pitch) removes contamination in the component and prevents premature fracture of the first full thread lead chamfer.
Design to **DIN 2279 – 2299**.

48 6100 – **"Go" and "No Go" ends on a single handle (DIN 2240, part 1 form R).** "No Go" end marked red.
48 6120/6130 – **"Go" and "No Go" gauges are separate (DIN 2240, part 2, form GE).**

Standard: Tolerances and dimensions to **DIN ISO 1502.**
Application: For metric ISO fine threads, right-hand DIN 13.

Note:	Thread gauges for threads with other pitches, Whitworth, trapezoidal, round, UNC, UNF, and NPT threads as well as left-hand threads available on request.

DIN 8140 | EG-M | ▶ L10 ◀ Cal

Thread gauges for metric ISO insert threads (EG)

Thread gauge for testing insert threads (EG) of wire thread inserts. The ground first thread pitch removes coarse swarf in the component and prevents premature fracture of the first thread pitch. Version to DIN 2279 – 2299. **"Go" and "No Go" ends on a single handle (DIN 2240, part 1, form R).** "No Go" end marked red.

Standard: Tolerances and dimensions to **DIN ISO 1502 and DIN 8140.**

Application: For metric ISO-profile insert threads (EG), right-hand DIN 8140-2.

Thread gauges MultiCheck with depth measurement

Similar to No. 486000 and 486100.
Robust, easy-grip steel body with calibrated aluminium slide for measurement and direct reading of the **thread depth up to 4×D**.

Standard: Tolerances and dimensions to **DIN ISO 1502.**

Advantage: Checking the thread gauge conformity and the thread depth in a single operation. Time saved for one inspection task up to 50%. Easy replacement of a worn gauge head (fitting kit on request).

Note: MultiCheck for coarse and fine threads, with vernier (reading to 0.1mm) or with digital display (reading to 0.01mm) including data output available **on request** (see No. 486511 – 486516).

Lens shapes for magnifying glasses

Convex *or converging lenses have the effect of concentrating the light. At least one of the faces represents the curvature of a sphere segment. Therefore these lenses are referred to as spherical lenses (sphere, Greek = ball).*
Biconvex *lenses are convex on both sides.*
They permit ***less distortion at higher magnifications*** *than planoconvex lenses.*

An ***aplanatic*** *lens system consists of 2 planoconvex lenses, whose flat faces both are directed outwards.*
This allows a ***sharp-edged image free of distortion.***

SCHWEIZER Standing magnifier Tech-Line without illumination

Aplanatic silica glass lens in low-reflection brass setting with lead-in protection. Heavy cast base with black plastic coating. Flexible metal swan neck 300 mm in length.

- Ergonomic design - low power consumption - long-life LEDs (up to 50,000 operating hours).
- Lamp magnifier with 84 long-life high-power LEDs.
- Adjustable ring illumination or segmented illumination, dimmable in 3 stages. Strength of illumination ring illumination: 6000 lx/ 3500 lx/ 2400 lx; segmented illumination: 2350 lx/ 1450lx/ 960 lx.
- Colour temperature 6500 K.
- Ra value 86.
- Full light output immediately - flicker-free.
- PXM® aspherical lightweight lens with cera-tec® hard coating and 3.55 dpt/2× and ∅ 132 mm permits a wide field of view, image is sharp right to the edges and free from distortion, for non-fatiguing work.
- Lens cover can be swung aside or removed.
- Quick change of view between magnification and normal view using "free-swinging" lens.
- Extremely low weight and 6 joints allow optimum alignment of the magnification head for any situation – variety of fastening options.

Supplied with: Table clamp for worktop thicknesses 18 – 74 mm.

Optional extras: Additional lens 6 dpt/2.5× magnification with ∅ 132 mm.

Note: Table base and lens spray protection for the underside are available on request. The light source can be exchanged by the manufacturer.

HOLEX LED lamp magnifier

Lamp magnifier with high-quality SMD-LEDs for non-reflecting, shadow-free and evenly illuminated field of work. Sharp-edged image, free of distortion. Long-lived LEDs (up to 50,000 h), low power consumption.

Size 100 – 48 SMD-LEDs. Additional add-on lens ∅ 22 mm for 3.5× magnification.

Size 125 – 60 SMD-LEDs; 2 levels of brightness.

Size 175 – 40 SMD-LEDs; 3 levels of brightness.

Supplied with: Lens cover, table clamp for worktop thicknesses 10 - 62 mm (size 100 with table base).

Lens shapes for magnifying glasses

__Aspherical__ lenses have a different radius at each point of the lens, and thus have nothing in common with a sphere. This variation in the curvature of the lens surface gives a great reduction in distortion, especially at the edges of the lens. Aspherical lenses permit __optimum freedom from distortion__ at a precisely determined eye distance.

Since the individual colours of the spectrum are refracted to different extents, the images display coloured edges.
This can be avoided by employing an __achromatic lens pair__. This ensures a __true colour image.__

Garant LED lamp magnifier

Elegant lamp magnifier with high light intensity. Lamp head, upright tube, and flexible neck of sturdy metal.

- The specially developed lamp cover with integral optics focuses the light **without dazzling and with minimum scattering losses** on the inspection area (4 times more light per Watt than a fluorescent tube, working life approx. 50,000 h = 6 years 24/7).
- **Distortion-free, hard-coated** plastic lens.
- Modern **highly efficient lighting concept**, consisting of 63 LEDs on a ring base.
- The lamp is **switched and dimmed** by placing a finger on a soft-touch sensor.
- The high quality flexible neck and the slender profile, reduced to the essentials, means the LED lamp magnifier can be used everywhere.

Advantage: 6 years 100 % illumination with no maintenance costs.
Easy and quick to clean (enclosed system).
Insensitive to vibration. Functional design.

Supplied with: With plug-in power supply adapter 100 - 240 V, lens cover and table clamp No. 491492 size TK.

Optional extras: Table base No. 491492 size TF.

Note: Further table or machine bases available on request.
The light source can be exchanged by the manufacturer.

4 times more light per Watt – switched and dimmed at the touch of a finger.

Innovative design of lamp magnifier for the most demanding applications.
Large viewing area with ∅ 153 mm for distortion-free viewing.
Robust jointed arms of aluminium and high performance plastic, well balanced with spring restraint (colourless anodised), hold the exact position.
Joints enclose and protect the cabling internally.

- **Absolutely scratch-resistant** glass lens - for distortion-free vision.
- **3D head joint** for individual adjustment and fixing.
- **Illumination:** 112 SMD high-power LEDs, power consumption only 13 W.
  Light intensity 5500 Lx, can be steplessly dimmed down to 10 %, LED working life up to 50,000 h.
- The **segment circuit (visualiser)** permits lighting effects that emphasise the structure.
  Colour reproduction stage 1A for brilliant rendering of colours.

Supplied with: With plug-in power supply adapter 100 - 240 V, 50/60 Hz, lens cover and table clamp No. 491492 size TK.
49 1497 – With additional add-on lens 30 mm ∅.

Waldmann W Lamp magnifier

LED lamp magnifier for anti-glare and evenly illuminated work field. Freely moving jointed arm.
The spring holds the lamp in any position.

- Hardened, ground and **scratch-resistant** glass lens. **Pivoting.**
- Rectangular lamp magnifier for powerful and even illumination over a large area, with 54 LEDs. Power consumption only 12 W, light intensity 7000 Lx, luminous flux 970 lm, multi-stage switchable. LEDs with up to 60000 h working life.
- Segment switching for recognition of the finest structures and defects. Depending on the application, can be switched between light with formation of shadows and all-round shadow-free light.
- Large field of view for distortion-free viewing.

Supplied with: With cover and plastic screw-on foot.

Optional extras: Table base No. 491660, table clamp No. 491670.

Note: The light source can be exchanged by the manufacturer.

Waldmann W LED lamp magnifier

Innovative design of lamp magnifier for the most demanding applications.
Large viewing area with Ø 153 mm for distortion-free viewing.
Unique balanced lamp support (aluminium) with enormous effective radius.
Enclosed design for protection of the user and the integral technology.

- **Absolutely scratch-resistant** glass lens
- **3D head joint** for individual adjustment and fixing.
- **Illumination:** 48 high-performance LEDs, power consumption just 16 W, max. light intensity 7503 lx, steplessly dimmable. Light characteristics can be adjusted by a three-position switch. LEDs with up to 50,000 h working life.
- The **segment circuit (visualiser)** permits lighting effects that emphasise the structure. Very good colour perception and high-contrast vision.
- Due to special coating, suitable for **ESD workstations**.

Supplied with: Plug-in power supply adapter 100 – 240 V, 50/60 Hz, lens cover, screw-on flange, base.

Optional extras: Table clamp 491670 size ESD

Note: The light source can be exchanged by the manufacturer.

KERN Stereo microscopes

Attractively-priced stereo microscope for simplified viewing of mechanical components, circuit boards and surfaces.
Greenough optics for the best reproduction quality.
Optimum illumination by steplessly dimmable LED incident illumination and transillumination.
The eye spacing of 55–75 mm is individually adjustable.
The tube is inclined at 45°.

49 1735 Size OSF439 – Particularly stable thanks to mechanical stand with handy carrying handle. Exchangeable lens with 3 levels of magnification for quick work.

49 1737 Size OZL465 – Shadow-free and even illumination thanks to integral LED ring illumination.

Size OZL463; OZL465 – Zoom lens for stepless magnification of 7–45×. Dioptre compensation adjustable on both sides for non-tiring work and a sharp image.

Supplied with: Dust cover, eyepieces.

Leica High quality stereo microscopes A-series

StereoZoom microscope with a magnification range from 5× to 30×, allowing both detail viewing and also a general overview.
Thanks to the patented FusionOptics™ technology, the Leica A60 achieves a depth of focus of 13.6 mm at the lowest zoom setting which avoids tedious refocussing when viewing higher components.

- Unrivalled depth of focus (13.6 mm).
- 46 mm object field.
- Ergonomic working due to the high working distance (122 mm).
- Antistatic plastic casing.
- Including LED ring light with 10 brightness steps.
- Clip-on diffuser (removable) for reduction in reflections.

Size A60S – With swing arm stand.
- For repeating objects.
- Direct earthing point in the base.
- Particularly high stability for working at high magnifications.

Size A60F – With flexible arm stand.
- Easy inspection of the object in x and y direction.
- Easy height adjustment for differing object heights.
- Table clamp mounting makes maximum space saving.

Application: Ideal for industrial inspections, assembly, and quality control.
Supplied with: Mains cable.
Optional extras: Transillumination No. 491777 size BLI.

Stereo viewing system Mantis® without eyepieces

Excellent, high-quality images for a wide range of applications in an easy-to-use, ergonomic system. The Mantis® optical stereo microscope provides a detailed and high-contrast 3D image that is perfect for 3D viewing and manipulation of a wide range of applications. A comfortable body position, maximum eye comfort, improved hand-eye coordination, user-friendliness and perfect stereo vision enable a higher level of precise, comfortable, and productive performance over longer periods of time.

Size PIXO – includes integrated digital camera for dynamic viewing.

49 1985 – With the versatile VERSO universal stand, the system can be raised and lowered to the correct position as required.

49 1986 – Additional range of the stand with extension arm. Rotate by 270°.

49 1987 – Compact, stable table stand with large focusing range. Maximum object height 146 mm. Incl. transillumination.

Advantage:

- Uniquely large, high-quality optical stereo image.
- Ergonomic design for user comfort and productivity.
- Five different options for illuminating your object.
- Digital imaging for collaboration, traceability and training.
- Perfect for numerous applications thanks to large working distances and excellent depth perception.

Supplied with: Incl. stereo head, LED lighting, dust cover, power supply unit, glare protection.

Size PIXO – includes 5 MP digital camera, ViCapture software.

Optional extras:

Size IOTA – Lenses No. 491991.

Stereo microscope STEMI 305

Stereo microscope for high resolution, intensely illuminated sharp focus images. Greenough design for the best image quality. **Integral vertical LED light source.** Individually adjustable to compensate for eye spacing and short-sightedness. Carrying handle for mobile use. Cold light stand, adjustable incident light: flat transillumination base (bright field / dark field), column with drive and 145 mm length of travel. Can be segmented with additional K LED spotlight with light beam adjustable for zoom and height.

Size 305FLEX – With additional double spotlights (swan-neck).

Size 305RING – With additional segmentable K LED ring lamp - 48 LEDs in 2 rows.

Optional extras: Eyepieces No. 491832.

Garant Measurement and documentation software on request

Simple measurement software for image archiving, measurement and labelling of images. Measurement directly on the live image with cross hair (adjustable, can be moved and rotated). Image feed via the USB camera or PNG file. Image export as a file, e-mail and to the printer.

System requirements:

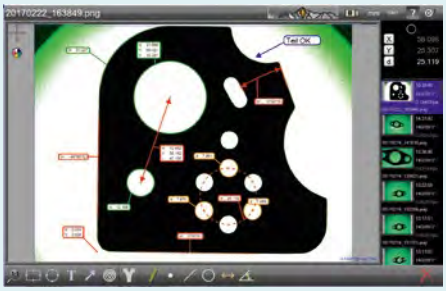
- Requires Windows 7 (32/64 bit) or later, Windows 10 recommended.
- Free USB port.

Function:

- Measurement of points, straight lines, circles, angles and distances.
- Construction of intersection points (tangent point, zero point), distances (centre/centre, min, max), straight lines (alignment lines, centre lines, tangents), cross-section circles and pitch circles.

Supplied with: USB stick with software D1, USB dongle for software activation and instruction manual.

Intuitive measurement and dimensioning of different elements.



Labelling of images for easy documentation.

PHOTONIC LED ring light with segment control

Neutral white light (40 LEDs, light temperature 5900K), continuously dimmable.
Segment selection (1/4 circle) and rotation (left/right) for optimum contrast conditions.
Homogeneous illumination and flicker-free operation due to DC power supply.
LED working life 25,000 hours. ESD socket for dissipating static electrical charges.
Sturdy slim design of the lighting head, internal ∅ 66 mm, including the adapter.

Supplied with: Including control unit, international switched-mode power supply (100-240V) and adapter from ∅66mm to 58mm.

Optional extras: Accessory parts adapter ∅ 66 mm to 60 mm No. 492232 size 66/60, diffuser No. 492232 size DIFF, polarisation filter set No. 492232 size FILTER.

Note:	Adapters for lenses with other ∅ (Zeiss, Leica, Nikon) available on request.

Individual control of segments

Without polarisation filter.

With polarisation filter.

The use of a polarisation filter no. 49 2232_Filter eliminates reflections that can occur when using direct lighting.

49 2230

49K 49 2230	LED ring light with segment control		eShop
Ring lamp ∅		mm	66
Ring lamp height		mm	25

PHOTONIC High-power ring light with segment control

LED ring light with integral controller for user-friendly operation – no separate control unit necessary.
Ergonomic and intuitive to use for left and right-handed users.
2 working distances can be set (45 – 130 mm and 80 – 300 mm). Homogeneous illumination.
Segments can be adjusted individually. Memory function for the preferred setting.
Can be integrated into an ESD environment.

Advantage:
- Multiple working distances can be set
- No external control unit required
- Flexible and intelligent segment control

Supplied with: Supplied with an adapter ∅ 66 mm to 58 mm, international power supply unit (100 – 240 V), hexagon key L-wrench.

Optional extras: Diffusor, polarisation filter, adapter for lenses

PHOTONIC LED cold light source with swan neck fibre optic cable

Very bright dimmable cold light source with long-life (> 30,000 h) and energy-saving LED technology (5800 K).
Sturdy metal casing, can be stacked as a stable assembly. ESD socket for dissipating static electrical charges.
Extremely high light densities at the illuminated area.

Size F1 – Passive cooling, silent and vibration-free.
Size F3000 – Remotely controlled with a foot switch or USB, extremely quiet fan. Shutter functionality. Can be used in vertical orientation. Optional halogen filter simulates halogen light 3500 K.

Supplied with: LED cold light source, double swan neck fibre optic cable (∅ 4.5 mm, length 550 mm) with integral focussing lenses.
Size F1 – Including international power supply unit (100 – 240 V).
Size F3000 – With EU mains cable.

Optional extras: Halogen filter, foot switch No. 492244 size SWITCH.

Note:	Further fibre optic cables, gap ring light sources, colour filters and other accessories available on request.

Stereo microscope without eyepiece Lynx EVO

Stereo microscope without eyepiece, for viewing and analysing your components and samples in 3D. The patented Dynascope® stereo viewer generates a 3-dimensional image of first-class quality. The unique Lynx EVO stereo observation system without eyepiece allows the user a pleasant working position and hence significantly more efficient working.

- The modular design permits configuration to suit individual applications.
- The magnification is performed steplessly from 6× – 60× and can be increased to 120× by use of additional lenses.
- **Flexible stand options**
- **Ergo stand**. Compact size for **small working areas**. Exceptional stability at high magnifications.
- **Multi-axis column stand**. Precise and sturdy, ideal for industrial applications which require the **largest possible working area**.
- Large working distance for easy processing of components.
- **First-class ergonomics.** Non-fatiguing working due to straight natural posture, no restriction in the movement of the head and noticeable reduction in eye fatigue.
- **High image quality** due to true colour images at high resolution, rich in detail, with high contrast.

49 1865 – 8-point LED ring light with regulation of lighting intensity and integral rotating diffusion lens.

49 1866 – LED angled optics for a 360° all-round view to allow a **better view of details** and inspection of concealed details on vertical components. Easy changeover from oblique view to conventional perpendicular view.

Application: For all application areas in production and inspection where long working distances and high image quality are important. For assembly under a microscope. For continuous use due to non-fatiguing working. Also ideal for glasses wearers.

Supplied with: Projection head with lens and zoom unit 10: 1. LED illumination, dimmable.

Size ERGO – Table stand with removable lens carrier.

Size AXIS – Column stand for mounting at the workplace, base plate.

Optional extras: Smart Cam (with software) No. 491867, reticules.

Size ERGO – Movable table 100 × 100mm with plastic surface, LED transillumination.

49 1865 – Other lenses (0.45 × / 0.62 × / 1.0 × / 1.5 × / 2.0 ×)

Lynx EVO with Ergo stand. Compact size for small working areas.

49 1865_ERGO

Lynx EVO with multi-axis pillar stand. Ideal for industrial applications for which the largest possible working area is required.

Vision ENGINEERING EVOCam II video inspection system

Digital full-HD microscope with brilliant live video image quality for precise magnification of objects. Various optional wide-field and precision lenses allow up to 300× magnification with constant image sharpness.

- Brilliant full-HD video images (1080p / 60 fps).
- Large 30 : 1 optical zoom range with many magnification options (up to 300×) and 12× digital zoom.
- Effortless image storage either on external media (USB stick) or optional software solution (Vifox). **Integrated USB3 interface.**
- High-quality optics with modern digital technology.
- Fast, professional imaging for reliable results.
- Integrated 8-point LED ring lamp.
- High-quality stand versions for precision and stability.
- 24 inch full-HD monitor with HDMI input.

Size ECO2503; ECO2501 – Table stand.

Size ECO2504; ECO2502 – Multi-axis column stands (without base plate), focus module.

49 1895 Size ECO2CE1 – Variable jointed arm.

_ECO2CE1

_ECO2501

Application: Video inspection system for goods receiving, production and development. Large detailed live image for continuous use and viewing by several users at the same time.

Supplied with: With full HD colour monitor 24 inch, USB stick.

49 1895 – Lens 0.62×.

Optional extras: EVO Cam II control panel No. 491898, LED transillumination, WiFi transmitter dongle and additional lenses (0.45 × / 1.00 ×).

Size ECO2503; ECO2501 – Movable table 100 × 100.

Size ECO2504; ECO2502 – Base plate No. 491889.

Dino-Lite Digital Microscope USB hand-held microscopes

_AF3113T

_AM4113ZT

_AF4115ZTL

_AF4915ZTL

_AM7915MZT

Easy-to-use portable digital microscope for professional use in various disciplines. Thanks to the CMOS chip / USB 2.0 connectivity, it can be easily connected to any device and offers outstanding image quality and up to 220x magnification. Polarisers reduce reflections on shiny objects and improve contrast. The magnification depends on the desired field of view. The smaller the field of view, the higher the potential magnification. Models with a long working distance can be used if you need a greater distance to the object. Includes intuitive measurement software for Windows and macOS.

Size AF3113T – Has measurement functions as well as microtouch button for recording images directly.

Size AM4113ZT – A handy, easy-to-use professional hand-held microscope with first-class image quality and up to 200 times optical magnification.

Size AF4115ZTL; AF4915ZTL – With a longer working distance (LWD), connected to the device via USB. The (optional) WF-20 is required for fully cordless operation.

Size AM7915MZT – The product offers outstanding image quality and colour reproduction in a sturdy, compact and attractive casing and up to 220x optical magnification. Also available as a model with a large working distance.

Supplied with: Measurement software DinoCapture 2.0 (Windows) and DinoXcope (macOS).

Optional extras: Pillar stand No. 492035

Note: Other versions (e.g. with coaxial incident light, ESD protection, etc.) and system calibration service available on request.

Garant Video measuring microscopes MM-OS

The high-quality video measuring system in conjunction with the user-friendly M3 measuring software is **particularly well suited for the quick and comparative measurement of flat components.**

- Long-lived **LED incident light** for clear and homogeneous illumination of the workpiece.
- Telecentric dimmable **LED transillumination.**
- **Aluminium granite base** and measuring table with **tapped holes** for attachment of clamping systems.
- High-resolution colour camera with telecentric lens.
- Extremely user-friendly, intuitively usable M3 measurement software including **DXF functionality.** Very high repetition accuracy thanks to **automatic edge detection.**
- **Automatic component recognition in seconds** at any angle of view.
- **Mechanical height adjustment with graduated scale** permits both the measuring plane and a clamping system to be adjusted individually and reproducibly.

Application:
- Measuring, dimensioning, and evaluation of flat components such as O-rings, washers, plugs in seconds, in a single operation.
- A wide variety of geometric shapes and materials can be reliably measured in a user-friendly manner. Documentation can also be performed.
- Various applications, for instance in production, inspection rooms or goods receiving.
- Compact general-purpose measuring system.

Supplied with: Multi-touch panel PC, wireless mouse and keyboard, dust cover, power supply unit, test certificate, and user manual.

Optional extras: Test standard No. 491928; precision vice No. 494480; base cabinet for measuring microscopes No. 492580.

Note: Length measurement variation $E_{UXY, MPE}$ to DIN EN ISO 10360-7.
Permissible ambient conditions: 20 °C ± 1 K, temperature gradient Δ_{th} = 0.5 K/h, Δ_{td} = 4.0 K/d, measured with a calibrated standard. We reserve the right to make technical changes and to change the touch panel version.

_1800×900

Garant Video measuring microscope MM1

Measuring microscope with quick image processing, high-resolution colour camera, and a multi-touch panel PC that is easy to operate and suitable for the workshop environment, with **intuitive M3 measurement software.**
Incident illumination: 56 white LEDs in 2 concentric rings. 1 ring and 4 segments can each be separately switched and dimmed.
Transillumination: Long-life LEDs, telecentric, can be switched and dimmed. **Solid granite base** with surface-hardened indexing table and high-precision guides. Ergonomic quick adjustment with one-handed operation in both axes (X and Y). **Diode laser** as positioning guide. Very high repetition accuracy thanks to **automatic edge detection.**

Size 200MZ; 300MZ –With motorised zoom lens, magnification from 0.3× to 3.5 and coaxial light for uniform illumination of components.

Application:
- In goods receiving, in the inspection room, in manufacturing.
- Suitable for general purpose use due to flexible four-quadrant incident light and compact measurement computer.
- A wide variety of geometric shapes and materials can be reliably measured in a user-friendly manner. Documentation can also be performed.

Supplied with: All-in-One PC, wireless mouse and keyboard, dust cover, power supply unit, test certificate, and user manual.

Optional extras: Lens No. 491912, software option No. 491913, cutting edge cleaner No. 354788; test standard No. 491928; precision vice No. 494480; quick-clamping system No. 494451; base cabinet for measuring microscopes No. 492580.

Note:
Length measurement variation $E_{UXY, MPE}$ to DIN EN ISO 10360-7 for magnification factor = 0.5.
Permissible ambient conditions: 20 °C ± 1 K, temperature gradient Δ_{th} = 0.5 K/h, Δ_{th} = 4.0 K/d, measured with a calibrated standard.

For all GARANT video measuring microscopes we can offer you the following on request:
- Maintenance contract.
- Installation and commissioning with brief instruction on use.
- Individual training for your employees.
- On-site calibration.

We reserve the right to make technical changes and to change the touch panel version.

56 LEDs can be switched and dimmed flexibly in rings and segments for optimum illumination of the workpiece.

Garant MM1 video measuring microscope

Laser for contour measurement on the MM1 for CNC/CMZ applications available on request

Advantages:
- **Height measurement: non-contact and quick.**
- Profile tracking with a dynamic Z-axis.
- Various sensor accuracies available.
- **Can be retrofitted.**

Garant MM1 CNC video measuring microscope

CNC-controlled video measuring microscope with quicker image processing, high-resolution colour camera, and a multi-touch panel based on a PC, easy to operate, suitable for the workshop environment.
Incident light: 56 white LEDs in 2 concentric rings. 1 ring and 4 segments can each be separately switched and dimmed.
Transillumination: Long-life LEDs, telecentric, can be switched and dimmed. **Solid granite base** with surface-hardened indexing table and high-precision guides.

- Easy installation and use of **measurement programmes.**
- Practical **automation** of measuring processes, for example pallet measurements.
- Modern user-friendly measurement software for **intuitive operation**.

Supplied with: All-in-One PC, wireless mouse and keyboard, dust cover, power supply unit, test certificate, and multi-lingual user manual.

Size 200CMZ; 300CMZ – With motorised zoom lens, magnification from 0.3× to 3.5 and coaxial light for uniform illumination of components.

_300CNC-TP

Garant Software options for MM1

Size DXF – Loading complex DXF files and overlaying them with the live image. The DXF coordinate system can be brought into conformity with that of the workpiece (congruence) or it can remain independent of the workpiece (for matching the workpiece to a DXF geometry). Definition of tolerance bands. Active change of colour when the tolerance band is exceeded. Exporting measured elements in DXF format. Definition and overlaying of cross-hairs.

Size PROFIL – For the best possible matching of relative measurement points within a specified tolerance band (DXF option required). Several profiles with different tolerance ranges can be integrated into a single measurement procedure. Solely the component zero point must match that of the DXF file, following which the device (under CNC control), then automatically follows the contour.

Advantage:

Size PROFIL –
- Automatic matching of the measurement point cloud within a DXF tolerance band.
- Automatic contour tracking in accordance with the DXF file that was loaded.

Note: Individual links to your statistics software available on request.
Size PROFIL – The availability of a DXF option (pre-existing or ordered with the tracking unit) is required for the profiling option.

HOLEX Precision vices

Precision vice in hard chrome-plated (brass) or anodised (aluminium) version. Ideal for use with small parts, e.g. on microscopes and shadowgraphs or with surface roughness measuring tools. Angular accuracy 0.04 mm, exchangeable clamping jaws of hardened, stainless steel and plastic. Fixed jaws with Vees for cylindrical parts. The additional Vee on the fixed jaw and the clamping slots on the long sides increase the versatility.

Note: Also available as Inox version (stainless) on request.

Clamping system for optical and tactile measuring machines

Modular, flexible, and versatile sets of high-quality aluminium components with long-life Hardcoat surface. All construction sets are specifically extendable.

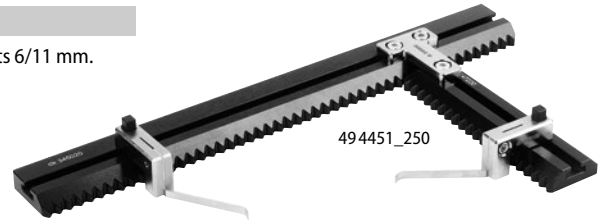
Rail fixing basic set

Suitable for: All GARANT measuring microscopes and all measuring machines with T-slots 6/11 mm. Other arrangements and slot sizes available on request.

Size 250 – For table widths ≥ 200 mm.

Size 350 – For table widths ≥ 300 mm.

Supplied with: Rack rails with fine-pitch racking, clamping clips, T-nuts, left/right spring clamps, bolts.



Type		250	350
49K 49 4451	Rail fixing basic set quick-clamping system	eShop	(eShop)
Length of base rail (rack teeth one side)	mm	250	350
Length of cross rail (rack teeth both sides)	mm	100	200
Length of spring clamps	mm	60	

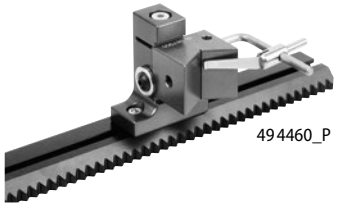
Extension sets

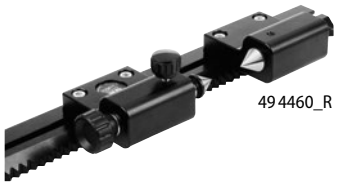
Size P – Small 120 degree Vee block for clamping rotationally symmetrical parts by means of spring clamps. Can be mounted vertically or horizontally.

Size R – Pair of tailstocks for quick and easy mounting of test pieces. One with fixed tip, one with sprung tip which can be clamped as required. The tailstocks are secured directly to the T-slot of the rack rail.

Supplied with:

Size P – Including Vee block on the rack rail.





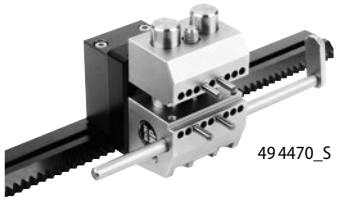
Type		P	R
49K 49 4460	Extension set	(eShop)	(eShop)
Clamping range	mm	2 – 25	–
Tip height	mm	–	20
Vee length	mm	25	–

Horizontal and vertical mounting on the rack rail (does not include attachment set No. 494475).

Size S – Precision vice with offset jaws and exchangeable guide pillars for extending the clamping range.

Supplied with:

Size S – Including 8 parallel pins (of which 4 are offset) for pin clamping, adjustable stop with scale, separate pillar set.



Type		S
49K 49 4470	Extension set	(eShop)
Clamping range	mm	0 – 75
Jaw width	mm	50

Horizontal and vertical mounting on the rack rail (does not include attachment set No. 494475).

Size D – Three-jaw manual chuck for inside and outside clamping of rotationally symmetrical parts. Jaws reversible without tools.

Supplied with:

Size D – With 3 plug-in parallel pins for clamping small parts, for increased clamping of small parts outside the jaws, offering complete accessibility.

Type		D
49K 49 4471	Extension set	(eShop)
Internal clamping ∅	mm	17 – 50
External clamping ∅	mm	0 – 55

Quick-release clamp and clamping bracket for fitting to the rack rail.

Suitable for: No. 494470 and 494471.

49K 49 4475	Attachment set for No. 494470 / 494471	(eShop)

Drawing stamp / position stamp

Practical drawing stamp for positioning feature marks on technical drawings in order to identify measurement points or remarks.

Application:

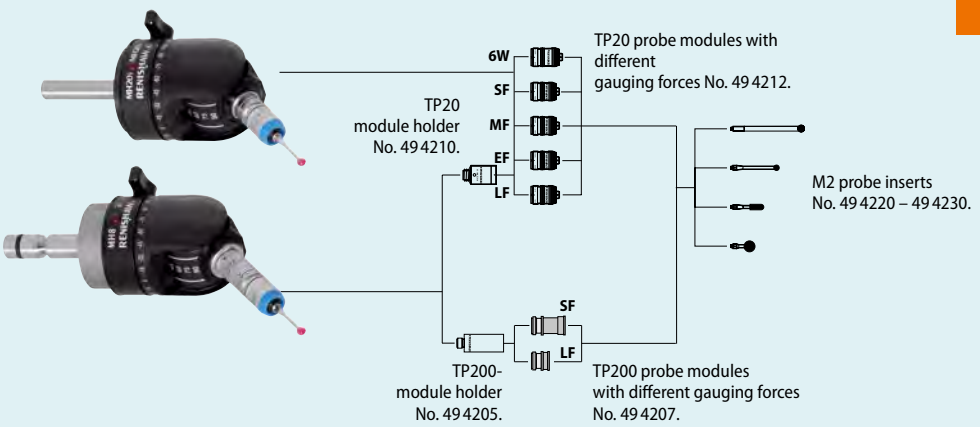
RENISHAW Measurement probe systems

MH20i manually indexable rotating / tilting head with integral TP20 probe module holder (on request).

MH8 manually indexable rotating / tilting head (on request).



49

RENISHAW Probe holders with probe modules

The modular design of probe holder and removable probe modules allows the facility of exchanging manual and automatic probe modules without laborious recalibration. For probes with RENISHAW automatic holder (autojoint), a PAA adapter has to be used.

Probe holder + probe modules TP20

The TP20 is a switching 5 or 6 way measuring probe. The TP20 can be used with all probes which have an M8 connection thread.

49 4210

Type		TP20
49D 49 4210	Module holder	(eShop)

The TP20 probe module contains the electro-mechanical sensor, carries the probe inserts (connection thread M2) and permits the probe movement in ± X, ± Y, and ± Z direction (± Z if the TP20 6-way probe module is used). Different application-specific probe modules are available. Their different gauging forces are indicated by different protective cap colours.

Coordinate plug gauge

Coordinate plug gauge for determination of the position and alignment of internal threads using a coordinate measuring instrument or tactile MM1 measuring microscope with the tactile TP20 measuring system.

Application: The plug supports itself by means of a difference in pitch between two successive turns of the thread and thus centres itself on the flanks of the thread. The probe measures the alignment in space of the smooth functional faces.

Industrial endoscopes

The stainless steel tube and high-quality lenses make it especially well suited to tough day-to-day work in industrial environments. The metal shaft and special glass lens-type end piece make the endoscope extremely resistant to damage and wear and provide optimal protection for the lenses. The rod lens system reliably provides clear, sharp and bright images and impresses by providing super-sharp images through to the edges in combination with the largest possible image aperture angle. Viewing directions from 0°–120° and aperture angles of 0°–105° for a wide range of applications.

Advantage:
- Optimum image quality – clear, sharp, bright.
- True-colour image reproduction.
- Built-in fibre optics.
- Pressure resistance up to +5 bar (in air).
- Maximum durability due to metal shafts.
- Oil, fuel and solvent resistance.
- Temperature resistance up to 150°C (and above).
- Available in the range 1.6 mm to 10 mm.
- Small diameter for viewing small workpieces and access points.

Optional extras: LED light sources, lens, HD camera, protective cover.

Note: Further probes with direction of view of 0°-120° and image aperture angle of 65°-105° are available on request. Versions with 340° rotatable lens shaft are also available.

Video endoscope VIPER

Lightweight, compact and flexible VIPER video endoscope. Quickly interchangeable probes with different diameters (from 2.2 mm) and operating lengths increase flexibility. With its low weight, the VIPER endoscope is extremely light and handy.

- Bright 4.3 inch monitor with CMOS camera technology for images in HD quality.
- Intuitive, easy to use.
- Long, uninterrupted inspections with commercially available battery packs.
- Fast data transmission with micro USB 2.0, mini HDMI connection and SD memory card slot.
- Quickly interchangeable probes with different diameters and operating lengths.

Supplied with: Power supply unit, micro-USB cable, video cable, 2× Li-ion rechargeable batteries, SD memory card 8 GB, metal stand, carrying case.

HD camera for endoscopes

The EN-sure USB HD camera is a compact and exceptionally versatile system, suitable for all rigid and fibre optic endoscopes. No matter how difficult the conditions are on site, the small dimensions and easy to use system means that it is ready for operation in just a few seconds. It delivers crisp, sharp images and videos in HD quality – for accurate, meaningful diagnostics. The bright LED light source is integrated into the system, eliminating the need for separate light sources and control units. Pick up the camera, connect your laptop, PC or tablet and get started right away. No software is required – you can save the inspection results directly to your connected device.

- Application with and without software.
- Zoom in / Zoom out.
- Automatic and manual white balance.
- Image memory function.
- Video recording function.
- Easy plug and play. Connection of notebook, PC or tablet – can be used with or without software (USB 3.0 or USB-C) and with Windows 7 or higher.
  - Size USB – Connection via USB interface.
  - Size HDMI – Connection via HDMI interface.

Supplied with: Including adapter for connecting endoscopes with diameters from 2.7 mm to 4 mm.
Size HDMI – Incl. screen.

Optional extras: Further adapters on request.

Note: Version without cable (WiFi) No. 492847 size WIFI.

HOLEX Video endoscope with measurement grid

Base unit with 3.5 inch LCD display and 2 m long flexible probe (Ø 5.5 mm, direction of view 0°). Robust watertight probe head (IP67) of stainless steel. Zoom mode (2×), mirror mode. Image aperture angle 60°, contrast and brightness control, black/white image mode for higher-contract images, images and videos can be saved on the SD memory card, USB, and AV output for data and image transmission. Probe with high-intensity LEDs at 0° alignment forwards and side LEDs at 90° to the direction of view.
Side-LED mode: When the screw-on probe mirror (110°) is used, activation of the side LEDs avoids generation of confusing reflections.
Measurement grid mode: Measurement of an object on the screen surface in conjunction with the measurement probe. Measurement field size 20×15 mm.
Illumination mode: Control switch for turning the image illumination on and off. For use in large voids and/or very dark surroundings.
Image rotation: 90° image rotation clockwise using the control button.

Application: For instance, for quick checking of weld seams. Defects can be measured immediately during the inspection.

Supplied with: Includes 1× probe No. 492940 size 2000 (IP67), carrying case, screw-on probe mirror (110°), SD memory card, contact point, USB data cable, cleaning set and 4 batteries No. 081551 size LR6.

HOLEX Video endoscope

IP 55

HOLEX video endoscope with large LCD display showing true-scale details, and comprehensive functions. The sun shade offers additional protection when in sunlight. The unit can be held steady using the two handles. The base unit is compatible with all HOLEX endoscope probes No. 492932 – 492944.

- **Base unit with 7 inch LCD display** (image cut-out 6 inches).
- **Zoom mode**; 3 stages of digital zoom: 1.5×, 2× and 5×.
- **Images and video recordings can be saved.**
- **USB and AV output.** The integral USB and AV outputs allow your images and videos to be transferred to a PC.
- **Integral rechargeable Li-ion battery with 5 hour capacity.**
- **180° image rotation** / reflection.

49 2923

Advantage:
- Intuitive touch display with full screen display.
- Exceptionally robust and ideally suited for use outdoors.
- Very large image aperture of 6 inches.
- Image aperture with adapter can be divided for parallel display of 0° and 90° viewing when using a probe ∅ 6 mm.
- Facility for adding comments by sound recording. The built-in microphone can be used during **video operation** for recording comments during the inspection. This eliminates the need for laborious writing and compilation of notes.
- Notes can be added **for images**.
- Comparison of saved images with live images.
- Selected settings can be clearly shown directly on the display.

Supplied with: Sturdy watertight and dust-tight transport case, SD memory card, power supply unit (AC 100 – 240 V / 50 – 60 Hz), USB data cable, AV cable, cleaning kit. **Without probe**.

Optional extras: Endoscope probes No. 492932 – 492944.

Touch screen.

Type		F1100

42L 49 2898	Adapter for 0° and 90° directions of view	eShop

IP 67

HOLEX Endoscope probes for HOLEX video endoscopes

Sturdy watertight probe head (IP67) of stainless steel with dimmable white LEDs. Direction of view 0°.

49 2937 – Probe particularly resistant over its entire length due to metal mesh protective sleeve. Particularly suitable for sharp-edged cast iron parts. Very flexible. Image aperture angle 90°.

49 2940 – Image aperture angle 60.7°.

49 2942 – **Elbow bend probe head:** Probe with hand grip and setting handle for bending the camera head in two directions (maximum 2× 155°). In conjunction with the probe mirror supplied, this allows inspection even of a recess that faces in the opposite direction to the insertion of the probe. A stop function for the desired angular position allows non-fatiguing working. Probe tip with braided metal protective sheath.
Image aperture angle 87.1°.

49 2944 – **2× 180° flexible probe head:** Probe with hand grip and setting handle for bending the camera head in two directions (maximum 2× 180°). For inspection of voids opposite the direction of entry of the probe, no additional probe mirror is needed. A stop function for the desired angular position allows non-fatiguing working. Complete probe with metal-braided protective hose, particularly resistant. Image aperture angle 90°.

49 2940/2942 – Very high image quality with 16.7 million colours.
Illumination mode: Control switch for turning the image illumination on and off. For use in large voids and/or very dark surroundings.
Side-LED mode: When the screw-on probe mirror is used, activation of the side LEDs avoids generation of confusing reflections.
Image rotation: 90° image rotation clockwise using the control button.

Suitable for: All endoscope versions No. 492923; 492924; 492925; 492928.

Application: Ideal for inspection of voids where access is difficult, e.g. **automotive:** Engine, gearbox, fuel tank, bodywork, dashboard, appraisal. **Aerospace:** engines, turbines, pipework, and wiring systems. **Buildings:** Assessment of the structure of buildings, water damage, pest infestation. **Pipework systems:** weld seams, traces of foreign bodies, leaks. **Hydraulic systems:** cylinders, leaks. **Heating - sanitation - air conditioning:** ovens, furnaces, boilers, air conditioning systems, drainage systems. **Pest control:** Bees' nests, wasps' nests, birds' nests, insect entry points. **Police, customs:** Vehicle checking, goods checking.

Supplied with:

49 2940 – Screw-on probe mirror 110°.

49 2942 – Screw-on probe mirror 70°.

Note: Other types of probe (up to 30 m) with other probe head Ø and directions of view available on request.

Mitutoyo Measuring projectors PJ-PLUS

Detail with application example

Projector for the exact transillumination and incident light inspection of small to medium-sized components. **Universal tool** for use in production, laboratories, inspection, and grinding shops.

- **Standard lens 10×**. 20x, 50x and 100x magnification lenses on request.
- **Vertical, rotating 315 mm cross hair screen** with built-in digital angle display, changeover function for reading in degrees or decimal.
- The **telecentric lighting system** guarantees a vertical and even illumination of the image field.
- **LED transillumination and incident lighting** with stepless light intensity control ensure a long service life with low power consumption.
- **Fanless design** prevents the ingress of contamination into the unit.
- **Sturdy coordinate measurement table,** with quick adjustment in both axes.
- **Built-in digital display** (with data output) guarantees reliable, error-free measuring.
- For **measuring lengths, angles, curves, and radii**.

Supplied with: Incl. lens 10× magnification, anti-glare, cover, and mains lead.

Optional extras: Cutting edge cleaner No. 354788.

Note: Further special accessories such as lenses, tilting central support, horizontal Vee, toolholder, standard comparison scales or an edge sensor with QM-Data 200 analysis unit available on request.

Mitutoyo Profile projector PV-5110

Profile projector for precise transillumination and incident light checking of large components. **Robust free-standing device** for universal application in production and inspection.

- **Standard lens 10× magnification.** 5x, 20x, 50x and 100x magnification lenses on request. Maximum distortion of the lenses 0.2%.
- **Rotating screen ∅** effective 508 mm.
- **Integral digital LED display** for angular measurements, selectable degrees / decimal.
- **Telecentric illumination system** for even illumination of the image field and exact measurements.
- **Sturdy coordinate comparator stand** 380×250 mm, with integral glass scales.
- Ensures straightforward observation and easy measuring of lengths, angles, curves, radii, and threads etc.

Supplied with: 10× magnification lens, measurement table, halogen incident illumination and transillumination, digital angle display, mains lead.

Optional extras: Digital display unit No. 499356, cutting edge cleaner No. 354788.

Note: Further special accessories such as lenses, tilting central support, horizontal Vee, toolholder, standard comparison scales or an edge sensor with QM-Data 200 analysis unit, 2-D-Geopak software programme, digital display or cover available on request.

IP 67 | Absolute System

Mitutoyo Linear scale with absolute system

- With **absolute measuring system.**
- After switching on, the current position is displayed; thus it is not necessary to move to reference points.
- Straightforward assembly and installation.
- Resistant to water, oil, and dust due to electromagnetic induction.

Application: For exact measurement and positioning of axial adjustments e.g. on milling machines, lathes, positioning tables or measurement tools. Also suitable for converting machine tools to digital display.

Note: **Applicable only in conjunction with display unit No. 499356.**

IP 66

Mitutoyo Scale unit with absolute system

With **absolute electronics** and large easy-to-read display digits. One-off setting of the zero position, which remains the absolute zero point until the battery has to be replaced (approx. 1.5 years). Maximum measuring precision with very high speed of travel. ZERO/ABS function – zero setting and changeover between relative and absolute measurement.

49 9401 – Scale unit with electro-magnetic inductive measuring system. **For horizontal installation.**

49 9402 – Scale unit with capacitive electronic measuring system. **For vertical installation.**

Application: Suitable for measuring and positioning tasks on machine tools, jigs, etc.

Supplied with: 1 battery No. 081560 size 357.

Optional extras: Data cable No. 497085.

mm / Inch

Mitutoyo Digital display units for Linear Scale

Easy-to-operate display unit for connection to linear measurement systems. Display range: 8 digits and sign (–), mains connection: 220 Volt.

Function: Zero setting, changing the counting direction, mm / inch changeover. Halving the displayed value, ABS / INC coordinate switching, addition / subtraction, pitch circle calculation, programmable. **Comprehensive calculation functions:** (+, –, ×, ÷, COS, SIN, TAN, ARC, √, π), function buttons for milling machines and lathes, hole sequence machining.

Supplied with: Mains cable (2 m) and spare fuse.

Optional extras: Quick setting unit (RS 232, USB, Digimatic input) for sensing the workpiece offset, linear scale No. 499241.

Mahr Surface roughness measuring instrument PS10

Portable roughness measuring instrument for precise roughness measurement and documentation conforming to standards, using the stylus tracing method. **With integral (removable) calibration standard**. Large illuminated 4.3 inch TFT touch display. Display can be rotated. Feed unit can be operated as part of the main unit and separately. Mounting for height adjustment for measurements on cones etc., data saved as TXT, X3P, CSV and PDF files. Gauss filter to ISO 16610 – 21 (supersedes DIN EN ISO 11562), special filter to DIN EN ISO 13565 – 1, IS filter to DIN EN ISO 3274 (can be switched off).

Advantage:
- Switch on and start measurement right away – intuitive, no training.
- Storage of PDF certificates.
- Automatic cut-off selection.
- For direct access to the start view press the start button at the same time as the home button.
- Quick access to your desired functions, using the favourites list in the display.
- Take measurements according to the standards DIN EN ISO 4287/4288 and DIN EN ISO 21920-2:2021.

Supplied with: Supplied with feed unit, standard probe No. 499004 size 6 – 350, integral roughness standard No. 499575 including works calibration certificate, integral height adjustment, probe guard, charger / mains adapter, operating instructions, carrying case with shoulder strap, mini USB cable, extension cable for the feed unit.

Optional extras: Spare and special probe No. 499004, probe extension No. 499008, probe guard No. 499038, stand No. 499011; 498857.

Spare part: Battery No. 499548 size AKKU.

Note: Set for transverse sensing available on request.

Large illuminated 4.3 inch TFT touch display
Display can be rotated.

Start button is also the Home button
for direct access to the start view.

More flexibility thanks to removable feed unit.

Probe (2 µm) with detachable probe guard.

Freely programmable function keys
Direct access to your chosen functions via your own favourites list, e.g. measurement conditions, Ra, Rz, etc.

Interface:
USB, micro SD card, Marconnect (RS 232, USB).

49 8835

Garant

Surface roughness measuring instrument ST2

Portable roughness measuring instrument for precise roughness measurement and documentation conforming to standards, using the stylus tracing method. **With integral (removable) calibration standard.** Large illuminated 4.3 inch TFT touch display. Display can be rotated. Feed unit can be operated as part of the main unit and separately. LED light bar for status display (green - battery status display, red - error message, blue - measurement, data transmission), integral height adjustment, data saving as TXT, X3P, CSV and PDF files. Gauss filter to ISO 16610 – 21 (supersedes DIN EN ISO 11562), special filter to DIN EN ISO 13565 – 1, IS filter to DIN EN ISO 3274 (can be switched off). **Tolerance monitoring:** It can be quickly determined whether the measured value is within the specified tolerance from the colour of the parameters (green – inside and red – outside the tolerance). IATF 16949 compliant – reliable traceability.

Advantage:

- Switch on and start measuring immediately – **intuitively** without training, e.g. automatic cutoff selection, information on roughness characteristics directly on the device, pre-set measuring programs and quick access to desired functions by saving favourites in the display.
- Transmission of the **measuring results wirelessly** or alternatively by a cable connection. Compatible with the optional HCT (Hoffmann Group Connected Tools) mobile app. Available free of charge for Android and iOS. Can also be used via a Human Interface Device (HID).
- Summarise multiple measurements (for example, for a series) in a **PDF log** using the HCT mobile app. **Adding a photo (for example,** component or measurement setup and making individual comments on the log possible.)
- Document the results via wireless or cable connection using the optional thermal printer for printouts of the profile and results.
- The software interface of the device **can be switched between bright and dark views depending on the lighting conditions.**
- **Ergonomic stand** ensures optimum viewing angle.
- Take measurements according to the standards DIN EN ISO 4287/4288 and DIN EN ISO 21920-2:2021.

Supplied with: Supplied with feed unit, manual Vee, erector No. 499023, standard probe No. 499004 size 6 – 350, integral roughness standard No. 499575 incl. factory calibration certificate, integral height adjustment, probe guard, charger / mains adapter, operating instructions, mini-USB cable, USB Wireless dongle No. 499024, extension cable for feed unit, carrying case.

49 9022 – Additionally with wireless printer No. 499017.

Optional extras: Spare / special probe No. 499004.
Probe extension No. 499008.
Probe guard No. 499038.
Stand No. 499011; 498857.
Data cable for MarConnect No. 498941 size USB2.

Spare part: Battery No. 499548 size AKKU.

Wireless printer included in 49 9022.

Can be switched to bright or dark mode depending on lighting conditions.

Ergonomic stand and manual Vee for hard-to-reach places.

49 9002

49 9003

Advantage:

- Switch on and start measurement right away – intuitive, no training.
- MarConnect Duplex interface for starting the measurement remotely.
- USB A port (use for instance for a wireless stick and scanner).
- USB B port (use for instance for mass storage or connection of a power supply unit).
- Document the results via wireless or cable connection using the optional thermal printer for printouts of the profile and results.
- Transmission of the measuring results by a cable connection or alternatively via wireless.
- MarWin Roughness Viewer software for simple evaluation with generation of results print-outs from up to 100 profile files (download free of charge).
- Saving of measurement programs (Quick & Easy).
- Scanning QR codes/barcodes for starting assigned measurement programs and reading in workpiece information (scanner not included in delivery).
- Scanning QR codes/barcodes for starting assigned measurement programs and reading in workpiece information.
- Automatic cut-off selection.
- For direct access to the start view press the start button at the same time as the home button.
- Quick access to your desired functions, using the favourites list in the display.
- Remote control (SPC) of the MarSurf M 310 by external software.
- IATF 16949 compliant – reliable traceability with MarConnect.
- Take measurements according to the standards DIN EN ISO 4287/4288 DIN EN ISO 21920-2: 2021

Supplied with: Supplied with feed unit, manual Vee, standard probe No. 499004 size 6 – 350, including integral roughness standard No. 499575. Factory calibration certificate, integral height adjustment, probe guard, charger / main adapter, operating instructions, carrying satchel with shoulder strap, mini-USB cable, extension cable for head advance unit, carrying case No. 499016.

49 9003 – Additionally with Bluetooth® printer No. 499017.

Optional extras: Spare and special probe No. 499004, probe extension No. 499008, probe guard No. 499038, stand No. 499011; 498857, data cable for MarConnect Duplex interface No. 498941 size USB2, scanner.

Spare part: Battery No. 499548 size AKKU.

Note: Set for transverse sensing available on request.

Mahr

Surface roughness measuring instrument MarSurf M410 with free scanning system

mm / Inch | Q1 Cal

Surface roughness measuring tool with free probe travel and automatic zeroing for precise roughness and wave measurement in accordance with relevant standards. The MarSurf M 410 has a practical touch display, evaluation device can be removed from the feed unit, an integrated PDF memory and wireless data transmission is possible.

- **Free probe travel** with high-precision probe system.
- **Quick-change probe arm** without tools and with additional protection.
- **PDF protocol creation** directly in the device without additional software.
- **Only a few seconds of set-up time** using motorised height adjustment of the feed unit with **automatic zeroing.**
- Unique probe arm management for creating, changing and deleting over 50 probe arms. The calibration data of a calibrated probe arm is retained.
- Probe travel in accordance with DIN EN ISO 4288 / ASME B46.
- Automatic selection of filters and probe travels to the standard.
- Measurement travel for longitudinal sensing 0.1 to 26 mm.
- Phase correction Gauss filter to DIN EN ISO 16610-21 (supersedes DIN EN ISO 11562), robust Gauss filter according to DIN EN ISO 16610-31 and special filter ISO 13565-1.
- Wireless data transmission to a PC, e.g. to Excel or to third-party software.
- Assistance-guided tilt adjustment.
- **Portable use** with mains and battery power.
- **International up to date** incorporating all the usual reference values to DIN/ISO, JIS, ASME, MOTIF.
- 17 languages integrated.
- Inclination correction ±1°, manually.
- Storage of over 30,000 measurement programs.
- Read in information using a scanner by scanning a QR or barcode (scanner not included).
- Take measurements according to the standards DIN EN ISO 4287/4288 and DIN EN ISO 21920-2: 2021.

Supplied with: MarSurf M 410 evaluation device, MarSurf MD 26 feed unit including BFW 250 probe system, standard probe arm, M 410 docking station, wide-range power supply unit with 3 adapters, micro USB cable, MD 26 cover cap, screwdrivers, 3 pcs. assembly key, operating instructions and carrying case.

49 9043 – Additionally with Bluetooth® printer No. 499017.

Note: Other probe arms, e.g. for small bores and slots, available on request.

Mitutoyo Surface roughness testers SJ-220 and SJ-310 with skid system

RS232C | Digimatic | ▶ Q1 ◀ Cal | ▶ Q2 ◀ Cal

Transportable cordless rail system for determining surface roughness. Gauge force 0.75 mN to DIN/ISO. Separate feed unit for measurements in very small spaces and for attachment to stands. Phase correction Gauss filter to DIN EN ISO 16610-21 (supersedes DIN EN ISO 11562). Automatic protection of the probe during transport. Auto-calibration function and integral memory for measurement conditions.

49 9205 –
- High-resolution 2.8-inch touchscreen with user-friendly menu guidance. Feed unit can be operated as part of the main unit or separately. Measured data and measurement conditions can be archived to micro-SD memory card.
- All recognised parameters to DIN EN ISO, VDA, JIS, ANSI, and freely selectable conditions.
- Contains, among other things, the new roughness standard DIN EN ISO 21920.
- Supports 25 languages.

49 9207 –
- Very easy intuitive menu-guided controls with clear presentation of measured results and profiles on a 5.7 inch colour display.
- Statistics function and colour-coded tolerance evaluation.
- Large number of internationally recognised parameters to DIN EN ISO, VDA, JIS, ANSI, and MOTIF, and 16 integral languages.
- Two different calculations can be performed based on just a single measurement.
- Measurements where access is difficult or overhead can be performed using the separate feed unit.
- Automatic calibration function / mean value calibration can be performed with up to 12 multiple measurements.
- Saving of up to 10 measurement conditions.
- Quick output and documentation of measurement results, graphics and measurement conditions on the integral printer.
- Individual password protection.
- Easy archiving of measured data on an SD memory card.

49 9205

Feed unit in the device

49 9205

Feed unit removed

Supplied with: Feed unit with contact point, mains adapter, calibration standard, and carrying case.

49 9207 – Includes 5 rolls thermal paper No. 499050, 1 pair of support legs No. 499220 size FUSS, rail for flat and cylindrical workpieces No. 499220 size Z-KUFE, mains adapter and user manual as USB stick.

Optional extras: Transmitter and probe for small bores (from 2.5 mm) No. 499210, rail for flat and cylindrical components No. 499220 size Z-KUFE, support legs (2 pieces) No. 499220 size FUSS, adapter for clamping in height gauge No. 499220 size H-ADAPT, granite measurement stand No. 499415, data cable No. 498430, printer No. 498701.

Note: Free-of-charge analysis software, further adapters, and probes available on request.

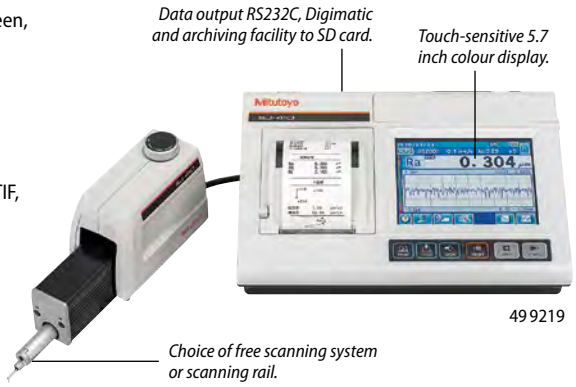
Mitutoyo Surface roughness measuring instrument SJ411 with free scanning system

Digimatic | RS232C | Q1 Cal | Q2 Cal

Transportable cordless reference level system with dust-protected, touch-sensitive operating screen, and integral printer.

- Very easy intuitive menu-guided controls with clear presentation of measured results and profiles on a 5.7 inch colour display.
- Optional measuring with free scanning system or scanning rail.
- Measurement of roughness, ripple and primary profile.
- Statistics function and colour-coded tolerance evaluation.
- Large number of internationally recognised parameters to DIN EN ISO, VDA, JIS, ANSI, and MOTIF, and 16 integral languages.
- Phase correction Gauss filter to DIN EN ISO 16610-21 (supersedes DIN EN ISO 11562).
- Compensation function for radii and inclinations.
- DAT function: Digital inclination wizard for aligning the feed unit position.
- Two different calculations can be performed based on just a single measurement.
- Quick output and documentation of measurement results, graphics and measurement conditions on the integral printer.
- Easy archiving of measured data on an SD memory card.
- The calibration values can be saved and recalled using five different buttons.



49 9219

Supplied with: Including feed unit with standard contact point, 5 rolls of thermal paper No. 499050, mains adapter, calibration standard, user manual, and storage case.

Optional extras: Standard probe No. 499221, measuring stand No. 499415, pack of paper rolls (5 pieces) No. 499050.

Note: Free-of-charge analysis software available on request.
Only available in Germany and Austria!

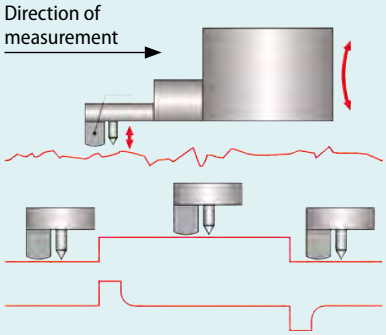
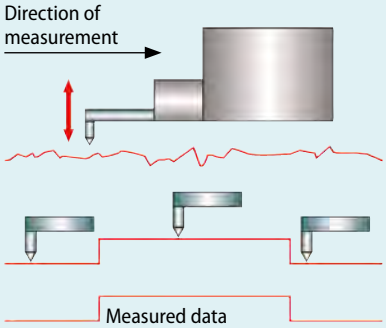
Surface roughness measurement with or without a rail

Measurement with a rail



- During measurement with a rail, the measurement system supports itself with the rail on the surface being measured. This ensures that only the movement of the contact point relative to the rail is measured.
- Measurement with a rail is suitable for measuring the surface roughness.

Measurement without a rail (free scanning system)



When measuring without a rail it is the irregularities of the surface relative to the guide of the feed unit that are detected. Therefore in addition to the surface roughness, also the ripple and the primary profile are measured.

Mahr MarSurf CD 140 A contour measuring station

The MarSurf CD 140 A has a touch probe system with a measurement range of up to 70 mm, and the stylus tips can be changed quickly and without the need for any tools – all without recalibration.

Application: The computer-aided measuring station permits comprehensive and quick evaluation of the measurement results:

- Comprehensive contour measurement functions, fast and simple
- Stylus tips can be changed without the need for tools
- Traversing velocity in X axis of up to 200 mm/s
- Simple creation of programs or individual measurements with MarWin
- Automatic evaluation, best contour fit, CAD contour comparison and many more.
- Can optionally be expanded with roughness measurement feature (Rz > 2 µm)
- Measurements with double stylus tip are possible

49 9299 –
- Flexible mounting plate with 25 mm hole grid, no additional X/Y table required

49 9301 –
- Quick adjustment of the Z axis with easy-to-use handle
- Flexible mounting plate with 50 mm hole grid, e.g. for KMG workpiece holders

Supplied with: Contour measuring machine, machine base incl. Y adjustment, PG A 36-350-25 contact element, MarWin EasyContour plus mobile software, contour calibration standard with 2 balls (45 mm and 6 mm).

Size CD140AG11R; CD140AFR – Incl. roughness option.

Optional extras: PC, probe elements No. 499314 – 499318.

Note:	Commissioning and training available on request. **Only available in Germany and Austria!**

49 9299

Probe system with a contact point length of 350 mm permits quick change of contact points without using tools – without recalibration. The automatic contact force selection guarantees the correct contact force when changing several contact points.

BAQ Shore hardness tester

P1 Cal

Shore hardness testers for determining hardness to Shore A or D to DIN ISO 7619-1 (supersedes DIN 53505) and ASTM D 2240. Sturdy, handy aluminium casing.

49 5002/5004 – High-contrast bright LED graphical display. Memory for 100 measurement values with date and time. USB interface for PC and charger.

Application:

49 5002/5003 – **Shore A:** Soft rubber, elastomers, natural rubber products, cast resin, leather, neoprene rubber, polyester, plasticised PVC.

49 5004/5005 – **Shore D:** Hard rubber, hard plastics, Perspex, Formica, stiff thermoplastics, vinyl boards, polystyrene, pressure rollers.

Optional extras: Test stand No. 495016. Test blocks for checking on request.

49 5002/5004 – Software for generating test certificates, statistics, and graphics available on request.

BAQ Digital rebound hardness tester dynaROCK III

Sturdy casing made of powder-coated aluminium. Evaluation to DIN 50156 and ASTM A956 in Rockwell HRC and HRB, Vickers HV, Brinell HB, and the tensile strength of steel. The device can be used in any orientation (horizontal, facing upwards, facing downwards...). Internal memory for >1,000,000 measurement values, USB port for data transmission to a USB stick.

Accuracy: ±4 HL (0.5 % at 800 HL).

Supplied with: Impact tool type D, hardness comparison block, USB data cable, cleaning brush, transport case, charger, and manufacturer's certificate.

Optional extras: Alignment rings for curved surfaces, test blocks with DAkkS certificate and impact tools types DC, DL, D+15, C and G on request.

Spare part: Connecting cable to impact measuring tool 495023.

BAQ Portable UCI hardness tester alphaDUR II and alphaDUR mini

RS232C

The **alphaDUR II** portable UCI test unit can accept test probes to DIN 50159-1 issue 2008-10, ASTM A 1038 and VDI-/VDE guideline 2616, together with type D rebound impact tools to DIN 50156 and ASTM A956. The measurement of the impression is performed using a test load. The test load of the probes is detected automatically. Simple menu-driven operation using the large high-resolution colour display. Memory for 50 materials calibrations and up to 500,000 measured data items with date, time, material and evaluation. Evaluations with a wide range of statistical functions.

Application: For portable use (about 8 hours operating time on batteries) and also for quick hardness testing of all metallic materials during production and goods receipt.

Supplied with: Basic unit with built-in lithium-ion rechargeable battery, mains adapter / charger, probe cable and transport case. User manual on USB stick. (Probe No. 495043 is also necessary for measurement.)

Optional extras: Carrying case, probe handle. UCI hardness comparison plates in different dimensions including ISO/ASTM certificate on request.

49G 49 5042	Portable hardness tester alphaDUR II (without probe)		(eShop)
Power supply			Li-ion battery

49 5042

The **alphaDUR mini II** is a portable UCI hardness tester for measurements to DIN 50159-1, ASTM A 1038 and VDI/VDE guideline 2616. Measurement range 10 to 3000 HV, high-resolution colour display, memory for 50 differently calibrated materials and >1,000,000 items of measuring data. Conversion into HRC, HRB, HB and tensile strength. Statistics functions and integral Lithium-ion battery with 10 h operation life. Measurement is performed using the probe No. 495043 – which should ordered separately.

Supplied with: Basic device with integral battery, probe cable, charger with USB cable, transport case and user manual on USB stick (without the probe).

INNOVATEST Rockwell hardness testing machine

Rockwell hardness testing machine with very high precision. Stiff machine frame, suitable even for rough workshop conditions.

Size 300RS – Large 6.5 inch industrial colour touch screen. Easy-to-understand user interface with internal and external data storage facilities. Test load application within the closed control loop (**load cell, closed loop system**).

Standard:

Size 300RS – DIN EN ISO 6508, ASTM E-18 and ISO 2039/1.

Supplied with: HRC hardness comparison plate with grid.

Size 300RS – Ready-to-use basic equipment: Rockwell cone 120°, flat support table ∅ = 80 mm, Rockwell ball holder 1/16 inch. Including dispatch packaging.

Note: Delivery charged separately. Please contact your specialist advisor with regard to calibrating the required load levels and methods. Further accessories such as Vee supports available on request.

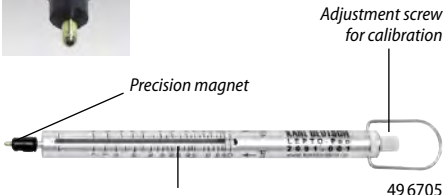
KARL DEUTSCH

Thickness measuring tools – LEPTO-Pen

Quick and easy thickness measurement using the attraction force method. Suitable for non-magnetic coatings such as paints, varnishes, plastics, and galvanised coatings on unhardened iron and steel. With precision magnet, mechanical spring balance, graduated scale and scale calibrated and graduated in µm of coating thickness. For use in any position: horizontal, vertical and "overhead".

Supplied with: Plastic case, user manual, and test certificate.



49 6705

Type		2091A
49G 49 6705	Thickness measuring tool LEPTO-Pen	eShop
Measuring range	µm	10 – 500
Error limit		±10 % / ±3 µm

KARL DEUTSCH Thickness measuring tools – Pocket Leptoscope

Robust, handy thickness measuring tool for precision, non-destructive testing of film thicknesses on steel and non-ferrous metals.

- Probe integral within the device and immediately ready for measuring.
- Single-point and two-point calibration with averaging can be performed.
- Cordless battery mode, auto-off.
- Convenient user guide in plain text, multi-language.
- Graphics display with background illumination.
- Large characters for ease of legibility.
- Data output for thermal printer.

Size 2021 – **Fe tool** for measuring non-magnetic coatings, e. g. Cr, Cd, Cu, Zn coatings, paints, varnishes, plastics etc. on magnetisable iron and steel.

Size 2026 – **Fe / non-Fe combination device.** The substrate is recognised automatically. Additionally for measuring electrically non-conductive coatings e. g. Eloxal, paints, varnishes, plastics etc. on all non-ferrous metals e. g. aluminium, copper, brass etc.

Supplied with: Transport case, check bodies (size 2021: one-piece; size 2026: two-piece), calibration foil kit (two-piece), 1 battery No. 081561 size LR3, instruction manual and calibration certificate.

Note:	Version with measured value memory and statistics function on request.

Membrane keypad
is dirt-proof.

Spring-mounted measurement probe
exerts constant pressure.

KARL DEUTSCH Wall thickness and sonic speed measuring tool (Echometer)

mm / Inch | IP 54

Small, easy to use, ultrasonic wall thickness measuring tool with automatic test head recognition. **Testable materials: All materials which transmit sound, such as steel, iron, non-ferrous metals, plastics, glass, ceramic etc.** Wall thickness and sonic speed measurement in a single tool.

- Convenient user guide in plain text (multi-language).
- Variable display modes for optimum matching to the measurement task: – Standard display – Difference value – Minimum value

Supplied with: Transport case, coupling fluid (100 ml), 2 batteries No. 081561 size LR3, and calibration certificate.

Optional extras: Measuring heads with measuring range up to 400 mm available on request.

Note:	Variants with data memory, data output, and statistics module or for measurement of the wall thickness of coated materials available on request.

KARL DEUTSCH

Thickness measuring tools – Universal Leptoscope

Universal thickness measuring tool for Fe and/or non-Fe material depending on the probe No. 496900, 496910 or 496912.

- Interchangeable measuring probes.
- Clear display with background illumination.
- Ready for measuring immediately without calibration.
- Extensive calibration capability, e.g. patented adjustment when measuring a coating of unknown thickness.
- Mains and battery mode, auto off.
- Data output for thermal printer.
  Size 2042SET – ■ Extensive statistical functions, large data memory.

Supplied with: 2 batteries No. 081561 size LR6, transport case, user manual, and calibration certificate.
Size 2042SET – Set including standard probe Fe No. 496900 size EP, check sample (two-piece), calibration foil kit (six-piece), PC cable, and iCom software.

Ferrous and non-ferrous measuring probes for Universal Leptoscope No. 496850

Application:

49 6900 – **Ferrous probe** for measuring non-magnetic coatings, e.g. Cr, Cd, Cu, Zn coatings, paints, varnishes, plastics etc. on magnetisable iron and steel.

49 6910 – **Non-ferrous probe** for measuring electrically non-conductive coatings e.g. Eloxal, paints, varnishes, plastics etc. on all non-ferrous metals such as aluminium, copper, brass etc.

49 6912 – **Fe / non-Fe combination probe.** The substrate is recognised automatically. Application as for Fe / non-Fe combination probe.

Supplied with:

49 6900–6912 – Including the manufacturer's calibration certificate.

Optional extras:

49 6900–6912 – Positioning aids for microprobes, other microprobes available on request.

Mitutoyo Mini-processor / printer DP-1 VA for connection of Digimatic measuring tools

49 8701 – Fast and quiet data printer. Large easily legible characters. Timed reading of measured values (clock function). Data logging up to 9999 values. Thermal printer paper with long-term stability. Very compact. Press key to start. Powered by 6V mains adapter, batteries or rechargeable batteries. Data logger function with time stamp. Printing and data transmission can be performed concurrently. Compatible with measuring devices with the Digimatic 2 format.

Printable data: Measured values; OK / not OK values, number of data, min / max value, range; average value, standard deviation, number of rejects, percentage of rejects, process capability index, histogram, intervention limits; date and time.

Application:

49 8701 – For data collection, printing, and statistical evaluation of the measured data of small measuring tools with Digimatic interface.

Supplied with:

49 8701 – Supplied with 1 roll thermal paper, carrying strap, and mains adapter.

Optional extras:

49 8701 – Thermal paper No. 498710, foot switch No. 498780. Batteries (4 pieces) No. 081570 size LR6, batteries (4 pieces) No. 081561 size. LR6.

V-MUX Dongle

HCT

Dongle with software (in German and English) for easy integration of several tools into CAQ systems under Windows 10 and 11.
Communication is performed with EUROmux protocol or MUX10 / MUX50 / Dmx16.
Connects measuring devices that are connected to a PC via USB, Bluetooth® or other radio technology.
Brecht hardware multiplexers (498902; 498904) can be incorporated as a data source.
Foot switch No. 498903 can also be incorporated.

Suitable for: GARANT HCT, HOLEX HCT, Mahr i-wi (calipers, dial indicators, external micrometers), TESA TLC, Mitutoyo U-Wave Bluetooth, Sylvac Bluetooth.

49H 49 8989	V-MUX Dongle	–

HCT

HCT Windows app software

The HCT worker guidance system to work through your workflows efficiently, integrate them into production processes and take care of documentation automatically, quickly and accurately.

- Connect up to 16 different HCT devices to a PC simultaneously via Bluetooth®.
- Simple to create and work through work plans.
- Images and live measurements for each work step guide the user through the workflow.
- Data is sent from the HCT Windows app to the HCT measurement equipment and generated readings are transferred to the computer. The workpiece's serial number is linked directly and automatically to the associated measurement value.
- Measured data is transmitted to e.g. CAQ systems (MUX50, DMX16, Open Protocol, CSV and DFQ)
  Setting Bench function: Wireless data transmission of the configured pre-set values (nominal dimensions) including tolerances to the GARANT HCT dial indicator via HCT.

Suitable for: **GARANT** No. 655010; 659021; 654410; 412781; 412783; 418685; 434336; 434342; 421575.
HOLEX No. 655025; 412790; 412792; 418743; 434008.
Stahlwille No. 655015; 655017.

Supplied with: USB wireless dongle.

Note: **GARANT** No. 412781 and 434336 as from measuring tool firmware version R 5.

HID

HCT

HCT smart dongle

Radio receiver that connects various HCT tools to the PC without the need for software.
Set it up once and then use it on any computer.

- Very reliable connection with HCT tools using only the USB port on the computer.
- Measurement values can be uniquely assigned via freely selectable names.
- Simple configuration via MS Excel without the need for additional software.
- No need for authorisation to install software on the computer.

Suitable for: **GARANT** No. 655010; 654410; 412781; 412783; 418685; 434336; 434342; 421575; 415371; 415373.
HOLEX No. 655025; 412790; 412792; 418743; 434008.

Supplied with: USB wireless dongle.

Note: **GARANT** No. 412781 and 434336 as from measuring tool firmware version R 5.

HID HCT HCT

HCT

GARANT FootSwitch HCT

Non-contact transmission of measurement values – no impact on the measurement set-up.

- **Radio receiver integrated into Footswitch for simple and reliable connection of HCT measuring tools to different workstations and computers.**
- Simple configuration via MS Excel without the need for additional software.
- No need for authorisation to install software on the computer.
- Very reliable connection with HCT tools using only the USB port on the computer.
- Measurement values can be uniquely assigned via freely selectable names.
- **The Footswitch can trigger the transmission of measurement values either in parallel or sequentially.**

Garant Vibratory finishing machine

Mobile vibratory finishing machine GMT35 in **compact design,** for automated finishing work on **small to medium batch sizes.**

- Powerful motor.
- Steel trough (35 l) with 15-mm polyurethane lining.
- Integrated separating station for automated separation of workpiece and grinding medium.
- Closed water circuit with wastewater treatment.
- Controlled via touch screen.
- Individual processing steps can be programmed.
- Machine with soundproof cover and lid.
- Rollers on the underside for easy transportation.

Application: The preferred choice for **deburring turned and milled parts** and **3D-printed** workpieces. Suitable for **metals** and **plastics**. This machine can also handle the subsequent steps of **polishing** and **cleaning**.

Supplied with: 1× vibratory finishing machine with integrated separating station, water circuit and PLC control,
1× transport trolley (No. 918558 TNB1),
2× small storage boxes (No. 964486 EF4220),
1× large storage box (No. 964486 EF4320),
2× dividers (aluminium, plastic),
2× measuring jugs,
1× hand shovel,
3× separating sieves with different hole patterns.

Note:	Unavailable in some countries. Express delivery not available

Garant Vibratory finishing machine

Vibratory finishing machine GMT2 in **compact design,** for automated finishing work on **small to medium batch sizes.**

- Powerful motor with defined speed range.
- Steel trough (2 l) with polyurethane coating.
- Removable separating station for manually separating the workpiece and grinding medium.
- Effortless separation thanks to ergonomic tipping mechanism.
- Intuitive to control via control panel with timer function.
- Quiet, dust-free working thanks to transparent cover.

Application: The preferred choice for **deburring turned and milled parts** and **3D-printed** workpieces. Suitable for **metals** and **plastics**. This machine can also handle the subsequent step of **polishing**. **Only dry machining is recommended (no compound required).**
For wet machining, we recommend our GARANT GreenPlus Compound UNI (No. 501600 UNI).

Supplied with: 1x vibratory finishing machine with control panel and removable separating station
1x separating screen with 10 mm hole grid
1x separating screen with 18 mm hole grid
1x ceramic grinding bodies (3 kg), triangular, coarse (No. 501505 0606T)
1x ceramic grinding bodies (3 kg), triangular (oblique), coarse (No. 501515 1015TA)

Garant VIBRATORY FINISHING MACHINES

A simple solution for any requirement.
Post-processing of workpieces made using additive manufacturing:

A

Garant Ceramic grinding bodies

Ceramic grinding bodies (aluminium oxide abrasive grit bonded in ceramic) are the **most widely used mass finishing tools** and are **suitable for universal use**. **Very dense** and **excellent abrasive effect.**

50 1505–1530 – High-performance version for **fast machining.** Low self-abrasion, long service life.

Application: For **fast deburring and rounding** of edges and as a **preliminary stage for polishing steel, stainless steel** and other **steel alloys.** Also suitable for rough machining on plastic and non-ferrous metals, with the risk that the grinding bodies clog faster, which reduces their abrasive effect.

50 1505/1510 – The **triangular** shape is the **sturdiest version** with the longest service life. Ideal for rough **edge machining** on workpieces with a **simple geometry.**

50 1515/1520 – The **triangular (oblique)** shape is the most universal shape.

50 1525–1535 – **Cylinder (oblique)** shape, ideal for surface preparation (flat, free-form surface).

Garant Porcelain grinding bodies

Porcelain grinding bodies (without abrasive grit) have **no** removal effect.

Application: For **polishing** and **smoothing all materials.** Creates **homogeneous, shiny surfaces.** Ideal as a follow-up step after pre-grinding with ceramic grinding bodies and plastic grinding bodies.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

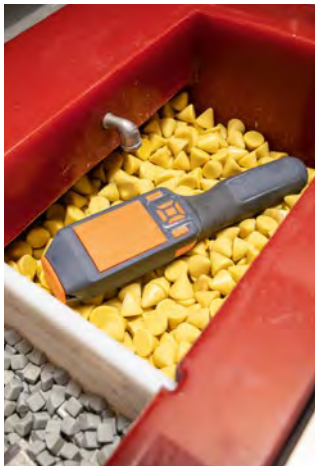
Length		mm	5	6	15	
Diameter		mm	2	4	7	

A

Garant Plastic grinding bodies



Plastic grinding bodies (aluminium oxide abrasive grit bonded in plastic) have a **low density** and a **softer substrate.**
This enables **gentle processing** and the **grinding bodies do not become clogged.**
Significantly **lower abrasive effect** compared to ceramic grinding bodies.
50 1561/1567/1570 – Higher abrasive performance due to coarser grit.
50 1565/1575 – Finish grinding to polishing.

Application: For **fine grinding** and for **light deburring work** on soft materials such as **aluminium, copper** and **plastic.**
Achieves very high surface quality with a matt sheen.
50 1561/1565 – **Taper** form for workpieces with **bores and contours.**
50 1567–1575 – **Pyramid** form for workpieces with **corners and recesses.**

Garant CaraFin diamond polishing bodies

Diamond polishing bodies (diamond bound in EVA-PU) have micro-abrasive removal properties.
For polishing, smoothing and cleaning all materials. Creates shiny surfaces.
Ideal as a follow-up step after pre-grinding with ceramic grinding bodies and plastic grinding bodies.
Safely removes microburrs on non-ferrous metals and aluminium. A long service life of the polishing bodies is guaranteed, since the diamond is directly bonded to the EVA-PU and therefore the diamond material cannot break off when used correctly. If the polishing bodies are heavily soiled, they can be cleaned with water and cleaning agents.

Application: For use in our **GARANT vibratory finishing machine GMT2 (No. 501310 GMT2).**
Supplied with: Contains enough diamond polishing bodies for a complete filling of the GARANT vibratory finishing machine GMT2.

Garant Compound without hazard labels – powerful and safe

GARANT GreenPlus Compound UNI: for safer handling of your vibratory finishing machine. 5–7% of the liquid compound without hazard labels is added during the wet process in vibratory finishing machines. The probiotic ingredients and regular operation of the vibratory finishing machine ensure long service lives and less waste. Changing the process water after approx. 80 machine hours or 4 weeks is recommended. Any odours are prevented and the service life extended by adding an additional 1% of the compound. Protects employees, the environment and makes storage simpler by doing away with corrosive ingredients.

- Universally suitable for all ferrous metals and NSF-certified.
- It boosts the grinding performance and effectively cleans workpieces and grinding bodies.
- Corrosion protection ensures safety.

Application: Only add the compound to the process water in the water tank in the specified dose. The measuring jug supplied with the vibratory finishing machine facilitates correct dosing. Also very well suited for use in our GARANT vibratory finishing machine GMT2 (No. 501310 GMT2).

DICK Workshop file set

The blanks are forged and ground; manufactured with an exact cut of even density and depth using special machines. These **non-convex files** have tooth profiles appropriate to each grade of file.
To protect the files, the set is arranged in a **strong transparent roll-up nylon wallet**.
Protected files cannot be contaminated and the cut is protected against damage; this ensures a consistently high removal rate, smooth file surfaces, and an extended working life.

Application: **Quality file** for workshop use with long tool life and high removal rate.

Bastard = Cut 1
2nd cut = Cut 2
Smooth = Cut 3

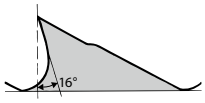
PFERD Milled tooth files, teeth radially milled, flexible version

Teeth on both sides, milled radially from the solid; top side **convex** – this **prevents scratches** on the component from the edges of the file. The special tooth shape and the positive cutting angle ensure high filing performance.
Cuts convex on both faces.

Application: Suitable for working sheet metal, particularly in **car production**, **bodywork building** and **car body repairs. Using these milled tooth files, groove-free, smooth surface finishes are obtained which can be painted without polishing.**



Teeth milled from solid.

The convex cross section prevents the edges of the file damaging the workpiece whilst filing

File handles

Ergonomic 2-component file handle with hole for hanging up and **practical colour code clips** (red, green, yellow) for individual marking of, for example, the cut. The non-slip surface and **ergonomic shape** ensure **non-tiring power transmission** even in wet or oily hands. Reversible reduction inserts ensure a secure grip on all tangs.

Application: For all workshop, key, and precision files.

Supplied with: File handle including 1 red, 1 green and 1 yellow colour-coded clip.

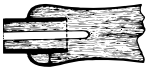
Ferrule pressed in deeply, cannot become loose.



Precision files

Swiss precision files
satisfy the highest demands for accuracy of shape, precision cut, removal rate and tool life. Special steel with hardness **65 – 66 HRC.** Unlike engineer's files, these have **slightly convex shapes** exactly matched to the application, a special cut angle and an extensive selection of different cuts. As a result smooth surfaces are always achieved in the most cost-effective way.

VALTITAN high performance precision files
with extremely high wear resistance due to surface hardness of **1200 HV.**
The special tooth profile prevents the file becoming clogged. Maximum metal removal rate and tool life. Virtually non-rusting, therefore suitable for use in highly corrosive environments. Leaves no corrosion-susceptible residues.

Precision needle files

Swiss precision needle files satisfy the highest demands for accuracy of shape, precision cut, removal rate and tool life. Cut length = $^1/_2$ file length.
Manufactured from special steel for precision files with high wear resistance (65-66 HRC).
Precisely determined shapes, special cut angle and large selection of different cuts.
High metal removal rate.
Quick-release handle see No. 519700.

Standard: **SC = Swiss cut; GC = German cut**

Note: See also Habilis precision files No. 527050 – 527070.

Precision riffler files

The blanks for the **Swiss precision riffler files** are forged from special steel and ground; precision machines give them an extremely precise cut of even density and depth with a hardness of **65 – 66 HRC.** The quality of these riffler files is provided by a clean and precise cut to the very tip of the point. These files feature a very high shape accuracy and a high metal removal rate with extremely long tool life.

Application: For precise and delicate work even on very hard materials, e.g. in mould and tool making.

Habilis precision files

Swiss precision files with highest shape accuracy, cut precision, removal rate, and tool life. Shapes similar to needle files, however with **strong, forged** square or hexagonal **tang** and **strengthened cross section. No file handle required.**

Application: Particularly suitable for tool and mould making due to tapered, slim shape. **Habilis precision files** allow **heavier working pressures** than needle files.

PFERD Diamond handy files

Equivalent to needle files No. 529220, however made from blanks similar to the Habilis files No. 527060 (thicker cross section, high-strength forged tang); approx. **3 times the coated area** of needle files.

Application: For filing **hardened steels, hard metal, glass, ceramic** and **fibre-reinforced plastics.** Use **light pressure** for filing, particularly on edges. Heavier pressure does not increase the removal rate but damages the file.

D

PFERD Diamond needle files

The blanks for these needle files are forged and ground from special steel. The diamond needle files are evenly spread with diamond powder of uniform grit and electro-bonded in place. The even diamond coating and the hardness of the diamond ensure best filing results. **Overall file length = 140 mm;** diamond coated length = 70 mm; shank ∅ = 3 mm.

Application: For precision finishing of cutting, stamping and press tools made of **hardened steel** or **carbide.** Also for working **glass, ceramic** etc. Use **light pressure** for filing, particularly at edges. Heavier pressure does not increase the removal rate but damages the file.

Optional extras: A **quick-release handle** for these files can be found under No. 519700.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

D

PFERD Diamond riffler files

Shape similar to No. 528050, but covered at both ends with diamond powder of uniform grit.
Application: For precision finishing of form tools made of **hardened steel** or **carbide.**
Minimum pressure in use.

Quick-release handles for needle files / diamond needle files

Size 2 – Quick-release handle, suitable for all hand sizes. **High clamping force,** tool can easily be inserted and removed.

Size 3 – High quality handle with **spring collet and rotary knob clamping** for ease of use and secure fixing.

Flexible diamond polishing files

Polishing file with **flexible metal base body.** Outer face of **resilient PU material,** one side coated with diamond grit.

Size D126; D64 – Very homogeneous surface roughness due to multi-crystalline diamonds.

Advantage: Ancillary times for preparation and cleaning, such as are required when polishing pastes are used, are eliminated.

Application: Ideal for polishing work on concave and convex surfaces. Suitable for **hard materials such as carbide, cast iron, hardened steels, ceramic** and non-ferrous metals.

52 9115

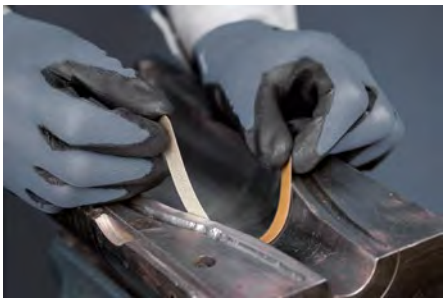
Grit designation		Pre-polishing	Polishing	Final polishing	Mirror finish		

Flexible diamond files

Very thin plastic backing, coated **on one side** with diamond abrasive grit. Height including grit 0.5 mm.

Application: Ideal for fine abrasive work on concave and convex surfaces, or in narrow slots. **Very high flexibility,** maximum bending radius 15 mm.



52 9120

Diamond sheet

Flexible diamond sheet, coated **on both sides** with abrasive diamond grit. Height including grit 0.7 mm.

Application: Ideal for grinding work on concave and convex surfaces.

Note: Diamond files can be cleaned in petrol with a metal brush (e.g. 576000).

MASTERFUL RESULTS IN ALL MATERIALS – THE GARANT BURR RANGE.

Maximum precision and efficiency: Minimal vibrations, perfect surfaces and the highest possible metal removal rate.

GARANT Master UNI

All-rounder for machining steel, stainless and acid-resistant steels and aluminium alloys.

- High removal rate, smooth cutting.
- Low thermal stress, long tool life.

GARANT Master Steel

Specialist for machining steel and cast steel.

- Noticeably higher aggressiveness.
- Optimum chip formation (no pointed chips).
- Optimised for high material removal.
- AlCrN coating.

GARANT Master Cast

Specialist for machining cast iron.

- AlTiSiN coating prevents breakouts.
- No chip adhesion.
- High rate of material removal and smooth running behaviour.

GARANT Master Alu

Specialist for machining aluminium alloys, plastics, bronze and non-ferrous metals.

- High removal rate, smooth cutting.
- Low thermal stress, long tool life.
- DLC coating prevents chip adhesion.

GARANT Master Uni mini burrs

All-rounder for machining steel, stainless and acid-resistant steels and aluminium alloys.

- High removal rate, smooth cutting.
- Low thermal stress, long tool life.

GARANT Master Inox

Specialist for machining austenitic, stainless and acid-resistant steels.

- Noticeably higher aggressiveness.
- Low thermal output.
- Optimised for high material removal.
- AlTiSiN coating.

1

First, select the material and the machining method.

2

Find the recommended tooth type and cutting speed in the table below.

Speed (rpm)									

3

Determine the appropriate speed for your drive machine.

$$n = \frac{v\ [m/min] \times 1000}{D\ [mm] \times \pi}$$

Materials with poor heat conductivity; reduce speed to avoid overheating of the burr.

Garant GARANT Master Uni / Master Alu burrs with shank ∅ 8 mm

The innovative tooth geometry permits a high metal removal rate and at the same time extremely smooth running and very good guidance.
Extra-sturdy shank with 8 mm.

Application: For the most demanding burring operations.

54 3220 – Suitable for use with power tools and industrial robots, on almost all materials.
For deburring, edge breaking, cleaning,
weld and surface preparation.

54 3710 – Optimised for machining hard and soft aluminium alloys, plastics, bronze and non-ferrous metals.

Note: Materials with poor thermal conductivity: Reduce speed in order to avoid overheating the burr and smearing.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni
Z P plastic												●				

The special tooth geometry generates **reduced cutting forces** and **avoids frayed fibres.** Cylindrical shape (ZYA).
Cutter geometry ideal for hard CRP/GRP with fibre content > 40 %.

Application: Side milling, contour milling and deburring (especially of fibre-reinforced plastics).

Chip guard for burrs

Chip guard with clear sight glass. Easy fixing for quick clamping on the straight die grinder with the help of a fastening ring. Targeted chip evacuation for greater protection against chips flying. Includes 5 chip shields.

Application: For use on all standard straight die grinders.
Supplied with: Set of 5 swarf protection.

Note: Does not replace wearing safety glasses!

Grinding and polishing points

GARANT / LUKAS / PFERD grinding points (OSA certified and tested to DIN EN 12 413) are specially designed for hardness, bonding, grit type, and grit size for the specific applications and cover a very wide application range. Minimal radial run-out ensures vibration-free grinding which is good for man, machine, and component. GARANT grinding points are generally suitable for **edge and surface grinding** and are characterised by very high material removal rates, long service life, and consistent surface finish quality of the component.

GARANT polishing points are characterised by long service life and quick production of fine, even surface finishes. Finest polishing grades or surfaces right up to mirror finish can be achieved, depending on the version used. GARANT polishing points can be profiled using dressing sticks.

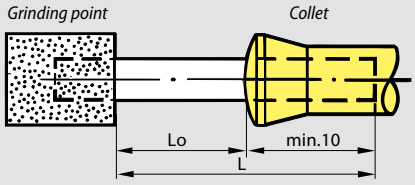
Speeds

Calculation: $$n = \frac{v\ [m/s] \times 60{,}000}{D\ [mm] \times \pi}$$

Maximum permissible speeds
(for grinding points No. 55 0100 – 55 1791 to DIN EN 12413).
Each package of grinding points (10 pieces) includes information about the maximum working speed in conjunction with the free shaft length L_0.



Permissible maximum speed in rpm for a free shank length LO of

L_0	10	**15**	20	mm
rpm	64	53	45	×1000

Important!

- The maximum permissible speed relates to the unsupported shank length L_0, i.e. depends on the mounting.
- 10 mm minimum clamped length in the collet must be maintained in all cases.
- Max. permissible circumferential speed v_{max} = 50 m/s.

A

Grinding points standard aluminium oxide (AN)

Grinding point in **standard aluminium oxide (AN)** in coarse grit and synthetic resin bonding. Shank length 40 mm.
Size ZY5025 – Shank ∅ 8 mm.

Application: For grinding of **high-alloy** steel, stainless steel and **cast iron.**
Recommended cutting speed 40 – 50 m/s.

Type			ZY1032	ZY1325	ZY1632	ZY2025	ZY4020	ZY5010	ZY5025

55 1600

A

Grinding points mixed aluminium oxide (AW-AN)

Grinding point in special quality **mixed aluminium oxide,** 30 grit (coarse), and ceramic bonding. Shank ∅ 6 mm, shank length 40 mm.

Application: For coarse grinding of **cast iron** and **stainless steel.** Recommended cutting speed 40 – 50 m/s.

SiC

Silicon carbide (SiC) grinding points

Ceramic bonded **SiC** grinding points, 80 grit (fine), with high self-sharpening effect and open-pore structure for improved reduction of clogging. Shank ∅ 6 mm, shank length 40 mm.

Application: For grinding **aluminium alloys** and **soft materials (non-ferrous metals).**
Recommended circumferential speed 25 –40 m/s.

CER

PFERD Grinding points mixed grit (AD-CER)

Grinding point with **mixed grit (AW-CER)** in **hardness J.** Soft bonded combination of **white aluminium oxide** and **ceramic micro-crystalline sintered aluminium oxide** with high self-sharpening characteristics for consistently high metal removal rates coupled with cool grinding behaviour (Pferd designation AWCO).

Application: For surface grinding of superalloys that are difficult to grind such as **titanium materials, nickel** and **cobalt-based alloys**, and also **hardened steel.**
Recommended cutting speed 30 – 50 m/s.

55

Shank ∅ 3 mm

55 1790 – **Coarse,** 46 grit.

A

Garant Polishing points, rubber-bonded

Polishing points with **standard aluminium oxide (A)** in resilient rubber bonding.

Application: **For fine abrasion and polishing of steel, stainless and acid-resistant steel, high-temperature materials and non-ferrous metals.** Polishing grinding points do not clog even when used on materials prone to clogging. For matt finish or application of visual effects on stainless containers etc. **Due to resilient bonding of abrasive grit a very fine polish is achieved.**
Not suitable for sharp edges and rough surfaces.

Garant Felt polishing points

Long-lived felt polishing point with **medium-hard felt which keeps its shape especially well.**

Application: For rough polishing and high-gloss finish polishing of ground surfaces where there is a strict requirement for maintaining the exact geometrical shapes.

Note: Felt polishing points must be used in conjunction **with grinding and polishing pastes** such as No. 552250 / 552330 / 552340 / 555740. Recommended circumferential speed 5 -10 m/s.

Garant Buffing wheel / abrasive fleece wheels

55 2205 – 3-layered felt for gloss polishing of fine contours.
55 2206 – Fine cotton yarn for gloss polishing of fine contours.
55 2207 – Abrasive fleece for fine matting work.

Application: For high-gloss finish polishing of ground surfaces where there is a strict requirement for maintaining the exact geometrical shapes.

Note: Polishing sponges must be used in conjunction **with grinding and polishing pastes** such as No. 552250 / 552330 / 552340 / 555740. Recommended circumferential speed 5 - 10 m/s.

D

Garant CaraFin diamond polishing point

Polishing points of **resilient PU material** coated on the outer face with diamond grit. The effectiveness of the bonded diamond grit is significantly greater than that achieved by loose diamond grit in polishing pastes.

Application: Polishing work with very high flexibility and conformity to contours.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

D

Garant Diamond grinding points – brazed metal bonding

Precision-ground blanks with **diamond application** in **vacuum brazing processes.**

Advantage:
- More free-cutting than galvanically bonded grinding points due **large grit projection** (about 70% of the grit projects from the bonding material) and **stronger bonding.**
- The **open structure** and **coarse D427 grit** reduce the grinding temperature and minimise the tendency to clog up.

Application: For hand-held use, on industrial robots or CNC grinding machines for **rough grinding work** with high material removal rates. **Side milling, contour milling** of composite materials (CRP/GRP), fibreglass, graphite, honeycomb.

Note: Other grit grade, special shapes or grinding points with internal cooling for stationary use are available in request.

Suitable for/ v_c [m/s]	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

Garant Abrasive caps

Optimised grit bonding yields very aggressive abrasion and a high material removal rate.

Application: The seamlessly formed abrasive caps slide on to the rubber body and are securely held in place by centrifugal force when the machine is running. The **abrasive caps can be replaced quickly and easily** (replace in direction of slots).

Note: Compatible only for use with ground abrasive cap holder No. 553100.

SiC

Garant Abrasive caps silicon carbide (SiC)

Silicon carbide (SiC) ideal for grinding titanium, aluminium and alloys of those metals.

Application: The seamlessly formed abrasive caps slide on to the rubber body and are securely held in place by centrifugal force when the machine is running. **Abrasive caps can be replaced quickly and easily** (replace in direction of slots).

Note: Compatible only for use with ground abrasive cap holder No. 553100.

Abrasive sleeves and abrasive flap sleeves

The rubber body of the abrasive sleeve holder expands at high speed to hold the abrasive sleeve in place. The full width of the sleeve can be used, it does not slip and can be replaced quickly and easily (twist in the direction of slots when fitting/removing). Only compatible with abrasive sleeve holders.

Suitable for: Abrasive sleeve holder No. 553600.

Application: Abrasive sleeves are predominantly used for surface grinding tasks which require the removal of large amounts of material – even at sharp edges.

Abrasive flap sleeves cylindrical

ZA

Densely packed around a stable core **abrasive strips** of Zirconium Aluminium Oxide (ZA) fabric. Due to the even wear of the individual abrasive strips, new abrasive fabric is constantly being exposed, thus increasing the service life and material removal rate several-fold.

Application: For aggressive surface grinding work as an alternative to sander bands and flap wheels. For use exclusively in the direction of rotation of the support body. The direction of rotation is marked on the core of the sleeve.

osborn Lipprite® abrasive fleece rings

The **Unipol® fleece rings** are wound round a metal core; **each set contains three rings.**

Application: The fleece rings can be clamped in any number and width.

55 5760 – Suitable for all metals (stainless steel, steel, aluminium, brass), plastics, wood, and ceramics. **Coarse and aggressive abrasive fleece** (approx. 100 grit) for removal of rust film and superficial dirt. For roughening old paint, varnish, plastic, and rubber parts, for burnishing decorative metal surfaces (roughness Rt approx. 3.5 - 4 µm).

55 5765 – **Medium-fine abrasive fleece** (approx. 180 grit), for regrinding of ground or brushed surfaces (roughness Rt approx. 3 µm).

55 5770 – **Fine abrasive fleece** (approx. 280 grit), for removing fine scratches and for brushing (roughness Rt approx. 1.5 µm).

Note: For clamping mandrels for fleece rings see No. 555785.

Diamond grinding and polishing compound

D

Silicone-free diamond paste in a handy spray can.

55 2330 – **Highly concentrated natural diamond grit** in a 5g spray for an even surface roughness over the entire surface of the component.

55 2340 – Synthetic mono-crystalline diamond in 10g spray for applications covering a large area.

55 2350 – Synthetic poly-crystalline diamond in 10g spray for quick polishing results.

Application:

55 2330 – For polishing work on **hardened steel, carbide, ceramics and composite materials.**

55 2340 – For polishing work on **all tools steels in general use.**

55 2350 – Ideal for steels and titanium with harness greater than 60 HRC. Very economical, since the polycrystalline structure of the diamond constantly reveals new cutting edges and the polishing proceeds.

Quick-change system

The Roloc™ Combisic® CDR quick-change abrasive system with a plastic external thread permits safe abrasive tool changing "with a single twist of the hand" in a very short time.

Application: For efficient abrasion of small areas, even with changing contours.
Reduced tool changing times save costs on multi-stage operations.

Note: **Sabre Special cleaning brushes can be** found under No. 57 3511 onwards.

Grinding discs ceramic grit (CER)

CER

Very high material removal rate and service life due to the use of self-sharpening ceramic grit (CER).
55 4001/4002 – Grit type: **100% geometrically shaped VSM ceramic grit** with abrasive coating (TOP SIZE).
55 4003/4004 – Grit type: **100% geometrically shaped VSM ceramic grit.**
55 4005–4016 – With precision formed **Cubitron™ II** grit.
55 4014/4016 – Strong **fibre substrate**, ideal for edge grinding.

Application:
55 4012–4006/4016 – Use in conjunction with hard backing pad No. 554089.

Abrasive flap discs, CONTOUR grinding disc (quick-change system, external thread)

Compared to conventional grinding discs, **mini-flap discs** with abrasive strips arranged at a very steep angle offer a **longer working life**, **more flexible grinding characteristics** and a **more even surface finish** (roughness value) down to the wear limit.
The Roloc™, Combidisc® CDR **quick-change system** with a plastic external thread permits safe abrasive tool changing "with a single twist of the wrist" in a very short time.

55 4030 – Very flexible version with stand-up strips and strip overlaps **for extremely gentle even grinding**.
55 4040 – Very high material removal rate due to the use of **self-sharpening ceramic grit (CER)**.
55 4032/4035 – Flat, compact arrangement of the strips for **weld seam dressing** and for **deburring work**.

Application: For efficient abrasion of small areas, even with changing contours. Reduced tool changing times save costs on multi-stage operations.

Note: **Roloc™ bristle discs** can be found from No. 573511 onwards.

CaraFin diamond polishing discs

CaraFin diamond polishing tools coated on one side with **mono-crystalline diamond**.
The bonded diamond grit achieves significantly **higher effectiveness** than loose diamond grit in polishing pastes.

Size D151; D64; D3; D1 – Soft PU backing for truly following the contours.
Size D30–D5 – Hard polyamide backing.
Optimum for polishing out the orange peel effect.

Advantage: Ancillary times for preparation and cleaning such as are required when polishing pastes are used are eliminated. Moulds optimally to the contours.

Application: Polishing work with high flexibility and conformity to contours **without polishing pastes.**
Ideally suited to use in combination with micro-abrasive systems No. 078140 and 078150.
Recommended speed 2000 rpm.

Garant GARANT CARAFIN DIAMOND POLISHING TOOLS

Since diamond is the hardest abrasive material, it is suitable for grinding all materials: Polishing of metals, paints, composite fibre materials (GRP) and ceramics. The new generation of GARANT CaraFin diamond polishing tools now offer you innovative environmentally-friendly products for surface treatment, which in addition will make your production process significantly cleaner and more efficient.

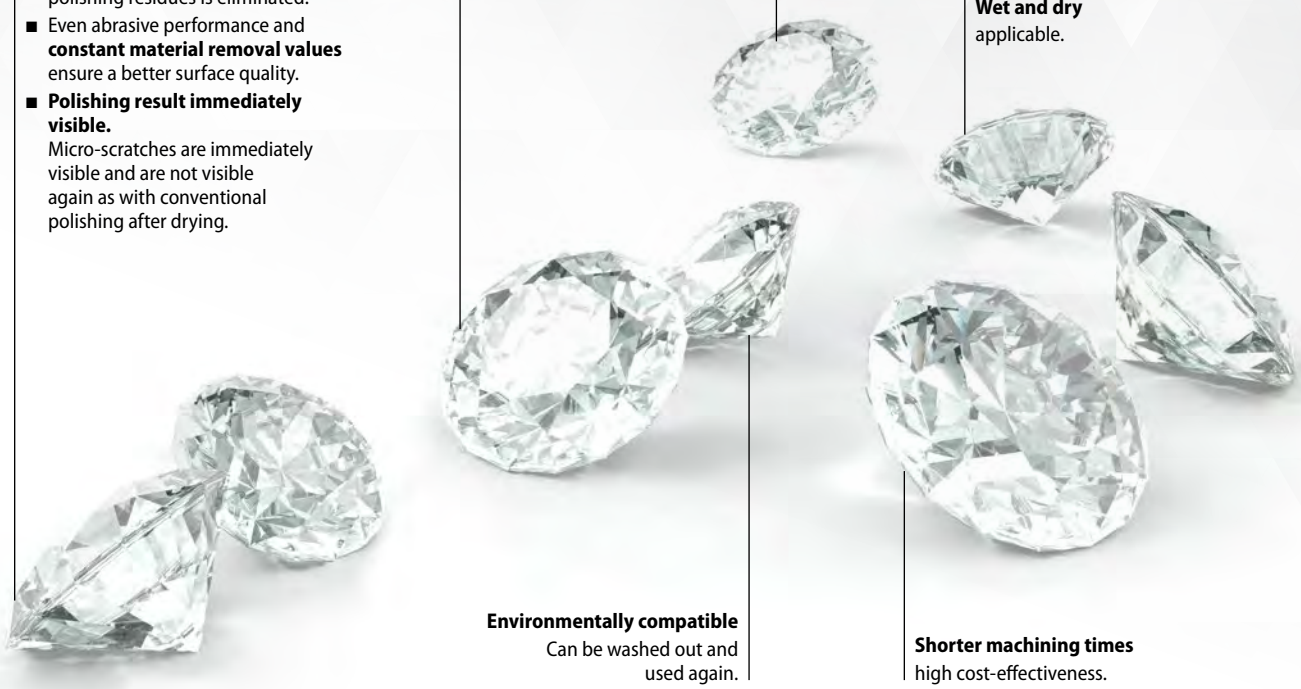
More effective than polishing pastes.

- **Better surface quality and more gloss** – no penetration of polishing agent into the surface of the workpiece.
- **Higher effectiveness** due to **longer tool life** than with conventional polishing pastes.
- **Further operations can be commenced** immediately – the time-consuming removal of polishing residues is eliminated.
- Even abrasive performance and **constant material removal values** ensure a better surface quality.
- **Polishing result immediately visible.** Micro-scratches are immediately visible and are not visible again as with conventional polishing after drying.

Easily automated
Geometry and removal behaviour are constant.

High-gloss results
without any use of chemical polishing pastes.

Wet and dry
applicable.



Environmentally compatible
Can be washed out and used again.

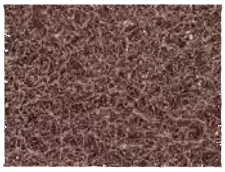
Shorter machining times
high cost-effectiveness.

Fe,S,Cl <0.1%

Abrasive / polishing fleece

Synthetic nylon fleece impregnated with abrasive grit in synthetic resin bonding.

Advantage:
- Adapts to the component shape.
- The open structure prevents clogging and reduces heat development.
- Even and reproducible finish.
- Can be used wet or dry.
- Contains no materials that could cause corrosion.



Cross section of the nylon fibre structure.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

Abrasive fleece pads/rolls (standard)

55 5995/5999/6087/6089 – High-performance fleece with **extremely dense grit distribution** deep into the fibres of the material. The special type of fleece structure permits **aggressive grinding characteristics**, a very long working life without clogging and an even **more uniform finish**.

Application: Can be used by hand, on hand block No. 556020 or on an orbital sander.

Size 100 – **Coarse and aggressive:** removes rust, rust film, and surface soiling. For roughening old paint, varnish, plastics, rubber parts (e. g. prior to bonding).

Size 220; 280 – **Medium / medium fine:** Can be used universally for removing rust film, light soiling, discolouration; for rubbing down ground or brushed surfaces, or for degreasing and cleaning prior to painting.

Size 400; 1000 – **Fine / very fine:** for cleaning delicate surfaces, for removing light scratches on metals. Also suitable for applying fine / very fine matt finishes to steels and non-ferrous metals.

Abrasive fleece pads / rolls (flexible)

55 6143/6150 – Hand-Pads of flexible and aggressive abrasive fleece.

55 6145/6148/6083/6085 – **Flexible** high-performance fleece with **extremely dense grit distribution** deep into the fibres of the material. The special type of fleece structure permits **more aggressive abrasive characteristics**, a very long working life without clogging and an even **more uniform finish**. The **enormous flexibility** enables use even in inaccessible places.

Application: For manual cleaning and finishing, ideal substitute for steel wool products.

Size 280 – **Medium / medium fine:** universally applicable to remove rust film, light soiling, discolouration; for rubbing down ground or brushed surfaces or for degreasing and cleaning prior to painting.

Size 1000 – **Fine / ultra fine:** for cleaning delicate surfaces, for repairing light scratches on metals. Also suitable for applying fine / very fine matt finishes to steels and non-ferrous metals.

Supplied with:

55 6143 – Pack of 10 hand pads.

55 6145 – Pack of 25 hand pads.

55 6148/6150 – Roll with 60 tear-off pads for dispensing.

Garant Soft-Pad roll, soft

A

Soft-Pad roll coated on one side with **standard aluminium oxide (A)**. **Ceramic coating** for a longer working life. Stored in a handy dispenser box, with visibility slot for quick assessment of the fill level.

Advantage: **Pure foam backing material.** This achieves the greatest flexibility and resistance to grit break-away. Reduced alien material penetration into the workpiece surface by a bonding structure free of solvents. **200 perforated pads**, each 100×120×3 mm.

Application: **Finish grinding of contours, edges, and at inaccessible places**, e.g. cleaning and preparation for painting. For wet and dry grinding.

	AlMg	< 900 N	< 1400 N	< 55 HRC	< 60 HRC	< 67 HRC	Carbide	INOX	Ti	GG(G)	CuZn	Plastics & GRP	Wood	Stone	Varnish	Uni

For sanding wood and painted surfaces

Flexible B or C paper, containing latex, spread with Aluminium Oxide (542B7 / 542C7). **Back with hook and loop fastener** for quick change of sheets and high tear resistance.

Advantage: For sanding wood and painted surfaces

- **Outstanding grit bonding** – long service life, no premature grit break-away damage to surfaces.
- **Dust-repellent additives** prevent clogging with grinding dust.
- **High-quality Aluminium Oxide grit** for max. grinding performance right to the end.

Application: Grinding of primed paintwork, fillers, finish paintwork together with deburring and roughening of plastic components and general preparation of wood.

SiC

STARCKE® Abrasive paper waterproof

Very strong and flexible latex paper evenly spread with **Silicon Carbide (SiC).** Good grit bonding, high abrasion force and long service life.
Sheet size 230×280 mm.

Application: Primarily for rubbing down by hand in bodywork building, repair workshops, and paint shops, for fine rubbing down of varnished or filled areas.

Garant Abrasive cloth economy rolls

Densely woven, robust and **highly flexible** cotton fabric (resistant to oil and petroleum) evenly spread with synthetic resin bonded **standard aluminium oxide (A).** Moulds ideally to the workpiece geometry. **High abrasive performance and long tool life.**

55 6980 – **Economy roll 115 mm wide** for all popular orbital sanders. **Cloth is drawn from the middle of the roll**, ensures a tidy workplace. Allows the roll to be used right up to the last piece without damage.

55 6960–6970 – **Economy roll in a handy dispenser box** with viewing slot for quick monitoring of the remaining cloth. With high-quality cut-off blade.

Application: **Ideal for metal.** Suitable also for wood and for abrading paint.

HOLEX Flexible abrasive belt holder “flexible file” 13 or 25 mm wide

Made of flexible plastic material with wedge-shaped abrasive belt support. Quick, safe tensioning of the abrasive belt by retaining clamps with clamping screw. Overall length 280 mm, abrasive surface length 120 mm.

Application: Uses abrasive cloth strips of length 280 mm (by the sheet or economy rolls). Particularly useful where access is difficult. Many applications, ideal supplement to files also in difficult applications.

AVSM Linishing belts regular Aluminium Oxide

Universal linishing belt with **Aluminium Oxide(A).** The grinding medium underlay is optimally designed to the grit and type of linishing belt.

55 8010–8012 – 40 grit - X-fabric (robust). 60 to 180 grit - T-fabric (robust-flexible) with **special flexibility.** Ideal for use on hand-held grinding machines.

55 8015–8140 – Robust X-fabric for **high material removal rate** on stationary grinding machines.

Application: For universal use on all popular materials: **steel,** non-ferrous metals, cast iron, **aluminium alloys, wood.**

Note: Other grit sizes, qualities, and dimensions are available on request in line with the manufacturer’s minimum order quantities. Unless specified otherwise on the order, belts will be supplied with standard joints. See No. 568526ff for spare linishing belts for burnishing machines.

VSM Linishing belts Zirconium Aluminium Oxide

High-performance linishing belt with **Zirconium Aluminium Oxide (ZA)** for a high removal rate. **The continuous self-sharpening characteristics** of Zirconium Aluminium Oxide permit **longer belt life** at **higher removal rates** and a more consistent surface quality compared to Aluminium Oxide.

55 8250/8315/8205/8317/8305/8310/8330 – X-fabric (sturdy) for high removal rates on stationary machines.

55 8207–8210/8220/8223/8252/8255/8256/8257/8259/8260/8304 – T-fabric (sturdy and flexible) with **special flexibility** for working in tight radii with hand-held machines.

Application: For use on all **steels and steel alloys, cast iron,** and also non-ferrous metals.

Note: Other grit sizes, qualities, and dimensions are available on request in line with the manufacturer's minimum order quantities. Unless specified otherwise on the order, belts will be supplied with standard joints. See No. 568526ff for spare linishing belts for burnishing machines.

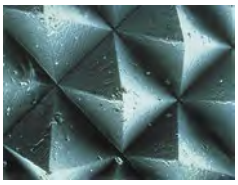
3M Linishing belts 237AA Trizact



The **pyramid-shaped grit (A)** is based on an exactly aligned three-dimensional structure of very small Aluminium Oxide mineral particles. During the abrasive process new layers of grit particles are continuously exposed – right until the backing fabric (X fabric) is reached.

Application: For smoothing and finishing. For **absolutely consistent fine abrasive results** on all steels, chrome nickel steels, cobalt, nickel, and titanium alloys.

Fleece linishing belts

Synthetic nylon non-woven fabric with synthetic resin bonded abrasive grit, long service life, **consistent surface finish, low heat generation.**

55 8485/8492/8490/8494/8495/8497/8498/8499/8500/8503/8504 – Flexible fleece belt for use on hand-held machines.

55 8506–8510 – Sturdy fleece belt with low belt stretch for very heavy duties.

Application:

55 8485 – For deburring, matting and finishing. The **low-stretch fabric backing** is particularly suitable for heavier loadings on pneumatic tools.

55 8481–8510 – For rubbing down rough ground or brushed surfaces, for consistent and reproduzible results. Also suitable for removing rust film, light soiling, and discolouration.

Garant Grinding oil without hazard labels

The safe and flexible grinding oil **for efficient working with grinding files and bench stones** to achieve optimal surfaces.

- Prevents rapid clogging.
- Improves cutting ability.
- Cleans and cools.
- Pleasant smell – petroleum/silicone-free.

Applications: can be used manually and mechanically (small grinding systems).
Ideal for machining moulds or sharpening blades.

KYOCERA Degussit® sintered ruby fine abrasive tools of oxide ceramic

The exceptionally high hardness of highly sintered Aluminium Oxide ceramic, free of binding agents, gives the fine abrasive tools an excellent edge and profile stability (synthetic ruby) for an outstanding surface quality.

Application: For precision work in tool and mould making, in precision mechanical manufacture, optical and glass industry, porcelain manufacture etc. For applying chamfers, for notching, and for changes of shape.

Rotating abrasive discs – General Information

For hand-held use on angle grinders

Here the abrasive media used (Aluminium Oxide or Silicon Carbide, mostly in combination of different grit sizes) are bonded in a phenolic resin.
Depending on the type of resin bonding (disc hardness), the quality of the abrasive medium and the type of glass fibre reinforcing fabric, the discs are intended for **different applications of grinding processes, material groups, and performance classes**.

Material groups:

- **Steel / cast iron** with very wear-resistant bonding systems.
- **Special types for stainless steel** with very high cutting performance, also suitable for steel.
  Fe, S, Cl content < 0.1 % (even "2 in 1" types) which prevents oxidation.
- **Non-ferrous metals / aluminium** with "soft" bonding system (prevents smearing).

Specification:

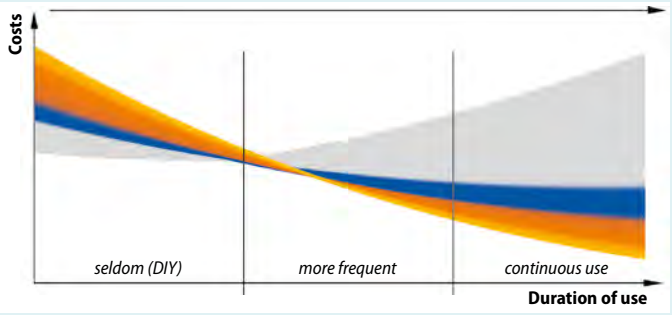
A60R-BFXA (example):

A	Abrasive medium (A standard aluminium oxide, ZA zirconium aluminium oxide, CER ceramic grit)
60	Grit size in mesh (24, 30, 36, 46, 60, 80, 120)
R	Bonding hardness (N, O, P, Q, R, S, T). N = soft; T = very hard.
B	Type of binding (B Bakelite artificial resin)
F	Fibre reinforcement
X	Manufacturer's internal designation
A	External fibre reinforcement

Safety at work:

- Observe the markings and limitations of the tool; do not use cutting discs for roughing.
- Wear ear defenders, eye and body protection.
- Never exceed the indicated running speed (rpm) or maximum cutting speed (m/s).
- Never use grinding tools which are unmarked.
- Destroy faulty grinding tools immediately.

Overall cost analysis for grinding



Garant TYROLIT PFERD 3M HOLEX

Performance classes:

- Premium quality
- Industrial quality
- "DIY quality"

Safe working:

All abrasive materials supplied by the Hoffmann Group are certified to:

oSa®

Association for safety and quality:

The oSa mark warrants fully-inspected manufacture and fulfilment of the strictest grinding tool safety requirements in the world, together with 100% traceability.

Rough grinding discs

- Grit, bonding, abrasive additives as well as reinforcement of the rough grinding discs are **optimised for maximum metal removal rate and working life in their respective applications.**
- Rough grinding discs, depressed centres (shapes 27, 28, 29).
- Grinding angle 20° to 30°.
- For use with electric and pneumatic angle grinders with maximum 80 m/s circumferential speed for grinding welds, surfaces, and edges.

Garant GARANT Master Uni rough grinding discs, ceramic grit

Self-sharpening **ceramic grit (CER)** and the specially matched **high-performance binding system** permit **grinding performance that is several times better, with extremely cool grinding** compared to conventional roughing discs (A).

- Very high productivity due to **very fast removal of material.**
- Optimum balance between **extremely soft metal removal behaviour** with very low application force and **very long service life**
- Ideal for grinding hard surfaces **made of steel and INOX** such as edge grinding, surface grinding or removing weld seams.

Specification: CER24Q-BF.

Cutting discs

- Grit, bonding, abrasive additives as well as reinforcement of the cut-off discs are **optimised for maximum cutting performance and working life in their respective applications.**
- Narrow cutting discs (0.8 mm / 1.0 mm / 1.6 mm) specially suited for quick burr-free cutting with low thermal stress. On older angle grinders please ensure discs are precisely centred.
- Cutting discs from 2.0 mm disc thickness exhibit increased lateral stability, stiffness and service life.
- Cutting discs flat (shape 41) or with depressed centre (shape 42).
- For freehand cutting using electric and pneumatic angle grinders with maximum 80 m/s peripheral cutting speed V_c. For stainless steel, use cutting discs at reduced speed.

Diamond cutting discs for wet and dry cutting

Diamond cutting discs for wet and dry cutting. Bore ∅ 22.23 mm.

- High cutting performance of diamonds gives short cutting times.
- Extremely long working life, fewer disc changes.
- Unvarying diameter, always cuts to the full depth.
- Hardly any disc wear, reducing dust generation.

Application: For cutting all common building materials such as concrete (even reinforced), bricks, natural stone, tiles, ceramics, steel etc.

Note:
- Diamond coating already pre-sharpened. **Observe correct direction of rotation!**
- **Other diamond cutting discs on request.**

56 9741

High-performance with **10 or 12 mm coating height.** Suitable for all building materials, long working life, protected against overheating.

3M Fibre discs (CER)

The precisely formed **high-performance abrasive grit** in 3M™ products consists of defined ceramic triangles optimally arranged on the grinding surface. **Greatly increased removal rate** with very long working life and even finish.
Extremely tear-resistant but very flexible **vulcanised fibre.** Bore diameter 22.23 mm and crossed slots.

Application: Limited to maximum 80 m/s circumferential speed with backing pads No. 566690 / 566692 on angle grinders. The quick-cutting grit permits **comfortable and ergonomic working** without the need to exert great pressure. At the same time the high removal rate of 3M™ fibre discs makes them a real alternative to roughing discs and flap discs.

Backing pad for fibre discs

Fibre disc backing pad with high temperature resistance.
Special design to enable full exploitation of the performance potential of fibre discs.

Backing pad, hard

80 m/s

Hard, non-deforming fibre disc backing pads.
Contact face **lightly ribbed for optimum grit support** when grinding edges and surfaces.
Special plastic with **very high temperature resistance.**
Ideal for **coarse grinding and roughing work** in 36 to 60 grit.

Coarse cleaning discs

SiC

Very **coarse non-woven abrasive mesh structure,** will not clog even when used on soft thick coatings.

56 6700 – Medium hard fleece body with very **aggressive grinding characteristics,** for an even finish and long working life. General purpose disc for all rough grinding work, **even for difficult applications** such as removing stubborn scale.

56 6726 – Extremely hard and aggressive fleece body creates a coarse finish with a very high cleaning effectiveness. Very **long working life, even when used on edges.**

Size 125 – With internal M14 thread fro quick installation.

56 6750 – Hard and aggressive fleece body for **general-purpose use** on large areas.

56 6712/6715 – Flexible fleece body, ideal for **grinding convex surfaces.** Creates a soft and even finish, especially suitable for visible surfaces.

Application: For rust removal, paint removal, dressing weld seams and removing surface dirt.

56 6712 – With **glass fibre backing for use with backing pad** No. 566650.

56 6700/6715/6726/6750 – With **glass fibre backing pad for direct clamping** on angle grinders.

Fleece compact discs

Steel | 60 m/s

Crimped-in fibrous fleece with resin-bonded aluminium oxide grit permits **metal removal and finishing in a single operation.**

Size 180 – **Universal disc** for light deburring work, for polishing out slight scratches and removing colouration.
Size 150 – **Medium hard** version with **increased aggressiveness and edge stability.** For general deburring work, light removal of material by abrasion with fine surface finish.
Size 100 – **Hard** version with coarse grits, very stable edge.

Application: For surface and edge grinding on angle grinders (recommended speed 6000 rpm).

Velour-backed abrasive discs on paper backing, Aluminium Oxide (A)

A

Abrasive paper thickness 540 FK (F paper, 40 to 180 grit) to paper thickness 544 C3K (240 – 400 grit, stearate coated) with **high strength and dense distribution.**
High removal rates due to specially treated abrasive grit **(A).**

Application: **General purpose** for grinding metal, non-ferrous metals, varnish, paint, wood, and plastic.

Velour-backed abrasive discs (paper) for orbital sanders

Velour-backed abrasive disc with **paper backing.** Dust-repellent coating prevents premature clogging. The back is covered with hooks and loops.

56 7553 – Velour-backed abrasive disc with open distribution, aluminium oxide (A). Ideally suited to materials that have a high tendency to clogging.
56 7557 – Velour-backed abrasive disc **MIRKA IRIDIUM®** with a mixture of ceramic grit (CER) and aluminium oxide grit (A), dust-repellent coating, high material removal rate and long service life.
56 7790 – Velour-backed abrasive disc with semi-open distribution, aluminium oxide (A).

Application: On **orbital sanders** with hook and loop pads e.g.No. 567990 (dust extraction available). Universal **all-round product** for coarse, intermediate and fine abrasion on all metal and plastic surfaces, paint systems and woods.
56 7557 – Ideal for **soft** and **hard surfaces.**

Velour-backed abrasive discs (film backing) for orbital sanders

Fe,S,Cl <0.1% | 40 m/s

With **stable film backing.** Dust-repellent coating prevents premature clogging.

Advantage:

56 7787 – ■ More uniform surface finish due to outstanding grit wear.
■ Improved tear resistance when the edges are stressed.
56 7792–7796 – ■ More uniform surface finish due to outstanding grit support.
■ Improved tear resistance when the edges are stressed.

Application: High-quality aluminium oxide abrasive grit (A) for general coarse, intermediate and finishing use.

56 7787 – High-quality self-sharpening ceramic abrasive grit (CER), open distribution. Universally applicable for coarse, intermediate and finishing use.

56 7796 – High-quality aluminium oxide grit (A), open distribution. For universal applications, coarse, intermediate and finishing.

56 7792–7793 – **Cubitron™ II** precision grit with the advantage of **quicker material removal** and more **consistent surface finish on large areas** (sheet metal work).

Garant CaraFin diamond polishing pad

D

Hook and loop fastening **CaraFin foam polishing pad** made from elastic PU material coated with **diamond grit.**
Foam material hardness optimally adapted to polishing stage.
The **effectiveness of the bonded diamond grit is significantly greater** than that achieved by loose diamond grit in polishing pastes.

Application: Very high flexibility and conformity to contours.
Without polishing paste.

MIRKA ABRALON™ discs for finish grinding

SiC | Fe,S,Cl <0.1% | 40 m/s

The ABRALON™ patented finishing system comprises a woven mesh with silicon carbide coating on a thin foam pad.
The advantages are:

- The grinding mesh enables water and air to **circulate freely**, the **grinding dust is effectively removed.**
- **High effectiveness** – reduced working time and longer working life.

Application: For manual and mechanised **dry and wet grinding** of contours, shapes, metals **with high demands on the surface finish** and for the preparation for polishing.

Velour-backed abrasive discs, mesh structure for dust-free grinding

Velour-backed abrasive discs consisting of a **mesh structure** of polyamide fabric containing thousands of holes and coated with abrasive grit.

Advantage:
- **Dust–free grinding:** very low impact on workplace and environment.
- No clogging of the grinding wheel (surface defects and dust balls are avoided).
- Guaranteed **improved surface finishes** with less grinding media consumption.
- **High effectiveness** – the removal rate increases by several orders of magnitude depending on the surface.

Cubitron™ II abrasive grit

Mini-linishing belts for finish grinding

A

Defined blocks pressed in as abrasive grit. High grit density for very long working life. **No clogging** due to defined channels. **Consistent surface quality** over the entire grinding process, even on thin sheets.

56 8534 – Mini linishing belts **Ø 90×100 mm** (289×100 mm).

56 8535 – Mini linishing belts **Ø 100×100 mm** (314×100 mm).

Mini-linishing belts with non-woven abrasive mesh, for matting

Fleece mini-linishing belts for blending in, matting and finishing.
With film backing, for light-duty use on all backing rollers.

56 8558 – Mini linishing belts **Ø 100×100 mm** (314×100 mm).

56 8561 – Mini linishing belts **Ø 90×100 mm** (289×100 mm).

Garant Backing rollers for mini-linishing belts

Mounting bore ∅ 19 mm with double keyway.

56 8570 – Resilient backing roller with multiple segments to allow linishing belts to be changed particularly easily. Size 2IN1 replaces the versions hard and soft usually available in the market.

56 8575/8577 – Pneumatic version, the degree of hardness can be set individually. Adapter for bike pumps included.

Application: To take mini-linishing belts No. 568531 – 568561.

LESSMANN® THE GERMAN BRUSH COMPANY **Technical brushes**

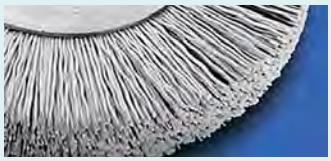
Wire material

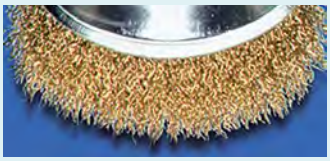
Steel wire / brass-coated steel wire with high tensile and flexural strength.

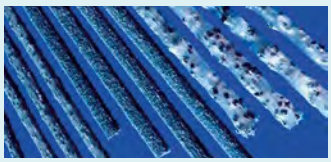
High-strength stainless steel wire (INOX) with high resistance to corrosion, acids, alkalis, and high temperatures.

Micro-abrasive polyamide bristles, incorporating abrasive Aluminium Oxide (A) or Silicon Carbide (SiC) grit.

Brass wire for machining non-ferrous metals and natural materials.

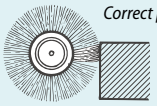




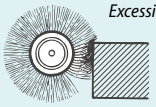


Instructions for use – optimising the brushing results

Correct working method



Wrong working method



Action	Circumferential speed	Brush ∅	Wire thickness	Bristle length
Increasing the brushing effect	↗	↗	↗	↗
Reducing the brushing effect	↘	↘	↘	↘
Brush retains burrs	↘		↗	↘

Note

Only the tips of the bristles act on the workpiece. Excessive contact pressure does not improve the result, but increases the required drive power and reduces the working life of the brush.

Recommended circumferential speeds for brushing jobs								
	Circumferential speed in m/s							
Applications	15	20	25	30	35	40	45	50
Deburring			25 – 35					
Cleaning welded joints					35 – 45			
Removing scale					35 – 45			
Polishing				30 – 40				
Processing plastics	15 – 25							

Weld seam dressing
Knotted wheel and cup brushes, highly aggressive.

Removing discolouration
Wheel brushes with shank, with waved stainless steel wire.

Brush access to restricted places
Knotted end brush opens due to centrifugal force.

Deburring
Wheel brushes with waved wire.

Rust removal, paint removal
Cup brushes for use on surfaces.

Cleaning, deburring, blending, finishing
Abrasive bristles for very fine surface finishes.

Wheel brushes

Multi-row – made of steel wire / stainless steel wire / brass wire / abrasive bristles

Waved wire firmly crimped into the steel body. **High density,** high concentricity, and good wear resistance. Adaptable to various different mounting bores by use of **interchangeable reducing rings** (supplied).

Size 250×30; 300×35 – Bore with double spline.

Application: Use on bench grinder or polishing machines, or on machines with flexible drive heads.

57 0100–0200/0170–0220 – For roughening, cleaning, removing rust, and scale etc.

57 1050/0170 – **For brass, copper, light alloys, etc.** For polishing, fine brushing etc.

Single-row of steel wire, knotted

Straight wheel brush with smooth steel wire 0.50mm, **knotted** and firmly crimped into the steel body.
Left knotted, reliably avoids premature unwinding.
Very aggressive brushing effect with high wear resistance.

Application: For heavy brush work such as descaling, removing rust, removing paint, roughening, cleaning metal parts, also for cleaning formwork boards.
For stationary use.

Deburring wheel brushes for deburring machines

Bore diameter 50.8 mm with double keyway 13×7. Other bore diameters available.

57 0510 – Waved high-tensile **stainless steel wire**.
57 0520 – Waved high-tensile **abrasive nylon bristles.**
57 0490–0505 – Waved high-tensile **steel wire.**

Application: For all popular bench deburring machines.
Particularly long working life due to special wire.

57 0505 – Keyway 13.5×7.6.
57 0520 – Flexible abrasive bristles for even deburring and rounding of corners and surface preparation.
57 0490–0510 – Ideally suited for economical deburring of flat strips, profiles, pipes, fittings, plastic parts, and the like.

Bristle Brush RB-ZB / BB-ZS / BB-ZB — Ø 25 / 50 / 76 / 150 mm

The **radial** bristle brush consists of individual segments (approx. 1.6 mm wide).

57 3545 – Removable mandrel **(shank Ø 3 mm)**. Segments can be combined to make up any desired brush width.

57 3565 – With oblique bristles (type A) for **powerful performance.**

57 3545–3555 – With curved bristles (type C) for use on **profiled surfaces.**

57 3547/3550 – Mandrel **(shank Ø 6 mm)** with cast segments.

Application: Ensure the correct direction of rotation.

57 3545–3550 – Requires no accessories for use on straight grinders or flexible shafts.

57 3555/3565 – **Bore Ø 25.4 mm,** with reducer rings Ø 22.23 / 19 / 15.6 / 12.7 mm supplied. Extendable to any width with adaptor No. 573580. For use on double grinding machines or on straight grinders on flexible shafts with mandrel No. 556380 size 1.

Supplied with:

57 3545 – 24 individual segments (approx. 1.6 mm wide) **including mandrel** with shank Ø 3 mm.

Hacksaw frame

Hacksaw frame

Hacksaw frame developed based on the **latest ergonomic findings** for non-fatiguing work with maximum cutting rates. **Extremely lightweight, high strength two-component frame** with **anti-slip inserts** for a secure grip. **Blade tension up to 1000 N(100 kP)** is easily achieved using the integral tensioning nut within the handle. Alternative **blade setting at 55°** for flush cutting. Overall length 395 mm.

Supplied with: Supplied with GARANT bi-metal hacksaw blade 1× No. 582500: progressive 18 – 32 tpi.

BOSCH Precision portable and bench circular saw blade, carbide-tipped

Precision saw blade with high-strength, **noise and vibration suppressing blade body.** The tensioning ring incorporated ensure stability of the shape in all temperature ranges. The **coating** prevents adhesions, keeps the saw blade cool and protects it against corrosion. **Precision-ground carbide teeth** ensure a long working life and best quality of cut.

Note:	Further circular saw blades can be found in Group 17.

Recommended cutting speeds:	
Material	**in m/s**
Steel	25 – 30
Aluminium	100
Multi-material	100

Type steel

Application: For **machining steel.** Special anchoring of the carbide teeth in the base blade prevents teeth breaking off. Tooth form: Trapezoidal flat teeth (with chamfer), neutral rake angle.

Size 136–210 – For hand-held dry-cutting hacksaws.

Size 305; 355 – For tenon saws and mitre saws.

LENOX Sabre saw blades set

Pack of most commonly used types of sabre saw blades for the respective applications, in a handy reclosable and refillable plastic box. One box to cover practically all applications.

Application: For metal.

Content: 5 pcs. bi-metal sabre saw blade size 818R
3 pcs. bi-metal sabre saw blade size 618R
3 pcs. bi-metal sabre saw blade size 614R
2 pcs. bi-metal sabre saw blade size 960R

Suitable for materials		Metal

Steel	S/STL	0.5-1.5

BOSCH Sabre saw blade THIN METAL

The PRO Thin Metal S325GF sabre saw blade has been specially developed for cutting very thin metal sheets, such as when working on heating and air conditioning systems. It is equally suitable for cutting non-ferrous metals such as copper sheet and is the ideal choice for heating, ventilation and air conditioning installations.

Application: For working on very thin metal sheets.

BOSCH Hole saw SHEET METAL

This hole saw combines the best features in a compact design: It is durable, accurate and optimised for high-quality work on sheet metal.

Advantage:
- Long tool life when cutting holes in stainless steel.
- Outstanding service life thanks to Bosch Carbide Technology.
- Ground and sharpened fine carbide teeth for strength and precision.

Application: For working on very thin metal sheets.

Note: Power Change Plus quick-clamping adapter and matching centre drill are required. You can find these in our eShop under the following item numbers: Power Change Plus quick-clamping adapter: No. 589795 size 14-152 and No. 589796 size 14-152 Centre drill with ejection spring: No. 589805 size HSS-CO.

Hole saws bi-metal

Robust unbreakable construction with variable toothing on flexible special steel body (bimetal). The reinforced stiff base is equipped with thread and drive pin holes (from ∅ 32 mm) for secure mounting on the arbor. The high quality of the HSS teeth, the teeth geometry and the tight manufacturing tolerances guarantee the best cutting performance and tool life.

58 9010 – ■ **Precision ground teeth** – very quick sawing and clean cut edges.

58 9030 – ■ **Variable tooth pitch 4.5 / 5.5 tpi with reinforced teeth (Tough Teeth).**
- ■ Maximum depth of cut for all sizes **40 mm.**
- ■ **Optimised coating** reduces heat development.
- ■ **SPEED SLOT®** – Quick removal of the drill plug by stepped recesses.

58 9010/9050 – ■ **Vario toothing 4/6 tpi for low vibration.**
- ■ Maximum depth of cut for all sizes **38 mm.**

Application: On pillar drills, lathes or hand-held power drills at the appropriate speed. For cutting circular holes from thin-walled to thick-walled material with a flat or convex workpiece surface. Suitable for all materials such as steel, **stainless steel,** brass, copper, cast iron, light metal, wood, plasterboard and plastic panels etc. Use of lubricant will give increased tool life (metals).

58 9030 – Also highly suitable for thin sheet metal bodywork.

Recommendation: The use of cutting oil such as No. 084205 size 0.25 extends the service life and permits more rapid progress through the material.

Note: **Arbors and hole saws are compatible with all commercially available bi-metal hole saws apart from Bosch SDS.**
For drill heads for stone see No. 788000.
For carbide circle cutters for steel see No. 118400, 118500, 119000.

Hole saw accessories and sets

Hole saw mounting shanks

58 9310 – Standard mounting shank with high clamping force.
58 9313 – Quick-change mounting shank for tool-free change of hole saw and centre drill (pull, turn, snap in).

Supplied with: HSS centre drill.

Note: For clamping on stationary machines with mountings other than hexagonal, select drill chuck No. 342220 size 16/16 and the matching plug-in shank.
For instance, for an MT2 arbor, use plug-in shank No. 342500 size 2/16.

TYROLIT Ceramic bonded surface grinding wheels

High performance surface grinding wheels with high-porosity bonding system for reduced thermal loading and minimal dressing diamond wear.

- **Universally applicable** for reciprocating grinding processes, which significantly reduces the frequency of wheel changes **in daily operation.**
- For use on all commercially available grinding machines for tool and die making and machine tool building, e.g. Jung, ABA, Blohm, Elb, Mägerle, Ziersch & Baltrusch, Geibel & Hotz, Jones & Shipman.
- **Cooling with emulsion is necessary,** ensure good lubrication, especially on long-chipping materials.

Note: Profile surface grinding wheels available on request.

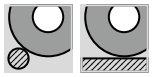
- Internal cylindrical grinding
- Bench grinder
- Saw sharpening
- Tool grinding

For special enquiries, you can download the "Data Sheet for Grinding Wheel Recommendation" from "Consulting and support" on our website.



Form 1A1

TYROLIT Synthetic resin-bonded surface and external cylindrical grinding wheels with CBN or diamond

Surface grinding and external cylindrical grinding wheels, **highly developed,** with **super-abrasives** (CBN or diamond) in synthetic resin bonding. The high-strength, **vibration-optimised VIB STAR grinding wheel base body** permits a **high damping** for a smooth, even grinding process with high surface quality.

- **Extreme performance improvement (G-factor)** compared to conventional grinding media.
- **The vibration-damping design of the carrier body significantly increases the working life.**
- **Continuous self-sharpening effect due to even power consumption and avoidance of cyclical sharpening operations.**

Application:

- **General use for all materials from a hardness of about 58 HRC (limit of economic use).**
- **For surface grinding and external cylindrical grinding (straight longitudinal grinding, recess grinding).**
- Can be used on all commercially available grinding machines for tool and die making and machine tool building, e.g. Jung, ABA, Blohm, Elb, Mägerle, Ziersch & Hotz, Jones & Shipman.
- Cooling with emulsion or grinding oil is necessary.
- Superabrasive CBN / diamond grinding wheels are always used **with less than half the wheel width** compared to that for conventional grinding wheels.

Note: Before initial grinding, these grinding wheels can be dressed on a soft steel block at an infeed of approx. 0.02 mm. Alternatively with a dressing tool No. 599600. Sharpen grinding wheels (opening up the bonding) using sharpening stone No. 599840.

A | Form 1

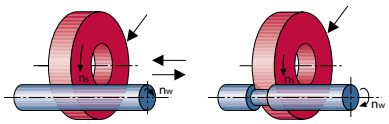
Ceramic bonded external cylindrical grinding wheels

High performance external cylindrical grinding wheels in ceramic bonding. The grinding wheel structure incorporates the optimum match of grit volume and bonding volume; bonding strength and manufacturing process are characterised by:

- **High cutting effectiveness and reduced grinding times with low wear.**
- **Low thermal loading, cool cutting.**
- **Long cycles between dressing operations mean reduced downtime.**

59 4225–4565 – Aluminium oxide for **general purpose** use.
59 4588–4595 – Sintered aluminium oxide for longer working life and better metal removal rate. Particularly suitable for **high alloy steels / HSS.**

Application:
- **For general use in external cylindrical grinding (straight/ oblique longitudinal grinding, recess grinding).**
- For use on all grinding machines generally used for tool and die making, and machine tool building (e.g. Kellenberger, Studer, Schaudt, Tschudin, etc.)
- Cooling with emulsion is necessary, good lubrication on long-chipping materials i s absolutely necessary.



Longitudinal grinding process | *59 4125*

Specification:
59 4225–4565 – **89A 802J5 AV217**
59 4588–4595 – SD83A80II7PVK8F

Note: Suitable also for surface grinding.

TYROLIT Bench grinding wheels and dressing wheels

Size NK36; NK60; EK60; EK80; SC46; SC80 – **High-quality long-lasting bench grinder wheels** in ceramic bonding. Very low radial and axial run-out, maximum cutting speed 40 m/s. For **general use** on double-ended bench grinding machines for deburring, sharpening and resharpening tools.

Size C800 – **Resiliently bonded honing wheels**, very soft. Maximum working speed 25 m/s.

59 6610 – Shape 5 with single-sided recess 125×20 mm.

Application:

Size EK60; EK80 – For hardened steels and HSS.

Size SC46 – For aluminium and non-ferrous metals.

Size C800 – For sharpening of cutting, polishing, effect grinding and fine deburring work. The clamping flange diameter area must be at least 2/3 of the wheel diameter.

Size SC80 – For sharpening solid carbide and carbide-tipped tools as well as cast iron and tungsten components.

Size NK36; NK60 – For construction steels and low-alloy steels and also grey cast iron.

Supplied with: Reducing ring set for the indicated bores.

Specification:

Size EK60; EK80 – White **electro-bonded aluminium oxide**, hardness grade M

Size SC46 – **Silicon carbide,** green, hardness grade H.

Size C800 – **PU-bonded silicon carbide.**

Size SC80 – Green **silicon carbide**, hardness grade J.

Size NK36; NK60 – **Standard aluminium oxide** grey-blue, hardness grade M.

Note: For compact deburring wheels see No. 568725 ff.

Synthetic resin-bonded laboratory cutting discs

A | Form 41N

SECUR LAB high performance laboratory cutting discs, of non-fabric, synthetic resin-bonded Aluminium Oxide for cutting off smelted steels, all kinds of powdered metallurgy steels, and all ferrous metals of various hardnesses.

Size 60 – Medium-hard cutting disc for material hardnesses of approx. 20 -62 HRC (250 -700 HV). **Specification: A80-BM.**

Size 67 – Soft, extremely quick-cutting disc for material hardnesses of approx. 60 -67 HRC (600 -900 HV). **Specification: A80-BS.**

Application:
- Cutting off metallurgical samples on stationary cutting grinding machines in the laboratory
- Exclusively wet cutting, coolant lubrication is required.
- Working speed **30 m/s, maximum 50 m/s.**
- Excessive pressure will cause the cut to wander.

CBN Form 11V9 Form 12A2D Form 12C2F Form 12V9 Form 4BT9

TYROLIT CBN tool grinding wheels - dry grinding

Tool grinding wheels with **CBN grit** in synthetic resin bonding for long service life and consistently high metal removal rates. The sandwich carrier body system of composite aluminium materials ensures high vibration damping and hence smooth grinding with consistent grinding results at high surface quality.

Size B126 – For fine surface quality and good metal removal rates.
Specification: B126C75B AMIGO-HSS.

Size B151 – For medium fine surface quality and very good metal removal rates.
Specification: B151C75B AMIGO-HSS.

Application: **For tool grinding on all common tool grinding machines.**
For grinding high alloy (HSS) tool steels and case-hardening steels, Stellite.

Synthetic resin bonding – dry grinding

Cup grinding wheels and dished grinding wheels with diamond abrasive coating.

Size D64 – Fine-grained for the best surface quality and good metal removal rates.
Specification: D64C50B DIAGO W-Carbide.

Size D126 – General-purpose grit for medium to fine surface quality and very good metal removal rates.
Specification: D126C75B DIAGO W-Carbide.

59 7520 Size D181 – Coarse-grained for the best metal removal rates.
Specification: D181C75B DIAGO W-Carbide.

Size D91 – General-purpose grit for medium to fine surface quality and very good metal removal rates.
Specification: D91C75B DIAGO W-Carbide.

59 7750 Size D151 – Coarse-grained for the best metal removal rates.
Specification: D151C75B DIAGO W-Carbide.

Application: **For general use on all common tool grinding machines.**
For grinding **carbide tools and short chipping non-ferrous materials.**
Very well suited to dry grinding, but can also be used for wet grinding.

Metal bonding – wet grinding

High-performance cup grinding wheels with diamond grit in metal bonding, giving increased strength and optimised binding of the diamond grit.
The optimum combination of grit and binding agent reduces the cutting forces, permitting **very high grinding performance** and **feed rates.**
Very high edge stability improves the **profile accuracy** even at high feed rates and **extends the dressing intervals** at constant surface finishes.
Specification: D64BXP-P STARTEC XP-P.

Application: High-performance grinding (slot grinding) of rotating solid carbide cutting tools.
For wet grinding with oil (recommended) or emulsion/water.

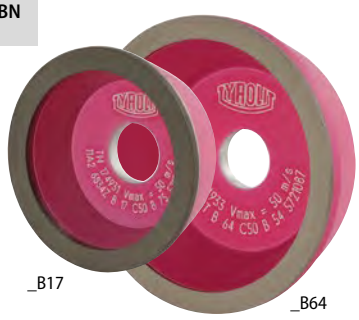
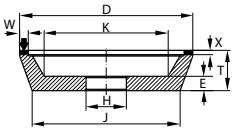
Form 11A2

D CBN

TYROLIT Diamond or CBN combination cup grinding wheel for Deckel S0/S0E





Form 11A2

Cup grinding wheels with CBN or diamond abrasive coating.

Application: **For cost-effective initial and finish grinding** of HSS and carbide styluses without changing the wheel, for Deckel S0 / S0E.
Can be used in pairs with No. 597111 / 597112 or 597121 / 597122.

59 7111/7112 – Diamond coating for high performance grinding of short-chipping materials with no ferrous content such as carbide, polycrystalline (PCD) tool materials, ceramic materials (PCS).
Specification D15C50B, D64C50B W-Carbide.

59 7121/7122 – CBN coating for high performance grinding of long-chipping ferrous materials such as hardened chrome steels and HSS tool steels (including powder metallurgy grades) and nickel-based alloys.
Specification: B17C50B, B64C50B HSS.

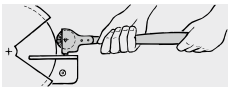
TYROLIT Grinding wheel dresser

Grinding wheel dresser with wooden handle

D

59 9100_DIA



Strong, handy wooden handle. A sturdy metal cage prevents grinding grit and sparks from flying out.

Size DIA – Very high wear resistance, with fixed diamond dressing segments.

Size STEEL – SIEVERT grinding wheel dressers with U-shape profile toothed discs made of Swedish steel, hardened and particularly wear-resistant.

Application: **For coarse dressing and sharpening of grinding wheels.**

Type			DIA	STEEL

TYROLIT Sharpening stone for CBN and diamond grinding wheels

A

Roughening and sharpening stones of homogeneous structures; various sizes.
Aluminium Oxide sharpening stone in **ceramic bonding (standard application).**

Application:
- **Sharpening (recreating the grit projections) of diamond and CBN grinding wheels** after dressing or during the grinding process. The bonding is cut back and the sharp diamond and CBN grit particles are made available again.
- Use **manually** or **stationary** on grinding machines with **radial in-feed.**
- Sharpening wet is recommended.

Note: Store sharpening stones preferably wet.

TYROLIT Precision grinding media range

The precision grinding range of Group 59 has been complemented by a **significantly extended precision grinding range** stocked by our supplier TYROLIT.

Discover more TYROLIT grinding tools for precision machining at www.tyrolit.com

The benefits for you:
- Approx. 1400 items in stock.
- Short delivery time.
- Small order quantities acceptable (single wheels or pack quantity).
- Well-proven simple and reliable processing by the Hoffmann Group.

D

TYROLIT Diamond grinding wheel dresser

Diamond grinding wheel dresser with plain, MT0 or MT1 arbor

Standard dressing tool for all machines with suitable holders. The dressers are intended to be **disposable** and should be renewed completely on reaching their wear limit. (They cannot be replaced in the holder.)

Size 0,4–1,5 – Disposable **single grit** diamond dresser.
Size 2,4 – Disposable **multi-grit** dresser with several individual diamonds.
59 9710/9720 – With spanner flats for each removal.

Application: For precision dressing and sharpening of grinding wheels to (re)create a defined condition of the grinding tool (axial and radial run-out, surface structure, grinding behaviour). For one-off and short series manufacture. Ensure sufficient flow of cooling lubrication. Short clamping distances (free length < 2×D) avoid vibration problems.

Size 0,4–1,5 – For straight, **slightly concave, and convex** grinding wheel profiles for external cylindrical grinding, surface grinding, **internal cylindrical grinding and profile grinding in the absence of sharp points.** Take care to mount the device in the correct position (inclination 3° to 15° to the grinding centre for both axial directions). So that the dresser wheel wears evenly, turn it 90° in the holder at regular intervals.

Size 2,4 – For **straight** grinding wheel profiles for surface and external cylindrical grinding.

Double open ended spanner

Drop-forged. With close tolerance jaw widths.

61 0600 – With optimised profile shank for specially secure grip and ergonomic working. Exceptional tool life and wear resistance.

61 0100/0120 – With easy-grip fluted shaft. Optimum flexional resistance, good torque transmission.

61 0900/0950 – With oval shank.

Standard: **DIN 3110 / ISO 3318**

Material:

61 0600 – Chrome vanadium steel, non-flaking, matt chrome-plated.

61 0900 – Chrome vanadium steel, phosphated.

61 0950 – Chrome vanadium steel, chrome-plated.

61 0100/0120 – Chrome alloy steel, non-flaking chrome-plated over nickel; smoothed finish.

Non-sparking tools can be found in prouct group 75 (product no. 75 9710 to 75 9738).

Combination spanner

Drop-forged. With close tolerance jaw width.

Combination spanner, normal version

61 3500–3520 – With easy-grip fluted shaft. Optimum flexional resistance, good torque transmission. Ring end with **AS-Drive** profile. (Sizes 3.2 – 5 with hexagon).

61 3600/3610 – With optimised profile shank for specially secure grip and ergonomic working. Exceptional tool life and wear resistance. Ring end with **HT-Drive** profile.

61 3800/3810 – Particularly suitable where space is tight. The combination of the 7.5° offset for the open jaws and the bi-hexagon geometry for the ring achieves a doubling of the application points. The small working arc of the open jaws allows the bolt head to be gripped every 15° of rotation.

61 3900–3970 – With oval shaft.

Standard: **DIN 3113 A / ISO 3318 / ISO 7738**

Material:

61 3500/3520/3510 – Chrome alloy steel, non-flaking chrome-plated over nickel; smoothed finish.

61 3600/3610 – Chrome vanadium steel, chrome-plated.

61 3800/3810 – Chrome molybdenum steel, matt chrome-plated.

61 3900/3910 – Chrome vanadium steel, phosphated.

61 3950/3970/3960 – Chrome vanadium steel, chrome-plated.

Note:

61 3600/3610 – **HT-Drive** – the particularly close-fitting profile.

Advantage:

- Bolts are gripped on the flanks. – The bolts are protected. – Longer bolt life.
- Larger contact surfaces between bolt and tool. – Secure grip and higher torque transmission.

The small working arc of the open jaws is particularly suitable where space is tight.

Wera JOKER 6007 open ended spanner / ratchet ring spanner extra-long

Drop-forged. Ring end with smooth-running sturdy precision ring ratchet (80 teeth) with a particularly small working arc of 4.5°.
The open end has a bi-hexagon profile and a replaceable hardened metal plate, which fulfills a stop function, preventing slippage and allowing a small working arc.

Material: Chrome molybdenum steel, matt chrome-plated.

Wera JOKER open ended spanner / ratchet ring spanner

Drop forged. Ring end with smooth-running sturdy precision ring ratchet (80 teeth) with a particularly small working arc of 4.5°.
The open end has a bi-hexagon profile and a replaceable hardened metal plate, which fulfils a stop function, preventing slippage and allowing a small working arc.

61 4875/4885 – Ring end 15° offset, reversible.

Material: Chrome molybdenum steel, matt chrome-plated.

JOKER 6004 is available in our product group 81 (article no. 81 3740 and 81 3745).

Handy stop function for secure engagement on nuts and bolts.

The end stop prevents irritating slipping from the bolt head.

Small working arc, no need to turn the spanner over due to the bi-hex profile.

Double-ended ring spanner, deeply cranked

Drop-forged. With close tolerance jaw widths.

61 5000 – With easy-grip fluted shaft. Optimum flexional resistance, good torque transmission. Ring end with **AS-Drive** profile.

61 5600 – With easy-grip profile shaft. Exceptional tool life and wear resistance. Ring ends with **HT-Drive** profile.

61 5900/5950 – With oval shaft.

Standard: **DIN 838 / ISO 3318**

Material:

61 5000 – Chrome vanadium steel, chrome-plated.

61 5600 – Chrome alloy steel; non-flaking chrome-plated, smoothed finish.

61 5900 – Chrome vanadium steel, phosphated.

61 5950 – Chrome vanadium steel, chrome-plated.

Note:

61 5600 – **HT-Drive –** the particularly close-fitting profile.

Advantage

- Bolts are gripped on the flanks.
- The corners are protected.
- Longer bolt life.
- Larger contact surfaces between bolt and tool.
- Secure grip and higher torque transmission.

STAHLWILLE® Double-ended crescent ring spanner

Drop forged ring spanner in a crescent shape. Close tolerance jaw widths.
Torsion-resistant fluted shaft. With **AS Drive** profile.

Material: Chrome alloy steel, non-flaking chrome-plated over nickel; smoothed finish surface (no sharp edges).

Application: Specially for working on engine blocks, e.g. fitting carburettors, alternators etc. and everywhere where nuts and bolts are difficult to reach using normal ring spanners.

Slogging ring spanners, straight

Drop forged, with short, strong profile shaft and reinforced striking end.

61 9000 – Extremely thin ring, exact tolerance jaw widths for working on bolts in very restricted places. The ring is higher than standard nuts, thus jamming is impossible. Stronger than any bolt.

Standard:

61 9161 – **DIN 7444**

Material:

61 9000 – Chrome alloy steel, painted green.

61 9161 – Chrome vanadium steel, phosphated.

FACOM Ratchet ring spanner for union nuts

Sturdy shank with split ring, which can be assembled around the hexagon nut. The split ring can be used like a ratchet.

Size 8–11 – With hexagonal ring.

Size 12–30 – With bi-hex.

Application: Predominantly for union nuts on pipework.

Double-ended open ring spanner (hydraulic / brake pipe wrench)

Drop forged; with reinforced ring, therefore exceptionally strong; jaw widths to exact tolerances. 10° angled heads.

61 9200 – With easy-grip fluted shaft. Optimum flexural strength, good torque transmission, very light and easy to use. Up to size 12×14 mm with hexagon ring - size 14×17 mm and above with bi-hexagon.

61 9705 – With oval, easy grip shaft, very strong. Up to size 12×14 mm with hexagon ring - size 14×17 mm and above with bi-hexagon.

Standard: **DIN 3118 / ISO 3318**

Material:

61 9200 – Chrome alloy steel; non-flaking, chrome-plated over nickel.

61 9705 – Chrome vanadium steel, chrome-plated.

61 9500

HOLEX Stud extractor

Strong steel body with axial through hole.
Three eccentrically placed rollers grip the stud firmly without causing damage.
The unit is placed on the stud and is turned. It automatically clamps and holds the stud.
Steel body size 6 to 12 with 1/2 inch square socket drive.
Size 16 only with spanner flats.

Material: Chrome vanadium steel, chrome-plated surface.

Application: For screwing and unscrewing studs.
For right-hand and left-hand threads.

Nut spinner with plastic handle, fully insulated to VDE

Handle and blade **fully insulated up to 1000 V to DIN EN IEC 60900 / VDE 0682-201**. Each of these screwdrivers is individually tested in a water bath for insulation breakdown under high voltage. **Application:** For use at voltages up to 1000 V.

with 2-component Haptoprene power grip, fully insulated

Ergonomically shaped **power grip** with easy-grip **Haptoprene** surface and an impact-resistant plastic core. The special surface structure allows transmission of high torques, even with wet or oily hands. **Blade** of chrome vanadium steel.

Multi-function key TwinKey®

2 four-way wrenches of die-cast zinc with reversible bit (Phillips and slot). The two wrenches are **linked with a magnet** to save space. When separated, two wrenches and the reversible bit are connected with a sturdy stainless steel cord so that they are captive.

Suitable for: Square socket 5; 6–7; 8–9; 10–11 mm,
triangular socket 7–8; 9–10; 11–12 mm,
two-wing ∅ 3–5 mm, half moon 6 mm,
stepped square plug 6; 7; 8; 9 mm, cross-head PH2,
slot-head 1.0×7 mm.

Application: Multi-function wrenches for operating locks in the field of building services (heating and sanitation, air conditioning and ventilation, electrical systems), gas and water supplies, and security systems.

Screwdrivers with T-handle for Torx® screws

62 5152 – Ergonomically shaped T-handle with easy-grip **Haptoprene** surface and an impact-resistant plastic core. Blade of chrome vanadium steel. Surface nickel-plated and chrome-plated, black tip. Size TX20 – TX40 with side drive.

62 5173 – Ergonomic 2-component T-handle with finger grip hollows and pleasant feel for high transmission of force and non-fatiguing work. With side drive and holding function on the long arm for secure holding of the screw on the tool. Blade surface matt chrome-plated.

62 5201 – Ergonomically shaped T-handle with non-allergenic elastomer coating and a core made of particularly tough and impact-resistant polypropylene. Blade of PB Swiss Tools special alloy combining maximum hardness and exceptional toughness. Chrome plated surface, black tip.

62 5221/5231 – Impact resistant plastic T-handle. Blade of vanadium special steel, matt chrome-plated, black tips.

Screwdrivers, for Torx® screws

62 5400 – **"multicraft" power grip**; exceptionally good grip, even with oily hands. Blade of PB Swiss Tools special alloy combines maximum hardness with exceptional toughness. Surface nickel-plated and chrome-plated, black tip. From size TX27 with hexagon flats for wrench assistance.

62 5406 – **SwissGrip Evo power grip** allows transmission of the required torque with no problems, even with wet or oily hands. Work without getting tired thanks to modified circular shape. High-tech 3-component materials improve the chemical and mechanical resistance. Handle with "Rainbow" colour coding for finding the correct drive size quickly.

62 5420 – **SwissGrip-power grip** with non-allergenic elastomer coating and a core of particularly tough and impact-resistant polypropylene. High torques can be exerted even with wet or oily hands. Tool handle made of conductive plastic, **suitable for ESDs.**

62 5500 – **Kraftform handle** with integral soft zones. Blade of high quality tool steel, surface matt chrome-plated, black tips.

62 5701 – **Multi-component power grip** with grip zone optimised for torque and comfort. Blade of high quality tool steel, surface matt chrome- plated, ChromTop tip.

62 5406/5420 – **Blade** of PB Swiss Tools special alloy combines maximum hardness with exceptional toughness. Surface nickel-plated and chrome-plated, black tip.

62 7377

Hexagon key L-wrench 90° – 100°, long, with ball point and short arm

Extra-short arm with flexible angle (90°– 100°), ball point can be inclined at an angle up to 30°. PB Swiss Tools special steel combining maximum hardness with exceptional toughness.

Size 1,5; 2 – Only with 90° angle.

Material:

62 7381/7386 – Surface nickel-plated and chrome-plated.

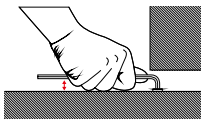
62 7382/7387 – Surface nickel-plated, chrome-plated and **powder-coated** for quick location using clear "Rainbow" colour coding.

Advantage: Flexible angle at the short arm (90°– 100°).
90° for insertion: Even places that are very difficult to access can easily be reached.
100°for working: The free space for the hand ensures pleasant and safe working.

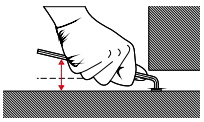
62 7381

62 7382

Short arm for screws where access is difficult:



90° for insertion.



100° for working.

62 7504

Hexagon electronics screwdriver

Ergonomically configured multi-component handle with smooth-running **rotating cap** (for fingertip pressure during precision work). Optimally shaped **quick turning zone** for fast, efficient screwdriving and **power zone** for transferring higher torques.

62 7470/7475 – Blades of high-quality tool steel, surface matt chrome-plated, black tip.
Hex-plus profile prevents deformation of the screw head and transmits more torque.

62 7490–7499 – **Blade** of PB Swiss Tools special alloy combines maximum hardness with exceptional toughness. Very high accuracy of the blades. Surface nickel-plated and chrome-plated.

62 7495/7499 – Tool handle made of conductive plastic, **suitable for ESDs.**

Application: For precise, efficient screw driving operations for electronics applications. Also ideal for all sensitive setting and adjustment work.

Supplied with:

62 7494/7499 – Practical stand / wall rack.

Hexagon ball point screwdrivers

Straight hexagonal shank with ball point.

62 7620 – **"Multicraft" power grip** of impact resistant plastic (cadmium free), particularly easy grip, even with oily hands. **Blade** of PB Swiss Tools special alloy combining maximum hardness and exceptional toughness, surface nickel-plated and chrome-plated.

62 7633 – **SwissGrip-power grip** with non-allergenic elastomer coating and a core of particularly tough and impact-resistant polypropylene. High torques can be exerted even with wet or oily hands.
Blade of PB Swiss Tools special alloy combines maximum hardness with exceptional toughness. Surface nickel-plated and chrome-plated.
Tool handle made of conductive plastic, **suitable for ESDs.**

62 7742/7746 – Ergonomically shaped **power grip** with easy-grip **Haptoprene** surface and an impact-resistant plastic core. The special surface structure allows transmission of high torques, even with wet or oily hands. **Blade** of chrome vanadium steel. Surface nickel-plated and chrome-plated.

62 7400/7410 – **Kraftform handle** made of impact-resistant plastic with integral soft zones. Blade of high quality tool steel, surface matt chrome-plated, black tips.

62 7511/7512 – **Multi-component power grip**. Impact-resistant core with torque and comfort optimised grip zone. Blade of chrome vanadium steel, surface chrome-plated.

TAKE IT EASY TOOL FINDER

63 0297

¼″

Hexagon socket, 1/4 inch, short

Forged from high quality steel, internally bevelled for easy fitting to bolt heads.

Hexagon socket

63 1000 – Optimum grain orientation due to special forging process. Close tolerance width across flats.
No rounding of bolt corners, nuts and bolt heads are protected.
Hardened in an oil bath, stress-relieved and distortion-free for a precision fit.
Rounded surface with **AS Drive** profile.

63 1029 – Close tolerance jaw sizes with **HT drive** profile protect corners of nuts and bolt heads.
Thin walls for access to restricted places.

Standard: **DIN 3124-S**

Material:

63 1000 – HPQ® high performance steel, non-flaking chrome-plated over nickel.

63 1029/1020 – Chrome vanadium steel, chrome-plated.

Note:

63 1029/1020 – GARANT and HOLEX hex sockets also available in imperial sizes (GARANT: No. 631032; HOLEX: No. 631022).

Hexagon Surface Drive socket

Surface Drive

The Surface Drive socket allows a tighter fit and a higher effectiveness.
The pressure works directly on the faces of the nuts and bolts; weaker corners are protected.
Intermediate sizes e.g. in inch (A/F, BSF, BSW) and rounded heads can be tightened or loosened using the Surface Drive. Sockets with hole.
Square drive socket with hole to DIN 3120 D 6.3.

Material: Chrome vanadium steel, chrome-plated.
