

# Logo and icon

Yandex  Cloud

## Main version

Use the full version for larger logo sizes in larger mockups where the goal is to take up more space.

The compact version is needed when the width of the layout does not allow you to use the full version.

## Round icon version

The version is used:

1. In the favicon, avatar of a channel or app.
2. In a row with other Yandex service icons.
3. When the logo is in a row with other product logos part of the Yandex B2B Tech business group.

## Monochrome version

Use the monochrome version when placing your logo on photos or colored backgrounds.

And if there are technical restrictions: printing or engraving, for example.
