# Annie.

3 years old.

A girl with albinism from  
Guinea Conakry.

Annie is a little albino girl with an  
incredibly difficult fate!

After her birth, the girl was given to a street vendor and became a tool for making money in the hands of bad people.

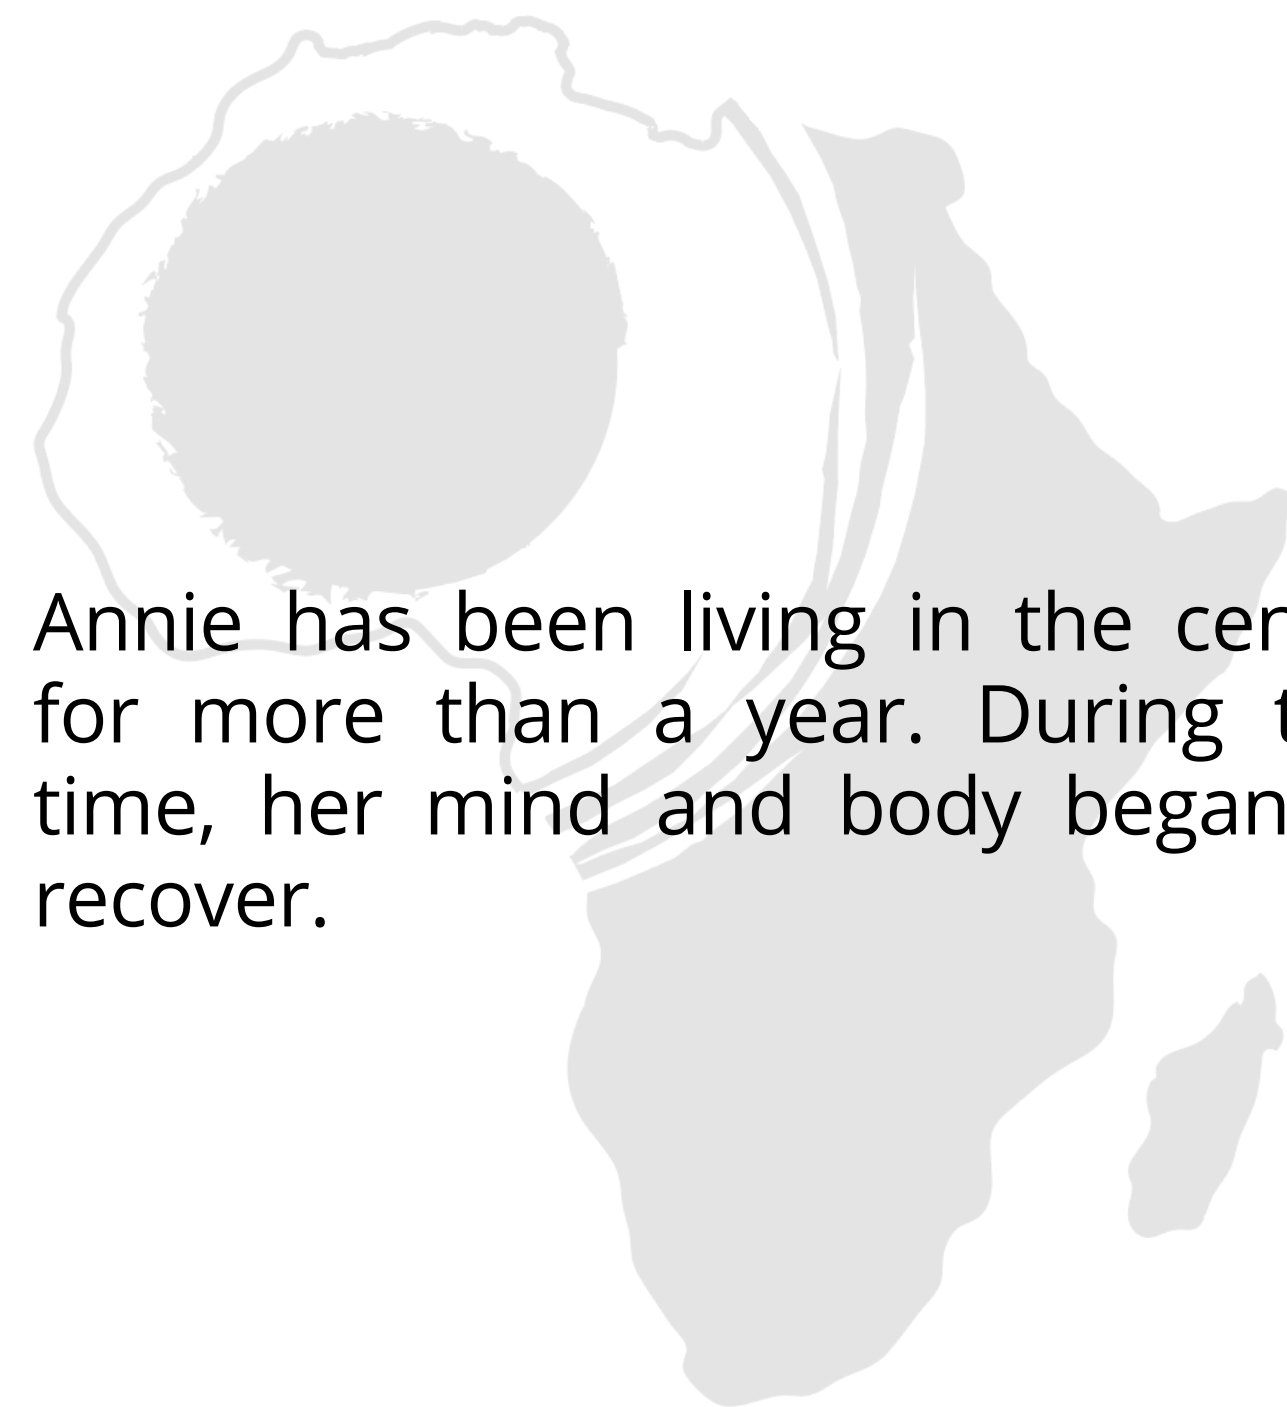

In August 2021, the child was admitted to our center in a very serious condition.

Her legs could barely move, her eyes could hardly see anything, she was covered in dirt and starving...

The necessary examinations of doctors were carried out to bring the child out of the serious condition. The girl needed medical assistance.

Annie has been living in the center for more than a year. During this time, her mind and body began to recover.

The child smiles, eats, communicates with other children and walks independently!

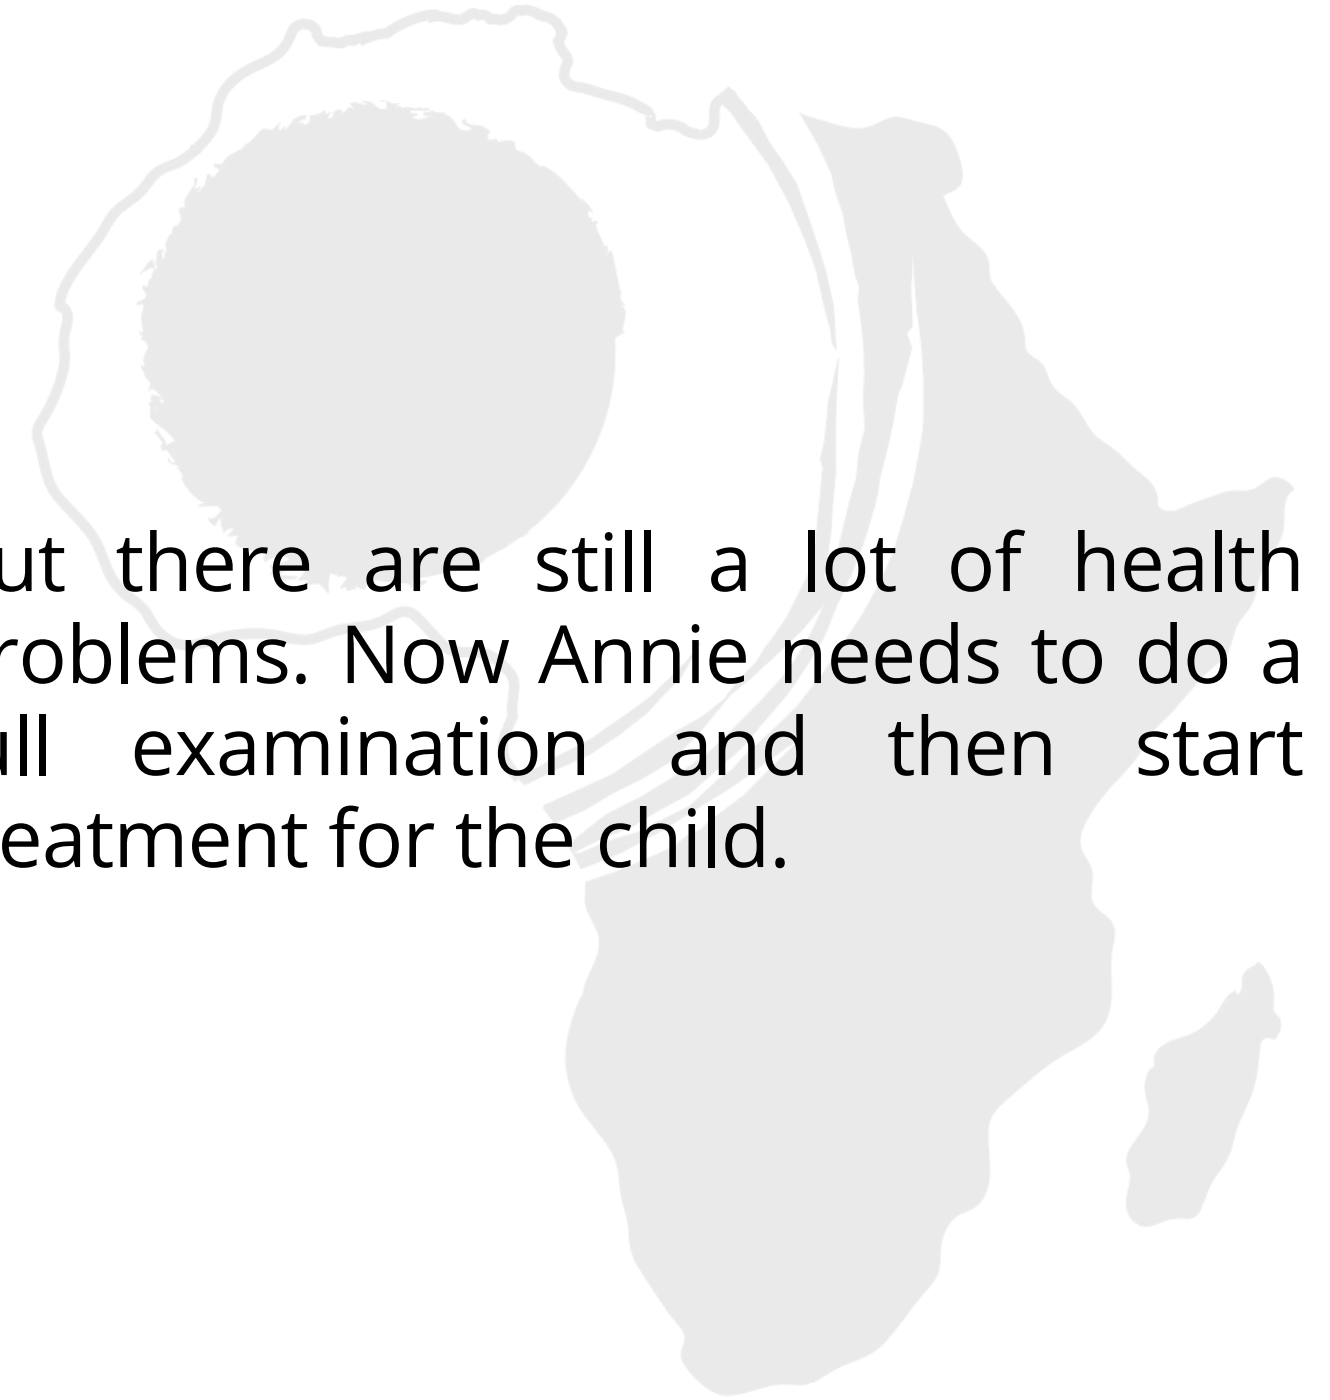

About her vision, doctors also give positive predictions.

But there are still a lot of health problems. Now Annie needs to do a full examination and then start treatment for the child.

Monthly required amount to restore Annie's health and maintenance is **€6000 Support Annie** by giving the girl a chance to live a full life.
