WORK EXPERIENCE

ITC DaVinci

Software Developer

Jan 2018 - Aug 2019

- Developing the admin panel on Flask
- Designing the database (PostgreSQL)
- Designing the mobile API on GraphQL
- Test coverage of existing code
- Later, worked on integrating the GraphQL API and the Ionic (for mobile) application

PAPARA.RU

Backend Developer

Jan 2019 - Aug 2019

- In this company, I came to an existing project (it was ~5 years old). I immediately discovered the problem of a large technical debt, so I talked to the Manager and made a small plan for refactoring. As a result, after 6 months of slow implementation of features and execution of current tasks, the legacy code was eliminated.
- - Django / Celery / DRF / MySQL

SELECTEL

Backend Developer

Aug 2019 - Mar 2020

- While working at Selectel, I was developing a part of the corporate portal for internal needs. I have been developing it from the very beginning, so I designed the database for the project, as well as the API.
- - FastAPI / SQLAlchemy (PostgreSQL) / Dramatiq / PyTest

Elastoo

Backend Developer

Apr 2020 - Present

- Participated in the development of several fintech services, games included in the ecosystem of other projects and telegram bots used both as an entry point for other services and as a separate tool.

EDUCATION

RANEPA

Bachelor of Computer Science

PROJECT

sitri

Oct 2019

- Tool for managing authorization and configuration data from a single object with possibly different or identical providers.

SKILLS

- FastAPI
- Flask
- Django
- SQLAlchemy
- PostgreSQL
- Git
- Dramatiq / Taskiq / Celery / Faust (aka Faust-Streaming)
- PyTest / UnitTest
- REST
- GraphQL
- HTML / JS / CSS
