PREFACE

The blessings of "Shri Bala Chandrika" has enabled me to place before the astrological fraternity, a long needed treatise which is somewhat fulfilled by writing an independent and exclusive book on "Navamsa" techniques for the first time in English.

In Hindu predictive astrology, Navamsa occupies an outstanding position and draws one's attention for deeper scrutiny and understanding. The Navamsa techniques are very many, as many as possible are dealt with in this book. Students are advised to study not only the classical texts but also Nadi Granthas, such as Deva Keralam: Chandra Kala Nadi, Dhruva Nadi, Bhṛigu Nadi etc. for additional knowledge.

The present is a rare kind of work, what the readers would find in this treatise can hardly be found elsewhere.

I have ventured into an uncharted area of Nadi Granthas and classical texts, where the concept of "Navamsa" has been extensively and innovatingly applied to solve various techniques of predictions.

I do not think it fit, to enumerate the innumerable techniques discussed in the book here, but I would like to state that many technical terms such as, Nidhanamsa, Ashtamamsa, Pushkaranavamsa, Bhava-suchaka-navamsa, the 64th Navamsa, Vikatamsa, Bhava-madhya-navamsa and many more are explained, showing their correct impart.

Many more techniques can be found from Vidhya-madhaviyam, Kashyapa Jataka (about 107 verses in Hora-Ratnam part II) and Nadi Granthas. If God ordains and gives me energy and sound health, I would add many more techniques in the next edition.

In conclusion, I crave indulgence of readers for scares of solecisms that have crept in while I was struggling to squeeze the right sense out of many a tough Sanskrit verse and express it in a foreign language. Further,

I also consider it necessary to emphasize here the fact that the present treatise claims to be a master key but only a attempt to solve some of the knotty problems of predictive astrology. I am fully aware that I have touched only the fringe of the subject so far and skill more remains to be done.

charts in North Indian style along with South Indian one, for the benefit of the readers.

I wish to express my gratitude to (1) Shri Naresh M. Sethia (of Baroda) for contacting the publisher every now and then by meeting him personally or talking on phone and (2) Shri Hari Prasad S. Bhatt (of Mumbai) for unsolicited help in getting the proofs checked and working out the mathematical calculations etc. in preparing the chapter on Navamsa - Dwadasamsa.

Any suggestions or comments regarding necessary additions or improvements to be made in this work, shall be gladly received and considered for the next edition.

I shall consider my labour amply rewarded if this book proves helpful to students and practitioners in enabling them to make predictions with greater confidence and greater success than otherwise.

PART I

CHAPTER 1

INTRODUCTION

The Navamsa is the most important sub-division of the Hindu Astrology. Usually the Rasi Chart and the Navamsa Chart are tagged together in the South. The importance of Navamsa is so great that practically every author of the past (standard texts) has made use of Navamsa technique in his book. Full-fledged books have also been written by renowned teachers of astrology, mainly based on Navamsa Division, such as Jaimini system, Kala Chakra Dasa, Sarvato-bhadra-Chakra and Ankana Shastra. The literature on Navamsa is so vast, that if an attempt is made to collect all those verses, the total figure would go beyond 3000 verses.

Mantreshwara says that "Some authors are of the opinion that effects emanating from Navamsa Chart are similar or equal to those of Rasi Chart." Some astrologers attach to 'Navamsa' even more value than Rasi itself e.g. "स्वोच्चे नीचांशगे दुःखी नीचे स्वोच्चांशगे सुखी" - the Sun in Mesha sign in Thula Navamsa is of no avail for being in exalted sign. On the other hand the Sun being in Thula Rasi in Mesha Navamsa gives very good results.

"प्रायो नवांशेऽखिलं" and "जातकफलं नवांशे" (Mana-sagari) meaning all aspects of life can be gleaned through Navamsa Chart. These two aphorisms made the author thinking since last forty years. During this period, material pertaining to "Navamsa" chart, has been collected from various sources (mainly from Deva Karalam and other Nadi texts) which resulted in the present "Book".

These Navamsa techniques properly studied and carefully utilized can enable one to foresee most of the events in native's

life without doubt. For doing so, one has to study well the principles explained in Part I of the book and apply them diligently for successful predictions.

Why Navamsa Chart is given more importance in Parasara's Shodasha Vargas?

(1) It is very significant that Nakshatra quarter is identified with Navamsa. Both are not only of the same length (arc) but their lines of demarcation are also identical. It is for this reason that the Navamsa Division is the most important amongst all the 16 Vargas. In Southern India, no astrologer would look at a Rasi Chart without Navamsa Chart. Some astrologers attach to "Navamsa Chart" more importance than Rasi Chart, because a planet debilitated in Rasi but exalted in Navamsa, makes the native happy. (Grahanan Amsakam Balam)

(2) Vimshopak: Amsa divisions are magnified projections and as such the findings from Rasi Chart are to be modulated. In Vimshopak, Rasi gets 6 points out of a total of 20 points. Next in importance is Navamsa with 5 points, Drekkana with 4 points while Hora and Dwadasamsa get 2 points each and Trimshamsa gets only one point.

(3) Navamsa chart gives a clue about the exact position of planets to greater accuracy, e.g. in Meena Lagna the Sun is Vargottama, one can safely say, that he is between 11°-26°-40' to 12°-00°-00'.

(4) Lordships of Navamsa signs are the same as those of Rasis i.e. having the same order.

(5) Use of Navamsa-tulya-Rasi and Rasi-tulya Navamsa is made only in Navamsa chart and not in any other division (Varga).

In short

(1) Navamsa chart is back bone (Meru-Danda) and Rasi chart is (देह) the body only;

(2) Navamsa chart is fruit and Rasi chart is a tree;

(3) Navamsa chart is Xray photo and Rasi chart is photopicture;

(4) Navamsa chart is Antar/Bhukti and Rasi chart is Maha Dasa;

(5) Navamsa chart is Sookshma Vibhaga and Rasi chart is Sthoola Vibhaga.

For the sake of convenience, the above square type horoscopes have been shown alongside in a composite circular chart. The outer circle of the disc indicates Navamsas, the third inner circle shows (Nakshatras) constellations and the fifth inner circle indicates signs. Signs and Navamsas are marked numerically as Mesha (1), Vrishabha (2), Mithuna (3), Karka (4)---upto Meena (12) in anticlockwise direction.

Each sign is divided into nine equal parts of $3^{\circ}-20'$ each, known as Navamsa. Each asterism of $13^{\circ}-20'$ is divided into four equal parts of $3^{\circ}-20'$ each known as padas or quarters or charanas as 1st, 2nd, 3rd or 4th quarter of a star.

The ascendant is in Kataka sign and Kanya Navamsa ($3-8^{\circ} 53'$) and this is indicated by an arrow in the circular chart at proper place; similarly natal positions of all the seven planets and Rahu and Ketu are marked with arrows in their respective signs and Navamsas as shown in the circular chart. This circular chart with all 108 Navamsas marked numerically alongwith the circumference will be found very useful and convenient for making all kinds of prognostications based on Navamsa. One can immediately find sign, Nakshatra, its pada, Navamsa sign position occupied by a planet in no time. To read Navamsa chart, circular diagram is a must.

Numbers 1 to 12 - refer to Navamsa Rasi. Circled figures refer to Vargottama Navamsas.

The ascendant in the standard horoscope is 3°-8°-53' i.e. the 3rd Navamsa in sign Kataka. The first Navamsa in sign Kataka is Kataka, so the 3rd Navamsa will be Kanya. With Kanya sign as ascendant prepare a chart, and insert Rasi figures in remaining parts serially. The Sun is 8°-16°-10' i.e. the 5th Navamsa falls in Simha. The 5th Navamsa in sign Dhanus is Simha. Put सूर्य (the Sun) in Simha. The Moon is 6°-12°-13' i.e. the 4th Navamsa in Thula. The 4th Navamsa in Thula is Makara. Put चंद्र (the Moon) in Makara. Mars is 4°-7°-9' i.e. the 3rd Navamsa is sign Simha. The 3rd Navamsa in sign Simha is Mithuna. Put मंग (Mars) in Mithuna. Mercury is 8°-25°-13' i.e. the 8th Navamsa

in sign Dhanus. The 8th Navamsa in Dhanus is Vrischika. Put बु (Mercury) in Vrischika. Jupiter is $10^{\circ}-29^{\circ}-29'$ i.e. the 9th last Navamsa in sign Kumbha. The 9th Navamsa in sign Kumbha is Mithuna. Put गुरु (Jupiter) in Mithuna. Venus is $9^{\circ}-13^{\circ}-14'$ i.e. the 4th Navamsa in sign Makara. The 4th Navamsa in Makara is Mesha. Put शु (Venus) in Mesha. Saturn is $2^{\circ}-20^{\circ}-42'$ i.e. in the 7th Navamsa in sign Mithuna. The 7th Navamsa in sign Mithuna is Mesha. Put श (Saturn) in Mesha Navamsa. Similarly Rahu and Ketu will occupy Mithuna and Dhanus Navamsas.

How to study Navamsa Chart

First of all the reader should study critically Part I of the book, going through more than once, so as to grasp the various techniques to be utilized for delineation purposes:-

(1) "Subhamsa-Papamsa"- it is better to have many planets in Subhamsas.

(2) Planets - whether they are in Uchcha, own house, friendly, Neecha or enemy Navamsas;

(3) Planets - in Bhavatmaka Navamsas such as-Bhagyamsa, Labhamsa, Kendramsa, Konamsa, Lagnamsa for good results;

(4) Planets in Chara - Sthira and Common Navamsas, useful in knowing longevity;

(5) Planets - in Vargottama for better results;

(6) Planets - in the 64th Navamsa for timing events;

(7) Planets - in Pushkara Navamsa for higher status in life;

(8) Nidhanamsa and Ashtamamsa for mode of death and life period;

(9) Eventful years in life showing in which year good or bad events will take place;

(10) Rasi-tulya Navamsa and Navamsa-tulya Rasi for transit results of major planets; etc.

Many more techniques for prediction can be found practically in every chapter of Part I.

CHAPTER 2

NAVAMSA-LITERATURE-TERMINOLOGY

Part A

Four books

- (1) Jaimini System;
- (2) Kala-Chakra Dasa;
- (3) Sarvoto-bhadra Chakra; and
- (4) Ankana Shastra (by Vyaghra-Pada)

On each of these four systems, independent books have been already written and published. All of them are based on Navamsa-Division (Varga).

Part B

Practically every standard text on Astrology, right from Vraddha-Yavana-Jataka (150 B.C.) till 18th century, various authors:- Meena Raja, Sphuji Dhwaja, Varah Mihir, Pruthuyasas, Kalyan Varma, Gunakara, Bala Bhadra, Mana Sagari author, Vaidya Nath, Mantreswara, Vidya Madhaviya author, Dhundi-Raja, Kamalakar, and various other authors have dealt with Navamsa-division in one or more chapters and/or partially here and there in their respective books in various verses. If one collects all these verses, the collection (sangraha) would go upto 3000 verses or even more.

Big Chapters on Navamsa Results

Some authors give importance to rising Navamsa (उदितनवमांश) and others to Navamsa occupied by the Moon at birth:

(1) Saravali - (Kalyan Varma) in chapter 50, (109 verses) gives results about the nature, traits, physical features etc. of native, one verse for each rising Navamsa.

(2) Nashta-Jataka - (from a Tamil Jataka work based on dogmas from Nadi-granthas) for 108 Navamsas of Ascendant showing place of birth (North-south street or East-West street) adjacent houses around the birth house, surroundings etc. for 108 Navamsas.

(3) Yavan-Jataka - (Sphuji-Dhwaja) in Chapter 31" (109 verses) - Navamsa occupied by the Moon-describing colour, nature, form, characteristic marks on the body (moles etc.) of native for each of the 108 Navamsas.

(4) Nakshatra Chudamani (नक्षत्रचुडामणिः) - This book describes traits, virtues or vices of a native on the basis of the Moon's 108 different Navamsa positions.

Part C

While Deva-Keralan employs many new concepts and novel techniques about uses of Navamsa-tulya Rasi and Rasi-tulya Navamsa and many other methods not found in classical texts. Dhruva-Nadi (G.O. M.L., Chennai) is the only book which gives planetary position of Navamsas in Bhava-Suchaka terms as Bhagyamsa; Nidhanamsa, Labhamsa etc. The author Jaya Muni has mentioned all the planetary positions in terms of Bhava-Suchakamsa in all charts.

Vidyamadhaviyam (Mysore University) freely uses Navamsa Chart as an independent chart, for aspects, ownership, positions etc. in about 600 (six hundred) verses.

Every standard book on astrology has given one or more small or big chapter/s on Navamsa results.

Hora-sara has made wide use of Navamsa technique, practically in most of the chapters. Some full chapters-viz.

(i) Chap. XXII deals with various ways/sources of obtaining wealth;

(ii) Chap. XXIV deals with diseases causing exit from the world; has used Rasi, and Rasi-tulya Navamsa e.g. Mesha-Meshama Meen-Meenamsa etc.

(iii) Chap. XXX gives traits, nature, features etc. of native; and years of sickness, diseases for all the twelve Navamsas.

Of late, recently, Shri S. Krishna Iyenger has written 20 articles on "Use of Navamsa in Prognostication" which were published in Astrological Magazine (Bangalore) from November 1968 to March 71. He has collected all the rules relating to Navamsa from text books such as - Sarvartha-Chintamani; Jataka-Tatva; Saravali; Phala-Deepika; Jataka Parijata; Uttar-Kalamrita; Mrityugnan-Kalamriti etc.

The first five books for "Navamsa" study are Deva-Keralam, Dhruva-Nadi; Vidya-Madhaviyam, Prasna-Marg and Hora-Sara.

GENERAL OBSERVATIONS

(1) Navamsa $3^{\circ}-20' \times 12 = 40^{\circ}$ (i.e. one cycle from Mesha to Meena Navamsas). A cycle of 12 Navamsas will repeat after an interval of 40° each. So Mesha Navamsa will repeat 9 times in the Zodiac. Similarly, all other Navamsas from Vrishabha to Meena will repeat nine times. In Western Astrology 40° aspect is known as a "Nonile Aspect".

(2) Navamsa Paryaya - नवांश, नवमांश; लव, नक्षत्रचरण (पाद), अंश, अङ्कण, अंशक, अङ्कभाग, कला, गौंश, नन्दांश, नवभाग and नवांशक. Only the word अंश (Amsa) without any reference (context), it means 'Navamsa'.

(3) The average time taken by each planet to transit an arc of one Navamsa i.e. $3^{\circ}-20'$ - is as follows:

The Sun	$3^{\text{ds}}-8^{\text{hrs}}$;	The Moon	$0^{\text{d}}-6.1/2^{\text{hrs}}$;
Mars	$4^{\text{ds}}-10.1/2^{\text{hrs}}$;	Mercury	$2^{\text{ds}}-5.1/2^{\text{hrs}}$;
Jupiter	$1^{\text{m}}-10^{\text{ds}}$;	Venus	$2^{\text{ds}}-16^{\text{hrs}}$;
Saturn	$3^{\text{ms}}-10^{\text{ds}}$;	Rahu-Ketu	$2^{\text{ms}}-2^{\text{ds}}$

Time taken by one Navamsa - to rise in the East is $13^{\text{ms}}-20^{\text{ds}}$.

(4) Navamsa conjunctions are of two types:

(i) Two planets in same Nakshatra-Charana i.e. in one Navamsa in a sign;

(ii) Two planets at a distance of 40° , 80° , 120° , 160° , 200° , 240° , 280° and 320° from each other, will fall in one Navamsa causing conjunction in Navamsa Chart.

In the Standard Horoscope:

Venus $\bigcirc$ Saturn (in Navamsa Chart) - distance about 200° ;

Jupiter $\bigcirc$ Mars (in Navamsa Chart) - distance about 200° ;

Jupiter ♃ Rahu (in Navamsa Chart) - distance about 40°;

(5) Every exalted sign has an exalted Navamsa and a debilitated Navamsa and every debilitated sign has also a debilitated Navamsa and an exalted Navamsa. The Moon is an exception. She is exalted in Vrishabha sign where there is Vrishabha Navamsa in it but no Neecha Navamsa viz Vrishchika. Similarly, the Moon is debilitated in Vrishchika sign where there is Neecha Navamsa but no exalted Navamsa viz. Vrishabha.

(6) Dhatu, Moola and Jeeva Navamsas

Every sign is divided into three equal parts of 10° each known as Drekkana (Decanate). The first part is Karma Drekkana (1° to 10°); the second one is Bhoga Drekkana (10° to 20°) and the third one is Nasha Drekkana (20° to 30°). Again each Drekkana is further divided into 3 equal parts of 3°-20' (Navamsa) each known as Dhatu, Moola and Java. e.g.

Karma Dhatu	00° - 00'	to	03° - 20'
" Moola	03° - 20'	to	06° - 40'
" Jeeva	06° - 40'	to	10° - 00'
Bhoga Dhatu	10° - 00'	to	13° - 20'
" Moola	00° - 00'	to	16° - 40'

" Moola	23° - 20'	to	26° - 40'
" Jeeva	26° - 40'	to	30° - 00'

In short, every movable Navamsa is Dhatu Navamsa; every fixed Navamsa is Moola Navamsa and every dual Navamsa is Jeeva Navamsa.

(7) Numerology - (a) In the standard Horoscope Lagna

Navamsa is Kanya in Kataka sign - the 10th Navamsa from it (30° aspect) will be Mithuna Navamsa in Simha sign, from which Kanya Navamsa in the Lagna will be the 100th Navamsa (semi-sextile).

(b) 60° aspect will be the 19th Navamsa from the Lagna Navamsa, from which the 91st Navamsa will be the Lagna Navamsa (sextile),

(c) 90° aspect 28th - 82nd (square);

(d) 120° aspect 37th - 73rd (trine);

(e) 150° aspect 46th - 64th (Quin-cunx);

(f) 180° aspect 55th - 55th (Opposition).

Note, that the numerals interchange their digits. So, Navamsa has some relation with Numerology.

(8) In Navamsa Chart, the trine positions of planets (120°) have same numerical Navamsa, same constellation lord and the lords of these trines are friends.

(9) Numerical Navamsas

(a) 'Ashtamamsa' - This is fully explained in Chapter on "Ashtamamsa-Nidhanama".

(b) "The 64th Navamsa" - fully discussed in separate chapter.

(c) The 88th Navamsa and the 108th Navamsa:

Jatakadesha Marga XIV verse 38

Prasna Marga XXI verse 23

If the Moon's Navamsa at birth in the case of bridegroom happens to be the 88th one, when counted from that of the bride, it indicates intense evil (in married life). Similar result will also be the case when the Moon's Navamsa happens to be the 108th when counted from that of the bride. This is one of

the methods of porutham (matching). The 88th Navamsa falls in Khara Nakshtra. i.e., 22x4-88th Navamsa.

(d) **The 55th Navamsa** - It is the 55th Navamsa from the rising Navamsa. At the time of performance of marriage ceremony (Pani-Grahana) no planet should be in the 55th Navamsa, as reckoned from the rising (Ascendant) Navamsa at that time.

(e) **The 5th Navamsa** - Jatakabharana p.244-verse 39 (2nd part)- If in birth-chart, even one planet in the 5th Navamsa (i.e. of the middle Navamsa in that sign) makes the native a man of status.

(f) (i) The 36th Navamsa from the Moon's Navamsa is Karmabham (कर्मभम्)

(ii) The 64th Navamsa from the Moon's Navamsa is Sanghatika. (साङ्गतिक).

(iii) The 72nd Navamsa from the Moon's Navamsa is Vainashika (वैनाशिकं)

(iv) The 96th Navamsa from the Moon's Navamsa is Manasa (मानसं).

When malefic planets transit through the above four Navamsas the native suffers from mental anguish, loss of wealth, and such diseases which give much physical pain.

(10) **Dharma-Artha-Kama-Moksha Navamsas**

Mesha-Simha-and Dhanus signs are Dharma signs.

Vrishabha-Kanya and Makara signs are Artha signs.

Mithuna-Thula and Kumbha signs are Karma signs.

Kataka-Vrischika and Meena signs are Moksha signs.

Every star has four Padas-Charanas (Navamsas):

1st pada is Dharma Navamsa;

2nd pada is Artha Navamsa;

3rd pada is Kama Navamsa; and

4th pada is Moksha Navamsa.

(11) The first pada in every star is 1-5 or 9 Navamsa;

The second pada in every star is 2-6 or 10 Navamsa;

The third pada in every star is 3-7 or 11 Navamsa;

The fourth pada in every star is 4-8 or 12 Navamsa.

(12) One can judge the life mission of a native from:

(i) **Ascendant Navamsa** - Kanya Navamsa

(ii) **The Moon's Navamsa** - Makara Navamsa

In the Standard Horoscope-both Kanya and Makara Navamsas represent Artha.

TERMINOLOGY

(1) Chara-Sthira - Dwiswabhava signs/Navamsas :-

(a) Chara-Variable, movable, cardinal, mutable etc.

(10) Every sign has one own Navamsa (Vargottama); one Bhagyamsa (the 9th Rasi-tulya Navamsa) and one Putramsa (the 5th Rasi-tulya Navamsa).

e.g. Mesha Rasi - Mesha Navamsa (Vargottama); Dhanus Navamsa (Bhagyamsa) and Simha Navamsa (Putramsa). Similarly, all signs be considered.

(11) उत्तमांशयुक्त = a planet in own Rasi in the 5th Navamsa;

विकटांशयुक्त = a planet in own Rasi in Neecha Navamsa;

Mars in Mesha Rasi, in Simha Navamsa is Uttamamsa-yuktaha.

Mars in Mesha Rasi, in Kataka Navamsa is Vikatamsa-yuktaha.

(12) स्वक्षेत्रस्वनवमांश - A planet in own sign and in own Navamsa, other than Rasi-tulya-Navamsa. Every Rasi has at last one own Navamsa. Kujadi planets (owning two signs) sometimes have their both Navamsas in one sign.

e.g. (a) Mars in Mesha sign in Vrischika Navamsa;

(b) Mercury in Kanya sign in Mithuna Navamsa;

- (c) Jupiter in Meena sign in Dhanus Navamsa;
- (d) Venus in Thula sign in Vrishabha Navamsa;
- (e) Saturn in Makara sign in Kumbha Navamsa;
- (f) Saturn in Kumbha sign in Makara Navamsa.

All the above six positions of planets are Swakshatra-Swa-navamsaha.

(13) त्रिकोणगे-त्रिकोणके - There is some difference in the meaning of these two words. The author, personally believes that Trikong means trine positions/or/transits in Rasi chart, while Trikonke means trine positions/or/transits in Navamsa chart.

(14) भावोत्तम - Bhavottama means a planet in same house in

Rasi and Navamsa charts. It enhances the good results of the house occupied. Research on this point is necessary.

(15) सूर्यभांशे - Surya-bhamse means a planet either in Simha Rasi or in any one of the remaining eight Simha Navamsas in other signs.

(16) सूर्यांशे - Suryamsa has three different meanings depending on context.

- (i) Navamsa occupied by the Sun;
- (ii) Simha Navamsa;
- (iii) Simha Dwadashamsa.

(17) (a) लग्ननवांश उदितनवांश - means the rising Navamsa; In the Standard horoscope - Kanya Navamsa.

(b) लग्नांश is लग्नराशितुल्य नवांश - i.e. Kataka-Navamsa.

(Bhavatmaka-Navamsa - as explained in Dhrava-Nadi).

(c) Lagna-Navamsa-Tulya-Rasi - Kanya Rasi-full 30°- which falls in the 3rd house, hence the Lagna-Ascendant is Vikramamsaha.

(18) शुभे शुभांशे - It has two meanings (with reference to context):

(1) Shubhe means a benefic planet, it means a benefic planet in benefic Navamsa;

(2) Shubhe means a benefic sign - it means a benefic Navamsa in benefic signs only.

(19) पापे पापांशे - It has also two meanings (with reference to context):

(1) Pape means a malefic planet; it means a malefic planet in a malefic Navamsa;

(2) Pape means a malefic sign - it means a malefic Navamsa in malefic signs only.

(20) योगांशे (Devakeralam Book 2 p.78 verse 29)- a planet Vargottama in own sign, e.g. Mars in Mesha Rasi - Mesh Navamsa. The Moon is Kataka Rasi - Kataka Navamsa.

Other planets Vargottama, in Mesha or Kataka are not covered, in this meaning.

(21) सर्ववर्गोत्तमः

A planet which occupies the same sign in all Varga charts is known as Sarava-Vargottama. This planet gives excellent results in his Dasa-Bhukti. (shad-Varga).

A planet in Chara sign from 00°-00' to 3°-20';
 A planet in Sthira sign from 13°-20' to 16°-40';
 A planet in Dual sign from 26°-40' to 30°-00';] is Vargottama.

Another word for वर्गोत्तम is गणोत्तम. (Phaladeepika P.73).

Refer circular chart given with the Standard Horoscope.

Mars Vargottama in Mesha is doubly powerful because he is in own sign. (Swakshatra Vargottama). Results will be multiplied.

The Sun Vargottama in Mesha is also doubly powerful because he is in his exalted sign. (Ucheha Vargottama).

Saturn Vargottama in Mesha is debilitated in sign and also in Navamsa is Neecha-Vargottama.

The remaining four planets the Moon, Mercury, Jupiter and Venus in Mesha sign and Mesha-Navamsa are ordinary Vargottama planets.

If the rising Navamsa is Vargottama in a benefic sign, it is called Subha Vargottama Lagna.

Rasi-Navamsa 2/2, 3/3, 4/4, 6/6, 7/7, 9/9, and 12/12.

If the rising Navamsa is Vargottama in a malefic sign, it is called Pape-Vargottama Lagna.

Rasi-Navamsa 1/1, 5/5, 8/8, 10/10, and 11/11.

Much importance is given to Lagna-Vargottama and the Moon Vargottama.

चरवर्गोत्तमसंस्थे सौम्ये Vidyamadhaviyam Part II P.331.

Any planet Vargottama in Chara sign is Chara Vargottama i.e. Vargottama in signs-Mesha, Kataka, Thula and Makara.

Any planet Vargottama in fixed sign is Sthira Vargottama i.e. Vargottama in signs-Vrishabha, Simha, Vrischika and

CHAPTER 3

VARGOTTAMA NAVAMSA

सत्य :-

चरमभवनेष्वाद्यंशाः स्थिरेषु मध्या द्विमूर्तिषु तथान्त्याः ।
 वर्गोत्तमाः प्रदिष्टास्तेष्विह जाताः कुले मुख्याः ॥

Definition

The first Navamsas in Chara signs; the middle Navamsas in fixed signs and the last Navamsas in Dwiswabhaba signs are known as Vargottama Navamsas. The natives born in these Navamsas (Udit-rising-ascendant-Navamsa) are chiefs in their families.

जातकपारिजाते Chap.1 verse 34

चरे चाद्यंशको नेयः स्थिरे मध्यनवांशकः ।
 अन्त्यांशको द्विस्वभावे वर्गोत्तम इति स्मृतः ॥

यवनेन :-

स्वे स्वे गृहेषु स्वगृहांशकाये वर्गोत्तमास्ते मुनिभिर्निरुक्ताः ।

A Vargottama planet is one, in the same Rasi and same Navamsa, e.g. the Moon in Mesha Rasi and also in Mesha Navamsa in that Rasi. The Vargottama rising Navamsa or a Vargottama planet means that its Rasi dispositor and Navamsa dispositor is one and the same planet

Kumbha. Any planet Vargottama in dual sign is Dwishwabhaba - Vargottama in signs- Mithuna, Kanya, Dhanus and Meena.

The Sun is Uchcha-Vargottama in Mesha sign Mesha Navamsa.

The Moon is Uchcha-Vargottama in Vrishabha sign Vrishabha Navamsa.

Mars in Uchcha-Vargottama in Makara sign Makara Navamsa.

Mercury is Uchcha-Vargottama in Kanya sign Kanya Navamsa.

Jupiter is Uchcha-Vargottama in Kataka sign Kataka Navamsa.

Venus is Uchcha-Vargottama in Meena sign Meena Navamsa.

Saturn is Uchcha-Vargottama in Thula sign Thula Navamsa.

Similarly, the above seven planets are Neecha Vargottamas in opposite signs of the above signs.

Rising Navamsa - Udit Navamsa - Lagna Navamsa:

Brihat Jataka - Chap.XXI verse 7 ----

स्तेनो भोक्ता पण्डितादयो नरेन्द्रः
क्लीबः शूरो विष्टिकृद्दासवृत्तिः ।
पापो हिंस्रोऽभीष्टवर्गोत्तमांशे
ष्वेषामीशा राशिवद् द्वादशांशैः ॥

Meaning - If, at a person's birth, the rising Navamsa be not a Vargottama one and be that of :-

- (1) Mesha - he will be a thief;
- (2) Vrishabha - he will enjoy life;
- (3) Mithuna - he will be learned;
- (4) Kataka - he will be rich;
- (5) Simha - he will be a king;
- (6) Kanya - he will be impotent;
- (7) Thula - he will be brave;
- (8) Vrischika - he will be a labourer;
- (9) Dhanus - he will be a servant;
- (10) Makara - he will do sinful actions;
- (11) Kumbha - he will be very cruel; and
- (12) Meena - he will be without fear.

In the case of a birth where the rising Navamsa happens to be Vargottama, the person concerned will be the head of the respective class mentioned above. The rising Dwadasamsas produce the same results.

लग्नचन्द्रिका - p.45-46 verses 93-94-95

शुभवर्गोत्तमे जन्म व्ययस्थाने च सद्ग्रहे ।
अशून्येषु च केन्द्रेषु कारकाख्यग्रहेषु च ॥ १३ ॥
सूर्ये केन्द्रे राजसेवी वैश्यवृत्तिर्निशाकरे ।
शस्त्रवृत्तिः कुजे शूरो बुधे चाध्यापको भवेत् ॥ १४ ॥
स्वानुष्ठानरतो नित्यं दिव्यबुद्धिर्नरो गुरौ ।
शुक्रे विद्यार्थसम्पन्नो नीचसेवी शनैश्चरे ॥ १५ ॥

Meaning

In case of a birth, where the rising Navamsa is a **Shubha-Vargottama**, having a benefic in the 12th house and the Kendra/s being occupied by various Karaka-planets - the native born will be a leading personality:-

- (1) with the Sun occupying Kendra - a government servant;
- (2) with the Moon - a businessman;
- (3) with Mars - a brave or militaryman;
- (4) with Mercury - a professor;
- (5) with Jupiter - one always merged in religious rites and having Divya intellet;
- (6) with Venus - having learning and wealth; and
- (7) with Saturn - one serving mean people.

The Vargottama ascendant makes the natal chart inherently very strong.

D.K.3 p.212 verse 4852

वर्गोत्तमं विना राहौ द्वितीये ऋणवान् सुतः ।
वर्गोत्तमे शुभं चेति शुभयोगे सुकीर्तिमान् ॥

Meaning

Rahu in the 2nd house, not in Vargottama, the native's son will be in grip of debts. Vargottama position will be auspicious. Vargottama Rahu (in the 2nd house) conjunct a benefic will make native famous.

D.K.1 p.86 verse 931

वर्गोत्तमांशे जीवे सप्तमे दीर्घमायुषः ।
बालारिष्टशतं हन्ति गिरिर्वज्रहतो यथा ॥

Long life

Long life will come to pass, if Jupiter in the 7th house is in Vargottama Navamsa. Infantile evils to life span if any will be countered as thunderbolt is resisted by the hill.

होरानवनीते - p.7 verse 18

वर्गोत्तमांशे यदि लग्ननाथे स्वोच्चांशगे वा स्वसुहृत्काणे ।
शुभांशके वा शुभदृष्टियुक्ते नरो भवेदामरणान्तसौख्यः ॥

Meaning

The lord of the Ascendant is:

- (1) a Vargottama, or
 - (2) in exalted Navamsa; or
 - (3) in own or a friend's Drekkana; or
 - (4) in a benefic Navamsa; or
 - (5) is aspected by a benefic planet; or
 - (6) is associated with a benefic planet;
- the native remains happy till the end of his life.

Brihat Yavan Jataka - p.328 verse 47

वर्गोत्तमस्था यदि वा स्युरेते सर्वेग्रहाः संजनयति भूपम् ।
करीन्द्रदानौघसुसिक्तभूमिं महाप्रभावं विजितारिपक्षम् ॥

King born

A native having all the seven planets in Vargottama Navamsas, will become a great valourous king, who will subdue his adversaries and be endowed with superior elephants whose drops of ichor will wet the earth.

Notes about rising Navamsa

If the rising Navamsa is Vargottama and its lord is favourably placed in Rasi Chart or the said Navamsa is fortified by benefics in Navamsa Chart the same results will follow i.e. the native remains happy till the end of his life.

Vargottama planets bestow the following results:-

(1) The sun - philosophical attitude; firmness of mind; sound health; status in life; popularity; desire to acquire knowledge; and self-satisfaction;

(2) The Moon - intellect; good memory; firm and impartial attitude; and getting desired things;

(3) Mars - desire to learn astrology; encouragement; indicates reasons for rise and fall in life;

(4) Mercury - sharp intellect; capacity to convince others; impressiveness; charity in talk; desire to learn astrology;

(5) Jupiter - intelligent; well developed physique, searching for truth; capacity to understand others' views and proud;

(6) Venus - capacity to understand pros and cons of a problem; physical development; knowledge of astrology; and

(7) Saturn - hindrance in physical development; longevity; careful; leads life by controlling desires; selfishness; irresponsible; carelessness and exercises restraints.

Samudayashtakavarga and Vargottama planet

A Vargottama planet in any house with 30 or more bindus enhances the good results of that house to the greatest extent, in proportion to the higher number of bindus.

Quite reverse is the case when a Vargottama planet is associated with less number of bindus.

(1) A native has Venus in Meena (Vargottama) in the 12th house with 20 bindus (the minimum) - he is fond of unnatural sex.

(2) Another native has Jupiter in Kataka (Vargottama) in the 5th house with 20 bindus (the minimum)- he is unhappy on account of the misdeeds of both his daughters.

The author has come across a chart having four Vargottama planets. It has not given rise to good results. The native is status quo because all the said four planets are associated with less than 26 bindus in S.A.V.

Powerful stars

Out of the 12 Vargottama padas of stars in the zodiac, six Vargottama padas are contributed by (i) Punarvasu (3rd and 4th) (ii) Chitta (2nd and 3rd) and (iii) Uttara shadha (1st and 2nd); hence these three stars are powerful and important.

CHAPTER 4

PUSHKARA NAVAMSA

After reading some of author's papers on Navamsa an astrologer friend wrote him "Your paper is comprehensive, useful and splendid. The paper would have been complete had you touched Pushkaramsa which is important in fixing the Muhurta of any auspicious activity". This induced him to take up further studies when he came across Pushkara Navamsa in Vidyamadhviyam Part I pages 30-31, wherein this Navamsa is defined. During the last fifty years he has come across it only once in Vidyamadhviyam (Sarvasiddhih). No standard book has thrown any light on Pushkara Navamsa's definition.

Pushkara Navamsa has two meanings depending on the context

(1) Pushkaramsa is a particular degree (one only) in each of the twelve signs. It is also known as Pushkarabhaga, which is used for auspicious effects, when a Muhurta, a birth or any other such point is to be considered.

Muhurta Darpana

एकविंशो मनुश्चैव जनाश्च मुनयः क्रमात् ।

मेषादिमीनपर्यन्तं पुष्करांशाः प्रकीर्तिताः ॥

Degrees in Signs

The degrees 21°, 14°, 24°, 7°, 21°, 14°, 24°, 7°, 21°, 14°, 24° and 7° in Mesha and the following signs respectively are called Pushkaramsas.

They are useful for fixing Pushkara Muhurta for auspicious activities in general. The same Pushkara degrees are also mentioned in Vidyamadhviyam. Kalamitram and Kala-vidhanam.

(2) Pushkaramsa also means Pushkara-Navamsa, a particular Navamsa (an arc of 3°-20' as opposed to 1°) in a sign which is very auspicious. This is the main topic of this chapter.

Vidyamadhviyam Part I p.30-31

मेषसिंहचापेषु सप्तमनवमौ ।

वृषकन्यामृगेषु पञ्चमतृतीयौ ।

मिथुनतुलाकुम्भेष्वष्टमषष्ठौ ।

एते पुस्करसंज्ञानवांशाः ।

Pushkara Navamsas

In Mesha, Simha and Dhanus signs the 7th Navamsa (Tula) and the 9th Navamsa (Dhanus); in Vrihasha, Kanya and Makara the 5th Navamsa (Vrishata) and the 3rd Navamsa (Meena); in Mithuna, Thula and Kumbha signs, the 6th Navamsa (Meena) and the 8th Navamsa (Vrishabha); and in Kataka, Vrishchika and Meena signs the 1st Navamsa (Kataka) and the 3rd Navamsa (Kanya) are called Pushkara Navamsa.

Rasis (signs)

Mesha-Simha and Dhanus signs - The 7th Navamsa-Thula i.e. from 20° to 23°-20'; The 9th Navamsa-Dhanus i.e., from 26°-40' to 30°;

Vrishabha-Kanya and Makara signs- The 3rd Navamsa-Meena i.e. from 6°-40' to 10°; The 5th Navamsa-Vrishabha i.e. from 13°-20' to 16°-40';

Mithuna-Thula and Kumbha signs- The 6th Navamsa-Meena i.e. from 16°-40' to 20°-00'; The 8th Navamsa-Vrishabha i.e.; from 23°-20' to 26°-40';

Kataka, Vrishchika and Meena signs - The 1st Navamsa-Kataka i.e. from 00°-00' to 3°-20'; The 3rd Navamsa-Kanya i.e. from 6°-40' to 10°-00';

In the composite circular chart, the outer circle of the disc indicates Navamsas, the third inner circle shows constellations (Nakshatras) and the fifth inner circle indicates signs. Signs and Navamsas are marked numerically as (1) Mesha; (2) Vrishabha; (3) Mithuna; (4) Kataka upto Meena (12) in anticlock-wise direction.

All the 24 Pushkara Navamsas of the zodiac are marked with a dot below the respective Navamsa signs at proper places in circular chart for convenience.

Each sign has two Pushkara Navamsas. There are in all $12 \times 2 = 24$ Pushkara Navamsas in the zodiac. They are all benefic Navamsas owned by benefic planets and produce auspicious results in Muhurta, natal, prasna and other matters.

Out of the 24, three Pushkara Navamsas are Vargottama viz. Vrishabha Navamsa (the fifth one) in Vrishabha sign, Kataka Navamsa (the first one) in Kataka sign and Dhanus Navamsa (the 9th one) in Dhanus sign. Any planet posited therein bestows very good results.

All Pushkaramsas (one particular degree) in twelve signs fall in Pushkara Navamsas. 21° Mesha sign falls in Thula Navamsa; 14° in Vrishabha sign falls in Vrishabha Navamsa; 24° in Mithuna sign falls in Vrishabha Navamsa; and 7° in Kataka sign falls in Kanya Navamsa. Similarly, degrees of trine signs fall accordingly in Pushkara Navamsas.

In standard texts Pushkara Navamsas are very rarely used while they are freely used in Deva-Keralam-Chandra Kala Nadi.

वर्गोत्तमे वा यदि पुस्करांशे सारेन्दुदेवेन्द्रगुरौ नृपालः ।

Birth of King

When Jupiter in conjunction with Mars and the Moon occupies a Vargottama or Pushkara Navamsa, the person born is a king. (2) When the full-moon aspected by benefic planet is posited in the 10th house, a ruler of land is born. (It may be noted that Pushkara Navamsa is equated with Vargottama).

D.K.2 p.85 verse 77

केन्द्र त्रिकोणगे जीवे पुष्करांशे सुभाग्यवान् ।
षष्ठाष्टमव्ययांशस्थो दुर्बले पुत्रशोकवान् ॥

Jupiter in Pushkara Navamsa

Jupiter in Kendra (1st, 4th, 7th or 10th) or Kona (5th or 9th) house in Pushkara Navamsa makes a native born very lucky (wealthy). But if the sign of Pushkara Navamsa occupied falls in Rasi Chart in the 6th, the 8th or the 12th house (Shastamse, Ashtamse or Vyayamse), the native (in addition to being wealthy) is emaciated (weak in health) and grieves on account of bereavement (death of a son).

Notes: (a) Suppose in a chart of Thula ascendant, Jupiter is posited in the 10th house (in Kataka) exaltation sign in Kanya Navamsa which falls in the 12th house in Rasi Chart, so both conditions are fulfilled.

(b) Suppose, in a chart of Thula ascendant Jupiter is in the 9th house (in Mithuna sign) is Vrishabha Navamsa which is also Ashtamasa (i.e. Nidhanamsa also).

(c) Suppose, in a chart of Thula ascendant, Jupiter is in the ascendant (Thula sign) in Meena Navamsa which is also Shastamsa.

In all the above three examples, the native will get both good and bad results.

The above referred Jupiter, if posited in Mesha triad (i.e. in Mesha-Simha or Dhanus sign), in Vrishabha triad (i.e.

Vrishabha, Kanya or Makara sign); in Mithuna triad (i.e. in Mithuna, Thula or Kumbha sign); or in Kataka triad (i.e. in Kataka, Vrishchika or Meena sign) starts giving results of Yoga from the 21st; the 14th, the 24th or the 31st (24+7) year of native's life respectively.

All seven planets in Pushkaramsa

If all the seven planets beginning with the Sun (Sun to Saturn) are posited in Pushkara Navamsa, the native born earns much wealth, enjoys all comforts of life, is very rich, famous and happy.

The 10th lord Jupiter in the 2nd house in Pushkara Navamsa and in company or in aspect of Mars causes Chamara yoga. This yoga will give prosperity after 22nd year of life.

Notes

(1) N.T. Rama Rao (late ex-Chief Minister of Andhra) - had his Moon, Jupiter and the rising Navamsa in Tula sign - Meena Navamsa; also Ketu, the Sun and Mercury were in Pushkara Navamsa. (The Sun and Mercury also Vargottama). In all five planets and the rising Navamsa were in Pushkara Navamsas. It may be noted that rising Navamsa sign (Meena) falls in Rasi Chart in the 6th house - shastamsa and hence his retreat as Chief-Minister in Aug./Sept. 1995.

(2) Amitabha Bachchan has Jupiter in Kataka and Kataka Navamsa, Vargottama and Venus in Kanya sign in Vrishabha Navamsa - two planets in Pushkara Navamsa.

(3) K.M. Khareget, has his Sun in Kataka sign Kataka Navamsa and Ketu in sign Simha is in Thula Navamsa.

(4) In the Standard Horoscope, the ascendent falls in Kanya Navamsa in Kataka sign.

It is found in practice that natives having their rising Navamsa (Udit Navamsa) falling either in Vargottama or in Pushkara Navamsa are outstanding in their careers. **Placement of more planets in Pushkara Navamsas is one more method to assess the worth of a nativity.**

CHAPTER 5

THE 64TH NAVAMSA

Gochara or transit is a topic which has been viewed from various standpoints in astrological classics. The most commonly followed technique of delineating Gochara results is based on transit of slow moving planets Saturn, Jupiter, Rahu and Ketu in relation to the natal Moon.

Astrological classics, such as Deva-Keralam, Brihat Parasara-Horasastra, Jataka Parijata, Hora Ratnam, Prasna Marg, Jataka-desh-marga and others speak of certain sensitive areas in a birth chart and transit over these areas by Saturn is said to cause much distress and even death. One such sensitive area is the 64th Navamsa (3°-20' or 200 minutes of arc) from the Navamsa occupied by the Moon or the ascendant. The representation is the result of the author's research in the virgin area which has remained largely unexplored. The author wishes to discuss certain aspects of the mysterious 64th Navamsa. The 64th Navamsa is nothing but 210th degree i.e., the 8th house aspect (dexter quincunx aspect according to Western Astrology).

The 64th Navamsa from that occupied by a planet will be the same Navamsa in the 8th sign, in order of sequence. For instance, a planet is in Mesha 8°-30' in the 3rd Navamsa from the beginning of sign Mesha, the 64th Navamsa will be the 3rd Navamsa in Vrishchika, the 8th sign. The 64th Navamsa will have the same degreeal Navamsa arc, i.e., in the above example the Navamsa of the planet ranges from Mesha 6°-40' to 10°-00'; and the 64th Navamsa will range in Vrishchika from 6°-40' to 10°-00'; and 64 divided by 12, will leave balance 4; so the 64th Navamsa sign will be the 4th sign from the planet's Navamsa sign i.e., in the above example the said planet is in Mithuna Navamsa of Mesha sign; so the 64th Navamsa sign will be Kanya in Vrishchika sign.

The concept of the 64th Navamsa has been developed by different authors from various standpoints. For instance Jataka-Parijata reckons it from the Moon; while Brihat Parasara Horas astra reckons it from the Moon and from the ascendant; while Prasna-Marga reckons it from the Moon, the ascendant and the Sun also.

I(a) Jataka Parijata, Chap.V verse 56

विलग्नजन्मद्रेक्काणाद्यस्तु द्वाविंशतिः खरः ।
सुधाकरोपगांशर्क्षात् चतुः षष्ठयंशको भवेत् ॥

Khara Drekkana/Navamsa

The 22nd Drekkana from that of the Drekkana occupied by the ascendant is called Khara. The 64th Navamsa from that of the Navamsa occupied by the Moon is called a Khara Navamsa. Some others like Vaidyanatha and Ganapati Muni reckon Khara Drekkana from the ascendant and the 64th Navamsa from the Moon only.

I(b) Mr. Divakaruni Venkata Subba Rao, the learned scholar of Hyderabad, observes on page No.31 of the souvenir of All India Astrological Conference - Madras 1982 as follows :-

“Ganapati Muni gave interesting details with Khargrahas, i.e., Khara Drekkanaadhipati - the lord of the 22nd Drekkana from the Lagna and Khara Navamsadhipati - the lord of the 64th Navamsa from the Moon.”

“Whenever the lord of the 22nd Drekkana and the 64th Navamsa lord to the natal Moon happen to be the same planet or when those two Kharas happen to transit a point deprived of an auspicious bindu in Ashtakavarga after two Sodhanas (reductions) are carried out and if that Kakshya happens to be owned by the transiting Khara, death is unavoidable. This has been observed by me for over a long time and is found to give accurate results.”

II Jataka Parijata, Chap.V verses 52-53

रन्ध्रे श्वरो रन्ध्रयुक्तो रन्ध्रद्रष्टा खरेश्वरः ।
रन्ध्राधिपयुतश्चैव चतुःषष्ठयंशनायकः ॥
रन्ध्रे श्वरातिशत्रुश्च सप्तछिद्रग्रहाः स्मृताः ।
तेषां मध्ये बलीयस्तु तस्य दाये मृतिं वदेत् ॥

Vulnerable planets

The following seven planets are termed as Chhidra Grahas:-

- (1) the lord of the 8th house;
- (2) the planet occupying the 8th house;
- (3) the planet aspecting the 8th house;
- (4) the lord of the Khara i.e., 22nd Drekkana from that of the ascendant;
- (5) the planet in conjunction with the lord of the 8th house;
- (6) the lord of the 64th Navamsa from that occupied by the Moon; and
- (7) the Atisatru (bitter enemy) of the lord of the 8th house.

The death of a native may be indicated in the Dasa of the strongest planet of the above seven planets.

III Jatakadeshmarga, Chap. VII verse 19

जन्मनि लग्नोपगताच्चन्द्रोपगतात्रवांशकाद्वाऽपि ।
चतुरुत्तरषष्ठयंशकभे लग्ने वा समादिशेन्मरणम् ॥

The Moon at Death

That death may happen when the Moon in his transit enters the 64th Navamsa reckoned from the Navamsa occupied by the ascendant at birth or the Moon at birth or when such Navamsa sign is rising at that time.

The author of Jatadeshmarga reckons the 64th Navamsa both from the ascendant as well as from the Moon. According to this verse death can happen more specifically within a period of 6 to 7 hours, i.e., the time taken by the Moon to transit one Navamsa or about 2 hours i.e., the time taken by the Navamsa sign to rise in the east.

IV Brihat Parasara Hora, Chap. XX verse 99

जन्मलग्नेन्दुगा नंदभागाः क्रमाद्वेदष्टयंशराशौ प्रयाते तनौ ।
मृत्युजन्मांगनीचोदये शून्यगे दुष्टपाकोदये देहमुक्तिर्भवेत् ॥

Rising sign of Death

That (1) when the sign representing the 64th Navamsa reckoned from the ascendant or the Moon, is rising or

(2) the 7th house sign from the 8th house (i.e., the 2nd house sign) is rising; or

(3) the 7th house sign from the ascendant is rising; One departs from this world if any one of these rising signs is devoid of bindus (has the least number of bindus) in the Ashtakavarga of the lord of the ascendant and the Dasa during that time is that of an adverse planet.

V Prasna Marg, Chap. XIX verse 61

चन्द्रांशेशस्य तद्भूषा नवांशेशोऽथवा रवेः ।
लग्नेशो वाऽपि यद्येवं स्वत्यमध्यचिरायुषः ॥

Longevity

If the lord of Navamsa occupied by the Moon is inimical, neutral or friendly to the lord of the 64th Navamsa therefrom, the Longevity of the native will be short, medium or full.

Similarly, reckon the lord of the Navamsa occupied by the ascendant, with that of the lord of the 64th Navamsa therefrom and in the same way reckon the lord of the Navamsa occupied by the Sun, with that of the lord of the 64th Navamsa therefrom. It will be noticed that the author of Prasna Marga has improved upon the earlier authors by taking into account the relationship - inimical, neutral or friendly - between the lords of the Navamsa occupied by the Moon and the lord of the 64th Navamsa from him; similarly he has taken into account the ascendant and also the Sun.

VI Hora Ratnam, Chap. VIII verse 27

जन्मलग्नांशकाच्चन्द्रनवांशादथ वाऽपि वा ।
राहौ चतुःषष्ठिमिते निधानं च विनिर्दिशेत् ॥

Rahu's Transit at Death

Death (of a close relative) should be indicated when Rahu transits the 64th Navamsa either from the Navamsa occupied by ascendant or the Moon.

Notes: Bala Bhadra goes a step further and states that the death can happen when Rahu transits the 64th Navamsa either from the ascendant or the Moon, roughly covering a period of two months.

VII Jataka Parijita - Chap. V verse 85

भुक्तयंशपो भानुसुतेन युक्तो दुःस्थानगो वा विषभक्षणेन ।
सहाहिना वा शिखिना च तस्य मृत्युर्भवेद्रज्जुनिबन्धनेन ॥

When the lord of the 64th Navamsa from the ascendant Navamsa occupies a Dusthana (i.e., the 6th, the 8th or the 12th bhava) and is in conjunction with :-

- (1) Saturn, the native born will die by swallowing poison;
- (2) either Rahu or Ketu, his death will be by hanging.

Notes: Here also, the Bangalore and Kasi editions have translated wrongly i.e. भुक्त्यंश - is interpreted as 10th Navamsa. भुक्ति = भु(4) and क्ति(6) - according to Katapadi - भुक्त्यंशपो means the lord of the 64th Navamsa.

2nd Rule: The 64th Navamsa from the ascendant Navamsa viz. Vrischika - is Kumbha whose lord Saturn conjuncts ketu in the Natal Chart in the 6th house. Mr. Zulficar Ali Bhutto's death took place on 18-3-1978 by hanging (execution).

(3) Chart of Mrs. Indira Gandhi (Ref. Chap. on Nidhanamsa/Ashtamamsa)

(i) Her ascendant is Karka 27°-3' in Meena Navamsa - the 64th Navamsa from it is Mithuna Navamsa in Kumbha, the 8th sign. Saturn was 10-29°-32' when she lost her mother (28-6-1936).

(ii) Her Saturn is in Karka 21°-47' in Makara Navamsa - the 64th Navamsa from it is Mesha Navamsa in Kumbha, the 8th sign. On 8-9-60 Ketu was 10-22°-08', when Firoz Gandhi breathed his last.

(iii) Her Mercury is in Vrishchika 13°-15' in Tula Navamsa - the 64th Navamsa from it is Makara Navamsa in Mithuna, the 8th sign. On 27-5-1964, Rahu was 2-10°-13' when Jawaharlal Nehru breathed his last.

(iv) Her Ketu is in Mithuna 10°-33' in Makara Navamsa - the 64th Navamsa from it is Mesha Navamsa in Makara, the 8th sign. On 26-1-1972, she was awarded the country's highest honour of Bharata Ratna when Rahu was 9-11°-50'. Rahu sometimes gives high honours.

(v) Her Herschel is in Makara 27°-21' in Kanya Navamsa the 64th Navamsa from it is Dhanus Navamsa in Simha, the 8th sign. Her ascendant is in Karka 27°-3' in Meena Navamsa - the 64th Navamsa from it is Mithuna Navamsa in Kumbha, the 8th sign.

Rahu transited Dhanus Navamsa in Simha and Ketu transited Mithuna Navamsa in Kumbha, simultaneously from 18-11-1978 to 20-1-1979. Most unfortunate events, such as expulsion from the Lok Sabha, warrant for her arrest was served; she was driven to Tihar Jail (round about 19-12-1978), took place during the period of about two months.

(vi) Her Herschel is in Makara 27°-21' in Kanya Navamsa - the 64th Navamsa from it is Dhanus Navamsa in Simha, the 8th sign. On 23-6-1980, Saturn was 4-27°-27' when Sanjay Gandhi met with an air accident.

(1) Dr. B.V. Raman's Venus is in Simha 2°-16' in Mesha Navamsa - the 64th Navamsa from it is Karka Navamsa in Meena- the 8th sign. Saturn was 11-2°-6' in March, 1937, when his grandfather expired.

(2) His ascendant is Kumbha 8°-16' in Dhanus Navamsa -

the 64th Navamsa from it is Meena Navamsa in Kanya, the 8th sign. Rahu was 5-10°-00' to 5-6°-40', when he toured England etc., from 4-10-1959 to 15-12-1959. Rahu sometimes gives high honours.

(3) (a) His natal Moon is in Vrishabha 23°-58' in Simha Navamsa- the 64th Navamsa from it is Vrishchika Navamsa in Dhanus, the 8th sign. Ketu was 8-24°-3' on 9-9-1963, when his beloved son Surya Prakash breathed his last.

(b) In Surya Prakash's horoscope- his Natal Ketu is in Mithuna 24°-40' in Vrishabha Navamsa- the 64th Navamsa from it Simha Navamsa in Makara, the 8th sign. Saturn was 9-24°-00' on 9-9-1963.

(5) The Standard Horoscope (the author's)

(i) Herschel is in Makara 21°-00' in Karka Navamsa- the 64th Navamsa from it Tula Navamsa in Simha, the 8th sign. My marriage took place on 28-5-1933 when Jupiter (a benefic planet) was 4-20°-49'.

(ii) M.C. falls in Mesha 4°-8' in Vrishabha Navamsa- the 64th Navamsa from it is Simha Navamsa in Vrishchika the 8th sign. On 9-9-1956, the author had a major traffic accident resulting in injuries when Saturn was 7-4°-14'.

(iii) Ascendant is Karka 8°-53' in Kanya Navamsa- the 64th Navamsa from it is Dhanus Navamsa in Kumbha, the 8th sign his Holiness Sri Sankaracharya of Dwarka Sarda Peetam conferred an honorary degree of "Jyotishalankara" on 10-11-1962 at public function when Jupiter was 10-9°-43'.

(iv) Natal Ketu is in Karka 17°-6' in Dhanus Navamsa the 64th Navamsa from it is Meena Navamsa in Kumbha the 8th sign. On 22-3-1965, a major throat operation for Cancer was carried out, when Saturn was 10-17°-20'.

(v) (a) Natal Moon is in Tula 12°-12' in Makara Navamsa- the 64th Navamsa from it is Mesha Navamsa in Vrishabha the 8th sign. On 30-11-1965 Rahu was 1-10°-58' when mother died.

(b) Natal Ketu is in Karka 17°-06' in Dhanus Navamsa- the 64th Navamsa from it is Meena Navamsa in Kumbha, the 8th sign. On 30-11-1965 Saturn was 10-17°-20' when mother died. Simultaneous transits of Rahu and Saturn may be noted (30-11-1965).

(c) Natal Moon is in Tula 12°-12' in Makara Navamsa the 64th Navamsa from it is Aries Navamsa in Vrishabha, the 8th sign. On 24-1-1975 wife expired when Ketu was 1-13°-10'.

Important research points

(1) When transit conjunction of major planets takes place in the 64th Navamsa (3°-20') in a nativity, either from the ascendant on the Moon or the Sun, major outstanding event takes place in one's life for good or bad.

(2) In the case of Shri Amitab Bachchan, Mars- 5-22°-41'- Kataka Navamsa in natal chart is posited in the 64th Navamsa from the ascendant- Aries Navamsa 10-21°-38' hence serious injury on 24-7-1982.

(3) Recently, the author came across a nativity in which Ketu was posited in the 64th Navamsa from his natal Jupiter. The native lost his young grown up son (38 years old - died in 1991) in a car accident. Can this principle be not applied to other Karakas such as the Sun for father the Moon for mother, Mars for coboms or Venus for wife?

(4) Transits of slow-moving planets such as Saturn, Jupiter, Rahu and Ketu through the 64th Navamsa or its trines, have to be considered for delineation purposes.

Shri V. Tirunvenkatacharya (The A.M. 1967-P.48) - Saturn gives similar results while transiting a trine Navamsa from the 64th Navamsa. In the case of Mahatma Gandhi and Smt. Indira Gandhi, Saturn was in trine to the 64th Navamsa from the ascendant at the time of their demise.

(5) It is also found in practice that the transits of slow-moving planets through the 64th Navamsa from the remaining five planets, Rahu, Ketu, M.C. (Dashama Madhyama) and trans-

Saturnine planets, are also productive of results of a significant nature favourable or unfavourable. Similarly transits through the 64th Navamsa of fast-moving planets, such as the Sun, Mars, Mercury and Venus, also give results, which are of small magnitude.

(6) Mundane events, such as cyclones, earthquakes, excessive heat, very heavy rains, devastating floods, excessive cold, droughts, big-fires etc.. can be predicted by the 64th Navamsa position (dexter quincunx) formed by the fast-moving planets, such as the Sun, Mars, Mercury and Venus with the four slow-moving planets in transit.

(7) This principle of the 64th Navamsa can be applied to Sayana positions also and the effects of transit of planets can be studied from the Sayana horoscope. The same principle can be extended to even political predictions by referring to the horoscopes of the nations.

RASI TULYA NAVAMSA

Dhruva Nadi, a rare astrological work is in possession of Government Oriented Manuscripts Library (Chennai-Madras). This work comprising 42 volumes contains about 2,50,000 verses. The author (Jaya Muni) mentions details for every chart in the following way.

CHAPTER 6**RASI-TULYA NAVAMSA AND
NAVAMSA TULYA RASI**

The Zodiac is a circle of 360° having no beginning or end. In order to measure the distance, it is divided into 12 equal parts of 30° each, known as signs or Rasis, beginning with the first point of Mesha (Mesha-Vrishabha... to Meena). Again the Zodiac is divided into 27 equal parts of 13°-20' each, known as asterisms beginning with Aswini etc. and ending with Revati.

Each sign is further divided into 9 equal parts of 3°-20' each known as "Navamsa". Similarly each asterism is further divided into four equal parts of 3°-20' each known as 'Padas' or quarters. Thus each sign comprises 9 quarters i.e., two and a quarter constellations. It is very significant that Nakshatra quarter is identified with "Navamsa". Both are not only of the same arc but their lines of demarcation are also identified i.e., each Navamsa corresponds to one Nakshatra Pada or quarter. It is for this reason that the Navamsa division is the most important of the 16 divisions (Vargas). In Southern India, no astrologer would look at a Rasi Chart without Navamsa.

A cycle of 12 Navamsas will repeat after an interval of 40° each ($3^\circ-20' \times 12 = 40^\circ$) so Mesha Navamsa will repeat 9 times in the zodiac, similarly all other Navamsas will repeat 9 times.

That, Navamsa has wider application for prognostication on a variety of facets of a person's life, has become evident from a critical study of some of verses from classics, such as Hora Sara, Jataka Parijta, Jatakadesh Marg etc. and Nadi Granthas like Dhruva Nadi, Deva-Keralam etc. An attempt is made to elucidate this unique technique of Bhava-suchaka Navamsa of prediction in this chapter.

In the Navamsa chart, note the Navamsa Rasis occupied by all the planets and the Lagna. Also note in which houses (Bhavas) in the Rasi chart, these Navamsa Rasis fall. Each planet is given a special nomenclature, according to his Bhava position of the Navamsa Rasi, in the Rasi Chart. They are known as Bhava-Suchaka -Navamsas. The charts below are also given according to system followed in the North India because application of the principle can be followed at ease.

(3) Mercury is in sign Mesha in Vrishabha Navamsa which falls in the 9th house in Rasi Chart, hence Bhagyamsa-yuktah.

(4) Saturn is in sign Vrishabha, in conjunction with Ketu, He is in Simha Navamsa, which falls in the 12th house in Rasi chart, hence Vyayamsa-yuktah.

(5) Ketu is in Vrishabha Navamsa (Vargottama) which falls in the 9th house in Rasi chart, hence Bhagyamsa-yuktah.

(6) Jupiter is in sign Simha in Simha Navamsa (Vargottama) which falls in the 12th house in Rasi chart hence Vyayamsa-yuktah.

(7) The Moon is in sign Dhanus in Dhanus Navamsa (Vargottama) which falls in the 4th house in Rasi chart, hence Sukhamsa-yuktah.

(8) Mars is Vrischika in Kataka Navamsa in debilitation which falls in the 11th house in Rasi chart, hence Labhamsa-yuktah.

(9) Rahu is in sign Vrischika in Vrischika Navamsa (Vargottama) which falls in the 3rd house in Rasi chart, hence Vikramsa-yuktah.

(10) The ascendant is in sign Kanya in Vrishabha Navamsa, which falls in the 9th house in Rasi chart hence Bhagyamsa-yuktah.

In this unique way all the twelve Navamsas are given separate additional nomenclature, according to their Navamsa signs falling in Rasi chart, known as Bhava-suchaka Navamsas.

This nomenclature is rarely used in standard tests, such as:

(1) Hora Sara - Chapter VII - Verse 24 - Lagnamsa - Nidhanamsasthe;

(2) Jatataka Parijat - Chapter V - Verse 82-Nidhanamsasthe - Randhramsa;

(3) Bhava-Prakashika - Chapter V - Verse 75 - Dhanamsasthe;

(4) Santan - Deepika - Verse 12 - Putramse.

There is one more classification, depending on the Navamsa Rasi falling in Kendra (1st, 4th, 7th and 10th - (केन्द्रांशे) or Kona (5th or 9th कोणांशे).

In the Standard Horoscope

The Sun in Simhamsa - which falls in the 2nd house - hence Vittamsah;

The Moon in Makaramsa - which falls in the 7th house - hence Bharyamsa, Kendramsa;

Mars in Mithunamsa - which falls in the 12th house -hence Vyayamsa;

Mercury in Vrischikamsa which falls in the 5th house - hence Putramsa - Konamsa;

Jupiter in Mithunamsa - which falls in the 12th house - hence Vyayamsah;

Venus in Meshamsa which falls in the 10th house - hence Karmasa - Kendramsa;

Saturn in Meshamsa - which falls in the 10th house -hence Karmasa- Kendramsa;

Rahu in Mithunamsa - which falls in the 12th house -hence Vyayamsah;

Ketu in Dhanus - which falls in the 6th house - hence Shashthamsah;

This classification is very important and useful in judging Raja-yogas and worth of a chart. If more planets fall in Bhagyamsa, Karmamsa, Labhamsa, Lagnamsa or Sukhamsa, the native leads a happy and prosperous life. Conversely if more planets occupy Shashthamsah, Nidhanamsa, Vyayamsa or Ashtamasa, the native of confronts many difficulties in life.

This Bhava-Suchaka-Navamsa nomenclature is freely used in all charts discussed in Dhruva Nadi; sparingly used in Deva-Keralam Book (3) pages 84 to 92 - "Vrishbha-Lagna-Vittamsah" - verses 3109 to 3186; and rarely used in standard

tests, where the commentators mostly have not interpreted the terms correctly. (Refer chapter on Nidhamamsa/Ashtamanasa).

NAVAMSA TULYA RASI

"When Saturn comes to the sign denoted by the Navamsa occupied by Ketu, diseases will strike the native including im- pure excretion, physical pain etc. Health will however be recov- ered early." (D.K. Book 2, p.141 verse 602).

Deva Keralam Book 3 in particular excels in applying tran- sits with reference to the sign caused by certain Navamsa posi- tions. Most of the verses quoted in this chapter are from that book. One can very well observe this fact, while going through it, dealing with transit of Saturn or Jupiter through signs di- rected by Navamsa positions of planets.

This technique is dealt with in three different ways:

(i) Transit through signs denoted by Navamsa position of the lords of all the twelve bhavas (Saturn's transit).

(ii) Transit through signs identical with Navamsa positions of lords of certain bhavas (Jupiter's transit).

(iii) Transit through similar signs denoted by Navamsa posi- tions of various planets e.g. the Sun, the Moon, Mars, Mercury, Venus, Rahu and Ketu.

All these transits discussed in this chapter can be ob- served with the help of the Navamsa Chart only and not from Rasi Chart which may be noted.

One who uses such techniques frequently will be able to issue successful predictions.

Significance of Chandra Navamsa Rasi

From Prasna Marga Part I. Chap. VIII verses 56 to 61 (6 verses) - (Dr. B.V. Raman)

यद्राशिसंज्ञश्चन्द्रांशः स राशिश्चेच्छुभान्वितः ।

भावी कालः शुभो वाच्यः पापयुक् चेदशोभनः ॥५६॥

Stanza 56: If Chandra Navamsa Rasi (in the Natal Chart) is associated with good planets, a good period ahead is indicated. If this Rasi is afflicted, then a bad future is going to set in.

जीवस्सुतप्रदो विप्रवरकृन्नीचभांशगः ।

शुक्रो वस्त्राङ्गनादायी विवादे जयकृद् बुधः ॥५७॥

Stanza 57: Jupiter in the Chandra Navamsa Rasi gives rise to the birth of a son. Jupiter debilitated, denotes quarrels with Brahmins. Venus in Chandra Navamsa Rasi gives fresh clothes and happiness from women; Mercury - success in litigation.

पूर्णचन्द्रो मनोहारिद्रव्यलाभं प्रयच्छति ।

देवभूमिपयोः कोपं कुर्यादकोऽथभूमिजः ॥५८॥

वृथैव विग्रहं भूमिविवादं च समावहेत् ।

सूर्यपुत्रः कृषिप्रेष्यपश्वादीनां विनाशकृत् ॥५९॥

Stanzas 58-59: A full Moon denotes beautiful things. The Sun causes anger of rulers and Gods. Mars causes strife, and litigation connected with land; Saturn brings about loss of produce in lands, diseases to cattle and sufferings to servants.

चण्डालापच्छिरो रोगविषसर्पभयं फणी ।

प्रेतबाधां शिखी कुर्यान्मान्दिश्चूर्णाद्युपद्रवम् ॥६०॥

Stanza 60: Rahu causes fear from poison, serpents and troubles to his inferior servants and headache. Ketu causes troubles from ghosts. Gulika causes trouble in shape of Abhichara.

बुधः पापयुतश्चेत्स विवादे परिभूतिकृत् ।

क्षिणचन्द्रो मनःपीडां करोति परिपृच्छताम् ॥६१॥

Stanza 61: Affected Mercury will give rise to failure in litigation and weak Moon causes mental worry.

The above rules for Prasna can be applied to Chandra Navamsa Rasi in a nativity. In the Standard Horoscope the Moon's Navamsa Rasi is Makara is occupied by Venus and Rahu. The author is happy and had good married life, till wife's death i.e. January 1975. Rahu had caused once food poisoning in life.

जीवशर्मा:

द्वादशैरनफा ज्ञेयो ग्रहैर्द्विद्वादशस्थितैः ।

प्रोक्तो दुरधरायोगोऽन्यथा केमद्रुमो मतः ॥२॥

Stanza 1-2: If the Moon's Navamsa Rasi in Natal Chart is

flanked:

(1) by a planet in the 2nd sign therefrom. Sunfa yoga is caused; or (2) by a planet in the 12th sign therefrom. Anafa

yoga is caused; or (3) by planets in both the 2nd and the 12th signs therefrom, Dura-Dhara yoga is the result.

If the above referred Rasi in the natal chart is not flanked by the planets (in the 2nd and the 12th signs) i.e. both the adjacent Rasas are unoccupied; Kemadruma yoga is formed."

In the Standard Horoscope Makara, the Moon's Navamsa Rasi is flanked in the 12th by Mercury and in the 2nd by Jupiter. Dura-Dhara Yoga is caused. In the Standard Horoscope, in Rasi Chart Kemadruma yoga is formed because the Moon's occupied sign Thula is not flanked by any planet/s in adjacent signs.

It is said that the Moon bring in Kendra from the ascendant and also bring aspected by Jupiter (9th aspect) from the 8th house Kema Druma yoga is nullified.

Notes: Further text is missing, nothing specific is mentioned. Transit of Jupiter for favourable results through the same signs be considered.

CHAPTER 7

DISPOSITORS

Uttara Kalamruta - Khanda IV - V.13

यभ्देशस्थितभांशपा बलयुताश्चेत्तद्भूपो लाभकृत् ।

If the planets owning the Rasi and Navamsa occupied by the lord of Bhava be endowed with strength, that lord will promote the increase of that Bhava...

The dispositors give results of the planets which are occupying their signs or Navamsas. One need not be surprised, as to how dispositors give effects of planets whose dispositors they become.

Recently this subject of dispositors has been elaborately dealt with by J.N. Bhasin in his book "Dispositors In Astrology" 1982, and by R. Santhanam in his book "Doctrines of Suka Nadi Retold" 1984 by referring the use of dispositor at many places. Both these authors have deduced their findings from Nadi literature.

This principle of dispositorship is of universal application and is freely used in standard texts. Dispositors are of two types - viz - Rasi dispositor and Navamsa dispositor. **Unique methods of application of these two dispositors are explained in this chapter.**

(A) D.K.3 p.97 verse 3272

मेषे चापांशगे शुक्रे कुलीरे च प्रजायते ।
जीवे कुजयुते काले बहु वित्तयुतः सुखी ॥

Conjunction of Dispositors in Transit

"A native born in Cancer Ascendant, with Venus occupying Dhanus Navamsa in Mesha sign, will have much wealth and be happy, during the period of conjunction in transit of Jupiter and Mars (both neutral planets)."

Note that Venus, a benefic planet is posited in the 10th house, occupying Pushkara Navamsa (Dhanus Navamsa in sign Mesha). Why the author Achyuta has taken into account the conjunction of Jupiter and Mars only? It may be noted that Mars is the sign dispositor (Mesha) and Jupiter is Navamsa dispositor (Dhanus) of Venus. These two planets whenever in transit conjunct, they produce certain favourable results to the native. Venus in Kataka ascendant is the lord of the 11th and the 4th houses, hence he bestows wealth (the 11th house) and happiness (the 4th house) as per houses owned by him. The sign conjunction between Jupiter and Mars takes place roughly once in every two years (i.e. 24 months). This period of conjunction varies from 1.1/2 months to 6 months, depending on their speed.

Conjunction of Jupiter and Mars in Kataka, Dhanus, Meena, Mesha, Vrischika and Makara signs is productive of more good results, because either of them becomes powerful in each of these signs. Only in sign Kataka or Makara, one is exalted and the other is debilitated simultaneously.

A very important rule can be deduced from the above verse as follows:

Two planets, one Navamsa dispositor (Jupiter in this case) and other sign dispositor (Mars in this case), during their conjunction in transit produce results good or bad, pertaining to sign/s (house/s) owned by the dispossited planet (Venus in this case).

One very very important event took place in author's life on 10-10-1989 (at Ahmedabad). He had constructed a small bungalow at Ahmedabad in 1970 and rented it to a tenant immediately. The tenant vacated it after 19 years of occupation, on

Tuesday 10-10-89 at 12-40 P.M. Its present value (1997) goes to several lakhs of rupees.

In the Standard horoscope

(i) Mars, Karaka for landed property is posited in the 2nd house (sign Simha);

(ii) Sign dispositor of Mars is the Sun;

(iii) Navamsa dispositor of Mars is Mercury.

A transit conjunction of these 3 planets, Mars, the Sun and Mercury was current from 16-9-1989 to 17-10-1989, in sign Kanya - which is Udit - Navamsa-tulya sign or Navamsa ascendant sign; (also a Pushkara Navamsa). The event took place when the Moon was passing through Makara sign - the Moon's Navamsa Rasi, trine to sign Kanya in which the conjunction of three planets took place. It may be noted that one of these planets, namely Mercury, was powerful, occupying his own sign Kanya (Moola-Trikona - 5-5°-15') having maximum 33 S.A.V. bindus

Research students should try to study the results good or bad, during conjunction in transit of rasi and Navamsa dispositors of all the seven planets and of the ascendant itself.

This subject matter was published for the first time in the Times of Astrology - June 91 issue - under the article - "Conjunction of Planets in Transit I."

After studying this article a scholar friend Dr. Vasan from Bangalore wrote on 14-10-91

"I am really happy to note the technique of deciphering the conjunction of planets and their implications. The dispositors of any Bhavadhipati in Rasi and Navamsa will decide the good or bad effects of that Bhava in Gochara conjunction. This technique was really unknown to people who are dealing with the science. You have really given us a beautiful technique which you have found out from the Nadi-texts."

Dispositors - The Standard Horoscope - a table prepared for all the planets and the ascendant:

Lagna/ Planets	House/s owned	Rasi- Dispositor	Navamsa Dispositor	
Lagna	Lagna	The Moon in Tula	Mercury in Dhanus	-both are in benefic signs; -both are benefic planets
The Sun	2nd	Jupiter in Kumbha	The Sun in Dhanus	-both Tri-akadasha signs;
The Moon	Lagna	Venus in Makara	Saturn in Mithuna	-both signs in Shadastaka;
Mars	10th/ 5th	The Sun in Dhanus	Mercury in Dhanus	-both dispositors are in conjunction;
Mercury	12th/ 3rd	Jupiter in Kumbha	Mars in Simha	-both dispositors have mutual aspect;
Jupiter	9th/ 6th	Saturn in Mithuna	Mercury in Dhanus	-both dispositors have mutual aspect; -Jupiter aspects his Rasi dispositor;
Venus	11th/ 4th	Saturn in Mithuna	Mars in Simha	-Rasi-dispositor aspects Navamsa-dispositor;
Saturn	7th/ 8th	Mercury in Dhanus	Mars in Simha	-both signs are in Nava-panchama; -Saturn aspects his Navamsa-dispositor;
Rahu	-	Saturn in Mithuna	Mercury in Dhanus	-both dispositors have mutual aspect;
Ketu	-	The Moon in Tula	Jupiter in Kumbha	-both signs are in Nava-panchama;
Mandi	-	Venus in Makara	Mars in Simha	-both dispositors are in Shadastaka.

The conjunction of Saturn and Mars in transit will confer favourable results pertaining to the 11th and 4th houses (Venus). The conjunction of Saturn and Mercury in transit will confer similar results pertaining to the 9th and 6th houses (Jupiter). Similarly the conjunction of Mercury and Mars will confer unfavourable results pertaining to the 7th and 8th houses (Saturn). The ascendant Rasi and Navamsa dispositors, the Moon and Mercury in transit conjunction will always give some good result, every month.

Combustion of Dispositors in Natal Chart

“Should both the lords of the rising sign and Navamsa ascendant be in combustion, (the child born will instantly pass away without doubt.”

The author has come across such rule for the first time throwing light, on real utility of the Rasi and Navamsa dispositors of ascendant being in combustion. How important is the Navamsa lord in regard to the life span of a newly born child passing away instantly! What would happen if the Rasi and Navamsa dispositors of the lords of some other houses viz. the 3rd; the 4th; the 5th; the 7th or the 9th house be similarly posited in combustion! It is a point of research.

Conjunction of Planets in Evil Houses

“Whenever the three planets viz the lord of the ascendant, that of a trine (i.e. either the 9th or the 5th lord) and the lord of the rising Navamsa are found at birth in the 6th or the 8th house from the natal ascendant (as seen in Rasi Chart), Balarishta effects should be foretold.”

I Conjunction of Rasi and Navamsa Dispositors

If the Lords of the 5th house, the 2nd house and the 7th house are in conjunction with their Navamsa dispositors as the same three planets, occupying malefic Navamsas be associated with malefics, the native has no children.

All the above four different uses of Rasi and Navamsa dispositors are simply wonderful.

II Dasa/Periods of Rasi and Navamsa dispositors

It may be noted that dispositorship of Rasi and Navamsa is linked with Dasa and Bhukti effects.

Bhukti of Navamsa Dispositor

Bhukti of Navamsa Dispositor

"Great happiness will come to pass in the following sub-period:-

- (1) If the Navamsa dispositor of the natal ascendant lord; or
- (2) If a planet posited in the sign together with the 7th lord; or
- (3) If the Navamsa dispositor of the 5th lord.

Notes: In the Standard Horoscope

(1) The navamsa dispositor of the natal ascendant lord is saturn (Makara Navamsa);

(2) No planet in conjunction with the 7th lord saturn in the 12th house;

(3) The Navamsa dispositor of the 5th lord is Mercury (Mithuna Navamsa).

In author life not only the sub-periods of Saturn and Mercury in all the Dasas were very favourable but their entire Dasas were out-standing.

An interesting chart of a boy (15 years old) appended below is worth studying. He met with a fatal jeep accident while crossing road on 2-6-1994 (running 15th year of life) at 9-15 P.M. - Ghatkopar - Bombay. He breathed his last on the way before reaching hospital.

Lord of the ascendant the Moon is in sign Simha (4-19°-55') - the Rasi dispositor is the Sun and Navamsa dispositor is Mercury. He was having the Sun's Dasa from 25-12-1989 to 25-12-1995. The Navamsa dispositor Mercury's period was current from 13-10-1993 to 19-8-1994. It may be noted that Rasi and Navamsa dispositors of the ascendant lord have caused havoc in this case.

Example 2. Nathuram V. Godse (Chart Ref. Chapter on - "The 64th Navamsa") He murdered Mahatma Gandhi on 30-1-1948. He was executed on 15-11-49. He was having Jupiter Dasa (5-11-1944 to 5-11-1960) and Mercury Bhukti from 5-7-49 to 11-10-1951. It may be noted that he was having ascendant lord Mercury's period in Navamsa lord Jupiter's Dasa.

III Aspect of Navamsa Dispositor

The author came across the following verses dealing with the use of Navamsa dispositor, at a stretch in Jyotisharnava Navanitam" for the first time during his study of the subject since last 50 years. This technique is very rarely used in standard texts.

Yogas for childhood danger

J.N. Chap.1 p.5 verses 11 to 16

भौमांशकस्थिते मन्दे भौमेनैव निरीक्षिते ।

राहुदृष्टियुते वाऽपि वर्षमेकं स जीवति ॥ ११॥

Evils at Birth - In One year

सूर्यदृष्टियुते वाऽपि त्रिवर्षं तस्य जीवितम् ॥ १३॥

Three years: "Should Saturn be in a Navamsa of Mercury with the aspect of the Sun or Mercury, the child will live for three years."

अर्कांशकस्थिते मन्दे अर्केणैव निरीक्षिते ।

काव्यदृष्टियुते वाऽपि चातुर्वर्षं स जीवति ॥ १४॥

चन्द्रांशकस्थिते मन्दे चन्द्रेणैव निरीक्षिते ।

देहाधिपेन संन्दृष्टे षड् वर्षं तस्य जीवितं ।

अथवा चाष्टमे वर्षे न जीवति न संशयः ॥ १५॥

Six or eight years: "Saturn in a Navamsa of the Moon with her aspect or with the aspect of the ascendant lord indicates a life-span of six years. Else, the child will quit the world in its 8th year.

जीवांशकस्थिते मन्दे जीवेनैव निरीक्षिते ।

चन्द्रदृष्टियुते वाऽपि चातुर्वर्षं स जीवति ॥ १६॥

Four years: "If Saturn is found in a Navamsa of Jupiter with the aspect of Jupiter or the Moon, say the child will live for four years."

Notes: The relevant planets position in Navamsa should be known and aspects be estimated in Rasi Chart only.

Say Saturn is in Simha 24th degree while Mars is in sign Vrishabha. Mars aspects Saturn. Saturn in turn begets Vrishchika Navamsa ruled by Mars. This way, all such combinations be understood.

Navamsa Dispositors

Three planets play a leading role in destroying one's happiness:-

(1) the Navamsa dispositor of Saturn;

(2) the Navamsa dispositor of Mandi;

(3) the Navamsa dispositor of the planet in whose sign the 8th lord is placed;

- the weakest of the above three will destroy the native's happiness.

Notes: In the S.H.

(1) the Navamsa dispositor of Saturn is Mars (Mesha Navamsa);

(2) the Navamsa dispositor of Mandi is Mars (Vrischika Navamsa);

(3) the Navamsa dispositor of the planet (Mercury) in whose sign 8th lord Saturn is placed is also Mars; (Vrischika Navamsa)

So, Mars is the only planet to destroy the native's happiness.

V Stellar Dispositor

(1) "Doctrines of Suka Nadi Retold" - by R. Santhanam 1984. He has brought to light selected rules from Suka Nadi containing about 18000 verses. In this book Risi Sukar has referred mostly to Rasi dispositors nearly 35 times and rarely to Navamsa dispositor but he has not referred to Stellar dispositor even once.

(2) "Dispositors in Astrology" by J N. Bhasin 1982.

In this book also Shri Bhasin has referred to Rasi dispositors only of various planets, their positions, aspects and certain relations between them etc. He has not touched the subject of Navamsa and Stellar dispositors.

(3) "Maha Yogas" by Dr. D.V. Subba Rao (Hyderabad 1986).

In this book he has referred to Stellar dispositors.

Page 21. "The Rasi dispositor and Stellar dispositor of the Yoga Karaka planet should be dignified."

Page 22. "The Stellar dispositor of the Yoga Karaka planet should not be debilitated in Navamsa"

Nadi authors give much importance to Stellar dispositors. (Refer author's article in the Times of Astrology - January 1994).

D.K.2 p.37 verse 3043

ऋणचोरभयप्राप्तिं व्रणोपद्रवरूग्भयम् ।
शन्याराक्रान्ततारेशदशायामन्तरेषु वा ॥

Evil Results

"Debts, theft, fear, ulcer, troubles, disease will follow during the Dasa or Bhukti denoted by the Nakshatra lord occupied by Saturn or Mars at birth."

Very useful clue is stated in the above verse about Saturn's and Mars' natal positions.

At birth, Saturn will be in a particular constellation, which in turn will relate to a Dasa. For example, Saturn in Aswini will mean that Ketu's Dasa will be adverse; in Bharani, Venus Dasa will be adverse, in Kritika the Sun's Dasa will be adverse, so on and so forth. Similarly the Dasa-Bukti results of all the remaining eight planets be inferred from the ruler of the constellation occupied by each of them.

The author has to place one very important point for investigation before research scholars i.e. the Dasa of the starlord of the ascendant. During this Dasa, the native rises to an outstanding position, in whichever walk of life he is placed i.e., society, business, trade, study, research, service, workmanship, farming, politics etc.

In the Standard Horoscope the ascendant starlord is Saturn whose Dasa from 06-07-1942 to 06-07-1961 was most outstanding in the native's life. This point deserves detailed investigation.

Shri K.K. Pathak (an astrologer friend of Patna) has commented on the above article in the Times of Astrology, March 1994 - as follows :-

"Mr. C.S. Patel, in his article on Vimsottari Dasa has highlighted the following points :-

(1) Dasa of the star lord of Lagna gives rise to career.

(2) Dasas of the star lord of natal Mars and natal Saturn give adverse results.

(3) Dasas of star lords of Yogakarakas like star lord of Lagna will also give rise in career

(4) Dasa of star lord of natal Ketu may give misfortune of various kinds.

I have tested these rules and have found that not only Dasa or star lord of Lagna but also that planets occupying such star in Lagna give rise in career."

From the above, it can be inferred that the stellar dispositors are very important in the sense that they can mould the effects of the main planet's Dasa for better or otherwise.

said to be Krura signs." Transit of the Sun through them is known as Krura month and transit of Jupiter is said to be known as Krura year."

CHAPTER 8

SHUBHA-ABDE - KRURA-ABDE

Deva Keralam introduces many rare concepts and techniques which are not traceable in other classical texts. In this chapter an attempt is made to bring to the notice of every serious student and researcher, one such hitherto unknown technique.

Abda means a year and yearly transit refers to Jupiter's transit only. Masa means a month and monthly transit refers to the Sun's transit only. Krurabde means transit of Jupiter through Krura sign. Krura Masa means transit of the Sun through Krura sign. The transit of Jupiter through Subha sign is said to be Subhabde and transit of the Sun through Subha sign is said to be Subhamasa.

The usual Krura sign owned by malefic planets and Subha signs owned by benefic planets are not referred in this technique.

Venkatesa the author of DevaKeralam (2) from page 73 to the end and D.K. (3) i.e. verses 1 to 5774 - has defined Krura Rasi in unique manner, only at one place and that too in two lines out of a total of 5774 verses.

D.K.2 p.241 verses 1774.1/2 and 1775.1/2

रन्ध्रे शाक्रान्तभवनदृष्टराश्यंशकोणगाः ।

क्रूरमासा इति ख्याताः क्रूराब्दे योजयेत् क्रमात् ॥

Kruramasa and Krurabda

"The sign occupied by the lord of the 8th house and its trine signs or signs aspected by him and the sign identical with Navamsa occupied by him (the 8th lord) and trines thereof, are

In six ascendants from Mesha to Kanya (1st group) the lords of the 8th signs (houses) therefrom are Mars, Jupiter, Saturn, Saturn, Jupiter and Mars respectively. These three planets have two more extra aspects in addition to the usual 7th house aspect. As such Krura signs for them will be more as compared to the remaining six ascendants. In ascendants from Thula to Meena (2nd group) the lords of the 8th sign (houses) therefrom are Venus, Mercury, the Moon, the Sun, Mercury and Venus respectively. These four planets have only one full aspect i.e., the 7th aspect, so the total number of Krura signs will be less.

In the standard Horoscope - Kataka ascendant - the lord of the 8th house Saturn (2°-20°-42') is in sign Mithuna, its trine signs are Thula and Kumbha; Saturn's aspected signs are Simha, Dhanus and Meena. Saturn is posited in Mesha Navamsa and its trines are Simha and Dhanus.

8th lord Saturn's sign and trines 3-7-11; 8th lord's aspected signs 5-9-12; 8th lord's Navamsa sign and trines are 1-5-9. In short 1-3-5-7-9-11 and 12 are Krura signs for the native. The remaining five signs 2-4-6-8 and 10 are subha signs.

From the table below it can be observed that the deaths of author's close relatives had taken place during the simultaneous transits of Saturn and Jupiter through Krura signs only.

Details of Demise of author's close relatives:	Transit Saturn	Transit Jupiter
Daughter 29th April 1954	Thula 7	Mithuna 3
Mother 30th November 1965	Kumbha 11	Mithuna 3
Father 15th June 1968	Meena 12	Simha 5
Wife 24th January 1975	Mithuna 3	Kumbha 11
Sister (1) 25th September 1989	Dhanus 9	Mithuna 3
Sister (2) 23rd August, 1994	Kumbha 11	Thula 7

Chart (male) Dhanus ascendant - Date of birth 25th December 1951 of 7^h-41^m(a.m.) - Ahmedabad (2nd group):-

The lord of the 8th house, the Moon (6°-22°-13') is in Thula and its trines are Mithuna and Kumbha. Her aspected sign is Mesha. She is in Mesha Navamsa - trines are Simha and Dhanus.

8th lord, the Moon and trines 7-3-11; the 8th lord's aspected sign-1; 8th lord's Navamsa sign and trines 1-5-9.

In short 1-3-5-7-9 and 11 are Krura signs for the native; the remaining signs 2-4-6-8-10 and 12 are shubha signs for the chart.

According to this principle Jupiter's transit through his own signs Dhanus and Meena; exalted sign Kataka and Kendra and Kona houses, will not give favourable results, if these signs happen to be Krura signs in a nativity.

On the contrary, Jupiter's transit through his enemies' signs, debilitation sign (Makara) and evil houses (6th, 8th and 12th), will bear favourable results if these signs happen to be Subha signs.

D.K.3 p.217 verses 4924-25

गोचरे क्रूरराशीषु राहु केतुशनैश्चराः ।
स्फुटयोगं गतास्तत्र स्वजनादिप्रपीडिताः ॥

Anguishment

When, Rahu, Ketu or Saturn transits through such Krura sign, on the degree of that sign lord (स्फुटयोगं), close relative will be anguished.

स्वपिता क्रूरमासेषु क्रूरराशौ शनैश्चरे ।

सञ्चारकाले क्लेशं च पित्रादीनां मनोव्यथा ॥

When Saturn transits through Krura sign and the Sun also transits Krura sign (may be the same sign or different one) there will be quarrels and father and others will be anguished.

Notes: From the above two verses (4924-25), it can be observed that transits of Rahu, Ketu, and Saturn through Krura signs are productive of evil results. Contrary results may be expected when these three planets transit through Subha signs.

Venkatesa has referred to this technique innumerable times in Deva-Keralam. Few selective verses are stated below for the information and guidance of readers

D.K.1 p.59 verse 603.1/2-604.1/2

Death of father

During third Dasa Jupiter's transit through the last Navamsa of Vrischika or through Makara, will prove fatal to the native's father (or a near relative): Jupiter's transit through Krura sign and the Sun's transit also through similar sign at a time will cause death.

D.K.1 p.72 verse 751

Increased prosperity

Incurring Grief

Fear from enemies

During the Dasa of the 6th lord or the 8th lord and in the sub-periods of planets placed in evil house (6th, 8th or 12th), coinciding with Jupiter's transit through Krura sign fear from enemies will strike. To overcome such an evil, charities be given away.

शुभाब्दे धनप्राप्तिं, प्रबलोद्योगभाग्यवान् ॥

Loss and gain of wealth: The native will be subjected to great trouble during Jupiter's transit through Krura sign; he will have loss of wealth in revolution. He will obtain wealth and will be lucky to have prosperous industry, during Jupiter's transit through Subha sign.

D.K.1 p.173 verse 1946

Inauspicious Result

“The astrologer should find the Navamsa occupied by the 8th lord. When the Sun transits this Navamsa Rasi, the native will be recipient of inauspicious result.”

D.K.1 p.228 verse 2558

.....त्वष्टमेशांशवत्सरे ।
कालमृत्युभयं सत्यं..... ॥

Untimely Death

When Jupiter transits the sign represented by the Navamsa occupied by the 8th lord, there is fear of untimely death.

Navamsa dispositor is given high importance in prediction by various Nadi texts. Navamsa dispositor is the owner of the Navamsa a planet is in e.g. in the Standard Horoscope - Saturn (the 8th lord) is in Mesha Navamsa, hence Saturn's Navamsa dispositor is Mars.

D.K.2 p.230 verses 1650-1651½

कूशब्दे कूरमासे वा कूरांशे गोचरे शनौ ।
देहजाड्यं च लभते कूरभूक्तौ विशेषतः ॥

Physical sickness will come to pass (1) during the Sun's transit through a Krura sign when Jupiter is transiting a Kura sign (in a year) or (2) when Saturn transits a malefic Navamsa and much more so, if at that time a malefic sub-period is current.

CHAPTER 9**NIDHANAMSA/ASHTAMAMSA**

Any planet if posited in a Navamsa owned by the 8th house-sign in Rasi chart is said to be Nidhanamsasthah (निधनांशस्थः). In the S.H., ascendant is Karkataka, so the 8th house is Kumbha sign. Suppose the lord of the ascendant the Moon if posited in any one of these nine Kumbha Navamsas in respective sign, the Moon is said to be Nidhanamsasthaha.

Jataka Parijata Chap.V verse 82

लग्नेशे निधनांशस्थे मूढे षष्ठगतेऽथवा ।
क्षुब्धाधया च मरणं बन्धुहीने महीतले ॥

The first quarter of the above verse “लग्नेशे निधनांशस्थे” is interpreted incorrectly as... “when the lord of the Lagna occupies the 64th Navamsa from the Lagna.....” in Bangalore edition (1932). Similarly in Kashi Sanskrit Granthamala (No.10) edition of Jataka Parijata, its commentator Shri Kapileshwar Shastri has also committed the same error.

Correct meaning:

Cause and Place of Death

“When the lord of the ascendant is posited in Navamsa-Rasi owned by the 8th house or is eclipsed by the rays of the Sun or is in the 6th house, the native will die of starvation or on the ground with no blood relations by his side.”

RASI

NAVAMSA

Mahatma Gandhi's ascendant is Tula and its lord Venus is in Navamsa Vrishabha in sign Tula, which falls in the 8th house in Rasi Chart, and hence Nidhamsasthaha. Note, in this case lord of the ascendant Venus is in his own sign Libra and own Navamsa Vrishabha which is also Ashtamamsa. He breathed his last on 30-1-1948 on the ground with no blood relations by his side. (मरणं बन्धुहीने महीतले).

This is illustrative of the great intuitive perception of our ancient seers who have authored such invaluable works which throw a flood of light on an important aspect of one's life.

Jataka Desh-Marga (1942) Chap.VI verse 19

लग्नेशे निधनांशस्थे लग्नांशे निधनेश्वरे ।
पापयुक्ते तदा जातः पञ्चाशद्वर्षजीवितः ॥

Longevity 50 years

If the lord of the ascendant be posited in Navamsa Rasi owned by the 8th house in any sign and the lord of the 8th house occupies the Navamsa Rasi owned by the ascendant in any sign and they (both) be cojoined with malefics, the person concerned will live for 50 years.

D.K.2 p.84 verse 74

निधनांशे धने जीवे नीचांशस्थे निशाकरे ।
आषोडशाब्दपर्यन्तमेकयोगफलं स्मृतम् ॥

Eka (poverty) Yoga

Jupiter in the 2nd house occupying Nidhanamsa, while the Moon in Vrishchika Navamsa (in any one of such nine Navamsas) will cause Eka-yoga (a poverty yoga) for sixteen years.

D.K.2 p.4 verse 2741

निधनांशगतत्वेन परस्त्रीसङ्गपापवान् ।

Sinful

If (the 7th lord) is in Nidhanamsa, the native will be sinful by joining other's women.

ASHTAMAMSA

Ashtamamsa has four meanings:

(i) 1/8 part of a sign i.e. 3°-45' - is known as Ashtamamsa. This kind of Rasi division (Varga) is used in twenty Vargas - as against Parasara's Shodasha-Vargas.

(ii) 1/8 part of a sign i.e. 3°-45' known as Kakshya - used in Ashtakavarga.

(iii) Eighth Navamsa in every sign i.e. from 23°-20' to 26°-40'.

(iv) A planet in the sign occupied by him is posited in a Navamsa which falls in the 8th sign therefrom, is said to be अष्टमांशस्थः Ashtamamsashtaha. This meaning is referred in this chapter.

(a) Suppose the Moon in sign Tula is posited in Vrishabha Navamsa (from 6-23°-20' to 6-26°-40') is said to be Ashtamamsashtaha.

(b) Suppose Saturn is in sign Mithuna in Makara Navamsa (from 2-10°-00' to 2-13°-20') is Ashtamamsashtaha.

D.K.2 p.86 verse 86

युग्मे नक्रांशत्रे सूर्ये चापे कर्कटकांशगे ।
मीने जूकांशगे कन्ये मेषांशे स्वल्पमायुषः ॥

Short Life Period

Short life is indicated with the Sun:

(i) in Mithuna sign - Makara Navamsa (2-10°-00' to 2-13°-20');
 (ii) in Dhanus sign - Karkataka Navamsa (8-10°-00' to 8-13°-20');
 (iii) in Meena sign - Tula Navamsa (11-10°-00' to 11-13°-20');
 or (iv) in Kanya sign - Mesha Navamsa (5-10°-00' to 5-13°-20').

Notes: In all the above four dual signs Ashtamamsas fall in the 4th Navamsa of the sign (i.e. 10°-00' to 13°-20'). In the above verse four positions in different dual signs of the Sun posited in Ashtamse are indicative of short life. This is general rule applicable to all the ascendants.

D.K.2 p.84 verse 73

चापे जीवे कुळीरांशे नीचे सिंहनवांशगे ।

मीने तुलांशके दुःखी विद्या सौख्यविहीनवान् ।।

Jupiter in Ashtamamsa

Jupiter:

(i) in Dhanus sign - in Karkataka Navamsa (8-10°-00' to 8-13°-20');
 (ii) in Meena sign - in Tula Navamsa (11-10°-00' to 11-13°-20');
 (iii) in Makara sign - in Simha Navamsa (9-23°-20' to 9-26°-40');
 - will cause grief, and deprive the native of learning and happiness.

Notes: Jupiter, in spite of bring in his own signs, Dhanus and Meena is not causing good results, because of his placement in Ashtamamsa.

D.K.2 p.84 verse 75

अष्टमांशं परित्यज्य जीवे धनगते सुखी ।

विद्यावान् मधुराभाषी विनीतो धर्मवत्सलः ।।

Jupiter not in Ashtamamsa

Jupiter in the 2nd house, not being in the 8th Navamsa, will bestow happiness, education, sweet speech, good manners and inclination for religious merits.

D.K.1 p.155 verse 1729

मीने तुलांशके केतौ दारसौख्यविहीनवान् ।

परस्त्रीसङ्गवान् कामी मूत्रकृच्छ्रपीडितः ।।

Ketu in Ashtamamsa

The native will be devoid of marital happiness, if Ketu placed in sign Meena occupies Tula Navamsa. Further he will be libidinous, will join others' women and will incur urinary disorders.

D.K.3 p.211 verses 4834-35.1/2

लग्नाष्टमगते केतावष्टमांशे च संस्थिते ।

तद्दशान्तर्दशाकाले चोरा द्धीतिः क्वचित् क्वचित् ।।

धने राहु धनच्छेदः स्वदशान्तदशासु च ।

Ketu in 8th Rasi and Navamsa

Ketu in the 8th from the ascendant occupying Ashtamasa, will produce fear from thieves to some extent during Ketu's Dasa-Ketu's sub period.

Rahu in the 2nd house (occupying Ashtamasa) will destroy one's wealth in Rahu-Dasa - Rahu's sub-period

Notes: For example Simha Lagna, Ketu in Meena in Tula Navamsa, i.e., 11-10°-00' to 11-13°-20'.

For example Kumbha Lagna, Rahu in Meena (2nd house) in Tula Navamsa i.e. 11-10°-00' to 11-13°-20'.

RASI

NAVAMSA

In Mrs. X's chart - Venus, the 9th house lord (Pitrasthan) 6-25°-38' - is in Tula sign, Vrishabha Navamsa i.e. Ashtamamsa. The Sun, Karaka for father 5-11°-13' is in Kanya sign, Mesha Navamsa, i.e., Ashtamamsa. Both lord of the 9th house and Karaka for father are in Ashtamamsa. She lost her father in 1950, i.e. in her 4th year of life.

Karaka planets posited in Nidhanamsa in a chart cause unnatural deaths of relatives indicated by them, e.g. the Sun in Nidhanamsa will cause some danger to father.

There can be only 9-nine Nidhanamsas in a chart in nine different signs, each at a distance 40°. **While Ashtamamsa is only one Navamsa, which refers to the sign position of a planet.** Fixed signs (Vrishabha, Simha, Vrishchika and Kumbha) have no Ashtamamsa in them which may be noted.

CHAPTER 10

EVENTFUL YEARS IN ONE'S LIFE

Every one, whosoever he/she may be undergoes some good or bad events in life. There are several methods of delineations and one such commonly used method is based on Dasas e.g. Vimshottari Dasas and periods in particular. Another method is based on transits of major planets using S.A.V. chart. There is one more simple method of glancing years indicating good or bad events in one's life based on Navamsa positions of all the 9 planets and the ascendant in terms of numerical Navamsa distances from each other. One Navamsa equals one year of life.

While studying Nadi astrology it is observed that in a particular year of life a favourable or unfavourable event will take place. There are five different methods of arriving at such eventful years in life.

The first method

Hora-sara Chap. XVII verses 88½ to 91½

ज्ञेया मन्दादि लग्नान्तनवांशकयुतिर्बुधैः ॥८६॥

तद्योगसदृशे वर्षे चायुघकलेशमादिशेत् ।

Year of Bad Events

"Learned men should reckon the number of Navamsas from the Navamsa occupied by Saturn upto the Navamsa occupied by the ascendant, both inclusive. In the year indicated by the total figure injury as wound through a weapon be feared.

राहुभौमादि लग्नान्तमंशयोगसमाब्दके ॥८७॥

विपदस्रक्षतायासदुःखादीनि समादिशेत् ।

Year of Bad Events

"Similarly, reckon the number of Navamsas from the one occupied by Rahu upto the Navamsa occupied by the ascendant, and also from Mars to the ascendant. In the years indicated by the respective figures, the native meets with some calamity, hit by a weapon, fatigue, sorrow and the like.

शुभग्रहादि लग्नान्तमंशयोगसमाब्दके ॥८९॥

पुत्रवित्तसुखादीनि लभते नात्र संशयः ।

Year of Good Events

"In a similar way reckon the number of Navamsas from the benefic planets (The Moon, Mercury, Jupiter and Venus) to the Navamsa occupied by the ascendant, during the years indicated by these sums, the native will be blessed with progeny, wealth, happiness and the like without doubt."

Let the principle embodied in the above verses be applied to the Standard Horoscope:-

Saturn: Reckon from the Navamsa occupied by Saturn i.e. Mesha Navamsa to the end of sign Mithuna which comes to 3 Navamsas. The ascendant is in Kanya Navamsa in sign Kataka, third from the beginning of Kataka which also comes to 3; so 3+3=6 (both inclusive); therefore in the 6th year of life the native will suffer some injury etc.

Rahu in Mithuna Navamsa in Makara sign. Reckon from the Navamsa to the end of sign Makara (4) Navamsas +9 Navamsas of Kumbha; +9 of Meena; +9 of Mesha; +9 of Vrishabha; +9 if Mithuna +3 Navamsas in Kataka (the ascendant) = total 52 Navamsas. In the 52nd year the native will have calamity, wound etc. (The native of this chart suffered demotion in service in the 52nd year of life)

Mars in Mithuna Navamsa in sign Simha;

7 Navamsas to the end of Simha;

+90 (10 signs×9) from signs Kanya to Mithuna;
 + 3 in the ascendant.
 100 Total i.e. in the 100 year, calamity wound etc;

The Sun

5 Navamsas in Dhanus;
 +54 (6 signs×9) from Makara to Mithuna signs;
 + 3 in the ascendant.
 62 i.e. in the 62nd year some unfavourable result.

The Moon

6 Navamsas in Thula;
 +72 (8 signs×9) from signs Vrischika to Mithuna;
 + 3 in the ascendant.
 81 Total (During author's 81 year i.e. 31-12-1995 to 31-12-1996 - three books:-

- (1) A.V.'s revised edition;
- (2) Compilation of all 32 articles of various magazines;
- (3) Compilation of all 17 articles in Gujarati almanac and magazine were published.

Mercury

2 Navamsas in Dhanus
 +54 (6×9) from signs Makara to Mithuna;
 + 3 in the ascendant
 59

Jupiter

1 Navamsa in Kumbha;
 +36 (4 signs×9) from sign Meena to Mithuna;
 + 3 in the ascendant
 40

In the 40th year book on Ashtakavarga (1st edition) was under print.

Venus

6 Navamsas in Makara
 +45 (5 signs×9) from signs Kumbha to Mithuna;
 + 3 in the ascendant
 54

In the years 59th, 40th, and 54th the native had good events such as wealth, happiness, notable good events and the like.

This confirms that there exists some such unique method of delineations, independent of transit of planets or Dasas. This system will prove the veracity of the correctness of Navamsa Chart. For every addition in a Navamsa of the birth ascendant (i.e. nearly 13m-20s of time) there should be an addition of one year in time of occurrence of events for each planet. It has been the experience of the author that this technique of timing events has largely come true in a number of cases. This technique is freely used in Budha-Nadi.

The second method

Prasana Marg:- Chap X V.50

क्रूराहिमृत्युगुलिकादिषु यावति -
 स्याल्लग्नशकात् प्रभृति कष्टतमो नवांशे ।

Ascendant to Planets

"Reckon the number of Navamsas from the Navamsa of the ascendant upto the Navamsa occupied by the most evil planets (both inclusive) viz. Mars, Rahu, Saturn, Gulika etc.

Notes:- This one line of verse indicates a method to reckon the number from the Navamsa occupied by the ascendant to the most evil planets. Similarly, from the ascendant Navamsa to the Navamsa occupied by benefics, the numbers of Navamsas be found out both inclusive. This method is complementary to the first method (i.e. planet to the ascendant vs the ascendant to planet).

In the Standard Horoscope

From the ascendant to the planets

.. to Ketu = 4 = 4 Navamsas = 4th year;

.. to Mars = 7+3 = 10 Navamsas = 10th year;

.. to the Moon = 7+(2 signs×9)+4=29 Navamsas = 29th year;

.. to the Sun = 7+(4 signs×9)+5=48 Navamsas = 48th year;

.. to the Mercury = 7+(4 signs×9)+8=51 Navamsas = 51st year;

.. to Venus = 7+(5 signs×9)+4=56 Navamsas = 56th year;

.. to Rahu = 7+(5 signs×9)+6=58 Navamsas = 58th year;

.. to Jupiter = 7+(6 signs×9)+9=70 Navamsas = 70th year;

.. to Saturn = 7+(10 signs×9)+7=104 Navamsas = 104th year;.

The Third Method

The author for the first time in life, came across a chart (in 1986) in which planetary positions in terms of numerical

Navamsas, beginning from Mesha Navamsa of Mesha sign (00°-00°-00') upto each planet, were given under the column of planetary distance in terms of Navamsas. This made him to think deeply over the subject with the result that these figures indicated by the positions of planets in terms of Navamsas would cause some good or bad events in native's life. Learned men should reckon the number of Navamsas from the first pada of Aswini star upto the pada-Navamsa occupied by each planet including Rahu and Ketu. Good or bad events may be glanced in the year indicating benefic and malefic planets respectively.

In the Standard Horoscope

From Mesha 0°-to various planets (Aswini's 1st pada) :-

Saturn - (2 signs×9)+7=25 Navamsas i.e. 25th year;

The ascendant - (3 signs×9)+3=30 Navamsa i.e. 30th year;

Ketu - (3 signs×9)+6=33 Navamsas i.e. 33rd year;

Mars - (4 signs×9)+3=39 Navamsas i.e. 39th year;

The Moon - (6 signs×9)+4=58 Navamsas is 58th year;

The Sun - (8 signs×9)+5=77 Navamsas is 77th year;

Mercury - (8 signs×9)+8=80 Navamsas is 80th year;

Venus - (9 signs×9)+4=85 Navamsas is 85th year;

Rahu - (9 signs×9)+6=87 Navamsas is 87th year;

Jupiter - (10 signs×9)+9=99 Navamsa is 99th year;

In the years indicated by the planets in terms of Navamsas of benefic planets good events and malefic planets bad events take place.

Note: In the year 58th (in 1973) - the Moon from Mesha sign 58th year; Rahu from the ascendant 58th year - the native had two major calamities viz. wife suffered from Cholera attack, and the only son had a snake bite. By the All Mighty's grace

both survived. Both events took place in 58th year and that too within a period of 10 days. Some author's consider the number of Navamsas from the ascendant Navamsa upto Mandi/Gulika and vice-versa for unfavourable results.

The Fourth Method

According to Sanketa Nidhi Chap VIII verse 61 page 208- (last line) - Units are measured by the number of Navamsas traversed by the lord of the rising Navamsa from the Lagna Navamsa. One can apply this rule to the positions of other planets.

In the Standard Horoscope

The ascendant:- From the Navamsa in Kanya (Kataka sign) upto its lord Mercury in Vrischika Navamsa in Dhanus sign.

$$\begin{array}{lcl} \text{From ascendant Navamsa to the end of sign} & = 7 & \\ \text{Its lord Mercury is in Vrischika Navamsa in} & & \left[\begin{array}{l} 7+44 \\ = 51 \end{array} \right. \\ \text{Dhanus sign (4 signs} \times 9) + 8 & = 44 & \end{array}$$

Mars to its sign lord the Sun

Mars to the end of sign Simha-7+(3 signs $\times$ 9)+8=42nd year.

The Moon to the end of sign Thula-6+(7 signs $\times$ 9)+7=76th year.

The Sun to the end of sign Danus-to Dhanus 109 years- because the Sun is in his own Navamsa.

Mercury to the end of Dhanus-2+(7 signs $\times$ 9)+3 = 68th year

Venus to the end of Makara-6+(6 signs $\times$ 9)+3 = 63rd year.

Rahu to the end of Makara-4+(10 signs $\times$ 9)+8 = 102nd year.

Jupiter to the end of Kumbha-1+(9 signs $\times$ 9)+8 = 90th year.

Saturn to the end of Mithuna-3+(1 sign $\times$ 9)+3 = 15th year.

THE FIFTH METHOD

Reckon the number of Navamsas from the Navamsa occupied by Saturn upto the Navamsa occupied by the Moon both inclusive. In the Standard Horoscope:-

Mars to the Moon - 7+(1 sign $\times$ 9)+4 = 20th year;

Ketu to the Moon - 4+(2 sign $\times$ 9)+4 = 26th year;

Ascendant to the Moon - 7+(2 signs $\times$ 9)+4 = 29th year;

Saturn to the Moon - 3+(3 signs $\times$ 9)+4 = 34th year;

Similarly - so and so forth - from Jupiter, Rahu, Venus, Mercury and the Sun.

Navamsa Progression

One Navamsa equals one year; this theory will give the year in which an event, good or bad is likely to take place. But during that particular year, in which month and on which day the event occurs is a subject of deep research.

Find out, the longitudinal distance from Mesha 0°-upto a particular planet, convert the difference into degrees and find out full Navamsas and the balance. This balance will indicate the month and day of the event.

One Navamsa=3°-20'=200 minutes of arc=1 year=360 days

In case of late Prime Minister Mrs. Indira Gandhi:

Her Mercury is from Mesha 7°-13°-15'

00-00°-00'

7-13°-15'

-7-10°-00'

3°-15'

7 signs $\times$ 9= 63 Navamsas

10° degrees= + 3 Navamsas

66 Navamsas

= 66 years

Balance 0-3°-15'=195' minutes

For 200'=360 days; for 195'=351 days=11 months and 21 days.

Date of death 19-11-1917 birth date

21-11-00 balance

0-0-66 years (full Navamsas)

10-11-1984

She breathed her last on 31-10-1984. Adjustment of 5' Kalas of arc in Mercury's position would give correct result. Mercury though a benefic planet is the lord of the 12th house (exit from the world) and lord of the 3rd house i.e. 8th from the 8th house (house of death).

This method is fully corroborated by Budha Nadi. It will thus be seen that the Navamsa Chart has many potential uses for delineating results as compared to Rasi Chart. This technique of timing events has by and large come true in a number of cases tested.

CHAPTER 11

NAVAMSA-TRANSIT

Deva Keralam has introduced many rare concepts. One such technique is **Navamsa transit** of planets. Secrets of Navamsa transit are hidden in **Nadi Granthes**.

Transit is a very important and reliable tool in timing events in the life of an individual. Navamsa transit is a transit of a heavenly body through the zodiacal arc of 3°-20', known as Navamsa or quarter (pada), mainly of slow-moving planets such as Saturn, Jupiter, Rahu and Ketu.

In the author's earlier articles transit results through the Navamsa have been exhaustively dealt with. There are quite a few more verses in Deva Keralam whose correct import has eluded the grasp of many research scholars till date.

In this chapter an attempt is made to bring to light one more such method of transit, hitherto unnoticed by scholars, from Deva-Keralam. Book 2 page 32 Verses 3018-19 and 3023: (some verses are again repeated in Book 2-page 128-verses 465-466 and 470.)

(1) The constellation through which the Moon is passing at the time of birth of a native is reckoned as the first star and is called **Janmarksha**; the 10th star from that is called **Karmarksha**, and the 19th one from that is known as **Adhanarksha**. There are three series of nine asterisms each in the zodiac, totalling 27 stars, this order is from Janma star (occupied by the Moon at birth).

Janma series 1st series from Janma star	Karma series 2nd series from 10th star	Adhana Series 3rd series from 19th star	Known as
1st star	10th star	19th star	Janmatara
2nd star	11th star	20th star	Sampattara
3rd star	12th star	21st star	Vipat-tara
4th star	13th star	22nd star	Kshematara
5th star	14th star	23rd star	Prathyaktara
6th star	15th star	24th star	Sadhakatara
7th star	16th star	25th star	Vadhatara
8th star	17th star	26th star	Maitratara
9th star	18th star	27th star	Parama- maitratara

In the Standard Horoscope, the Moon is 6°-12°-13' i.e. in Swati asterism 2nd quarter (Makara Navamsa in sign Thula). So Swati 2nd quarter is known as Janma-taramsa. The second star from the Moon star, Visakha, is Sampat star and its 2nd quarter is known as Sampat-taramsa. The third star from Swati is Anuradha star and its 2nd quarter is known as Vipattaramsa. Similarly, all the 2nd padas or quarters of all the remaining stars may be termed accordingly. It will be convenient to arrange them in a tabular form as below:

Janma series	Karma series	Adhana series	Taramsas
1 Swati 2nd pada	10 Satabhisha 2nd pada	19 Aridra 2nd pada	Janma-taramsa
2 Visakha 2nd pada	11 Purvabhadra 2nd pada	20 Punarvasu 2nd pada	Sampat-taramsa
3 Anuradha 2nd pada	12 Uttarabhadra 2nd pada	21 Pushyama 2nd pada	Vipat-taramsa
4 Jyeshtha 2nd pada	13 Revati 2nd pada	22 Aslesha 2nd pada	Kshema-taramsa
5 Moola 2nd pada	14 Aswini 2nd pada	23 Makha 2nd pada	Prathyak-taramsa
6 Poorvashadha	15 Bharani	24 Poorvaphalguni	Sadhaka-taramsa

Janma series	Karma series	Abhana series	Jasamsas
2nd pada	2nd pada	2nd pada	
7 Uttarashadha 2nd pada	16 Krittika 2nd pada	25 Uttaraphalguni 2nd pada	Vadha-taramsa
8 Sravana 2nd pada	17 Rohini 2nd pada	26 Hasta 2nd pada	Maitra-taramsa
9 Dhanishta 2nd pada	18 Mrigasira 2nd pada	27 Chittra 2nd pada	Paramamaitra- taramsa

The author Shri Achyuta gives much importance to transit of a planet through a quarter pada only in preference to the full transit through a star. Thus from the table it will be observed that in the circular diagram all the 9 Vrishabha Navamsas, all the 9 Kanya Navamsas and all the 9 Makara Navamsas are result-oriented. Similarly in all charts under study, quarter Navamsa whichever it may be, occupied by the Moon at birth and its trine Navamsas are to be considered only, in all totalling 27 quarters (padas) - Charanas - Navamsas

D.K. Book 2 p.32 verse 3018

विपत्तारांशगे मन्दे गोचरे शत्रुनिग्रहः ।

सम्पत्तारांशगे भीतिर्विपत्प्राणभयं महत् ॥

Meaning - When Saturn transits through:

(1) Vipattaramsa, the native suffers defeat (or imprisonment) at its hands of enemy;

(2) Sampat taramsa - one suffers from fear, calamity as intense possibility of death. (The chart discussed by the author in the Nadi belongs to some king. In lines there-after by the author has shortened the names of Kshemataramsa as just Kshema and Pratyak-taramsa as Pratyak etc.)

क्षेमे व्याकुलकार्याणि स्वराज्ये कलहं व्यथाम् ।

प्रत्यरे तु मनस्तापं पाण्ड्यभूपतिविग्रहम् ॥ ३०१६॥

(3) Kshemataramsa - perplexed in his activities, strife in his kingdom and physical pain.

शुभग्रहाक्रान्तकाले शुभं भवति नित्यशः ।

पापा क्रान्ते मनस्तापं ग्रहोक्तगुणमार्गतः ॥३०२३॥

Meaning - When a benefic planet (namely Jupiter) transits (through its above referred quarters) auspicious events take place daily; while transit of a malefic planet results in mental anguish etc. - according to the characteristics of the transiting planet.

Benefic results (culled out from Bhukti periods and other sources) for average natives:-

Change of residence due to rise in status, job, or line of activity; rise in income; success in endeavours; travel; pilgrimage; gain of land and property; monetary benefits; good fortune; all-round improvement in status and living; opening of new sources of income; reward; appreciation; marriage; birth of a child and the like.

Malefic results

Dishonour, sorrow, trouble, hatred, failure in business; trade etc.; threats of intimidation; enemies and troubles through them; loss of property; misunderstanding with own people; wound; sickness; health troubles; disease; hospitalisation; wasteful expenses; fear and anxiety; frustration; loss of position and status; grief; ill-health; chronic illness; mental depression; probable death and the like. (In short, adverse transit portends results such as death, loss of wealth etc., as indicated in the birth chart). One should ascertain and keep in mind the nature of events and happenings likely to occur in the life of a native.

Jupiter will bestow favourable results while Saturn will bestow unfavourable ones. Rahu will give unexpected, unusual and all of a sudden favourable results while Ketu will give exactly opposite results in the same way. However, the good or bad results will be modified by the simultaneous transits of unfavourable or favourable planets respectively. The transits of Venus and Mercury for favourable results and those of the Sun

and Mars for unfavourable results through the specified quarters of stars will be useful to **pin-point the probable time of occurrence of events**, during the periods of transit indicated by the slow moving planets.

The intensity of the results will vary both on the strength or otherwise of the natal chart as well as of the transiting planets.

While predicting the astrologer should take into consideration the native's position in life, age, sex, Dasa-Bhukti period, country of origin etc. before coming to any judgement, because all the above-listed results need not materialise at the same time and in all nativities.

Navamsa transits of major planets for the Standard Horoscope (for guidance):-

(1) Jupiter's transit Simha, Poorvaphalguni and quarter Kanya Navamsa (from 4°-20'-00" to 4°-16'-40") during retrograde motion from 23-1-1992 to 23-2-1992. Adhana series in Sadhaka-taramsa.

(2) Jupiter's transit the above quarter (item 1) again in direct motion from 5-7-1992 to 24-7-1992.

(3) Rahu's transit of Dhanu sign, Moola star, 2nd quarter Vrishabha Navamsa (from 8°-6'-40" to 8°-3°-20") from 26-6-1992 to 28-8-1992. Janma series in Prathyak-taramsa.

(4) Ketu's transit-Mithuna, Aridra star 2nd quarter, Makara Navamsa (from 2°-13°-20" to 2°-10°-00") from 21-2-1992 to 24-4-1992.

Research minded scholars will pay more attention to this old method of Navamsa transit and make further headway on this count for the benefit of posterity.

II Dhruva Nadi

Dhruva Nadi, a voluminous book, containing about 2,50,000 (two lakhs fifty thousand) verses in 42 different granthas, is in the possession of Government Oriental Manuscripts Library, Chennai.

The following few verses are referred to practically in most of the natiivities discussed therein.

Page 174-

रवित्रिकोणगे मन्दे पितृपीडा भवेत्कष्टं पितृवर्गेऽरिष्टदम् ।

Meaning: "When Saturn in transit coincides degreecally with the natal position of the Sun or its trine positions (120°-240°), the native's father's health will suffer or the native himself will suffer illness or death of some elderly male relative (some uncle) will take place.

चन्द्रत्रिकोणगे मन्दे मातृपीडा भवेत्कष्टं मातृवर्गेऽरिष्टदम् ।

"When Saturn in transit coincides degreecally with the natal position of the Moon, or its trine positions, the native's mother's health will suffer as the native himself will suffer illness or death of some elderly female relative (some aunt) will take place."

कुजत्रिकोणगे मन्दे भ्रातृपीडा भवेत्कष्टं भ्रातृवर्गेऽरिष्टदम् ।

"When Saturn in transit coincides degreecally with the natal position of Mars or its trine positions, the native's brother or sister will suffer or the native himself will suffer illness or death of some cousin will take place.

शुक्रत्रिकोणगे जीवे विवाहं लभते नरः ।

"When Jupiter transits over natal Venus or its trine positions, the native's marriage takes place."

गुरुत्रिकोणगे जीवे पुत्रीपुत्रस्य लाभवान् ।

When Jupiter transits over natal Jupiter or its trine positions, birth of a son or a daughter is expected.

Similarly, transits of Saturn or Jupiter may be considered

(from natal position and its trines) of the remaining planets for unfavourable or favourable results respectively.

These Dhruva Nadi results are effective during transit of Saturn or Jupiter through full Navamsa (3°-20') occupied by the planet. Suppose natal Sun is 8s-16o-10', the full Navamsa i.e. 100 minutes on either side of the Sun are conducive for results.

III Transit of planets through the 64th Navamsa (Refer Chapter No. 5)

IV Transit of planets through Navamsa as indicated in Chapter (Cross Positions of Planets in Rasi and Navamsa in chapter 12)

Time of fruition of a transit

Brihat Jataka chap 22 - verse 6:

दिनकररुधिरौ प्रवेशकाले गुरुभृगुजौ भवनस्य मध्ययातौ।
रविसुतशशिनौ विनिर्गमस्थौ शशितनयः फलदस्तु सर्वकालम् ॥६॥

There are parallel verses in:

- (1) Kala Prakasika Chap. 36 - verse 13; and
- (2) Muhurta-Mala - Chap. 5 - verse 20;

Meaning: "The Sun and Mars give results before touching a natal position; Venus and Jupiter at the time of crossing a natal position; Saturn and the Moon at the time of separating from a natal point, while Mercury throughout crossing a natal point during transit "

Suppose a natal position of a planet is 6°-12°-13'. The Sun and Mars will give results before touching the natal position (applying aspect); Venus and Jupiter, exactly at the time of crossing over it (crossing aspect); Saturn and the Moon after separating from a natal position (separating aspect); and Mercury will give results during all these three positions.

Late Shri K M. Kharegot (the great scholar of Bombay) ob-

served that our predictions as regards "Timing" of an event often go wrong. It has been noticed that effect of a transit involving Saturn takes place some time later than the exact time of conjunction, while that of Mars is to time or occur even before due date.

Timing of events is perhaps the most important and yet the most difficult part of predictive astrology. This chapter presents to the students of astrology, a variety of techniques of prediction based on rare Nadi Granthas, not accessible to many.

CHAPTER 12

CROSS-POSITIONS OF PLANETS-IN RASI AND NAVAMSA

(1) In the chart under consideration (Deva-Keralam Book 1, page 197 verse 2191) with Kumba ascendant - full details of all planets are not stated. Venus, the lord of the 9th house, is posited in the 11th house i.e. in sign Dhanus, aspected by Saturn from the 9th house. From these scant references Verse 2191 (above referred) is interpreted as under:-

मेषांशे तौलिगे मन्दे तुलांशे मेषराशिगे ।

भ्रातुर्प्राबल्यकालः स्यात् स्वप्राबल्यमतः परम् ॥ २१९१॥

"When, Saturn posited in Thula sign in Mesha Navamsa is Natal Chart, transits (through exactly opposite position) i.e. in Mesha sign-Thula Navamsa, it is high time for native's brother to prosper; also it is high time for native to prosper still more."

(2) In Dhruva Nadi (Sanskrit) G.O. M.L. No. R.14721:

Mesha Lagna - page 2 - Saturn's natal position:

तौलौ च मन्दे चापांशमन्दे -----।

on next page:

तुलांशे चापगे मन्दे स्वमातुर्मृतिमादिशेत् -----।

Natal Saturn is in sign Thula/Dhanus Navamsa. When Saturn transits Thula Navamsa in Dhanus sign, death of the mother be indicted. The above are the only two authorities found till date.

In the Standard Horoscope

The Sun is in	<u>Dhanus sign</u> Simha Navamsa	cross position is	<u>Simha sign</u> Dhanus Navamsa	Yes
The Moon is in	<u>Thula sign</u> Makara Navamsa	cross position is	<u>Makara sign</u> Thula Navamsa	not possible
Mars is in	<u>Simha sign</u> Mithuna Navamsa	cross position is	<u>Mithuna sign</u> Simha Navamsa	not possible
Mercury is in	<u>Dhanus sign</u> Vrischika Navamsa	cross position is	<u>Vrischika sign</u> Dhanus Navamsa	yes
Jupiter is in	<u>Kumbha sign</u> Mithuna Navamsa	cross position is	<u>Mithuna sign</u> Kumbha Navamsa	yes
Venus is in	<u>Makara sign</u> Mesha Navamsa	cross position is	<u>Mesha sign</u> Makara Navamsa	no
Saturn is in	<u>Mithuna sign</u> Mesha Navamsa	cross position is	<u>Mesha sign</u> Mithuna Navamsa	yes
Rahu is in	<u>Makara sign</u> Mithuna Navamsa	cross position is	<u>Mithuna sign</u> Makara Navamsa	yes
Ketu is in	<u>Kataka sign</u> Dhanus Navamsa	cross position is	<u>Dhanus sign</u> Kataka Navamsa	yes

Fast moving planets transit their cross positions very often. Only the transits of major (slow-moving) planets be considered, i.e., of Jupiter, Saturn, Rahu or Ketu.

Practical - In the Standard Horoscope:

(A) Jupiter is in sign Kumbha/Navamsa Mithuna opposite positions are Mithuna sign-Kumbha Navamsa.

This position occurs once in every 12 years. Last time, Jupiter passed through Kumbha Navamsa in Mithuna sign (i.e. from 2°-13°-20' to 2°-16°-40') from 9-9-1989 to 11-10-1989. The author got possession of his bungalow on 10-10-1989, a rare event

i.e. the tenet occupying it since last twenty years vacated it after much persuasion.

In the past, whenever Jupiter has passed through Kumbha Navamsa Mithuna sign, everytime some good rare event had taken place in author's life.

From 21-5-78 to 6-6-78;

From 7-6-66 to 22-6-66;

From 22-6-54 to 7-7-54;

and From 8-7-42 to 23-7-42

(B) Saturn is in Mithuna sign/Mesha Navamsa - opposite position is Mesha sign/Mithuna Navamsa i.e. from 0°-6°-40' to 0°-10°-00'.

(1) From 25-11-69 to 12-2-70 - the author had suffered great loss in share market.

(2) From 1-7-39 to 27-9-39 - unemployed, searching for a job.

This happens once in every 30 years or so.

Rahu is in Makara sign/Mithuna Navamsa - opposite position Mithuna sign/Makara Navamsa, i.e. from 2°-10°-00' to 2°-13°-20'.

(1) Mithuna 2°-13°-20' to 2°-10°-00' From 3-11-82 to 5-1-83: Only son was unemployed;

(2) Mithuna 2°-13°-20' to 2°-10°-00' From 29-3-64 to 31-5-64: Throat trouble (Cancer Disease);

(3) Mithuna 2°-13°-20' to 2°-10°-00' From 24-8-45 to 26-10-45: Wife's health causing worry.

When Rahu transits to Mithuna sign/Makara Navamsa }
Ketu transits at the sametime through - Dhanus sign/Kataka Navamsa This happens once in 18 1/2 years.

CROSS-POSITIONS OF PLANETS-IN RASI AND NAVAMSA 120
Further research is necessary to develop this technique.

This is one more method of Navamsa transit.

BHAVA-MADHYA NAVAMSA

॥ भावमध्यनवांशः ॥

Ascendant Navamsa is known as the rising Navamsa or Udit Navamsa or Lagna Navamsa etc. It is a Navamsa of "Bhava-Madhyas" of the first house or Lagna or the ascendant's degree position. In the Standard Horoscope, Kataka is the ascendant - $3^{\circ}-8^{\circ}-53'$ i.e. Navamsa occupied by Lagna is Kanya. On the basis of this Navamsa-sign, Navamsa Chart is prepared. Putting this Navamsa sign in the first house, the nine planets are placed in their respective Navamsa signs. A house may be 30° or more or less. Therefore the Navamsa of a house means the Navamsa in which the cusp of a house falls.

When the first house Bhava-madhyas (mid-point) is given so much importance, why not other mid-points of houses e.g. the 10th, the 7th, the 4th and other houses.

"Jataka-Tatva" G 216 page 184 (by Pandit V. Subramanya Sastri) Putrastha - Navamsa i.e. Navamsa indicated by the mid-point of the 5th house.

Shri Krishna Iyengar in his articles on the "Use of Navamsa in Prognostication" has also referred to the midpoint of a house at many places such as:-

(1) The second house midpoint will join some Navamsa and that Navamsa is occupied by Mercury.

(2) If Mars, the midpoint of the 3rd house and the lord of the 3rd house, all fall in even Navamsas, the native will be blessed with a number of sisters. Conversely, all these three indicators fall in odd Navamsas, one will be blessed with many brothers.

This principle can be applied to:

(a) The Sun, midpoint of the 9th house and the lord of the 9th house;

(b) The Moon, midpoint of the 4th house and the lord of the 4th house;

(c) Venus, midpoint of the 7th house and the lord of the 7th house;

(d) Jupiter, midpoint of the 5th house and the lord of the 5th house;

- for brethren of the father, mother, wife and one's own children respectively.

(3) If the midpoint of the 7th Bhava falls in the Navamsa of Venus and several other Venusian Vargas, the native is likely to have many wives.

(4) If the midpoint of the 7th Bhava, in a female nativity falls in Makara or Kumbha Navamsa, the husband will be an old and stubborn fellow.

(5) If the midpoint of the 7th Bhava, in a female nativity falls in Mesha or Vrischika Navamsa, her husband will be immoral and short-tempered.

(6) If the 5th house mid-point be a Navamsa of Venus, the native will have many children.

So, the Navamsa of the midpoint of a bhava is used for:-

(a) placement of planets in Navamsa Chart;

(b) mid-point falls in odd or even Navamsa;

(3) mid-point falls in a particular planet's Navamsa;

and (4) whether, a midpoint Navamsa is having an aspect (benefic or malefic) in a Navamsa Chart etc.

The Standard Horoscope

- Chart of Navamsa Rasis of Midpoints of 12 houses:

11	3	9	11
	ल		
8	6	2	
5	3	9	5
12			
3	5	8	11

The midpoints (their Rasis) of opposite Bhavas e.g. of the 1st and the 7th; of the 2nd and the 8th; of the 3rd and 9th Bhavas etc. will fall in the 7th Navamsa from each other e.g. the 1st house 3°-8°-53' - Kanya Navamsa vs of the 7th house 9°-8°-53' is Meena Navamsa.

Midpoint Rasis of the 2nd and the 6th houses; of the 8th and the 12th houses; of the 3rd and the 11th houses and of the 5th and the 9th houses are of the same Navamsa Rasi.

Planets transiting the Navamsas of cuspal points (mid-points) of various houses produce their full effects at that time. Of all the cusps the 10th cusp; next the 4th one and lastly the 7th one, are of utmost importance in descending order.

Very often, it is found in practice; transit of Rahu or Ketu through the above referred Navamsas causes tragic happenings during unfavourable Dasa periods.

A majority of the planets - malefic or benefic - falling close on cusps i.e., Bhava-Madhya, - ensure the Bhava-results adverse or favourable, to the fullest extent.

Rahu or Ketu, posited in close conjunction with particular midpoint in natal chart, creates inauspicious impact pertaining to that house during currency of own Dasa or period.

CHAPTER 13**SELECTED VERSES**

D.K.1 p.14 verse 128

पापांशगे दुर्मरणं शुभांशे क्षिप्रमारकम् ।
पित्ररिष्टस्य समये माता देशान्तरगता ॥

Instant vs Tragic Death

If (Mars and Jupiter as 9th lord) occupy benefic Navamsas, death will be instant, but if these two planets are in malefic Navamsas, father will incur a tragic end. At the time of father's death, the native's mother will have gone out of relevant place.

Deva Keralam 2 page 63 - verse 3299:

लग्नभावगते जीवे शुभांशे दैर्घ्यमायुषः ।
पापांशे पापसंदृष्टे त्वल्पायुर्दायमादिशेत् ॥

Long and Short Life

Jupiter occupying ascendant in a benefic Navamsa bestows longevity. If the said Jupiter with a malefic Navamsa is having malefic aspect, life span will be limited.

D.K.1 p.235 verse 2652

लनेशे नीचराशिस्थे नीचांशे पापवीक्षिते ।
अन्तः क्रोधी प्रसन्नात्मा किंचित्लुब्धस्वभाववान् ॥

Angry and Miserly Nature

If the ascendant lord is in debility both in Rasi and Navamsa, and be in aspect to a malefic the native will be inwardly angry, but be pleased. He will be somewhat miserly in disposition.

D.K.1 p.69 verse 718

Kanya Lagna

सुतेशे वृश्चिकांशस्थे भूसुतेन समन्विते ।
पितामहः प्रसिद्धश्च शुद्रग्रामाधिपत्यवान् ॥

Famous Grandfather

"If the 5th lord (Saturn) conjoins Mars and gets his position in Vrischika Navamsa, the native's paternal grandfather will be famous, leading a village inhabited by soodras.

Notes:- The 9th from the 9th i.e. the 5th house represents paternal grandfather. Saturn occupying Vrischika Navamsa (in any one of the nine signs) conjuncts his dispositor Mars is worth noting.

H.S. Chap.XXII verse 15

तदधीशे चरभांशे प्रवासतोऽर्थागमं सुखं लभते ।
स्थिरभांशके स्वदेशादुभयांशे सर्वतो धनप्राप्तिः ॥

Place of Earning

If the lord of the Navamsa referred to above be in a movable sign or Navamsa; the person born will be earning his money easily when he is absent from his native place. If the said lord be in an immovable sign or Navamsa, he will get money in his own place. If he in a dual Rasi or Navamsa, the native will get money everywhere.

Notes - तदधीशे - means ruler of the Navamsa occupied by the lord of the 10th house.

Jyotisharnava Navamitam p.124 verse 323

पित्रेशे चरराशिस्थे चरांशे रविसंयुते ।
मारकेशयुतेदृष्टे पितुर्मरणमादिशेत् ॥

Untimely Death of Father

The lord of the 9th house in a movable Navamsa of a movable sign in the company of the Sun and related to a Maraka planet (i.e. a killer planet) by aspect or conjunction will cause early death of father.

Jataka Desh-Marga Chap.VI verse 26

चरांशकस्था रविमन्दभौमा स्थिरांशकस्थौ भृगुदेवपूज्यौ ।
शेषौ तु युग्मांशकसंप्रयुक्तौ तदा समद्भूतनरः शतायुः ॥

One Hundred years Longevity

If the Sun, Saturn and Mars be in Navamsa owned by movable signs, Jupiter and Venus be in Navamsas owned by fixed signs and the remaining two planets occupy Navamsas owned by common signs, the person born will live for hundred years.

D.K.2 p.4 verse 2740

जामित्राधियतौ चन्द्रे स्थिरांशे स्थिरराशिगे ।
कारके स्थिरराशिस्थे वदेदेककलत्रवान् ॥

One Marriage Only

The 7th lord the Moon is in a fixed Navamsa of a fixed sign while the significator (Venus) is also in a fixed sign, it is said there will be one marriage only.

D.K.1 p.112 verse 1243

व्यांशेऽष्टमगे चन्द्रे पापद्वयसमन्विते ।
स्थिरलग्ने प्रजातस्य स्वल्पायुर्दायमादिशेत् ॥

Short-life

One born in immovable ascendant will be short lived if the Moon be in the eight house occupying Vyayamsa (12th Rasi-tulya Navamsa) in association with two malefics.

Sarwartha Chintamani Chap.V verse 59

लग्नपुत्रेश्वरौ खेटौ परस्परनिरीक्षितौ ।
परस्परगृहांशस्थौ शुश्रूषां कारयेत्सुतः ॥

Obedient Son

If the lords of the 5th house and the ascendant aspect each other or be posited in each other's Rasis or Navamsas, the son will be dutiful (son will be obedient to father).

D.K. Book 2 p.59 verse 3249

सूर्याशराशिगे मन्दे चन्द्रांशे केतुसंस्थिते ।
पापिनौ च पितृव्यौ द्वौ मातुलौ भवतस्तथा ॥३२४६॥

Relatives sinful "At birth, Saturn occupying a sign identical with Navamsa occupied by the Sun, will cause two sinful paternal uncles; similarly, Ketu occupying a sign which is identical with the Navamsa sign occupied by the Moon, will cause two maternal uncles to indulge in sinful deeds."

Notes: The Sun and the Moon represent paternal and maternal relatives respectively. This rule can be applied to Saturn occupying the Moon's Navamsa-tulya sign for maternal uncles and Ketu occupying the Sun's Navamsa-tulya sign for paternal

uncles. It can further be applied to other Karakas e.g. Mars for coborns; Jupiter for own progeny; and Venus for wife's brethren. The author has touched only male relatives but female relatives can be included, e.g., father's sisters or brothers; mothers sisters or brothers, own sisters (Mars); daughters (Jupiter) and wife's sisters (Venus).

In the Standard Horoscope Mars is placed in Mithuna Navamsa and Saturn is posited in Mithuna sign. Two sisters, who are no more today, had caused lot of troubles to the author for years, similarly, Jupiter occupies Mithuna Navamsa and Saturn is placed in Mithuna sign. Author's only son and one daughter had caused worries and mental anguish for many years. No doubt, none of those four relatives were or are sinful in the literal sense of the word. - "Papinou"

(for reference):

सूर्याशराशिगे मन्दे चन्द्रांशे केतुसंस्थिते ।

समस्तखेटेषु च उच्चराशौ स्थितेषु नीचांशगतेषु तेषु ।
भहीशपुत्रोऽपि रसाधिपश्च भिक्षाशनो मुख्यदिगम्बरः स्यात् ॥

Yoga with Debilitation Navamsa

Even a son of a ruler of the (whole) earth will become the head of the underworld or Patala (i.e., will have a steep, irreconcilable fall in position) will earn his meal by beggary and will be chief among naked ascetics when all the planets are in exaltation signs and debilitation Navamsas.

Notes: Seven planets cannot be exalted at a time. Only six planets can either be exalted or debilitated same time. When Mercury is exalted, the Sun and Venus cannot be exalted. When

the Sun and Venus be exalted, Mercury cannot be exalted at the same time.

D.K.2 p.78 verse 29

स्वोच्चे नीचांशके दुःखी नीचे स्वोच्चांशगे सुखी ।
स्वांशे वर्गोत्तमे भोगी राजयोगो भविष्यति ।

A planet in exaltation sign and debilitation Navamsa will be grievous. The one in debilitation sign with exaltation Navamsa will be a source of happiness. Pleasures and Raja Yoga will follow a planet that is Vargottama in its own sign. (e.g. the Moon in Kataka Navamsa in Kataka sign).

Brihat Yagan Jataka P.325 verse 25

सर्वे नवांशे यदि संस्थिताः स्वे धराधिनाथं मनुजं तथान्ते ।
कुर्वन्ति नानागजवाजिवृन्दैर्हतरिपक्षं प्रचुरप्रतापम् ॥

Seven Planets in own Navamsas

A native born with all the planets in their own Navamsas will become a splendourous king endowed with herds of elephants and horses; who has conquered his enemies.

D.K.2 p.78 verse 30

कष्टभावे त्रिग्रहोच्चे द्विग्रहोच्चेऽथवा यदि ।
क्लेशजीवनवान्नित्यं नीचांशस्थे विशेषतः ॥

Two or Three Exalted Planets

Two or three planets being exalted in a nativity in evil houses will make one's life miserable; their debilitation Navamsa positions in this yoga will be more troublesome.

Sarvartha - Chintamani Chap.II verse 111

जीवांशकस्थाः सकला ग्रहेन्द्राः केन्द्रश्रिता धर्मधनाश्रिता वा ।
जातो नरः प्रव्रजितः स बाल्ये युगांतमाहुर्बहुशास्त्रकर्ता ॥

Life upto the End of Yuga

If all the seven planets, in Navamsas of Jupiter (18 in all - 9 Dhanus and 9 Meena) be in Kendra, the 9th or the 2nd house the person born becomes Yogi from childhood becomes an author of many shastras and lives till the end of Yuga.

D.K.2 p.85 verse 76

सौम्यांशगे धने जीवे निधने वा सुखी धनी ।
विद्यापटुत्वमाप्नोति राजद्वारे सुबुद्धिमान् ॥

Cleverness and Intelligence

Jupiter, in the 2nd or the 8th house with Mercury's Navamsa will grant learning, cleverness in royal circles and intelligence.

Notes: In the Standard Horoscope, Jupiter in the 8th house occupies Mithuna Navamsa.

D.K.1 p.170 verse 1905

लग्नांशे भार्गवांशस्थे शुक्रे नक्रांशसंस्थिते ।
अन्तः क्रोधी प्रसन्नात्मा किंचिल्लुब्धप्रतापवान् ॥

Angry and Miserly Nature

If the rising degree obtains a Navamsa of Venus, while Venus himself is in Makara Navamsa, the subject will be given to anger inwardly, but will be a pleased soul. He will be somewhat miserly but valorous.

Hora-Ratnam (R. Santhanam's edition) Part I p.853 verse 369

एकोऽपि विहगः कुर्यात्पञ्चमांशगतो नृपम् ।
समस्तबलसंपन्नश्चक्रवर्तित्वमेव च ॥

King or Emperor

Even if one planet is in its Panchamamsa, the native will become a king; if that planet in addition be endowed with all kinds of strength, he will be an emperor.

Notes - Panchamamsa means a planet in the 5th Navamsa in own Rasi. There can be only four possibilities - in fixed signs.

- (i) Vrishabha Navamsa in Vrishabha Rasi (Venus);
- (ii) Simha Navamsa in Simha Rasi (the Sun);
- (iii) Vrischika Navamsa in Vrischika Rasi (Mars); and
- (iv) Kumbha Navamsa in Kumbha Rasi (Saturn).

In the first condition the respective planet becomes Vargottama in own sign in the 5th Navamsa (Rasi Madhya).

If the said planet in addition be endowed with Shad-Varga Bala (as per Shripatti Paddhiti), the native become an emperor.

"For a native born with the Moon in any Navamsa from Mesha to Meena (in any sign), there will be loss (destruction, etc.) of family wealth (Vyayah) in the years of his life represented by the following numbers respectively viz. Mesha 8; Vrishabha 9; Mithuna 24; Kataka 22; Simha 5; Kanya 1; Thula 4; Vrischika 2; Dhanus 20; Makara 38; Kumbha 21 and Pisces 10".

Note: the Moon's Navamsa Rasi of the native. In the running year of life mentioned above against each Navamsa Rasi,

ranging from Mesha to Meena, some loss (as destruction, theft, fire, spending, celebration, marriage, festivities etc.) of family wealth (or property) takes place. Suppose a child is born with the Moon in Kanya Navamsa. In the very first year of the child's life, some family wealth will be lost or reduced. Another child is born with the Moon in Mithuna Navamsa, the family's wealth or property will be lost or reduced or destroyed in the 24th year of its life. Similarly, the critical years for the Moon's position in other Navamsas can be arrived at for different nati-
ties.

CHAPTER 14

NAVAMSA-DWADASAMSA AND NAVAMSA SPASHTA GRAHAS

Navamsa-Dwadasamsa (N-D)

When a Navamsa (arc of 200' minutes) is divided into twelve equal parts, each part measuring 16'-40" or 16(2/3) minutes of arc is known as Navamsa-Dwadasamsa i.e. one twelfth division of Navamsa. Each Rasi consists of $9 \times 12 = 108$ Navamsa Dwadasamsas.

Refer the Table at the end of the chapter for Mesh sign only.

- (1) the first column shows the sign Mesha etc...;
- (2) The second column shows constellations, Aswini, Bharavi etc...;
- (3) The third column - various padas 1, 2, 3, 4; 1, 2, 3, 4; 1; etc.
- (4) The fourth column - number of Navamsa signs from Mesha to Dhanus (onwards) numerically;
- (5) the fifth column - signs, degrees, minutes and seconds of each Navamsa-Dwadasamsa;
- (6) the last column shows the N-D signs. Similarly, tables for all the remaining 11 Rasas be prepared for easy calculations.

According to our ancients that as many as 108 births may take place, when each Rasi is rising in the East with varying characteristics, nature, Yogas etc. Hence the Zodiac on the whole consists of $9 \times 12 \times 12 = 1296$ Navamsa Dwadasamsas. Each of which reveals a peculiar destiny or fate. Daily 1296 different natives are born.

Rudimentary method of preparing Navamsa-Dwadasamsa Chart. Navamsa-Dwadasamsa chart of the Standard Horoscope:

First of all, find out the N-D Rasi of the ascendant. Put that Rasi in the ascendant. Prepare the positions of the remaining planets. It should always be counted from the Navamsa-Rasis in which the planets are situated to arrive at correct N.D. positions.

Rectification of birth time

Shri Ekalavya (News and Views) in the Astrological Magazine, January 1988-p.14) has referred to this theory.

Among the traditional modes of rectification of birth time is one known as Kunda method. It has proved its validity by long, successful and continued usage.

Prasna Marga Chap.V verse 8

कुन्दिघ्ने पृथग्लग्ने प्रष्टतारा न चेद् भवेत् ।
क्षिप्वा काचित्कलास्त्यक्त्वा वा नेयं प्रष्टजन्मभम् ॥

By Katapayadi, Kunda signifies 81. The rule says, multiply the tentative Lagna-sphuta (longitude) by 81. The product represents a Nakshatra which denotes the native's birth star or its octave.

In case it does not, reduce by a few minutes the Lagna-sphuta and operate until it yields the desired result. The corresponding time will be the correct one.

In the Standard Horoscope the Lagna sphuta is 3°-8'-53' when multiplied by 81, it comes to 2°-29'-33'.

The Moon's sphuta is 6°-12'-13', when multiplied by 81 it comes to 2°-29'-33'. This confirms that the verification by Kunda method is not necessary in this case and the time of birth is almost correct.

CHAPTER 15

NADI ASTROLOGY

In the Annual Number of the Astrological Magazine 1952, late Dr. Nagaraja Sarma had introduced Nadi literature to the readers at some length. Since then much water has flown down the Ganges but nothing substantial, in the real sense of the word, has been done by research students in this field.

What is Nadi?

The word "Nadi" has four different meanings in Sanskrit literature.

(i) "Nadi" means 'Swara' or breadth movement. A human being inhales and exhales on an average about 21,600 times a day.

- Ida (Chandra); Pingala (Surya) and Sushumna = Nadis,

(ii) "Nadi" pulses - are used in Ayurvedic system, to find from which disease and to what extent a patient suffers by observing throbbings of pulses as felt on the patient's wrist.

(iii) "Nadi" - in marriage alliances-Adya-Madhya-Antya Nadi - used for compatibility.

(iv) "Nadi" - in astrology, is a small unit of arc (or its corresponding time) of the zodiac to rise in the East as the ascendant. The word "Nadi" in Astrology is used in this sense.

Nadi literature

There are as many as 20 or more "Nadi Granthas" prevalent in South India. Most of them are in old palm-leaf bundles in Sanskrit - but scribed in their southern languages. They are jealously guarded by their owners. These texts are available from

different libraries both in Sanskrit and Tamil e.g. G.O.M.L. (Madras); Mysore University Library (Mysore), Saraswati Mahal Library (Tanjore) etc. In northern parts of India, these Nadi Granthas are known as "Samhitas".

Various Nadi Granthas known are as follows:

(1) Bhrigu Nadi; (2) Sukar Nadi; (3) Dhruva Nadi (2,50,000 Verses - by Jaya Muni); (4) Satya Nadi; (5) Surya Nadi; (6) Agastya Nadi; (7) Guru Nadi; (8) Nandi Nadi; (9) Budha Nadi; (10) Chandra-Kala Nadi (Deva Keralam - two authors - Achyuta - part I; Venkatesha Part II); (11) Saptarishi Nadi; (12) Kumar Nadi; (13) Nava Nadi; (14) Kuja Nadi; (15) Kaka Bhujandar Nadi; (16) Garga Samhita; (17) Kapila Nadi; (18) Bhargava Nadi; (20) Sani Nadi; (21) Ishwara Nadi etc. and many more.

The author has gone through the texts of Dhruva Nadi (one volume only)-out of the 42 volumes-comprising about 2,50,000 verses; Deva-Keralam (both volumes-in 3 parts); Bhrigu Nadi and Nandi Nadi and partially read about other Nadis through monthly magazines. The texts of most of the above Nadis are in Sanskrit but copied in Southern Indian scripts e.g. in Tamil, Telugu, Malayali and Kannad ones. For studying them, they are to be transcribed into "Deva-Nagari Script". Some Nadis e.g. Suka Nadi, Kapila Nadi; and Kamala Muni Nadi are in Tamil.

Nadis generally have some stock methods of giving predictions without going into meticulous calculations. They are a highly refined extract of innumerable astrological texts. They follow Ayurvedic system for treatment of ailments without referring to any afflicting planet. They prescribe remedial measures. They take into account all the principles mentioned in the standard texts and many more which are unknown to the modern astrological world. In short, Nadi authors follow a unique predictive system of their own, not to be found in traditional literature. They are exhaustive treatises on applied astrology. Their hand-written copies are available from respective libraries at reasonable charges. This unique system of Nadi Granthas is not so easy to grasp, unless one has an indepth knowledge of almost all the available methods enlightened by Parashara, Jaimini, Bhrigu, Jaya-Muni etc. and other principles (hidden techniques).

Techniques of two main and available Nadis are discussed below:

(1) "Dhruva Nadi" recognises only five vargas while Deva-Keralam takes cognizance of 16 vargas. The parameters employed in choice of Nadiamsas by Jaya Muni are as follows:-

ध्रुवनाडी-कन्यालग्नम् (P. 168-Vol. R. 14721)

रविहोरा समुत्पन्नो द्रेक्काणं मकरं भवेत् ।

नवांशं वृषभश्चैव गुरुत्रिंशांशजातके ॥

Meaning - "The native is born in Kanya ascendant, in the Sun's Hora, Makara Drekkana, in Vrishabha Navamsa and in Jupiter's Trimsamsa".

The Sun's Hora ranges from 5-15° to 6-00°;

Makara Drekkana ranges from 5-10° to 5-20°; it comes to 5-15° to 5-20°;

Jupiter's Trimsamsa ranges from 5-12° to 5-20°; it comes to 5-15° to 5-20°;

Vrishabha Navamsa ranges from 5-13°-20' to 5-16°-40'; it comes to 5-15° to 5-16°-40'.

The ascendant arc of chart ranges from 5-15° to 5-16°-40' i.e. during 1°-40' arc rising i.e. 2nd half of Vrishabha Navamsa rising.

(2) Deva-Keralam (Chandra-Kala Nadi):

Out of many valuable contributions of Kerala scholars to Indian Astrology, the most outstanding and unique is Chandra-Kala-Nadi. It is full of rare dicta for assessing the worth of a chart, usually not found in classical texts. Even for seasoned astrological scholars: it is difficult to understand some terminology used and to interpret rules mentioned therein. It offers a virgin field for fruitful research.

These valuable books, Chandra-Kala Nadi Vol. I 1952; Vol II Part I and Part II-1956 have been published by the Government Oriental Manuscripts Library (Madras) comprising about 9182 verses. The celebrated author's names are Achyuta (Vol I)

and Vankatesh (Vol II). These three books carry a list of names Nadi Amsas, amended in every volume. The Adhyar Library (Madras) has a volume of Chandra-Kala Nadi, in which the 150 names of Nadis are given in verses. This correct text was published for the first time by co-researchers in Janma-Bhumi Almanac in the year 1968.

The very word "Chandra-Kala" represents its Sankhya (number) '16'. It has been found that the basis of Chandra-Kala-Nadi is "16-Vargas" of Parasara. If one prepares a table of Shodas-Vargas of a sign, the total number of sub-divisions will be "150" only in each sign, not one more nor one less. These are the Nadi-amsas." In the Annual Number of the Astrological Magazine of January 1984-page 27, late Shri V.A.K. Aiyer has thrown some light on this point. Late Shri Surendra K. Bhagat of Bombay has published in 1990, a book named "Golden Key to uphold Nadi-Granthas", wherein he has given in a tabular form all the 150 Nadis of each sign i.e. $150 \times 12 = 1800$ Nadis, with their degrees, minutes and seconds of arc for pinpointing Nadis at ease.

They have distinctive names and sequence. No doubt, it is difficult to pinpoint correctly the Nadi-Amsa.

Longitudes of Nadi-Amsas

खपञ्चेन्दुमिता नाड्यञ्चरभे व्यत्यये स्थिरे ।

षट् सप्ततिं समारभ्य द्विस्वभावेषु राशिषु ॥

They begin with (वसुधा) and end with (परमेश्वरी). These Nadis are counted in the given order in movable signs; in the reverse order in fixed signs and from 76 onward to 150 and from 1 to 175 in dual signs.

Movable sign 1 to 150; in fixed sign 150 to 1; in dual sign 76 to 150 and 1 to 75. As a consequence same Nadi Amsa can have different longitudes as follows:-

वसुधा in movable sign $00^{\circ}-00'-00''$ to $00^{\circ}-30'-00''$;

वसुधा in fixed sign $29^{\circ}-30'-00''$ to $30^{\circ}-00'-00''$;

वसुधा in dual sign $15^{\circ}-00'-00''$ to $15^{\circ}-20'-00''$;

It may be noted that these Nadi-Amsas are not of uniform length i.e. longitudes (arcs). They are unequal.

- (i) वसुधा (movable); परमेश्वरी (fixed); सुशीतला(dual)
 $00^{\circ}-00'-00''$ to $00^{\circ}-30'-00''$;
- (ii) वैष्णवी (movable); पंकजा (fixed); सुखदा(dual)
 $00^{\circ}-30'-00''$ to $00^{\circ}-40'-00''$;
- (iii) ब्राह्मी (movable); नागा (fixed); सुप्रभा(dual)
 $00^{\circ}-40'-00''$ to $00^{\circ}-45'-00''$;

From the above it can be observed that the Nadi can have different arcs in movable, fixed and dual signs, and same arcs can have different Nadis in movable, fixed and dual signs.

पूर्वभाग and उत्तरभाग

Usually the scholars take 150th part of a sign of 30° i.e. 12 minutes of arc to rise as a Nadi Amsa (time covered is 48" seconds of time). This is again divided into 2 equal parts of 6' minutes of arc, each as पूर्वार्ध and उत्तरार्ध (i.e. 24" seconds of time). After detailed study of Nadi-amsas, the author has come to believe that पूर्वार्ध and उत्तरार्ध apply to the Moon's and the ascendant's position in a Navamsa. There are innumerable references to this effect in the text.

'Nasta-Jatakam' by Mukund Daivajna (translated by R. Santhanam, Aug 1982) - There are four references on page no.136.

(1) **Mithuna Navamsa** - The birth is in a cart if the Moon is in the 2nd half of Navamsa. (This is an unfailing clue).

(2) **Karka Navamsa** - The second half of the Navamsa indicates female nativity, with a mole on the left breast.

(3) **Simha Navamsa** - The first-half indicates male birth.... The second half causes short stature.

(4) **Tula Navamsa** - The second half of this Navamsa indicates birth of a Brahmin.

For the Moon to cover 3°-20' of arc i.e. one Navamsa, it takes nearly 6^{hrs}-40^{ms} roughly. During this period one movable, one fixed and one dual - three signs rise in the east as ascendants. So पूर्वार्ध means the Moon is in the first half of the Navamsa and उत्तरार्ध means the Moon is in the 2nd half of the Navamsa

(1) The Moon 6-12°-20'-56" in Makara Navamsa - the Moon is in उत्तरार्ध - second half.

(2) The Moon 1-4°-20'-8" in Kumbha Navamsa - the Moon is पूर्वार्ध - first half.

The above are the author's observations during deep study. It is left to the research-minded scholars to accept them or suggest their own findings.

The last but not the least

"Regarding Nadis, investigations were carried out by the adept Mr Subba Rao and W.O. Judge jointly. Almost all (such Nadis) were found to be spurious..... I have seen cases, where a person's name, his wife's name, the number of children and some past events are correctly given and it appears wonderful. But the fact is, often clairvoyant powers are used to make horoscopes from palm and in many cases discarnate beings like nature spirits and undeveloped dead people are engaged to get this information. Many know that these things exist."

They correctly say the past events but miserably fail as far as future events are concerned.

Native's Death

When the Antardasa of an untoward planet is ruling, and Rasi owned or occupied by the planet (mostly Saturn-passing through Navamsa-Rasi of the 8th lord) is also a harmful one, the death of the person concerned may be expected to happen or he will be troubled by some serious disease.

Notes

In this chapter critical or adverse years are noted for all the twelve different Navamsa-ascendants. One can safely infer that in that particular year if a malefic period (Bhukti) rules simultaneously, death may be expected to happen, otherwise trouble by some disease be pronounced.

CHAPTER 19

RESULTS OF NAVAMSA POSITIONS OF SEVEN PLANETS

Results of the Moon in various Navamsas aspected by different planets

From the Astrological Magazine January 1969, P.160.

If the Moon at the time of a person's birth be conjoined in the Navamsa of Aries or Scorpio and be at the same time aspected by the Sun, he will be courageous, will punish thieves, will be reputed and will be protector of a city; if the Moon in a similar situation is aspected by Mars, he will be fond of killing, and hard-hearted; if by Mercury, he will be well versed in the art of military strategy and close fighting, will be fast in talking and bewildered; if by Jupiter, he will be a courageous king, holding kingly status, commands reputation and will be honoured by persons of learning; if by Venus, commands ministerial status and likes the company of women and will be rich; and if by Saturn, he will be bent upon creating quarrels, be proficient in magic and trickery, and of a deceitful disposition.

If the Moon attains a navamsa owned by Taurus or Libra and be aspected by the Sun, the person concerned will be an idiot; talks what others will like and will be fond of food and drinks; if by Mars, he will be addicted to the women of other people, filled with passion and sexual thoughts; possesses servants; if by Mercury, he will be proficient in dance, music and such other allied subjects, or be a poet; if by Jupiter he will be a literary genius and author of many books, will be proficient in law and engaged in ministerial professions; if by Venus, he likes the company of women, costly dresses; fond of costly food and drinks, holds a well-to-do position; generally a pleasure seeker and will be content and happy; and if by Saturn, he will cohabit with other's wives and will be bereft of relatives.

If the Moon at the time of birth occupies a navamsa of Gemini or Virgo and at the same time is aspected by the Sun, he will be proficient in wrestling, fighting etc., will command the respect of others, and will be proficient in acting; if by Mars, he will be a robber, cruel, deceitful and clever in worldly affairs; if by Mercury, he will be proficient in the art of writing and in trades, more particularly, handicrafts; if by Jupiter, he will be a minister or will hold ministerial position, be beautiful and possess praiseworthy habits; If by Venus, he will be skilled in music, gains social importance and finally if by Saturn he will be proficient in mechanical arts, in sastras and will be learned.

If at birth the Moon conjoins a Navamsa of Cancer and is aspected by the Sun, he will be of lean stature, and will have scars on his body; if by Mars, he will be clever in usurping other's belongings, avaricious and stingy; if by Mercury, he will be irreligious, uncharitable, sleepy and a non-believer in divinity and will be practicing penance having separate religious philosophy; if by Jupiter, he will be holding an important position in public life, if by Venus, he will be disliked by women and impotent; if by Saturn, suffers imprisonment, fond of entering into litigation with others, devoted to his work, and commits highly sinful deeds, including murder.

If the Moon at the time of birth occupies a Navamsa owned by the Sun and at the same time is aspected by the Sun, the native will be quick-tempered and holding well-to-do position; if by Mars, he will be engaged in jewellery business, repute and will be respected by Government, will be a friend of a person holding top-most position in the country and hard-headed; if by Mercury, will have faith in astrology, interest in Sastras and ancient literatures, devoted and will get hidden treasure; if by Jupiter, he will hold a high position in the army or becomes a great lord; if by Venus, he will have no children or will suffer loss of a son and will be fond of a son; and if by Saturn, he will be uncharitable, sinful and will engage himself in cruel deeds.

If at the time of birth the Moon occupies a navamsa sign owned by Jupiter (Sagittarius or Pisces) and at the same time the said sign is aspected by the Sun, he commands respect as a

courageous man; if by Mars, he will be proficient in fighting and in the use of weapons and commands respect everywhere; if by Mercury, he will be humorous in talking and will hold kingly or commanding position; if by Jupiter himself he will be a pet of the Government/King, will be faithful to his work and commanding reputation; if by Venus, will be blessed with sexual enjoyments and happiness and will be without lust and if by Saturn, he will be charitable and afraid of strong people and will be virtuously disposed.

If at the time of birth the Moon occupies a Navamsa of Capricorn or Aquarius and at the same time is aspected by the lord of Leo (the Sun), he will have only few sons, suffer from diseases and have defective organs; if by Mars, he will be rich, well-to-do, hated by women and will lead a miserable life though in affluent circumstances; if by Mercury, he will be haughty, mischievous, having blame-worthy habits and sinful; if by Venus, he will be addicted to wicked women, sinful and courageous; if by Jupiter, he will be proficient in all his endeavours and will be faithful to his work and if by Saturn, he will be niggardly, and stingy and will be suffering from diseases and putrasoka (sorrow for the dead son).

Notes

Though the above combinations and aspects are employed in the case of Moon's position, it is equally applicable with respect to the Sun and ascendant, mutatis mutandis. It has been explained in a text that whilst the Moon enjoys vargottama Navamsa and at the same time is aspected by benefic (s), the beneficial effects given above will materialise in full. If the Moon is conjoined in a friendly Navamsa other than vargottamamsa and aspected by benefic(s), the beneficial effects given above will materialise to the extent of 25 per cent only. If the moon conjoins Cancer and is aspected by a benefic, then 50 per cent of the beneficial results given above will materialise. On the contrary, if the Moon conjoins vargottamamsa and be aspected by malefic(s), then malefic effects given for that yoga will be restricted to 25 per cent, in his own Navamsa with malefic aspect will restrict the malefic side to 50 percent. Whilst the Moon conjoins a sign other than vargottama and his own and at the same time is aspected by a malefic, then the malefic effects will materialise in full.

तन्निमित्तपरिज्ञानं वक्ष्ये निर्याणलक्षणम् ॥ १॥

In the case of all creatures born in this world, Death will

happen through some reason or other. In order to find out the time when it would come off, I Shall describe the several causes by which the same happens.

शिखिजलशस्त्रनिपातैर्ज्वरामयक्षुत् कृतैरिनाद्यैः स्यात् ।

निधनस्थैर्मृतिहेतुः परदेशाध्वस्वके चराद्यैश्च ॥ २॥

शशिलग्नयोर्विशेषाद्वलिनो रन्ध्रस्थितैर्ग्रहैश्चिन्त्यम् ॥ ३॥

When there are many planets posited in the 8th house, death will be due to diseases of various kinds pertaining to these planets. The reckoning of the 8th house should be specially with reference to the Moon or the Lagna whichever is stronger.

केषांचिद्दशमस्थैश्चन्द्राब्दानोर्नवांशकादथवा ॥ १॥

A person gets wealth in various ways suited to his innate nature. According to some, wealth is acquired through planets posited in the 10th house reckoned from the Lagna, from the Moon or the Sun or their Navamsas.

ग्रहरहिते दशमगृहे चन्द्राब्दानोस्तथा तयोर्बलिनः ।

तदधीशराशिनाथस्वभावलब्धोपजीवनं कुरुते ॥ ३॥

If the 10th house be planetless, then the livelihood will be through that prescribed for the ruler of that house (or if the ruler of the Navamsa occupied by the planet owning the 10th place) reckoned from the Lagna, from the Moon, or from the Sun, whichever is stronger or that prescribed for the lord of the Rasi in which the lord of the above 10th house is posited.

अर्कांशे फलवृक्षैर्भेषज्यैर्धातुविक्रयैः शिल्पैः ।

द्यूतानृतशठ्यकरैर्भूषैर्वा वित्तमाप्नुयात् सततम् ॥४॥

If the Sun be the lord of the Navamsa occupied by the lord of the 10th Bhava, the person concerned will earn a living by dealing in fruits, trees, medicines, metals and handicrafts. He will obtain money by gambling, by uttering falsehood, by cheating or through kings.

चन्द्रांशे मणिपोतैः कृषिजलवस्त्रादिभिर्धनं लभते ।

गोमहिषशर्कराद्यैः स्त्रीसङ्गान्मन्त्रदैवताद्वाऽपि ॥५॥

If the Navamsa under reference be that of the Moon, the person gains a living by dealings in pearls, ships, by agriculture, water, clothes and the like, cows, buffaloes, sugar or through the medium of women, incantations, or by worshipping deities.

उपदेशमन्त्रकुशलैः साहसशस्त्राग्निभेषजैर्वाऽपि ।

आपणविक्रयकुशलैर्भौमांशे क्षत्रियादितो धनवान् ॥६॥

If the Navamsa in question belong to Mars, the person gains his livelihood by teaching, by proficiency in Mantras, an aggressive bold act, weapon, fire or drug, trading in things in the market, and from Kshatriyas.

तदधीशे सौम्यांशे दानाध्ययनादिभिः प्रियालापैः ॥७॥

When the Navamsa referred to belongs to Mercury, the person born will earn his livelihood by writing, drawing, mathematics, poetry, gambling, dancing and panegyrics, by making gifts, studying and pleasant narrations.

.....श्रमवधभारादिनीचकृत्यैश्च ।

तिललवणधान्यशाकैस्तृणकाष्ठजलादिभिर्धनं लभते ॥११॥

If the Navamsa referred to be owned by Saturn, the person born will earn a living through fruits and roots, leaves, by bearing burdens, by doing wearisome work, by trading through low persons, menials, grains and low corn. He will obtain money through base actions and by bearing burdens, by killing, through sesamum, salt, coriander, vegetables, grass, firewood, water and the like.

अंशाधिपोऽतिबलवानयत्नतोऽर्थागमं सुखं कुरुते ।

अंशाधिपोऽतिनीचे प्रोक्तफलं स्वल्पमेव विदधाति ॥१२॥

If the lord of the Navamsa referred to above be very strong, he will earn money without any effort at all and be happy. If the Navamsa lord be in his extreme depression, the several effects described above will reveal themselves only very little.

स्वस्वामिद्रष्टुक्तं स्वदेशफलदायकं मुनयः ऊचुः ।

अन्येन सहितद्रष्टं परदेशफलप्रदं प्राहुः ॥१४॥

Sages have declared that if the Navamsa Rasi be aspected by or conjoined with its lord, the earnings will be in his own native country. If it be, conjoined with or aspected by another, the earnings will be in a foreign country.

Ashtakavarga of Navamsa Chart

Smt. Gayatri Devi Vasudev writes in the Astrological Magazine (Sept. 1985 in Editorial)

"Traditional methods of the applications of Ashtakavarga are well known. One way to experiment.... is to try its application to Vargas as sub-divisional charts.... For a start, let us take the Ashtakavarga of the Navamsa chart.

She also took into consideration Ashtakavarga of Dasamamsa Chart and Suptamamsa Chart also.

In the end she says, "However, a judicious blending of the directions and Ashtakavarga methods give fairly accurate results."

Shri V.A.K. Ayer wrote in "News and Views" in the Astrological Magazine (Sept. 1986):-

"Can Ashtakavarga be applied to the Navamsa and other Varga Charts, as some modern writers tend to say: whether there are any directions or sanctions to that effect in classical texts?

Personally, I have not come across any authority in classical works. Navamsa is a very potent factor in predictive astrology and therefore could apply Ashtakavarga to it too; but a close scrutiny of its origin, structure, content and use belies it....

Bindus and Rekhas, they do not admit of Navamsa as Varga treatment unless it is on the bases of one's research or experience one applies the Ashtakavarga to divisional charts.'

A learned student, Shri S.K. Krishnan Nair, from Trivendrum wrote the author on 19-5-1986:-

"As on experimental measure, I have applied Ashtakavarga on the horary problems. I prepared a "Chandrashtakavarga of the Navamsa planets and the answers given were correct."

The author, during his study of last 50 years has not come across any authority in classical texts, about applying Ashtakavarga to Navamsa or any other Varga Chart. From research point of view, students may try.
