

One-click animated underlines & highlights for After Effects

■ INSTALLATION

aescripts Manager

RECOMMENDED

The easiest way to install and license MARKr is by using the **aescripts + aeplugins manager**. It handles install, updates and licensing automatically.

aescripts.com/learn/aescripts-aeplugins-manager-app

Free trial: to install a trial, select **Add Trial** from the **Account** menu in the manager.

Manual install

ALTERNATIVE

- 1 Copy `MARKr.jsxbin` into the After Effects `ScriptUI Panels` folder:

macOS

```
/Applications/Adobe After Effects [version]/Scripts/ScriptUI Panels/
```

Windows

```
C:\Program Files\Adobe\Adobe After Effects [version]\Support  
Files\Scripts\ScriptUI Panels\
```

- 2 Restart After Effects, then open the panel from `Window ► MARKr.jsxbin` and dock it in your workspace.

IMPORTANT - ONE-TIME SETUP

Enable scripting access

MARKr creates and edits layers, so After Effects needs scripting access turned on. Enable it once, in the After Effects preferences:

Preferences ► Scripting & Expressions ►

Allow Scripts to Write Files and Access Network ✓

■ QUICK START

- 1 Dock the panel anywhere in your workspace.
- 2 Pick a color in the panel swatch — this sets the highlight color.
- 3 Select a text layer.
- 4 Click a style. MARKr creates a shape layer with your animated highlight and keyframes for a left-to-right reveal.
- 5 Fine-tune in **Effect Controls**: Thickness, X Padding, Y Offset, Progress.

Static mode: Alt-click (Windows) / Option-click (Mac) applies a style with no animation.

Fully responsive: the shape is parented to your text, so it resizes and follows when you edit the words.

■ THE FIVE STYLES

M Scribble — a hand-drawn scribble stroke with natural tapering

A Strike — a clean strike-through across your text

R Highlight — a full marker-style highlight box

K HalfBox — a half-height highlight sitting on the baseline

r Line — a simple animated underline

■ LICENSE & SUPPORT

License: via the manager app it activates automatically after purchase. For a manual install, enter your license key when prompted on first use — or open it any time from the  button in the panel.

Support: questions or bugs? Use the support tab on the MARKr page at aescrpts.com.
