

Minimise your balloon profile to maximise your treatment possibilities.

Pliaform™ balloon-surface texture

Advance Micro™ 14

ULTRA LOW-PROFILE PTA BALLOON CATHETER

Microtherapy

The ultra low profile of these balloons allows you to attempt interventions that you never thought were possible.

Ideal for Below the Knee

These balloons were designed specifically to treat vessels from the knee all the way to the digital arteries.

Reduced Friction

The Pliaform balloon-surface texture* and hydrophilic coating reduce friction to help you cross lesions.

*on all sizes except 1.5 mm diameters

Actual size

Advance Micro™ 14

ULTRA LOW-PROFILE PTA BALLOON CATHETER

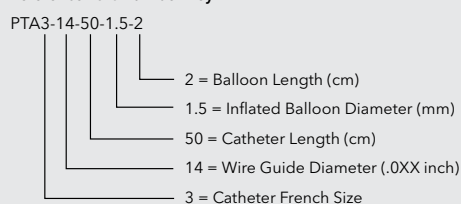

The Advance Micro 14 is used for percutaneous transluminal angioplasty (PTA) of lesions in peripheral arteries, including iliac, renal, popliteal, posterior tibial, anterior tibial, peroneal, pedal, femoral, iliofemoral, radial, brachial, ulnar and internal pudendal arteries, as well as of obstructive lesions of native or synthetic arteriovenous dialysis fistulas.

- Ultra-low profiles allow these balloons to pass through a 2.9 Fr ID Micropuncture® Pedal Access Set introducer.
- All of the balloon sizes are compatible with 3 Fr sheaths.
- The hydrophilic coating enhances pushability and trackability.
- Balloon lengths of up to 12 cm allow the treatment of longer lesions with fewer inflations and deflations.
- The nominal pressure for all sizes is 8 atm. The rated burst pressure is 16 atm.

ACCESS

The **Micropuncture® Pedal Access Set** can facilitate a retrograde tibiopedal approach, which is a new revascularisation technique that aims to give you another chance at limb salvage.*

Micropuncture®
Pedal Access Set

TARGET

When confronted with a chronic total occlusion in the legs, you can harness controlled power by choosing from four tip-load options of the **Approach® CTO Microwire Guide**.

The hydrophilic tip and supportive shaft of the **Approach® Hydro ST Microwire Guide** can help you target anatomy that is tortuous or below the knee.

Approach® CTO
Microwire Guide

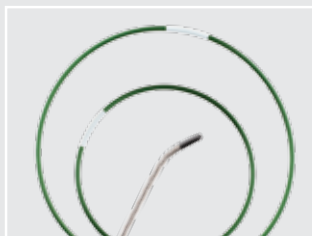

Approach® Hydro ST
Microwire Guide

The **Shuttle® Tibial Guiding Sheath** pairs with specially designed **Slip-Cath® Angiographic Catheters** to simplify access while minimising device exchanges.

The **CXI™ Support Catheter** provides the strength, visibility, lubricity and low profile that you need to help you reach and cross lesions.
