BMC SOLUTION PORTFOLIO

As companies embark on their digital journeys or refine their digital strategies, they inevitably face challenges that arise from platform expansion, evolving development models, the adoption of new technologies, and the increasing size of data sets.

OPPORTUNITIES AND CHALLENGES

Cloud

Inflexible management systems limit options

Data

The volume of data is truly colossal

Security

The pace of change and complexity is relentlessly increasing

DevOps

Outdated tools hinder progress

CLIENTS. COMMUNITIES. EMPLOYEES

A commitment to the success of its clients is a core principle of BMC's business. BMC's customers represent a rapidly growing global community, including tens of thousands of IT professionals across 119 countries on six continents. The BMC Communities website welcomes over 3.5 million visitors daily, providing a platform for clients to gain insights and share experiences while discussing technology trends and updates on BMC's products and solutions.

BMC offers businesses of all sizes and industries a comprehensive portfolio of open, scalable, modular solutions for automation, cognitive and intelligent process implementation, service management, and mainframe modernization.

FOUNDED IN 1980. IMPROVING DAY BY DAY

BMC was founded to help companies optimize their investments in mainframes. Through organic growth, strategic acquisitions, and dedicated research and engineering, BMC has expanded its expertise to include infrastructure, network, and service management across distributed data center environments and multi-cloud systems. BMC's unwavering priorities remain enhancing the manageability, security, and availability of IT infrastructure and services.
