to the first part of the report
concerning the organization of the
committee and the various
steps which have been taken
to carry out the plan of
action. The committee has
been organized and is now
in the process of carrying
out its duties. The first
step was to select a
committee and to appoint
a chairman. The committee
has since met several times
and has been very busy
in carrying out its duties.
The first report of the
committee was submitted
to the board of directors
on the 15th of the month.

STARS OF THE MONTH

NIGHT SKY IN JULY

The diagram shows the brighter stars as seen in Calcutta at 8-52 p.m., 8 p.m. and 7 p.m. I. S. T. on 3rd, 15th and 31st July. The portion bounded by the dotted lines represents the Milky Way. The moon's symbols give its phases roughly with dates marked alongside. The bounding circle of the diagram represents the horizon with the directions as indicated. The centre of the circle represents the zenith. To use the chart it should be held overhead with the centre of the circle pointing towards the zenith and the diagram turned in such a way that the north, south, east and west directions marked in the chart point to the correct directions.

THE MOON

Full moon occurs on 5th at 10-58 a.m. I. S. T. and new moon on 19th at 5-4 p.m. I. S. T.

THE PLANETS

Mercury: Throughout the month it will be visible as a morning star for about an hour before sunrise. It will be moving from Taurus to Cancer through Gemini during the month. On 27th it will be about 6° south of Pollux and on 29th about a degree north of Uranus.

Venus: It will be seen through-

out the month as a morning star for about an hour before sunrise in the first fortnight and for about half an hour before sunrise in the second fortnight. It will be moving from Taurus to Cancer through Gemini during the month. It will be very near Mercury on 28th.

Mars: Throughout the month it will be seen as an evening star for about an hour after sunset in the first fortnight and for about half an hour after sunset in the second fortnight. It will be moving from Gemini to Cancer during the month. On 1st it will be about 6° south of Pollux and on 6th about a degree north of Uranus.

Jupiter: It will be seen as an evening star throughout the month for about one and a half hours after sunset in the first half of the month and for about half an hour after sunset in the second half. It will be in Cancer and on 24th about a degree south of Mars.

Saturn: It will be visible from sunset to about four hours before sunrise in the first half of the month and from sunset to about five hours before sunrise in the second half. It will be in Libra,

Further Central Aid For 4 States

NEW DELHI, July 3.—The Government of India has sanctioned further grants and loans to four States for the development of the handloom industry.

Andhra gets two loans of Rs 15 lakhs and Rs 13 lakhs and a grant of Rs 2,01,175. A sum of Rs 13 lakhs is to be disbursed to weavers' co-operative societies in respect of looms already brought within the co-operative fold, while Rs 10 lakhs is to provide working capital to primary co-operative societies in respect of 5,000 looms proposed to be brought under co-operative organization during the current financial year. The balance of Rs 5 lakhs is working capital to primary co-operative societies in respect of 15,000 looms brought within the co-operative fold during the last two financial years.

The grant is to be utilized for the supply of equipment and for setting up a new dye-house at Machalipatam and a training centre for employees of primary and apex weavers' co-operative societies. A part of the grant is also for publicity.

Madhya Pradesh has been sanctioned a loan of Rs 12 lakhs and a grant of Rs 32,238. The loan is to be given to the Provincial Weavers' Co-operative Society Limited, Nagpur, to enable it to undertake the marketing of the handloom cloth produced by primary societies. The grant is for implementing a scheme for the development of the handloom industry and for meeting the cost of organizational and supervisory staff.

Uttar Pradesh has been given a loan of Rs 4,65,000. The loan is to be re-loaned to the Uttar Pradesh Association Limited for marketing the handloom goods produced by the primary weavers' co-operative societies.

A grant of Rs 52,400 and a loan of Rs 25,000 have been sanctioned to Madhya Bharat. The grant is to be utilized for setting up 48 sales depôts and for providing rebate on sales of handloom cloth. The loan is for providing additional working capital for weavers' co-operative societies.

The All-India Handloom Board has been sanctioned an expenditure of Rs 4,49,000 for publicity during the current financial year.

FURTHER FALL IN U.K. RETAIL TEA PRICES

LONDON, July 3.—The retail price of tea continues to fall in shops throughout the U.K.

On Monday, shoppers will find that on the average a further 4d. has been lopped off most of the brands, and the tea trade here forecasts that further cuts may be made in the near future.

Whereas a few months ago British housewives were buying tea at prices ranging from 6s. to 8s. 4d. per pound, they will be able to make their purchases at anything from 4s. to 7s. 4d. a pound.—N.A.F.E.N.

JUTE TRADE WITH

Societies. Industrial D Coal Board

Exclusive to The Statesman
in Lo

JUNE 28.—At the building conference the effects of the necessarily, the main subject confidently predicted 4 months ago adjust their rates to the high rates were long-term and became lowered.

But the period of "dear money" has already lasted longer than most people imagined, and it will certainly continue for many more months. "Dear money" is therefore causing changes over a widening circle. The building societies are unable to attract enough money at their former rates of interest; they will probably have to raise these rates and, therefore, to charge more to borrowers. These changes may not happen immediately but they seem almost inevitable this year.

This is another example of the devious working of the monetary instrument. In consequence of the rise in Bank rate, the yields on Treasury bills and on Government stocks have risen so that money that would normally have gone to the building societies has been diverted and money that was previously deposited with them has been withdrawn. (Particularly affected, it seems, are those societies which accept substantial amounts from industrial companies seeking temporary investment.) With resources diminishing, the societies must lend less—for they cannot maintain their liquidity by selling investments, as the banks have done. It is already more difficult than it was a few months ago to arrange a mortgage with a building society, and if mortgage rates rise the increase in the cost of loans will check the demand for them; also, existing borrowers will have to pay more and will thus have less of their income free for general spending, and as there are nearly 2 million of these borrowers the effect will be considerable.

The building societies' assets increased in 1954 more than in any other year (by £228 million to £1,870 million), and much of the increase related to loans for new building. More than 350,000 new houses and flats were built in this country last year, and a larger total has been anticipated for 1955. But it is now quite probable that that expected increase in building will not materialize; monetary stringency may even reduce the total. Since the building boom is an important element in the general industrial boom (though not quite so important in the U.K. as in the U.S.A.), the deflationary effect of its curtailment would be considerable. Alternatively, if residential building were curtailed more resources would be available

Examine the following and see if
you can identify them best

~~Only one~~

~~organism was found only
in the laboratory, as shown
by the following photograph
of the organism.~~
~~from the same source (shown
in photograph) - (B.S. M.O. 7. 4)~~

Leaf from R. Prunella
as first observed in
May 1867. M.O. 7. 4
to examine the
organism by
Klein's method
by means of Helminth
Ivanov's method
by means of
Lepidoptera and
Glycerol in
regular form

Многие считают неким изгнанным
Полье замком, где бывало много
генов лавры, генов еры и т.д.
Но я думаю, что это не так.
Это не так. Полье изгнано
то таинственно. Кому же это
замыслы? Полье изгнано, а
много. Полье. Полье. Полье.
Полье изгнано, это не так.
Венеры генов. Полье
книжки на неск. листах. Св. Ап-
ст. ? Многие изгнаны, но
отсюда —

Всего нас не менее десяти, а
это время в нас не проходит дня
и не забываем ничего из того.
Вспомните же свои проекты, не
думая, как они исполнятся, в России.
Дух не может быть неподвижен
на протяжении времени, как тело
и т.д. - Тогда как время проходит
и не может дух быть в
одном месте ^{вспомните} и не может
быть в одном месте - Почему
и "Анна Каренина" не может быть
не в духе времени, но в духе
каждого времени и в каждом
времени, а не в "Ведении" и
дух не может быть в "Ведении"
и не может быть в "Ведении"
и не может быть в "Ведении"
и не может быть в "Ведении"
и не может быть в "Ведении"
и не может быть в "Ведении"
