Report on Compliance with the UK Code on Corporate Governance

		Mandate	Compliance
		SECTION A: LEADERSHIP	
A.1	The Role of the Board	Every company should be headed by an effective board which is collectively responsible for the long-term success of the company	Complies
A.2	Division of Responsibilities	There should be a clear division of responsibilities at the head of the company between the running of the board and the executive responsibility for the running of the company's business. No one individual should have unfettered powers of decision	Complies
A.3	The Chairman	The chairman is responsible for leadership of the board and ensuring its effectiveness on all aspects of its role	Complies
A.4	Non-executive Directors	As part of their role as members of a unitary board, non-executive directors should constructively challenge and help develop proposals on strategy	Complies
		SECTION B: EFFECTIVENESS	
B.1	The Composition of the Board	The board and its committees should have the appropriate balance of skills, experience, independence and knowledge of the company to enable them to discharge their respective duties and responsibilities effectively	Complies
B.2	Appointments to the Board	There should be a formal, rigorous and transparent procedure for the appointment of new directors to the board	Complies
B.3	Commitment	All directors should be able to allocate sufficient time to the company to discharge their responsibilities effectively	Complies
B.4	Development	All directors should receive induction on joining the board and should regularly update and refresh their skills and knowledge	Partially complies
B.5	Information and Support	The board should be supplied in a timely manner with information in a form and of a quality appropriate to enable it to discharge its duties	Complies
B.6	Evaluation	The board should undertake a formal and rigorous annual evaluation of its own performance and that of its committees and individual directors	Does not comply (The requirement is not feasible in the Russian Federation)
B.7	Re-election	All directors should be submitted for re-election at regular intervals, subject to continued satisfactory performance	Complies
		SECTION C: ACCOUNTABILITY	
C.1	Financial And Business Reporting	The board should present a balanced and understandable assessment of the company's position and prospects	Complies
C.2	Risk Management and Internal Control	The board is responsible for determining the nature and extent of the significant risks it is willing to take in achieving its strategic objectives. The board should maintain sound risk management and internal control systems	Complies

C.3	Audit Committee and Auditors	The board should establish formal and transparent arrangements for considering how they should apply the corporate reporting and risk management and internal control principles and for maintaining an appropriate relationship with the company's auditor	Complies
		SECTION D: REMUNERATION	
D.1	The Level and Components of Remuneration	Levels of remuneration should be sufficient to attract, retain and motivate directors of the quality required to run the company successfully, but a company should avoid paying more than is necessary for this purpose. A significant proportion of executive directors' remuneration should be structured so as to link rewards to corporate and individual performance	Complies
D.2	Procedure	There should be a formal and transparent procedure for developing policy on executive remuneration and for fixing the remuneration packages of individual directors. No director should be involved in deciding his or her own remuneration	Complies
		SECTION E: RELATIONS WITH SHAREHOLDERS	
E.1	Dialogue with Shareholders	There should be a dialogue with shareholders based on the mutual understanding of objectives. The board as a whole has responsibility for ensuring that a satisfactory dialogue with shareholders takes place	Complies
E.2	Constructive Use of the AGM	The board should use the AGM to communicate with investors and to encourage their participation	Complies

Report on JSC RusHydro's Compliance with the Principles and Recommendations of the Corporate Governance Code Approved by the Bank of Russia (Letter № 06-52/2463 Dated April 10, 2014)

№	Principle (Principles) of Corporate Governance or Key Criterion (Recommendation)	Brief Description of the Part Where the Principle or Key Criterion is not Observed	Explanation of Key Reasons, Factors and Circumstances why a Principle or Key Criterion is not Met or is Complied with not in full, Description of Used Alternative Mechanisms and Tools of Corporate Governance
1	2	3	4
I. Shareholder Rights and Equality of Conditions for Shareholders to Exercise their Rights			
1.1.	<p>The Company shall ensure equal and fair treatment of all shareholders when they exercise their rights to participate in the management of the Company.</p> <p>The system and practice of corporate governance shall ensure equality of conditions for all shareholders - the owners of shares of the same category (type), including minority (small) shareholders and foreign shareholders, and their equal treatment by the Company.</p>		
1.1.1.	<p>The Company has approved an internal document that defines the basic procedures for the preparation, convening and holding of the general meeting of shareholders and meets relevant recommendations of the Corporate Governance Code, including the Company's obligations:</p> <p>to inform shareholders of the general meeting of shareholders and provide access to meeting materials, including publish the notice of the meeting and materials on the Company's website in the Internet not less than 30 days prior to this date (unless the legislation of the Russian Federation provides for a longer period of time);</p> <p>to disclose information about the date of the drawing up the list of persons entitled to participate in the general meeting of shareholders not less than 7 days prior to this date;</p> <p>to provide shareholders with additional information and materials on the agenda issues of the general meeting of shareholders in accordance with the recommendations of the Corporate Governance Code.</p>	<p>Disclosure of information about the date of the drawing up the list of persons entitled to participate in the general meeting of shareholders not less than 7 days prior to this date;</p>	<p>This norm is not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>

1.1.2.	The Company has assumed responsibilities to adhere to the principle of inadmissibility of actions that lead to an artificial redistribution of corporate control (e.g. voting with quasi-treasury shares, decision to pay dividends on preferred shares under the conditions of limited financial possibilities, decision not to pay dividends defined in the Company's Articles of Association on preferred shares if there are sufficient resources for their payment). These responsibilities are entrenched in the Articles of Association or in the internal documents of the Company.	These responsibilities are not entrenched in the Company's internal documents.	This norm is not entrenched in internal documents. 1. In case of approval of interested party transactions and when the Russian Federation does not take part in voting on them, the ban to vote with quasi-treasury shares may significantly complicate the decision-making. Moreover, in the capital markets the most attractive lending terms are offered by banks with state participation and quasi-treasury share votes might be required in the voting due to the fact that quorum cannot be achieved without them. Thus, this ban can cause expenses to the Company when it attracts debt financing on more expensive terms should the transactions with banks with state participation in their authorized capital be not approved. 2. Quasi-treasury shares in the RusHydro's Group are temporary thing and related to the preparations for the privatization of the Company (selling to a strategic investor with the state-owned stake in the Company). The Company is aware of the undesirability of quasi-treasury shares and at the same time believes that the Company's efforts to mitigate undesirable consequences of such shares. According to the Company, such disposal should be done with the greatest benefit for the Company and its shareholders.
II. Board of Directors of the Company			
2.1	The Board of Directors determines major strategic targets of the Company's activities in the long term, key performance indicators of the Company, exercise strategic management of the Company, defines the basic principles and approaches to risk management and internal control system in the Company, supervises the activities of executive bodies, determines the Company's policy on remuneration of members of the Board of Directors and executive bodies, as well as performs other key functions.		
2.2.	The Board of Directors shall be an effective and professional management body of the Company which is able to make objective, independent judgment and make decisions that meet the interests of the Company and its shareholders. The Chairman of the Board of Directors should help it carry out the functions imposed on the Board of Directors in a most efficient manner. Meetings of the Board of Directors, preparation for them, and participation of members of the Board of Directors therein should ensure efficient work of the Board of Directors.		
2.2.1.	The Chairman of the Board of Directors is an independent director, or among the elected independent directors a senior independent director is determined who coordinates the work of independent directors and is responsible for interaction with the Chairman of the Board of Directors.	The Chairman of the Board of Directors is not an independent director. A senior independent director has not been elected.	The Chairman of the Board of Directors is a professional attorney who votes in accordance with the directives of the Russian Federation. The Chairman of the Board of Directors is elected based on the directive of the Government of the Russian Federation, including with special features provided for in relation to the strategic Joint Stock Companies which JSC RusHydro has been since 2012. At present, in the Company's internal documents there is no

			<p>information regarding the powers and the status of senior independent director.</p> <p>However, currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
2.2.2.	<p>The Company's internal documents include the procedure for convening and preparing for a meeting of the Board of Directors which enables the members of the Board of Directors to get properly prepared for the meeting and set forth, inter alia:</p> <p>the period for notifying members of Board of Directors of the upcoming meeting;</p> <p>the time limits for sending documents (voting ballots) to each member of the Board of Directors and receiving completed documents (voting ballots) therefrom when meetings are held without physical presence of members of the Board of Directors;</p> <p>the possibility to take account of written opinions on any agenda items presented by members of the Board of Directors who are absent from the meeting;</p> <p>the possibility to discuss and vote on the agenda items remotely, via conference and video-conference calls.</p>	<p>The procedure for preparation and holding of meetings of the Board of Directors does not provide for the possibility to discuss and vote on the agenda items via conference and video-conference calls.</p>	<p>This norm is not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
2.2.3.	<p>Most important issues are decided at the meetings of the Board of Directors held in person. The list of issues meets the recommendations of the</p>	<p>The list of issues that are considered at the meetings of the Board of Directors held in person does not meet the recommendations of the Corporate Governance Code.</p>	<p>This norm is not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance</p>

	Corporate Governance Code ¹		Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
2.3.	The Board of Directors should include a sufficient number of independent directors.		
2.3.1.	Independent directors account for not less than one-third of the elected members of the Board of Directors.	Not complied with	The Board of Directors includes three independent directors, which meets the requirements of the Listing Rules of CJSC MICEX Stock Exchange. Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
2.3.2.	The Board of Directors (the Nominating (Staff, Appointment) Committee)) conducts a conformance evaluation of candidates to the Board of Directors to the independence criteria.	The Staff and Remuneration Committee of the Board of Directors do not conduct a conformance evaluation of candidates to the Board of Directors to the independence criteria.	At present, such evaluation is not within the competence of the Staff and Remuneration Committee Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
2.4.	The Board of Directors should form committees for preliminary consideration of most important issues of the Company's business.		
2.4.1.	The Board of Directors has established the Audit Committee composed of independent directors. The functions of the Committee are set out in the internal documents and comply with the recommendations of the Corporate Governance Code ²	The functions of the Audit Committee do not comply in full with the recommendations of the Corporate Governance Code	The norms are entrenched in the internal documents not in full. Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be

¹ Indicated in paragraph 168 of Part B of the Corporate Governance Code

² Indicated in paragraph 172 of Part B of the Corporate Governance Code

2.4.2.	The Board of Directors has established the Remuneration Committee (can be combined with the Nominating (Staff, Appointment) Committee consisting of independent directors. The functions of the Committee are set out in the internal documents and comply with the recommendations of the Corporate Governance Code ³	The functions of the Remuneration Committee do not comply with the recommendations of the Corporate Governance Code	approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
2.4.3.	The Board of Directors has established the Nominating (Staff, Appointment) Committee (can be combined with the Remuneration Committee) consisting of independent directors. The functions of the Committee are set out in the internal documents and comply with the recommendations of the Corporate Governance Code ⁴	The functions of the Staff and Remuneration Committee do not comply with the recommendations of the Corporate Governance Code	
III. Corporate Secretary of the Company			
3.1	Effective current interaction with shareholders, co-ordination of the Company's activities to protect the rights and interests of shareholders, support of the effective work of the Board of Directors are provided by the Corporate Secretary (special structural division headed by the Corporate Secretary).		
3.1.2.	The Company has approved an internal document that defines the rights and responsibilities of the Corporate Secretary (Regulation on the Corporate Secretary), the content of which meets the recommendations of the Corporate Governance Code ⁵	The content of the Regulation on the Corporate Secretary does not meet the recommendations of the Corporate Governance Code in terms of subordination of the Corporate Secretary and the conditions and procedures for payment of remuneration to the Corporate Secretary.	<p>This norm is not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
3.1.3.	The Corporate Secretary takes a post without concurrently performing other functions in the Company. The Corporate Secretary has the functions in accordance with the recommendations of the Corporate Governance Code. The Corporate Secretary has sufficient resources to	The Corporate Secretary takes a post concurrently performing other functions in the Company. The Corporate Secretary does not have functions in accordance with the recommendations of the Corporate Governance Code.	<p>These norms are not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. ⁵ Indicated in paragraph 186 of Part B of the Corporate Governance Code

	carry out his/her functions ⁶		of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
IV. System of Remuneration due to Board of Directors, the Executive Bodies, and other key managers of the Company			
4.3.	The system of remuneration of the executive bodies and other key managers of the Company should provide that the amount of remuneration should depend on the Company's performance results and their personal contribution to this result.		
4.3.1.	The Company has in place a long-term motivation program for members of the executive bodies and other key managers of the Company	The Company does not have in place a long-term motivation program for members of the executive bodies and other key managers of the Company using the Company's shares (options or other derivative financial instruments, whose underlying asset is the Company's shares).	<p>The Board of Directors of JSC RusHydro (Minutes № 206 dated November 21, 2014) approved 2015-2019 Long-Term Development Program of the RusHydro Group. This Long-Term Development Program of the RusHydro Group also includes key performance indicators (KPI).</p> <p>This decision also made remuneration of the members of the collegial executive body of the Company dependent on achieving the KPIs of this program.</p> <p>Starting from 2015, the KPI for senior managers were replaced by the KPIs of the Long-Term Development Program. The list of KPIs of the Long-Term Development Program is significantly expanded and approved for 5 years.</p>
V. Risk Management and Internal Control System			
5.1.	The Company should have in place an efficient risk management and internal control system designed to provide reasonable confidence that the company's goals will be achieved.		
5.1.1.	The Company developed and implemented the anti-corruption policy that defines measures aimed at establishing the elements of corporate culture, organizational structure, the rules and procedures for the prevention of corruption	The Company's anti-corruption policy is not approved as a separate document.	<p>JSC RusHydro developed and approved a number of local regulatory acts aimed at formation of the corporate culture elements, organizational structure, rules and procedures guaranteeing prevention of corruption. In accordance to the Resolution of the Board of Directors, a Code of Corporate Ethics establishing ethical norms and rules of conduct of the Company's employees and members of the Board of Directors was approved, as well as Regulations on an order of prevention and regulating a conflict of interests in JSC RusHydro, Rules and Regulations on RusHydro hotline created to counteract fraud and corruption, illegal activities and to improve the Company's activities.</p> <p>Currently, the Company is developing the anti-corruption policy of the Company which is consistent with the standards of the Corporate Governance Code</p>

⁶ Indicated in paragraph 217 of Part B of the Corporate Governance Code

			approved by the Bank of Russia on March 21, 2014, and the Policy for Managing Conflicts of Interest.
5.2.	To independently evaluate, on a regular basis, reliability and efficiency of the risk management and internal control system and corporate governance practices, the Company shall carry out internal audits.		
5.2.1.	<p>The Company has in place a separate structural unit performing the functions of internal audit, which does not functionally report to the Board of Directors. The functions of such division meet the recommendations of the Corporate Governance Code. Such functions include, in particular:</p> <p>performance evaluation of the internal control system; performance evaluation of the risk management; assessment of corporate governance (in the absence of the Corporate Governance Committee)</p>	The structural division performing the functions of the internal audit functionally reports to the Audit Committee of the Company's Board of Directors.	<p>These norms are entrenched in the Structural Division Regulations (№ 981 dated November 28, 2014), as well as the Internal Audit Policy.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
5.2.2.	Head of the Internal Audit Department reports to the Board of Directors, is appointed and removed from office by the decision of the Board of Directors.	The Head of the Internal Audit Department functionally reports to the Audit Committee of the Company's Board of Directors, is appointed to and removed from office by the Chairman of the Management Board – General Director of the Company as agreed upon with the Audit Committee of the Company's Board of Directors of JSC RusHydro.	<p>These norms are approved by the Regulations on the Audit Committee of the Board of Directors of JSC RusHydro approved by the Board of Directors of JSC RusHydro (№ 188 dated October 25, 2013).</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
5.2.3.	The Company has approved the Internal Audit Policy (Regulation on the Internal Audit) which defines the goals, objectives and functions of the internal audit.	The Internal Audit Policy is not approved by the Board of Directors.	<p>The Internal Audit Policy is approved by the Company's internal order.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms</p>

			of the Company's Corporate Governance Code.
VI. Disclosure of Information on the Company, Information Policy of the Company			
6.1.	The company and its activities should be transparent to shareholders, investors and other interested parties.		
6.1.1.	<p>The company has approved an internal document that defines the company's Information Policy which meets the relevant recommendations of the Corporate Governance Code. The Information Policy of the company includes the following ways to interact with investors and other interested parties:</p> <p>setting up the company's website where it would post answers to frequently asked questions from shareholders and investors, a regularly updated calendar of its corporate events, and other useful information for its shareholders and investors;</p> <p>regular meetings with analysts, members of the executive bodies, and other key managers of the company; and</p> <p>regular presentations (including in the form of conference calls and webcasts) and meetings with members of the management bodies and other key employees of the company, in particular, in connection with publication of financial statements of the company or in relation to major investment projects or plans for strategic development of the company.</p>	<p>The Company's Information Policy does not meet the relevant recommendations of the Corporate Governance Code.</p> <p>The Information Policy of the Company does not include the specified ways to interact with investors and other interested parties.</p>	<p>These norms are not entrenched in internal documents.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.</p>
6.1.2.	<p>The company's Information Policy is implemented by its executive bodies. The company's Board of Directors shall exercise control over proper information disclosure and compliance with the Information Policy.</p>	<p>The Company's Board of Directors does not exercise control over proper information disclosure and compliance with the Information Policy.</p>	<p>These norms are not entrenched in internal documents.</p> <p>Head of the Corporate and Legal Management Unit exercises control over proper information disclosure and compliance with the Information Policy.</p> <p>Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014.</p> <p>The Corporate Governance Code of JSC RusHydro is planned to be</p>

			approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
6.2.	The company should ensure timely disclosure of complete and accurate information about the company in order to enable its shareholders and investors to make informed decisions.		
6.2.1.	The Company discloses annual and interim (semi-annual) consolidated or individual financial statements prepared in accordance with International Financial Reporting Standards (IFRS). Annual consolidated or individual financial statements are disclosed together with the auditor's report whereas interim (semi-annual) consolidated or individual financial statements - together with a report on the results of the audit review or audit report.	Interim (semi-annual) consolidated financial statements are not disclosed together with a report on the results of the audit review or audit report.	Interim (semi-annual) consolidated financial statements are not audited.
6.2.2.	The company has disclosed a special memorandum containing plans relating to the company of the person who has control over the company. The said memorandum has been prepared in accordance with the recommendations of the Corporate Governance Code. ⁷	A special memorandum containing plans relating to the company of the person who has control over the company has not been disclosed nor prepared by the Company in accordance with the recommendations of the Corporate Governance Code.	These norms are not entrenched in internal documents. Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
6.2.3.	The company discloses information on the capital structure in accordance with the recommendations of the Corporate Governance Code.	The Company does not disclose information on the capital structure in accordance with the recommendations of the Corporate Governance Code.	These norms are not entrenched in internal documents. Currently, the Company is working to implement the norms of the Company's Corporate Governance Code approved by the Bank of Russia on March 21, 2014. The Corporate Governance Code of JSC RusHydro is planned to be approved in 2015. Then, in 2015-2016, amendments to the Articles of Association and internal documents of JSC RusHydro will be approved to entrench the norms of the Company's Corporate Governance Code.
6.2.4.	The annual report of the company contains	The annual report of the Company does not contain the following additional information recommended by the	The Company's annual report has been prepared in accordance with

⁷ Indicated in paragraph 279 of Part B of the Corporate Governance Code

<p>additional information recommended by the Corporate Governance Code:</p> <p>a summary of most significant transactions, including interested party transactions, entered into by the Company or legal entities controlled by the Company during the past year;</p> <p>a report of the Board of Directors (including reports by its Committees) for the year; in particular, such report should include information about the number of meetings of the Board of Directors held in person/without physical presence of the members of the Board of Directors and about participation of each member of the Board of Directors in its meetings, a description of most important and most complex issues which were discussed at the meetings of the Board of Directors and its committees, and main recommendations made by the committees to the Board of Directors;</p> <p>information about any shares in the company which are owned by, or whose beneficiaries are, members of the Board of Directors and/or executive bodies of the company;</p> <p>information on whether any members of the Board of Directors and the executive bodies have conflicts of interest (including those associated with their participation in the management bodies of any competitors the company);</p> <p>a description of the system of remuneration of members of the Board of Directors, including the amount of individual remuneration payable upon the results of the year to each member of the Board of Directors</p>	<p>Corporate Governance Code:</p> <p>a description of the system of remuneration of members of the Board of Directors, including the amount of individual remuneration payable upon the results of the year to each member of the Board of Directors (with a breakdown between their basic fee, additional remuneration for the chairmanship in the Board of Directors and for the chairmanship/membership in committees of the Board of Directors, the amount of participation in the long-term incentive program, the amount of participation of each member of the Board of Directors in an option plan, if any), reimbursement of expenses associated with their participation in the board of directors, and costs incurred by the Company in connection with liability insurance for its directors in their capacities of members of the management bodies;</p> <p>information on the total remuneration for the year:</p> <p>(a) in respect of a group of at least five members of the executive bodies and other key managers of the Company who receive the largest amounts of remuneration, broken down by type of remuneration;</p> <p>information on the remuneration of the one-person executive body for the year, which he/she has received or is to receive from the Company (or a legal entity forming part of a group of entities which includes the Company) with a breakdown by type of remuneration, both for carrying out his/her duties of the one-person executive body and otherwise;</p>	<p>the requirements of Chapter 70.3 of Disclosure Information Regulation approved by the Bank of Russia dated December 30, 2014 №451-P and the requirements of the Government №1214 dated December 31, 2010. Report on Pending Lawsuits

	Number of lawsuits	Total amount of the recovery of monetary funds
JSC RusHydro – suitor	88	RUR 5.9 billion
JSC RusHydro – defendant	10	RUR 27.5 million

Report on Government Support Received by the Company

In 2014, JSC RusHydro did not attract funds from the federal budget to implement investment program projects. In 2014, the Company used previously received budget funds in the amount of RUR 11,992.8 million of which:

- ❖ RUR 11,291.5 million to construct heat generation facilities in the Far East (RUR 4,377.9 million – CHP Plant in Sovetskaya Gavan, RUR 6,125.3 million – the Yakutskaya SDPP-2, RUR 788.3 million – the second stage of the Blagoveschenskaya CHP);
- ❖ RUR 697.8 million to implement the projects "the Gotsatlinskaya HPP, the Republic of Dagestan";
- ❖ RUR 3.5 million to develop the project documentation for the Kankunskaya HPP.

Information on the Measures to Verify Implementation of the Long-Term Development Program of the RusHydro Group

In 2014, the Board of Directors of JSC RusHydro approved the Long-Term Development Program of the RusHydro Group (hereinafter referred to as the Program, the Document) (Minutes № 206 dated November 21, 2014). The program was developed in fulfillment of the assignment of the President of the Russian Federation № Pr-3086 dated December 27, 2013, the decision taken at the meeting of the Russian Government (Minutes № 3 dated January 30, 2014), the orders of the Federal Agency for State Property Management № OD-11/18576 dated April 29, 2014 and the Ministry of Energy of the Russian Federation № 09-1918 dated June 16, 2014 and № AN-7899/08 dated July 23, 2014, as well as in accordance with JSC RusHydro's Order № 528 dated July 3, 2014. The document is generated for the period of 2015-2019 years on the basis of JSC RusHydro's Strategic Plan for the period up to 2015 with a view to 2020 and determines the basic principles and directions that ensure effective rapid development of the RusHydro Group to effectively use energy resources, create conditions to ensure reliability of the Unified Energy System, and make an expanded use of energy sources for the benefit of shareholders and society. The program takes into account the goals and objectives set out in:

- ❖ the Concept of long-term socio-economic development of the Russian Federation for the period up to 2020;
- ❖ the Russian Energy Strategy for the period up to 2030;
- ❖ the Area Planning Scheme of the Russian Federation in the field of power generation;
- ❖ Presidential Decrees, orders of the Government of the Russian Federation and other regulatory legal acts on the development of national power generating industry.

In drawing up the Program, the Company took into account the provisions of the Federal Agency for State Property Management's letter № OD-11/18576 dated April 29, 2014 "On the development of key strategic documents in state-owned companies" and the Methodological Recommendations of the Federal Agency for State Property Management on elaboration of long-term development programs for strategic open joint-stock companies and federal state unitary enterprises, as well as open joint-stock companies, the share of the Russian Federation in the authorized capitals of which is more than fifty per cent in total. The final version of the Program was agreed upon with the Federal Agency for State Property Management, the Ministry of Energy of the Russian Federation and the Expert Council under the Government of the Russian Federation.

In accordance with the directive of the Government of the Russian Federation № 4955p-P13 dated July 17, 2014 and the Methodological Recommendations of the Ministry of Economic Development of the Russian Federation for the purposes of verification of implementation of the long-term development program of the Company and its subsidiaries, the Audit Committee of the Company's Board of Directors (Minutes № 63 dated November 14, 2014) and the Board of Directors (Minutes № 206 dated November 21, 2014) approved the Standard for verification of implementation of the long-term development program of the RusHydro Group (hereinafter referred to as the Standard).

This Standard has been designed with due regard to the Standard for financial audit of the implementation of the long-term development programs for open joint-stock companies included in a special list approved by order of the Government of the Russian Federation № 91-p dated January 23, 2003. This Standard for financial audit of the implementation of the long-term development programs was approved by assignment of the Government of the Russian Federation № ISH-P13-2583 dated April 15, 2014.

In accordance with the Standard (paragraph 3.2), verification of the Program implementation will be carried out on an annual basis, starting from 2016 (verifying fulfillment of 2015 Program).

In addition, taking into account staffing measures carried out in 2014 to upgrade the efficiency of JSC RusHydro management, the Internal Audit, Control and Risk Management Department of JSC RusHydro is assigned functions involving organization of external financial audits of the long-term development program of JSC RusHydro, as well as implementation of its monitoring during the fiscal year.

Report on Creation of Single Treasuries of Parent, Subsidiary and Dependent Companies

In execution of Russian President's Directives № Pr-1032 dated May 7, 2014 and ISH-P13-3464 dated May 13, 2014, JSC RusHydro (hereafter referred as the Company) submitted to the Board of Directors the issue "On creation of a single Treasury of JSC RusHydro, its subsidiary and dependent companies" for consideration and approval.

This issue was approved by the Board of Directors of the Company and the Chairman of the Management Board – the General Director of the Company was given instructions to carry out a number of measures to ensure the implementation of this assignment (Minutes of the Company's Board of Directors № 203 dated September 15, 2014).

In October 2014, the Company's Treasury performed an analysis of the current structure of financial flow management and the settlement and payment system of the RusHydro Group, the results of which were forwarded to the Ministry of Finance of the Russian Federation.

Currently, the Company has in place Order №37 dated January 26, 2015 with a detailed plan of activities to ensure the introduction of the Single Treasury. The plan includes:

- ❖ Development and approval of the concept (structure) of the single Treasury;
- ❖ Approval of the Single Treasury Regulations and other organizational and administrative documents regulating the activities of the Single Treasury and the management system of financial flows of the RusHydro Group;
- ❖ Synchronization and automation of treasury functions.

Currently, planned activities aimed at the creation of the Single Treasury are carried out in full and on time.

Report on Implementation of Non-Core Asset Disposition Programs

Information on availability in JSC RusHydro of the approved program for disposition of non-core assets (hereinafter referred to as NCA) and the NCA list.

1. The Board of Directors (Minutes № 106 dated September 1, 2010) approved the Regulations "On the procedure for disposition of non-core assets of JSC RusHydro". Report on the Implementation of 2014 Measures approved by the List of Non-Core Assets of JSC RusHydro was considered by the Management Board of the Company (Minutes № 893pr/1 dated February 6, 2015) in accordance with established procedures and approved by the decision of the Board of Directors of the Company (Minutes № 210 dated March 2, 2015)

A separate NCA disposition program is not adopted in JSC RusHydro. The NCA List indicates planned activities for NCA disposal, as well as the results of the activities.

2. The NCA disposition program represents the NCA List. The List of Non-Core Assets of JSC RusHydro includes basic information about the non-core assets, their book value, a type of proposed action in respect of non-core assets, estimated time limits for implementation of actions and other relevant information.
3. In accordance with the Regulations "On the procedure for disposal of non-core assets of JSC RusHydro", the Company is entitled to take the following management actions in respect of its non-core assets:

1. Actions designed to retain control over a non-core asset, including:	2. Actions designed to terminate control over a non-core asset, including
<ul style="list-style-type: none"> a) Retention: reservation of the Company's rights to a non-core asset in its present form; b) Ringfencing: establishment of a new legal entity together with other individuals and/or legal entities or without their participation; reorganization in the form of separation, with the transfer of the relevant non-core asset to the new legal entity; transfer of the non-core asset in payment for the authorized capital of the existing legal entity. c) Lease: leasing the non-core asset. d) Development of the asset through the implementation at its premises of projects that have a positive economic effect. 	<ul style="list-style-type: none"> a) Sale: compensatory alienation of a non-core asset or a share in the ownership thereof; b) Gratuitous transfer: gratuitous alienation of a non-core asset, usually in favor of the state or municipality; c) Liquidation: liquidation (cannibalization, derecognition, destruction, etc.) of a non-core asset, including subsequent possible sale of its individual components (does not apply to non-core assets in the form of shares, emission securities converted into shares, participation interests in authorized capitals of legal entities).

4. The List of 2014 Non-Core Assets of JSC RusHydro was approved by the Board of Directors' decision dated February 17, 2014 (Minutes № 193 dated February 19, 2013), while amendments thereto were approved by the Board of Directors' decision dated October 28, 2014 (Minutes № 205 dated October 2, 2014) and November 28, 2014 (Minutes № 207 dated December 1, 2014).

Report on the Implementation of 2014 Measures approved by the List of Non-Core Assets of JSC RusHydro was considered by the Management Board of the Company (Minutes № 893pr/1 dated February 6, 2015) in accordance with established procedures and approved by the decision of the Board of Directors of the Company (Minutes № 210 dated March 2, 2015).

Actual data of NCA disposition in 2014, as well as the reasons why the actual value of alienated non-core assets deviates from their book value are given in the table "Report on disposal of JSC RusHydro's non-core assets in 2014".

5. Deviation of the actual sales value from the book value of an asset is due to the fact that in accordance with the Regulations on the procedure for immovable property disposal, a sale shall be effected at a price not less than the market value.
6. Total indicator values (book value, sales value and the number of sold non-core assets in the reporting period) are given in the table "Report on disposal of JSC RusHydro's non-core assets in 2014".

Report on Disposal of JSC RusHydro's Non-Core Assets in 2014

№	Name of Asset	Inventory Number of Asset	Balance sheet line where the asset was reflected as of the reporting date preceding the disposal date of the asset	Bookkeeping accounts (including analytics) which reflect the income and expenses from retirement of the asset 91.1xxx/91.2xxx)	Book value of the asset, RUR thousand	Actual sales value, RUR thousand	Deviation of the actual sales value from the book value of the asset, RUR thousand	The reason why the actual sales value deviates from the book value of the asset
1	Residential house № 45	BR1847	1151 "Property, plant and equipment"	91.01/91.02.01	4,979.80	5,079.40	99,60	Selling at a price not lower than the market price to employees of JSC RusHydro branch - the Bureyskaya HPP in accordance with the Regulations on the procedure of immovable property disposal
2	Apartment № 61, house № 31	BR1004_61	1151 "Property, plant and equipment"	91.01/91.02.01	190,80	524,83	334,03	Selling at a price not lower than the market price to employees of JSC RusHydro branch - the Bureyskaya HPP in accordance with the Regulations on the procedure of immovable property disposal
Total:					5,170.60	5,604.23	433,63	

Report on Expanding Access of Small and Medium-Sized Businesses to Procurement

In fulfillment of the requirements of the Federal Law of the Russian Federation № 223-FZ of 18 July 2011 "On procurement of goods, works and services by certain kinds of legal entities", JSC RusHydro ensures transparency of procurement and expansion of the competitive environment. The Company has developed, approved and implemented the Regulation on procurement of products for the needs of JSC RusHydro, providing for the placement of all necessary procurement documents in the Single Information System www.zakupki.gov.ru, as well as the use of an electronic trading platform.

Considerable cost savings are achieved thanks to the use of high-efficient competitive procurement methods. The Company carries out electronic trading in the amount of not less than 40% of the total annual volume of procurement of goods, works and services (including from 10% to 20% of auctions, primarily, in relation to the list of goods, works and services, orders for delivery (performance, provision) of which are placed through an auction, as approved by the Government of the Russian Federation).

Upon implementation of the investment activities, cost savings for procurement of goods (works, services) per unit of output within the framework of 2014 annual comprehensive procurement program of the RusHydro Group in terms of procurement, the results of which are summed up and contracts are signed or are planned to be signed, amounted to 11.55% for 12 months of 2014.

To execute the Government's instructions on expanding access of small and medium-sized enterprises to purchases made by infrastructure monopolies and state-owned companies, as fixed in the "road map" (Russian Federation Government's Order № 867 of 29.05.2013) and relevant government directives, JSC RusHydro is implementing a set of measures. They include:

- ❖ The Company has made changes to the Company's local normative acts which provide for obligations to enter into contracts with small and medium-sized businesses within 20 days after the results of the tendering procedure, and pay for work performed, services rendered within 10 days from the date of execution of works / services. Provision is made for assignment of rights (claims) in favor of financial institutions (factoring) for contracts concluded with small and medium-sized businesses.
- ❖ The Company has approved JSC RusHydro's Partner Program (available on the Company's website in the "Purchases" section) aimed at implementing the state policy on development of small and medium-sized businesses. Small and medium-sized businesses can join the program subject to the requirements established by the Company's local normative acts.
- ❖ In 2015, JSC RusHydro is planning to increase its share of purchases from small and medium-sized businesses to 18% of total purchases.

At year-end 2014, JSC RusHydro's share of direct contracts with small and medium enterprises in the total amount of concluded contracts based on the results of procurement of goods, works and services amounted to 11.88%.

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Auditor's Report

To the Shareholders of Open Joint-Stock Company Hydro-Generating Company – RusHydro:

We have audited the attached financial statements of Open Joint-Stock Company Hydro-Generating Company – RusHydro (hereinafter – OJSC RusHydro) which comprise the balance sheet as of 31 December 2013, and statement of financial results, statement of changes in equity and statement of cash flows for the year ended 31 December 2013 and notes to the balance sheet and statement of financial results (hereinafter all the reports together are referred to as the “financial statements”).

OJSC RusHydro's responsibility for the financial statements

OJSC RusHydro's management is responsible for the preparation and fair presentation of these financial statements in accordance with the reporting rules established in the Russian Federation and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The auditor's responsibility

Our responsibility is to express an opinion as to whether the financial statements are fairly presented based on our audit. We conducted our audit in accordance with Russian Federal Auditing Standards and International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management of OJSC RusHydro, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient to provide a basis for our audit opinion on the financial statements.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of OJSC RusHydro as of 31 December 2013 and the results of its operations and its cash flows for the year then ended in accordance with the reporting rules established in the Russian Federation.

Auditor's Report

Emphasis of matter

Without modifying our opinion on the fairness of the financial statements we draw attention to Note 3.1.2 Long-term investments (balance sheet line 1170) to the financial statements which describes the reasons for non-revaluation of quoted financial investments in shares of OAO RAO Energy Systems of East, OAO Yakutskenergo and OAO Far East Energy Company at their current market values.

As of 31 December 2013 the amount of unrecognised decrease in the market value as compared to the carrying value of these investments is RUB 12,394 million, as of 31 December 2012 – RUB 9,887 million.

I. General information

1.1 Information about the Company

Principal activities of open joint stock company Federal Hydro Generating Company (ОАО RusHydro, hereinafter - the Company) are the generation and sale of electricity (power). The Russian Government is the Company's major shareholder.

The Company's registered address is: 51, Republic str., Krasnoyarsk, Krasnoyarsk Territory, Russian Federation, 660075. The Company's postal address: 7, Malaya Dmitrovka str., Moscow, Russian Federation, 127006.

As of 31 December 2013 the Company employed 6,305 people (as of 31 December 2012 – 6,101 people).

The Company's shares are traded on OAO MICEX-RTS stock exchange (<http://moex.com>). Level 1 American depository receipts, each of which corresponds to 100 ordinary shares of the Company are traded on the Main Market of London Stock Exchange and over-the-counter market of the USA.

As of 31 December 2013 the ownership share of the Russian Federation in the Company's share capital amounted to 60.50% less actually placed additional shares of the Company under the current additional issue of shares (see paragraph 3.3.1 of the Explanatory Notes). Considering the additionally placed shares as of 31 December 2013 the ownership interest of the Russian Federation in the Company's share capital amounted to 66.84%.

As of 31 December 2013 the Company has 19 branches registered in the Russian Federation, including: branch Bureyskaya GES, branch Volzhskaya GES, branch Votkinskaya GES, Dagestan branch, branch Zhigulevskaya GES, branch Zagorskaya GAES, branch Zeiskaya GES, Kabardino-Balkarsky branch, branch Kamskaya GES, Karachaevo-Cherkessky branch, branch Cascade of Verkhne-Volzhsky GES, branch Cascade of Kuban GES, branch Corporate Energy University, branch Nizhegorodskaya GES, branch Novosibirskaya GES, branch Saratovskaya GES, branch Sayano-Shushenskaya GES named after P.S. Neporozhny, Severo-Osetinsky branch, branch Cheboksarskaya GES.

Membership of the Company's Board of directors as of 31 December 2013 is as follows:

- Boris Ayuev, Chairman of the Management Board of ОАО SO UES;
- Christian Andreas Berndt, General Director, EF-TEK LLC;
- Andrey Bugrov, Vice-President of INTERROS Holding Company CJSC, Deputy General Director, Deputy Chairman of Board of Directors, member of the Management Board of MMC Norilsk Nickel OJSC, Vice-President of RSPP;
- Maxim Bystrov, Chairman of the Management Board of ATS JSC, Acting Chairman of the Management Board of Non-profit Partnership Market Council;
- Victor Danilov-Danilyan, Head of Sectoral and Natural Resources Management Department, member of Academic Council of Lomonosov Moscow State University;
- Evgeny Dod, Chairman of ОАО RusHydro Management Board;
- Sergey Ivanov, General Director, Russian Energetic Company OJSC;
- Victor Zimin, Chairman of Republic of Khakassia Government;
- Denis Morozov, Managing Director from Russian Federation, Belarus and Tadzhikistan, Representative of the Russian Federation in the Board of Directors, European Bank for Reconstruction and Development;
- Mikhail Polyboyarinov, member of the Management Board, First Deputy of Chairman of SC Vnesheconombank;
- Vyacheslav Pivovarov, General Director, Altera Capital LLC;
- Vladimir Stolyarenko, Professor of the specialized department "Theory and practice of interaction between business and authorities" of National Research University Higher School of Economics;
- Sergey Shishin, Senior Vice-President of ОАО VTB Bank.

According to the decision made by the Company's extraordinary general meeting of shareholders held on 19 April 2013 (Minutes No. 10) Eduard Volkov, Ilya Gubin, Viktor Kudryavyy, Denis Morozov, Denis Nozdrachev, Vyacheslav Pivovarov, Berndt Pfaffenbach and Vladimir Stolyarenko were elected to the Board of Directors; the powers of Boris Kovalchuk, Grigory Kurtser, Andrey Malyshev, Vladimir Tatsy, Evgeny Tugolukov, Rashid Sharipov, Mikhail Shelkov and Sergey Shishin were terminated.

According to the decision made by the Company's general meeting of shareholders held on 28 June 2013 (Minutes No 11) Christian Andreas Berndt, Andrey Bugrov, Maxim Bystrov, Sergey Ivanov and Sergey Shishin were elected to the Board of Directors; the powers of Eduard Volkov, Ilya Gubin, Viktor Kudryavyy, Denis Nozdrachev and Berndt Pfaffenbach were terminated.

As of 31 December 2013 the Company's Management Board includes:

- Evgeny V. Dod, Chairman of the Management Board,
- Sergei Abrashin,
- Rakhmetulla Alzhanov, Deputy Chairman of the Management Board,
- Konstantin Bessmertny,
- Boris Bogush,
- Sergei Voskresensky,
- Yury Gorbenko,
- Evgeny Gorev,
- Mikhail Mantrov, Deputy Chairman of the Management Board,
- Vladimir Pekhtin, Deputy Chairman of the Management Board,
- George Rizhinashvili, Deputy Chairman of the Management Board,
- Stanislav Savin,
- Sergey Tolstoguzov,
- Sergey Tsoy, Deputy Chairman of the Management Board.

According to the decision made by the Company's Board of Directors of 16 April 2013 (Minutes No 180) Vladimir Pekhtin was elected to the Company's Management Board. According to the decision made by the Company's Board of Directors of 17 September 2013 (Minutes No 187) – Sergey Tolstoguzov was elected to the Company's Management Board; the powers of Aleksey Maslov were terminated.

As of 31 December 2013 members of the Company's Internal Audit Commission included:

- Anna Drokova, deputy head of Federal Agency for State Property Management Directorate's department,
- Leonid Neganov, Deputy Department Head in the Russian Ministry of Energy,
- Maria Tikhonova, Secretary of interdepartmental commission for business efficiency analysis of companies of fuel and energy sector,
- Alan Khadziyev, Department Head in the Russian Ministry of Energy,
- Vladimir Hvorov, Department Expert in the Russian Ministry of Economic Development.

According to the decision made by the Company's annual general meeting of shareholders held on 28 June 2013 (Minutes No 11) Leonid Neganov, Maria Tikhonova and Vladimir Hvorov were elected to the Internal Audit Commission; the powers of Adelya Vyaseleva, Dmitry Gorevoy, Elena Litvina were terminated.

1.2 The Company's operating environment

The Russian economy displays certain characteristics of an emerging market. The legal, tax and customs frameworks continue to develop and are subject varying interpretation.

The on-going uncertainty and volatility of the financial markets, in particular in Europe may have a negative effect on the Russian financial and corporate sectors. Future economic and regulatory situation, internal and external business environment may differ from Company management's current expectations.

The Company's operations are to a greater or lesser degree, exposed to various types of risks (financial, legal, country and regional, reputation, etc.).

The Company's risk management policy specifies the continuous efforts to identify risks, assess them and control and also develop and implement actions for addressing the risks, business continuity management in accordance with international and national standards of risk management (COSO ERM 2004, ISO 31000, professional standard "Risk management of an organisation", etc.).

Financial risks

Financial risk includes market risk (currency risk, interest rate risk and other price risks), credit risk and liquidity risk.

Information about the Company's exposure to financial risks, their reasons and risk management tools is presented in paragraph 3.16 of the Explanatory Notes.

Legal risks

The reasons for legal risks are associated with potential changes in legal and regulatory base including currency and customs regulations, tax legislation and others.

Legal risks in domestic market related to regulation of electricity generation and its sale/purchase, which represent the Company's principal activities, can significantly impact the Company's position by decreasing its net profit.

Legal risks in external market related to currency and customs regulation are insignificant due to insignificant volume of foreign trade transactions the Company participates in, which are managed through legal support and control of these transactions and liability insurance.

To manage the legal risks the Company employed experienced lawyers, monitors legislation and makes amendments in the regulatory base.

Country and regional risks

The reasons for country and regional risks are associated with political and economic situation, the geographic features of the country or the region where the entity operates and (or) is registered as a taxpayer.

Exposure to country risk may be indirectly assessed by credit rating with some assumptions (less political risks for business). Rating of Russia is BBB at positive forecast (according to Fitch rating agency) that means good creditworthiness of the state which however, can be worsened due to negative changes in the economic environment.

The economy of the Russian Federation is not protected from softening of market and economic recession. Due to the impacts of the global financial crisis, the financial problems and strained perception of risks associated with investments in the emerging economies decrease the volume of foreign investments in Russia and have negative impact on the Russian economy.

In the crisis environment experienced by the financial market and reduction of manufacturing output there is a risk of decrease in electricity demand that may result in reduction of sales and decrease in the Company's revenue and also a risk of increase in accounts receivable due to non-payments by the consumers of electricity.

The management believes that it has been taking all necessary measures to mitigate the impact of these events on its activities: optimisation of the obtained cash use, assessment of the buyers' solvency, diversification of resources use and others.

Due to elevation of political risks in the world and Russian Federation in 2012 and enhancement of the state control over energy industry the Company takes the required steps to prevent negative influence of the above risks on its operations.

The Russian regions where the Company performs its operations are characterised by peaceful political situation. Probability of war conflicts, strikes, introduction of the state of emergency in these regions is low except for entities located in North-Caucasus Federal District.

However, changes in the Company's business environment in Russia and in the regions of the Company's presence, the nature and frequency of such changes and related risks are hard to

predict and so are their effects on the Company's operations in the future. Such risks are largely beyond the Company's control due to their global scale. If the situation is destabilised in Russia or any Russian regions, the Company will implement crisis management strategies to minimise the risk of the negative effect of the situation on the Company to the fullest extent possible.

To manage the risks the Company is implementing a complex action plan to enhance safety of the Company's facilities under which the existing plan on ensuring safety at the power plants, including those under construction is amended.

Reputation risks

Reputation risks are associated with a decrease in the number of an entity's customers as a result of negative perception of the quality of products, works, services sold, the ability to meet the deadlines for products delivery, work performance, etc.

The Company assesses its exposure to these risks as low due to the fact that the Company sells electricity and capacity in the wholesale market and has high and sustainable reputation in the market.

To manage these risks the Company analyses key indicators of reputation risks based on the forecast of changes in the share of positive references in mass media, control over compliance with production and market discipline, cooperating actively with all stakeholders to maintain high reputation.

Other risks

To manage the risks the Company focuses on other operating risks including - industry risk, production risk, risk of hydraulicity, risks associated with compliance with legislation on labour safety, risks of industrial safety, environmental risks and risks associated with the third parties' activities and others.

The reasons for these risks are associated with the industry-specific factors that are relevant to the operations, condition of property, plant and equipment. There is an exposure to these risks, degree of possibility of events is at statistically average or low levels. On a permanent basis, the Company implements actions for monitoring the risks and decreasing the probability of their occurrence and severity of the potential adverse consequences including assignment of responsibility, control, diversification and insurance.

II. Accounting policies

These statutory financial statements have been prepared on the basis of the following accounting policies:

2.1 Basis of presentation

The Company's statutory financial statements are prepared in accordance with the accounting and reporting rules currently effective in the Russian Federation provided for by the Federal Law "On Accounting" and "Regulation on Accounting and Reporting in the Russian Federation" as well as other accounting regulations approved by the Russian Ministry of Finance.

Assets and liabilities are stated at actual cost, except for property, plant and equipment and investments for which the current market value can be determined, and assets against which impairment provisions have been duly formed, as well as estimated liabilities.

2.2 Assets and liabilities denominated in foreign currency

Business transactions in foreign currencies were recorded using the official Rouble exchange rate as of the date of the relevant transaction. Cash on hand and in bank accounts (bank deposits), cash and payment documents, accounts receivable (except for advances received and issued and prepayments) including loans receivable and payable), denominated in foreign currencies are recorded in the financial statements in the amounts calculated based on the official currency exchange rates effective as of the reporting date. The exchange rates were as follows: USD 1 = RUB 32.7292 as of 31 December 2013 (31 December 2012: USD 1 = RUB 30.3727, 31 December 2011: USD 1 = 32.1961), EUR 1 = RUB 44.9699 as of 31 December 2013 (31 December 2012: EUR 1 = RUB 40.2286, 31 December 2011: EUR 1 = RUB 41.6714).

Exchange differences arising during the year from translation (including those as of the reporting date) of foreign currency-denominated assets and liabilities payable in foreign currencies or Russian roubles were reported in the statement of financial results as other income or expenses.

2.3 Accounting for assets and liabilities

In the balance sheet, investments, accounts receivable and accounts payable, including bank credits and loan liabilities, are treated as short-term if the term of their circulation (maturity) does not exceed 12 months after the reporting date. Other assets and liabilities are recognised as long-term.

Interest on loans issued and other investments are recorded in the balance sheet line 1230 "Accounts receivable"; interest on bank credits and loans received are recorded in the balance sheet line 1510 "Borrowings".

Advances to the suppliers of equipment and capital construction contractors are recognised in line 1230 "Accounts receivable".

VAT on advances issued and received is recognised on a gross basis in the balance sheet line 1260 "Other current assets", 1450 "Other liabilities" and 1550 "Other liabilities", respectively.

Deferred tax asset and deferred tax liability are recognized on the balance sheet on a net basis.

2.4 Property, plant and equipment, construction-in-progress and income-bearing investments in tangible assets

Property, plant and equipment are accounted for in accordance with the Russian Accounting Regulation "Accounting for property, plant and equipment" (RAR 6/01).

Property, plant and equipment include land, buildings, facilities, machinery, equipment, transport vehicles and other assets whose useful lives are over 12 months.

Property, plant and equipment are recognized at their historical cost equal to actual acquisition (construction, production) cost.

The acquired property, plant and equipment with historical cost of below RUB 40 thousand per unit which were initially recognised after 1 January 2011 are accounted for within inventories; property, plant and equipment which were initially recognised before 1 January 2011 were accounted for within inventories, if their historical cost did not exceed RUB 20 thousand per unit.

Real property assets which have been constructed, put into operation and are actually used but the title to which was not registered under the procedure established by the effective legislation are accounted for within property, plant and equipment in a separate line.

Property, plant and equipment are recognised on the balance sheet at cost less depreciation accumulated from the date of their independent valuation for merging subsidiaries and associates (hereinafter - SAC) into the Company in 2008 or over the whole period of their operation, if they were put into operation after merging SAC into the Company.

The Company does not perform the revaluation of property, plant and equipment items.

Useful lives of the acquired property, plant and equipment including those which had been in operation before the acquisition, received as a contribution to the share capital or under legal succession in connection with restructuring, are established by the review committee for commissioning of a facility based on the Classification of the Company's property, plant and equipment when PP&E item is initially recognised.

The adopted standard useful lives by groups of property, plant and equipment in accordance with the Classification of the Company's property, plant and equipment are presented below.

Property, plant and equipment group	Useful lives of property, plant and equipment (years) on the balance sheet
Facilities and transmission equipment	3 to 100
Machinery and equipment	1 to 40
Buildings	7 to 75
Other	1 to 20

Depreciation of property, plant and equipment is accrued on a straight-line basis proceeding from their historical values and depreciation rates calculated based on their useful lives.

Depreciation is not accrued on:

- land plots and natural resources;
- housing assets commissioned prior to 1 January 2006 (similar assets acquired after 1 January 2006 are depreciated in accordance with the generally accepted procedure);
- fully depreciated assets that are still on the balance sheet.
- assets that are temporarily shutdown for more than three months and during the restoration period which exceeds twelve months.

Gains and losses on disposal of property, plant and equipment are recorded in the statement of financial results within other income and expenses.

Construction-in-progress includes real estate assets under construction, which have not been put into operation, equipment to be installed and other investments in non-current assets which are not included in PP&E. Equipment which does not require installation, stored in the warehouse and intended for assets under construction are recorded within construction-in-progress in a separate line.

These items are recognised in the balance sheet line 1150 "Property, plant and equipment".

Interest on borrowings raised for the purposes directly related to acquisition, construction and/or manufacture of investment assets, accrued prior to initial recognition of the assets is included in their historical cost; that accrued after the initial recognition of the assets are recognised in the statement of financial results within other expenses.

Interest on borrowings raised for the purposes not related to acquisition, construction and/or manufacture of investment assets, but actually used to purchase the investment assets are included in the cost of investment assets in proportion to the share of the above borrowings in total amount of borrowings raised for the purposes not related to acquisition, construction, manufacture of investment assets.

Income-bearing investments in tangible assets represent PP&E items acquired for leasing out to generate income.

These assets are recognised at their historical cost determined under the procedure used for general PP&E items.

Leased PP&E items are recognised in off-balance-sheet accounts at cost specified in the lease agreement/determined based on the acceptance certificate. If the lease agreement and acceptance certificate do not specify the cost of these assets, property, plant and equipment are recorded in the off-balance-sheet accounts at the following values:

- land plots having the cadastral value - at their cadastral value;
- other PP&E items - in the amount of lease payments inclusive of VAT under lease agreement including the repurchase price of the leasing item.

2.5 Investments

Investments are accounted for in accordance with the Russian Accounting Regulation "Accounting for investments" (RAR 19/02).

Investments include:

- contributions to the share capital of other entities (including subsidiaries);
- debt securities (including bonds, promissory notes);
- deposits in credit institutions except for short-term deposits classified as cash equivalents (paragraph 2.9 of the Explanatory Notes);
- loans issued to other entities;
- government and municipal securities and other investments.

Investments are initially recognised at their actual cost of acquisition.

The Company's actual costs to purchase investments represent the historical cost of investments purchased at a charge.

The historical cost of investments in the Company's share capital is presented by their monetary value agreed by the Company's founders, if not specified otherwise by the Russian legislation.

Investments, the current market value of which can be determined under the established procedure, are recognised on the balance sheet at their current market value as of the end of each reporting period (on a quarterly basis). The difference between the value of these investments as of the current reporting date and their prior value is recorded within other income and expenses.

Current market value of the securities which are traded by the institutors of trading is determined at market prices established at OAO MICEX-RTS (<http://moex.com>).

Investments for which no current market value is determinable are recorded on the balance sheet at their carrying (book) value, except for investments for which there are indications that the decline in their value (impairment) is significant and non-temporary as of the reporting date.

Investments are tested for their impairment once a year as of 31 December of the reporting year, if there are indications of impairment.

The Company accrues the impairment provision for the amount of difference between carrying (book) value and estimated value of the investments with regard to investments for which

significant and constant impairment indicators are proved by impairment test. The estimated value of investments is determined based on the data about net assets, revenue, composition of expenses, schedule of projects financing and other factors.

Despite of the fact that well-grounded judgements are applied to determine the estimated value of investments, there are unavoidable limitations as in any valuation technique. Therefore, the estimated value represents the Company management's best estimate based on all the information available as of the reporting date. Future events will also have impact on determining the estimated value and impact of such events can be significant for the Company's financial statements.

Difference between the historical cost and nominal value of debt securities for which current market value is not determinable, is recorded on a straight-line basis during the period of their circulation and is recognised in the Company's financial results within other income (expenses). When investments for which current market value is not determinable are disposed, they are carried at book value of each unit of these investments except for issuance securities (shares, bonds) which are disposed under FIFO; when investments for which current market value is determinable under the established procedure are disposed - based on the latest valuation.

The Company discloses information about measurement at discounted value, the amount of the discounted value of debt securities of other related parties and loans issued to them.

Income and expenses associated with investments are reported within other income or expenses. Interest on loans issued and other income from investments are recognised in the balance sheet line 1230 "Accounts receivable".

2.6 Inventories

Inventories are accounted for in accordance with the Russian Accounting Regulation "Accounting for inventories" (RAR 5/01).

Inventories are accounted for at their actual cost of acquisition (production).

If market value of inventories as of the end of the reporting year is below their historical cost including due to on-going (long-term) price reduction, Company makes a provision in the amount of inventory impairment which is charged against increase in other expenses. Such inventories are recognised on the balance sheet net of the inventories' impairment provision.

The average cost method is applied to determine the material expenses when writing-off inventories used to produce goods (provide services).

2.7 Expenses of future periods

Expenses incurred by the Company in the reporting period but related to future reporting periods (payments under voluntary and mandatory insurance of property and employees, one-off payments to purchase licenses and other expenses) are recorded as expenses of future periods. These expenses are written-off on a straight-line basis during the periods which they relate to.

Expenses of future periods to be written-off during the period exceeding twelve months are recognised on the balance sheet as non-current assets in line 1190 "Other non-current assets"; those to be written-off during twelve months - in line 1210 "Inventories".

2.8 Accounts receivable

Trade receivables are accounted for in the amount of services provided, works performed, good dispatched at justified prices and established tariffs. Settlements with other debtors are recognised for accounting and reporting purposes based on the contractual prices.

Accounts receivable which are overdue or unlikely to be repaid by the contractual deadlines and are not secured by guarantees, pledges or otherwise, are recognised on the balance sheet net of doubtful debt provision. The provision is based on the conservative assessment made by the Company's management with regard to the portion of receivables which is unlikely to be repaid.

Doubtful debts provision is made on a quarterly basis as of the end of the respective period. The provision amount is separately determined based on the unbiased information about solvency of the specific debtor and assessment of probability of receivables repayment in full or partially.

Accrual (release) of doubtful debts provision increases other expenses (income).

Uncollectable receivables are written-off when recognized as such. These receivables are recorded in off-balance-sheet accounts over five years after the debt is written off for monitoring whether there is a possibility of their collection in case of any changes in the debtor's property status.

2.9 Cash equivalents and presentation of cash flows in the statement of cash flows

Cash equivalents comprise current highly liquid investments, which are readily convertible into a predictable amount of cash and are exposed to an insignificant risk of changes in value.

The Company recognises short-term bank deposits with a maturity of up to three months (not longer than 91 days) within cash equivalents if they are treated as funds used for settlements and repayment of liabilities, not intended for investment and other purposes.

The Company's cash flows which cannot be clearly attributed to cash flows from operating, investing or financing activities are included in the cash flows from operating activities in the statement of cash flows. Such cash flows include receipts and payments related to financial instruments of forward deals.

The following items are presented on a net basis in the statement of cash flows:

- indirect taxes within receipts from buyers and customers and payments to suppliers and contractors;
- cash flows used for investing activities and received on repayment of short-term bank deposits (with a maturity of more than three months) within the same reporting period, if they are characterised by quick return, large amounts and short-term maturity.

Cash receipts and payments do not include cash flows changing the structure of cash equivalents, but not changing their total amount.

2.10 Share capital, reserve and additional capital

The Company's share capital has been recorded in the amount of the nominal value of ordinary shares purchased by shareholders. The share capital is equal to the amount specified in the Company's Charter.

When the share capital is increased through placement of additional shares, transactions associated with the formation of the share capital are accounted for when the respective changes made in the Company's constituent documents are registered.

The Company's additional capital includes share premium resulted from placement of the Company's shares at price exceeding their nominal value and total of additional capital of subsidiaries, associates merged into the Company during the 2008 reorganisation.

In accordance with legislation the Company forms a reserve fund in the amount of 5% of the share capital. The amount of mandatory annual deductions to reserve fund is 5% of the Company's net profit until it reaches the specified level.

2.11 Loans and bank credits received

Loans and bank credits are accounted for in accordance with the Russian Accounting Regulation "Accounting for loans and bank credits" (RAR 15/2008).

Loans payable are stated inclusive of interest payable as of the end of the reporting period according to the loan agreements.

Interest is accrued on a monthly basis at the end of each reporting period. If a lender provides for interest calculation attributable to different reporting periods, the amount of interest shall be allocated and included in the amount payable separately for each month.

Additional expenses incurred in connection with borrowings are charged to expenses of future periods with subsequent straight-line inclusion in other expenses over the repayment period.

2.12 Estimated liabilities, contingent liabilities and contingent assets

Estimated liabilities

The Company recognises estimated liability, which meets the recognition criteria established in the Russian Accounting Regulation "Estimated liabilities, contingent liabilities and contingent assets" (RAR 8/2010).

The Company recognises an estimated liability for earned but unused employee vacations, which is determined as of the end of the reporting year with reference to the number of unused vacation days of each employee at the reporting date and employee's average salary, inclusive of insurance contributions.

Contingent liabilities and contingent assets

Contingent liabilities and contingent assets are not recorded on the balance sheet, but instead are disclosed in the Explanatory Notes to the balance sheet and statement of financial results.

Contingent liability (contingent asset) arises as a result of past business events when existence of a liability (asset) of the Company at the reporting date depends on occurrence/non-occurrence) of future uncertain events, which are beyond the Company's control.

Contingent liability is disclosed in the Explanatory Notes to financial statements, except where the likelihood of a decrease in economic benefits associated therewith is remote. Contingent asset is disclosed in the Explanatory Notes when the inflows associated therewith are probable. There is a need to disclose its estimated amount or a range of estimated amounts, if such values are identifiable.

2.13 Revenue recognition

Revenue from sales of products (provision of services) is recognized on an accrual basis (as the products/services are delivered/provided and relevant settlement documents presented to buyers). Revenue is presented net of value added tax and other similar mandatory charges.

Other revenues of the Company include:

- proceeds from sale of property, plant and equipment, investments and other assets;
- interest received in connection with providing the Company's cash for use, interest for the bank's use of cash sitting on the Company's bank accounts in the bank and interest on the acquired interest-bearing notes of the third parties - in accordance with interest provision in the note when presenting it for payment. The Company recognises the above income in the statement of financial results in line 2320 "Interest income";
- income from participation in share capital of other entities (dividends). is recognised by Company when announced and included in the statement of financial results in line 2310 "Income from participation in other entities";
- income from transactions with derivatives when the respective trading positions are closed;
- fines, penalties and interest for breaching contractual terms;
- prior year profit identified in the reporting year (considering the requirements of the Russian Accounting Regulation "Correction of errors in accounting and reporting" (RAR 22/2010);
- other proceeds (income) according to the Russian Accounting Regulation "Income of an organisation" (RAR 9/99) (including income in the form of insurance indemnity).

2.14 Recognition of expenses

Accounting for expenses is regulated by the Russian Accounting Regulation "Expenses of an organisation" (RAR 10/99) under which the Company's expenses are divided into general expenses and other expenses.

Administrative expenses are written-off against the cost of goods sold (services provided).

General expenses are recognised in the reporting period wherein they were incurred irrespective of the actual closure of accounts payable.

Expenses shall be accounted for irrespective of the intention to generate revenue or other income and their form.

Other expenses include:

- expenses incurred in disposal and other write-off of property, plant and equipment, investments and other assets;
- interest paid by the Company for provided cash (bank credit, loans); the Company recognises these expenses in the statement of financial results in line 2330 "Interest expense";
- expenses incurred in payment of services provided by credit institutions;
- doubtful debts provision calculated on the basis of the reporting period results in accordance with the Company's accounting policies (see paragraph 2.8 of the Explanatory Notes);
- expenses from transactions with derivatives when the respective trading positions are closed;
- fines, penalties and interest for breaching contractual terms, compensation of losses caused by the Company;
- prior year losses identified in the reporting period (considering the requirements of the Russian Accounting Regulation "Correction of errors in accounting and reporting" (RAR 22/2010));
- charity and social security;
- expenses incurred as a result of extraordinary events in business operations (natural disaster, fire, accident, etc.)
- other expenses according to RAR 10/99.

2.15 Changes in the accounting policies

There are no significant changes in the Company's accounting policies for 2013 and 2014 based on the Russian Accounting Regulation "Accounting policies of an organisation" (RAR 1/2008).

With effect from the Company's accounting reports for 2013, the Company retrospectively amended detailing of some balance sheet items, in particular the lines 1170 Investments, 1230 Accounts Receivable, 1240 Investments (except for cash equivalents), 1370 Retained Earnings (Accumulated Deficit) and 1520 Accounts Payable. Such amendment allows the best presentation of the Company's financial position as of the reporting date.

III. Disclosure of material indicators

3.1 Non-current assets (Section I of the balance sheet)

3.1.1 Property, plant and equipment (line 1151 of the balance sheet), construction-in-progress (line 1152 of the balance sheet), income-bearing investments in tangible assets (line 1160 of the balance sheet)

PP&E group	Net book value		
	31 December 2013	31 December 2012	31 December 2011
Line 1151 Property, plant and equipment, including:			
Facilities and transmission equipment	189,486	191,295	192,712
Machinery and equipment	77,085	61,930	47,618
Buildings	35,348	34,778	34,448
Motor vehicles	406	212	379

* Investment in ОАО Yakutskenergo (29.80%) is recorded within subsidiaries as the Company has control over these entities indirectly via other subsidiaries.

Key factors affected changes in the value of investments in subsidiaries, associates and other entities in 2013 are as follows:

- acquisition of additionally issued shares of subsidiaries for the total of RUB 20,326 million, including OAO Sulaksky Hydrocascade for the amount of RUB 8,960 million, ZAO Malaya Dmitrovka for the amount of RUB 3,400 million, OAO Yuzhno-Yakutsky GEK for the amount of RUB 3,245 million, OAO Geotherm for the amount of RUB 1,596 million, OAO Ust-Srednekanskaya GES for RUB 1,480 million, OAO Renewable Energy Engineering Centre for RUB 694 million, JFJ CSO SShGES for RUB 567 million and other companies for the amount of RUB 384 million;
- receipt as payment for the Company's additional issue registered on 3 December 2012 (see paragraph 3.3.1 of the Explanatory Notes) of equity stakes in the utilities companies for the total of RUB 18,596 million, including OAO Irkutsk Electric Grid Company for the amount of RUB 8,543 million, OAO Ust-Srednekanskaya GES for RUB 5,193 million, OAO RAO Energy Systems of the East for the amount of RUB 2,965 million, OAO Sakhalin Energy Company for the amount of RUB 1,824 million and OAO Irkutskenergo for the amount of RUB 71 million;
- disposal of investment in OAO Trest Hydromontazh with the value of RUB 1,441 million in connection with the sale of OAO TEK Mosenergo for RUB 1,663 million;
- valuation of investments which have a current market value and related recording of a loss for the total of RUB 3,119 million (see paragraph 3.16 of the Explanatory Notes), including the loss for the total of RUB 3,050 million related to the shares of OAO Inter RAO UES;
- assessment of investments having current market value with recognition of a loss amounting to RUB 3,119 million (see paragraph 3.16 of the Explanatory Notes) including a loss amounting to RUB 3,050 million related to OAO INTER RAO UES shares.

In June 2013, four new 100%-owned subsidiaries were established, with the share capital of RUB 0.5 million each, for implementing construction projects in the electricity sector in the Russian Far East, i.e. – ZAO Blagoveshchenskaya CCGT, ZAO Sakhalin GRES-2», ZAO CCGT in the City of Sovetskaya Gavan and ZAO Yakutsk GRES-2. Construction will be financed with special purpose budgetary funds in the amount of RUB 50,000 million received from the government as part of the Company's additional issue registered on 3 December 2012 (see paragraph 3.3.1 of the Explanatory Notes). As of 31 December 2012 the shares of these companies were transferred for trust management to OAO RAO Energy Systems of the East.

Investments in subsidiaries that have current market value

As of 31 December 2013, 31 December 2012 and 31 December 2011, investments included shares of the Company's subsidiaries, i.e. OAO RAO Energy Systems of the East, OAO Yakutskenergo and OAO Far East Energy Company, received in 2011–2013 as a result of the additional issue of the Company's shares which are cognised on the Company's balance sheet. These investments are recorded at the value agreed with the founders and determined on the basis of the market valuation performed by an independent appraiser totalling 20,204 million as of 31 December 2013 (as of 31 December 2012 and 31 December 2011: 17,239 million). This valuation exceeds the current market value of the shares as of 31 December 2013, 31 December 2012 and 31 December 2011 by RUB 12,394, RUB 9,887 million and RUB 7,048 million, respectively.

The Company's management plans to get benefits from investments in OAO RAO Energy Systems of the East, OAO Yakutskenergo and OAO Far East Energy Company by controlling their business operations rather than as a result of fluctuations in their market value. Thus, according to the Company's management, current market quotes do not fairly reflect the fair value of the controlling shareholdings in these companies as the number of shares traded in the market is not representative; not more than 1% of total shares issued are in circulation on a daily basis.

In view of these circumstances and considering that the Company has no plans to sell these investments, in accordance with paragraph 6 of the Russian Accounting Regulation "Accounting reports of an organisation" (RAR 4/99), approved by order No. 43n of the Russian Ministry of Finance of 6 July 1999, the Company decided against performing revaluation of its investments in

shares of OAO RAO Energy Systems of the East, OAO Yakutskenergo and OAO Far East Energy Company at the current market value from acquisition date.

The amount of unrecognised change in the market value as compared to the carrying amount as of 31 December 2013 is RUB 12,394 million (as of 31 December 2012: RUB 9,887 million; as of 31 December 2011: 7,048 million). The Company's net assets would have amounted to RUB 612,026 million, if it included the above unrecognised change in the value (as of 31 December 2012: RUB 582,287 million, as of 31 December 2011: RUB 528,429).

Impairment of investments in subsidiaries, associates and other entities for which current market value is not determinable

The Company's management analysed the negative trends related to a number of subsidiaries, which is presented below: The management performed the analysis of investments to the share capital of the entities listed below for possible signs of impairment, and also analysed possible impairment of other assets related to these subsidiaries, including those recorded within accounts receivable (see paragraph 3.2.2 of the Explanatory Notes).

HydroOGK Aluminium Company Ltd. The Company is engaged on parity with United Company RUSAL ("UC Rusal") in the Project of Boguchansky Aluminium Plant construction (the "Project"). The Company together with UC Rusal have a joint control over ZAO Boguchansky Aluminium Plant. The subsidiary – HydroOGK Aluminium Company Ltd – was established for the Company to participate in this Project and implement the corporate governance of the Project. Boguchansky Aluminium Plant's financing is provided for in the Company's Investment Programme approved by the Russian Ministry of Energy and is implemented partly through the Company's acquisition of HydroOGK Aluminium Company Ltd's and ZAO Boguchansky Aluminium Plant's promissory notes.

As of 31 December 2013, the Company's balance sheet carries the following Project-related assets:

- within the accounts receivable: interest-free promissory notes of ZAO Boguchansky Aluminium Plant with redemption "on demand but not earlier than 31 December 2024" for the total of RUB 4,662 million and interest-free promissory notes of HydroOGK Aluminium Company Ltd with redemption "on demand but not earlier than 31 December 2013" for the total of RUB 3,338 million (see paragraph 3.3.2 of the Explanatory Notes);
- within long-term investments: shares of HydroOGK Aluminium Company Ltd for the amount of RUB 779 million.

The analysis of recoverability of these assets performed by the Company as of 31 December 2013 was based on the following key factors:

- the Company intends to complete construction of Boguchansky Aluminium Plant injecting additional investments into the Project, if necessary;
- the Company plans to receive economic benefits in the form of return on capital invested into the Project. Consequently, the Company has no intention to demand redemption of the above interest-free promissory notes with cash as it plans their capitalisation in the share capital of the Project's participating parties, except for a portion of promissory notes of HydroOGK Aluminium Company Ltd which will be paid using cash currently carried on its balance sheet.

Based on the analysis of the factors that might indicate the impairment of assets related to the construction of Boguchansky Aluminium Plant, the Company's management concluded that there were no impairment indicators as of 31 December 2013.

OAO Zagorskaya HAEPP-2 In September 2013, Zagorskaya HAEPP-2 which is currently under construction suffered from the flooding of a section of the HAEPP building from the lower reservoir. Due to the technical complexity of identifying the losses as a result of the accident, management are not able to estimate the amount of expenses needed to rectify the accident consequences and write off the damaged items of construction in progress.

ОАО RusHydro
Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

Summarised information in relation to OAO Zagorskaya HAEPP-2 on the balance sheet of OAO RusHydro is as follows:

- within long-term investments: shares of OAO Zagorskaya HAEPP-2 for the amount of RUB 9,780 and interest-bearing loan for the amount of RUB 7,029 million;
- within other accounts receivable for additional shares issued but not yet transferred to the Company in the course of OAO Zagorskaya HAEPP-2's additional share issue: accounts receivable for the total amount of RUB 46,071 million (see paragraph 3.3.2 of the Explanatory Notes).

The analysis of recoverability of these assets performed by the Company as of 31 December 2013 was based on the following key factors:

- Construction works and the assets are insured. In accordance with the insurance contracts and under the current Russian law, the acknowledgement of the fact that the accident at Zagorskaya HAEPP-2 which is currently under construction is the insurable event and subsequent payment of compensation is only due after the thorough analysis of the accident reasons by insurance companies based on the report on investigation of the causes of the flooding.
- Management plans to perform recovery work and complete construction of Zagorskaya HAEPP-2. Capacity supply contracts were concluded in respect of Zagorskaya HAEPP-2. There are specific rules for the price setting in respect of new HPPs (including pumped-storage power plants) being constructed: the price is set in a manner that guarantees payback period of 20 years for all CAPEX invested in construction.
- Following the decision of the regulatory body NP Market Council of 16 December 2013 the commissioning date for generating assets of Zagorskaya HAEPP-2 and the start date of fulfilment of obligations under the committed capacity supply contracts for new HPPs (including pumped-storage power plants) was transferred from the beginning of 2014 to the beginning of 2017. As these dates were adjusted for OAO Zagorskaya HAEPP-2 is not subject to any penalties for under-supplied capacity under the above contracts.

As of 31 December 2013 there is no significant uncertainty in terms of the expenses to be incurred on recovery of damage caused by the flooding at Zagorskaya HAEPP-2. However, these expenses can be significant.

Based on the analysis of factors that might indicate impairment of assets related to Zagorskaya HAEPP-2 construction project, the Company's management concluded that there were no such indicators as of 31 December 2013.

No negative trends which may result in impairment of other shareholdings were observed.

Provision for impairment of investments for which current market value is not determinable amounts to RUB 58 million (as of 31 December 2012: RUB 832 million; as of 31 December 2011: RUB - 32 million). Original cost of long-term investments for which provision for impairment of investments was made amounts to RUB 96 million as of 31 December 2013 (as of 31 December 2012 - RUB 874 million, as of 31 December 2011 - 79 million).

Other	1,134	281	669	
Total long-term loans issued	33,018	18,760	16,036	

As of 31 December 2013 the balance sheet line 1170 "Investments" includes the following long-term loans issued:

- loan to OAo Far East Generating Company amounting to RUB 11,538 million to refinance liabilities maturing by 3 December 2018 and 15 September 2021;
- loans to OAo Zagorskaya GAES-2 in the total amount of RUB 7,029 million issued to finance expenses related to investment project OAo Zagorskaya GAES-2 maturing by 05 February 2018 transferred from short-term loans due to changes of the conditions of the agreement;
- loan to OAo Sakhaenergo in the total amount of RUB 3,476 million issued to refinance liabilities maturing by 03 December 2018;
- loans to OAo Hydroinvest in the total amount of RUB 2,082 million issued to finance purchase of OAo Hydroproject Institute, OAo Krasnoyarskenergosbyt maturing by 20 October 2015;
- loans to OAo Ust-Srednekanskaya GES in the total amount of RUB 1,747 million issued to finance expenses related to investment project «Ust-Srednekanskaya GES» maturing by 5 February 2018 transferred from short-term loans due to changes of the conditions of the agreement;
- loans to OAo EKS RusHydro amounting to RUB 1,700 million to purchase an ownership interest in OOO EKS Bashkortostan and OAo RusHydro Bashkortostan maturing by 31 December 2015;
- loan to OAo Far East Distribution Grid Company amounting to RUB 1,670 million to refinance liabilities maturing by 3 December 2018;
- loans to ZAO Tekhnopark Rummyantsevo in the total amount of RUB 1,508 million issued to refinance liabilities maturing by 30 December 2015 and 30 November 2022;
- loan to OAo Teploenergосervice in the total amount of RUB 929 million issued to refinance liabilities maturing by 03 December 2018.

There are no indicators of a prolonged decline in the value of the above investments.

(c) Long-term debt securities

Issuer's name	31 December 2013	31 December 2012	31 December 2011	Due for repayment	Annual rate,%
Receivables from other counterparties related to long-term promissory notes, including:					
				On demand but not earlier than 12 December 2014	
OOO Energo-Finance		-	6,899		13.00%
Total debt securities		-	6,899		

Based on the assessment of the recoverable amount of OOO Energo-Finance promissory notes which was determined based on the forecast net assets of RUSENERGO FUND Ltd. which acted as a guarantor of OOO Energo-Finance promissory notes, the Company's management concluded that as of 31 December 2012, the value of OOO Energo-Finance promissory notes may not be recovered. As a result, a provision for impairment of the above investment amounting to RUB 6,899 million was made as of 31 December 2012.

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

In 2013, net assets of RUSENERGO FUND Ltd. continued to decrease. As a result, as of 31 December 2013 there were no changes in the Company's management assessment of the carrying amount of OOO Energo-Finance promissory notes.

3.1.3 Other non-current assets (line 1190 of the balance sheet)

Line 1190 "Other non-current assets" includes expenses of future periods to be written-off from expense account during the period beyond 12 months of the reporting date.

Breakdown of total expenses of future periods by types is presented in the table below:

Narrative	31 December 2013	31 December 2012	31 December 2011
Project documentation on the construction of Cheboksarskaya GES related to uplifting water reservoir level	1,620	1,526	-
Software and licenses	1,239	823	611
Borrowing costs	647	715	353
Other	393	332	219
Total expenses of future periods, including:	3,899	3,396	1,183
Long-term expenses of future periods which are subject to writing-off from expense account during the period beyond 12 months of the reporting date (within the balance sheet line 1190)	2,987	2,772	711
Short-term expenses of future periods which are subject to writing-off from expense account during 12 months of the reporting date (within the balance sheet line 1210)	912	624	472

As a result of works performed to uplift the level of Cheboksary water reservoir it is planned to increase the production capacity of Cheboksary GES and eliminate the increased depreciation of equipment and hydraulic engineering installations. If the Company becomes aware that it won't obtain the expected additional economic benefits, the above expenses of future periods will be written-off against other expenses.

3.2 Current assets (Section II of the balance sheet)

3.2.1 Inventories (line 1210 the balance sheet)

Narrative	31 December 2013	31 December 2012	31 Decembe 2011
Raw, materials and other inventories	1,813	1,428	1,051
Short-term expenses of future periods which are subject to writing-off from expense account during 12 months of the reporting date (see paragraph 3.1.3 of the Explanatory Notes)	912	624	472
Other	136	3	1
Total line 1210 "Inventories"	2,861	2,055	1,524

Raw, materials and other inventories are measured at actual cost of acquisition. As of 31 December 2013 the provision for their impairment amounted to RUB 105 million (31 December 2012: RUB 20 million, 31 December 2011: RUB 30 million).

3.2.2 Accounts receivable (line 1230 of the balance sheet)

(a) Long-term accounts receivable (payments expected beyond 12 months of the reporting date)

Total long-term accounts receivable were RUB 80,323 million, 75,630 million and 89,269 million as of 31 December 2013, 2012 and 2011, respectively.

ОАО RusHydro**Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results**

(in millions of Russian Roubles unless otherwise stated)

Breakdown by types of long-term accounts receivable is as follows:

Type of long-term accounts receivable	31 December 2013	31 December 2012	31 December 2011
Advances issued to suppliers of equipment and capital construction contractors	35,074	37,296	26,246
Interest-free promissory notes received	27,040	26,633	27,219
Interest-free loans issued	16,817	9,235	31,423
Lease receivables	927	1,431	1,984
Buyers and customers	103	128	37
Other long-term accounts receivable	362	907	2,360
Total line 1231 "Long-term accounts receivable (payments expected beyond 12 months of the reporting date)"	80,323	75,630	89,269

3.3 Equity and reserves (Section III of the balance sheet)

3.3.1 Share capital (line 1310 of the balance sheet)

As of 31 December 2013, 2012 and 2011, the Company's share capital is registered according to the established procedure and fully paid:

Share capital composition	Number of shares at 31 December 2013	Number of shares at 31 December 2012	Number of shares at 31 December 2011
Ordinary shares with nominal value of RUB 1 per share	317,637,520,094	317,637,520,094	290,302,702,379

As of 31 December 2013, the following shareholders are registered in the register of shareholders:

Shareholder	Type of shareholder	Number of shares	Ownership share, %
Russian Federation represented by the Federal Agency for State Property Management	beneficial owner	258,161,535,606	66.84%
Non-Banking Credit Organisation ZAO National Settlement Depository	nominee holder	110,327,350,871	28.56%
ООО Depository and Corporate Technologies	nominee holder	10,191,600,852	2.64%
Other		7,574,977,561	1.96%
Total		386,255,464,890	100.00%

As of 31 December 2013, the number of shares registered in the register of shareholders exceeds the number of shares in the Company's share capital as of 31 December 2013 due to the additional issue of shares registered on 3 December 2012 by 110,000,000,000 shares, including 68,617,944,796 shares that were actually placed as of the reporting date. As of 31 December 2013 the placement of the additional shares was completed but changes in the share capital were registered in accordance with the established procedure in 2014, the Company did not increase the share capital.

Additional issue in 2012-2013

The Company's extraordinary general meeting of shareholders held on 16 November 2012 (Minutes No. 9) made the decision to increase the Company's share capital by placing 110,000,000,000 additional ordinary registered shares with the nominal value of RUB 1 each through public offering with payment in cash and non-monetary assets. Non-monetary assets include ordinary registered shares of the following joint stock companies: ОАО RAO Energy Systems of the East, ОАО Ust-Srednekanskaya GES, ОАО SEC, ОАО Irkutskenergo, ОАО Irkutsk Electric Grid Company.

The Company's Board of directors approved the decision on additional issue of the Company's securities on 22 November 2012 (Minutes No.166). The Company's Board of directors approved the placing price of the Company's additional shares – RUB 1 each – on 10 December 2012 (Minutes No.169).

On 3 December 2012, the Federal Service of Financial Markets (hereinafter FSFM of Russia) registered the additional issue of the Company's 110,000,000,000 ordinary registered shares No. 1-01-55038-E-041D.

26 November 2013 is the actual completion date of the placement. FSFM of Russia registered the Report based on the results of additional issue of shares on 26 December 2013. Changes in the Company's founding documents are registered on 28 January 2013.

68,617,944,796 shares were actually placed as a result of this issue, which represents 62.38% of the issue's total number of securities

As part of this issue Company had been received as payment:

- blocks of shares of energy sector companies (paragraph 3.1.2 of the Explanatory Notes);
- cash in the total amount of RUB 50,022, including cash from Russian Federation represented by the Federal Agency for State Property Management in the amount of RUB 50,000 for funding construction of electricity assets in the Russian Far East (see paragraphs 3.1.2 and 3.2.3 of the Explanatory Notes).

Additional issue in 2011-2012

The Company's annual general meeting of shareholders held on 30 June 2011 (Minutes No. 7) made the decision to increase the Company's share capital by placing 89,000,000,000 additional ordinary registered shares with the nominal value of RUB 1 each through public offering with payment in cash and non-monetary assets.

The Company's Board of directors approved the decision on additional issue of the Company's securities on 29 July 2011 (Minutes No.129). The Company's Board of directors approved the placing price of the Company's additional shares – RUB 1.65 each – on 2 August 2011 (Minutes No.130).

On 16 August 2011, the Federal Service of Financial Markets registered the additional issue of the Company's 89,000,000,000 ordinary registered shares No. 1-01-55038-E-040D. FSFM of Russia permitted the circulation of 50% of the placed additional shares outside Russia.

20 June 2012 is the actual completion date of the placement. FSFM of Russia registered the Report based on the results of additional issue of shares on 6 September 2012. Changes in the Company's founding documents are registered on 1 October 2012.

27,334,817,715 shares were actually placed as a result of this issue, which represents 30.71% of the issue's total number of securities.

As of 31 December 2013, 651 million shares of the total number of ordinary shares are owned by the Company's Management Board members (31 December 2012: 593 million shares, 31 December 2011: 516 million shares). Subsidiaries and associates own 8,704 million shares of the Company (31 December 2012: 8,704 million shares, 31 December 2011: 8,704 million shares).

3.3.2 Revaluation of non-current assets (line 1340 of the balance sheet)

As of 31 December 2013, the amount of accumulated revaluation of non-current assets is RUB 53,325 million (31 December 2012: RUB 53,578 million, 31 December 2011: RUB 53,982 million). This metric consists of the amounts of revaluation accumulated by subsidiaries and associates which the Company acquired as part of the 2008 restructuring process.

The amount of accumulated revaluation was decreased by RUB 253 million in 2013 due to disposal of items of property, plant and equipment revalued earlier (31 December 2012: RUB 404 million).

ОАО RusHydro
Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

3.3.3 Additional paid-in capital (line 1350 of the balance sheet)

As of 31 December 2013, 2012 and 2011, the Company's additional paid capital was RUB 58,424 million, RUB 58,424 million and 40,657 million, respectively, and consisted of share premium of the Company and subsidiaries and associates which the Company acquired as part of the 2008 restructuring process.

3.3.4 Reserve capital (line 1360 of the balance sheet)

As of 31 December 2013, 2012 and 2011, the Company's reserve capital was RUB 6,474 million, RUB 5,739 million and RUB 4,208 million, respectively.

In accordance with the decision of the Company's annual general meeting of shareholders of 28 June 2013. (Minutes No. 11), the Company allocated 5% of its net profit for 2012 in the amount of RUB 735 million to the reserve capital.

3.4 Non-current liabilities (Section IV of the balance sheet)

3.4.1 Long-term borrowings (line 1410 of the balance sheet)

Balance sheet line 1410 "Borrowings" includes long-term loans payable:

Lender / creditor	31 December 2013	31 December 2012	31 December 2011
ОАО Sberbank of Russia	30,613	-	23,520
RusHydro Finance Ltd	20,000	20,000	20,000
Russian bonds issued in February 2013	20,000	-	-
Russian bonds issued in April 2011	15,000	15,000	15,000
European Bank for Reconstruction and Development	9,155	10,984	3,813
UniCredit Bank Austria AG	2,862	2,336	-
Bayerische Landesbank (BayernLB)	335	46	-
EM Falcon Ltd	-	1,500	2,423
CF Structured Products B.V.	-	-	1,932
Total line 1410 "Borrowings"	97,965	49,866	66,688

In February 2013, the Company placed non-convertible interest-bearing ten-year bonded loans of Series 07 and 08 for the total of RUB 20,000 million. The buy-back option period (period of redemption on demand from holders of securities) established by the Company is five years.

In December 2013, the Company received RUB 10,613 million under the agreement on non-revolving credit facility with ОАО Sberbank of Russia to refinance the existing liability of the subsidiaries of RAO Energy Systems of the East Group that is controlled by the Company.

The Company also restructured the existing liabilities to ОАО Sberbank of Russia under the agreement on credit line facility amounting to RUB 40,000 million concluded in 2011 for a period of two years. Out of the total amount received RUB 20,000 million were repaid in 2013; the period for repaying the remaining part of debt was extended by seven years, up to 2020.

The key provisions of the contracts were as follows:

Lender / creditor	Agreement effective year	Redemption year	Amount in million units (in the currency of the loan)	Currency	Loan interest rate
Bayerische Landesbank	2012	2024 / 2025*	16	Euro	Euribor + 0.85%
RusHydro Finance Ltd	2010	2015	20,000	Russian Roubles	7.875%
UniCredit Bank Austria AG	2011	2026	128	Euro	3.35%**
EBRD (Tranche 1)	2006	2020	2,300	Russian Roubles	MosPrime + 3.65%
EBRD (Tranche 2)		2014	850		MosPrime + 2.75%
EBRD (Tranche 3)		2016	3,150		MosPrime + 3.05%

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Lender / creditor	Agreement effective year	Redemption year	Amount in million units (in the currency of the loan)	Currency	Loan interest rate
EBRD	2011	2021	8,000	Russian Roubles	MosPrime + 2.75%
Russian bonds issued in April 2011	2011	2016***	15,000	Russian Roubles	8.00%
Russian bonds issued in February 2013	2013	2018***	20,000	Russian Roubles	8.50%
OAO Sberbank of Russia	2011	2020	20,000	Russian Roubles	8.30% / 9.30%****
OAO Sberbank of Russia	2013	2018	10,613	Russian Roubles	7.99% / 8.99%****

* The final redemption date depends on the redemption commencement date.

** Fixed interest rate is applied to 90% of the loan amount, variable quarterly interest rate published by OeKB (Oesterreichische Kontrollbank AG) less 0.25% is applied to the remaining 10% of the loan amount.

*** Bonds maturity is 10 years, and the bond holders have the right to call for an early redemption in 2016.

**** Variable quarterly interest rate determined due to agreement's conditions.

As of 31 December 2013, the total amount of long-term loans to be repaid within 12 months of the reporting date and reclassified to short-term category was RUB 3,329 million (31 December 2012: RUB 43,512 million.) (see paragraph 3.5.1 of the Explanatory Notes).

In addition to the credit facilities from Bayerische Landesbank (BayernLB) и UniCredit Bank Austria AG which were undrawn as of 31 December 2013, the Company can raise RUB 4,400 million after 31 December 2013 under a loan agreement with the European Bank for Reconstruction and Development (EBRD) for 12 years to refinance current liabilities of OAO FEDGC, a member of RAO Energy Systems of the East Group and support upgrading the Company's distribution networks.

Ageing analysis:

Due for repayment	31 December 2013	31 December 2012	31 December 2011
From 1 to 2 years	21,676	3,329	27,204
From 2 to 3 years	16,693	21,663	2,329
From 3 to 4 years	1,529	16,663	20,659
From 4 to 5 years	32,142	1,447	15,659
Over five years	25,926	6,764	837
Total line 1410 "Borrowings"	97,965	49,866	66,688

Interest on borrowings included into the cost of investment assets

In 2013, the amount of interest on borrowings included into the cost of investment assets was RUB 2,830 million (2012: RUB 2,868 million), of which RUB 2,481 million was the interest accrued on borrowings where the agreement does not specify that the funds are provided for special investment purpose (2012: RUB 2,360 million).

3.4.2 Other non-current liabilities (line 1450 of the balance sheet)

Line 1450 "Other liabilities" includes long-term VAT on advances issued in the amount of RUB 1,559 million as of 31 December 2013 (31 December 2012: RUB 1,265 million, 31 December 2011: RUB 271 million) and trade payables in the amount of RUB 469 million as of 31 December 2013 (31 December 2012: RUB 685 million, 31 December 2011: RUB 483 million).

European Bank for Reconstruction and Development (EBRD)	ОАО RAO Energy Systems of the East	4,070	-	-
ОАО Sberbank of Russia	ОАО Камчатскэнерго	3,978	-	-
ОАО Bank of Moscow	ОАО Сахалинэнерго	700	701	-
ОАО Sberbank of Russia	ОАО Сахалинэнерго	651	-	-
Solios Environnement S. A., ALSTOM Grid SAS (AREVA T&D S. A.), ЗАО Commerzbank (Eurasija)	ЗАО Богучанский Aluminium Smelter	82	929	1,423
Other	Other	1,398	1,164	1,246
Total collateral for liabilities and payments issued		73,670	54,590	38,858

In 2013, the Company issued guarantees for liabilities of ОАО Far East Generating Company and ОАО RAO Energy Systems of the East under the loan agreements with ОАО VTB Bank and European Bank for Reconstruction and Development (EBRD) respectively, including the principal amount of the loan and accrued interest. Liabilities due date is 26 December 2015.

Guarantees issued by the Company for liabilities of ОАО Богучанская GES under its loan agreement with ОАО Vnesheconombank include:

- total liabilities of ОАО Богучанская GES under the loan agreement, including accumulated interest in the amount of RUB 25,605 million as of 31 December 2013 (31 December 2012: RUB 19,946 million);
- pledge of ОАО Богучанская GES's interest-free promissory notes for the total of RUB 21,027 million (see Note 3.2.2 of the Explanatory Notes) and pledge of shares for the total of RUB 14 thousand.

RUSAL Group undertakes to reimburse the Company for 50 per cent of liabilities settled under this guarantee by the Company for ОАО Богучанская GES.

During 2011 the Company pledged interest-free promissory notes of ЗАО Богучанский Aluminium Smelter for the total of RUB 4,615 million (see paragraph 3.2.2 of the Explanatory Notes) and shares for the total of RUB 14 thousand as a guarantee of settlement by ЗАО Богучанский Aluminium Smelter of its liabilities under the loan agreement with SC Vnesheconombank.

ОАО RusHydro
Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

3.7 Income and expenses on operating activities (statement of financial results)

3.7.1 Revenue (line 2110 of the statement of financial results)

Revenue from sales of electricity and capacity has the largest percentage in the Company's revenue structure (99.5%).

Item	2013	2012
Sale of electricity	78,975	65,553
Sale of capacity	29,251	28,155
Sale of heat	141	141
Other	427	358
Total line 2110 "Revenue"	108,794	94,207

The Company sells a major part of its produced electricity and capacity (99.9%) on the wholesale electricity and capacity market, where sales are made at non-regulated prices (except for sales at regulated tariffs in the RF Far East non-pricing zone and volumes produced for selling to households or equivalent consumer categories).

3.7.2 Cost of sales (line 2120 of the statement of financial results)

Item	2013	2012
Purchased electricity and capacity	16,696	16,489
Depreciation and amortisation	11,853	10,810
Wages and social insurance contributions	8,357	8,058
Property tax	6,004	5,246
Repairs and maintenance	3,308	3,515
Fees for administering the wholesale market of electricity and capacity (ОАО SO UES, ОАО АRS, ЗАО СFR)	2,672	2,425
Third party services	1,863	1,646
Fire and other security services	1,434	1,311
Insurance expenses	1,328	1,505
Lease of power equipment	1,097	1,298
Lease expenses	1,038	797
Water usage expenses, water tax	967	817
Other expenses	2,256	2,070
Total line 2120 "Cost of sales"	58,873	55,987

Operating expenses broken down by cost elements are as follows:

Item	2013	2012
Material expenses	21,166	20,644
Payroll expenses	6,915	6,737
Social contributions	1,442	1,321
Depreciation and amortisation	11,853	10,810
Other costs	17,497	16,475
Total for elements of costs	58,873	55,987
Change in balances of work in progress, finished goods, etc. (increase [-] / decrease [+])	-	-
Total expenses incurred on operating activities	58,873	55,987

3.10 Taxes

Value Added Tax

Total VAT calculated with due account of recovered tax amounts was RUB 32,149 million in the reporting year (2012: RUB 26,763 million), including:

- VAT calculated on sales of goods (work, services) is RUB 19,639 million (2012: RUB 16,998 million);
- VAT calculated on the amounts of received payment or partial payment for goods (work, services) to be delivered in the future is RUB 10,797 million (2012: RUB 8,694 million);
- recoverable amount of tax is RUB 1,713 million (2012: RUB 1,071 million).

Total VAT recoverable in the reporting period was RUB 23,529 million (2012: RUB 21,455 million), including:

- VAT recoverable invoiced to the taxpayer on acquisition of goods (work, services), property rights in Russia was RUB 10,182 million (2012: RUB 10,168 million);
- VAT calculated on the amounts of received payment or partial payment for goods (work, services) to be deducted from their delivery date was RUB 10,797 million (2012: RUB 8,693 million);
- VAT calculated on the amounts of payment or partial payment for goods (work, services) to be delivered in the future was RUB 2,390 million (2012: RUB 2,578 million);
- VAT recovered in 2013 which was paid earlier when the goods were imported to the Russian customs territory was RUB 151 million (2012: RUB 0 million);
- other recoverable VAT was RUB 9 million (2012: RUB 16 million).

The Company decreases the calculated VAT by the amount invoiced on purchase of goods (work, services) in Russia, according to tax legislation.

Corporate income tax

Deferred tax assets and deferred tax liabilities were:

Item	31 December 2013	31 December 2012	31 December 2011
Deferred income tax assets	(2,260)	(2,318)	(2,285)
Deferred tax liabilities	9,444	7,570	5,125
Total line 1420 "Deferred tax liabilities"	7,184	5,252	2,840

Income tax calculated on the basis of the accounting profit (theoretical income tax charge) for the reporting year was RUB 9,342 million (2012: RUB 4,525 million).

When calculating theoretical income tax charge, income from participation in other entities in the amount of RUB 408 for 2013 (2012: RUB 269 million) was deducted from income included in the accounting profit of the reporting period, as for accounting purposes such income is recorded less withholding tax.

In the reporting year, the amount of non-temporary differences which affected the theoretical income tax charge adjustment for the purposes of income tax calculated for tax accounting purposes (current income tax) was RUB 10,910 million (2012: RUB 20,361 million).

The above non-temporary differences arise from differences in recognising the following income and expenses for accounting and income tax purposes:

- income in the amount of RUB 3,609 million in 2013 (2012: RUB 1,233 million) which is not recognised for tax accounting purposes and resulted in the tax asset, including:
 - Income from reversal of doubtful debt provision in the amount of RUB 1,480 million (2012: RUB 678 million);
 - other income in the amount of RUB 2,129 million (2012: RUB 555 million);
- expenses in the amount of RUB 14,519 million in 2013 (2012: RUB 21,325 million) which are not recognised for tax accounting purposes and resulted in the tax liability, including:
 - depreciation of RUB 3,926 million (2012: RUB 4,047 million);
 - charges to doubtful debt provision in the amount of RUB 2,260 million (2012: RUB 2,969 million);
 - decrease in investments measured at current market value in the amount of RUB 3,119 million (2012: RUB 2,369 million);
 - expenses related to sale, disposal or other transactions with assets in the amount of RUB 826 million (2012: RUB 1,143 million);
 - charges to the provision for impairment of investments in the amount of RUB 5 million (2012: RUB 7,873 million);
 - charity donations in the amount of RUB 1,121 million (2012: RUB 1,352 million);
 - financial support and other social payments to employees in the amount of RUB 292 million (2012: RUB 237 million);
 - other expenses in the amount of RUB 2,770 million (2012: RUB 1,604 million).

The total amount of deductible temporary differences, which affected the adjustment of the theoretical income tax charge for the purpose of the current income tax calculated for tax accounting purposes, was RUB 49 million (2012: RUB 166 million), including those originated – RUB 1,258 million (2012: RUB 621 million) and settled – RUB 1,209 million (2012: RUB 455 million).

Total amount of taxable temporary differences that affected the theoretical income tax expense adjustment for the purpose of the income tax calculation for tax accounting purposes, was RUB 10,092 million (2012: RUB 11,845 million), including those originated – RUB 16,552 million (2012: RUB 13,885 million) and settled – RUB 6,460 million (2012: RUB 2,040 million).

In 2013, movement in deductible and taxable temporary differences was mainly due to:

- different useful lives of property, plant and equipment for accounting and income tax purposes;
- recognition of depreciation premium on items of property, plant and equipment for income tax purposes;
- application of multiplying factor for accrual of depreciation charges on property, plant and equipment used in operations in a hostile environment with a high turnover for tax accounting purposes in prior periods;
- capitalisation of interest on borrowings in the cost of investment assets for accounting purposes;
- including the costs of insurance in the value of investment assets in the accounting records of the Company.

The Company applied tax rate of 20% in the calculation of income tax based on accounting profit received by the Company's branches (excluding profits received by branches Kamskysya GES and Votkinskaya GES that apply 15.5% rate).

According to the tax accounting data, the taxable profit for 2013 was RUB 49,764 million (2012: RUB 31,247 million).

Other taxes and levies

In 2013, operating expenses include other taxes and levies in the amount of RUB 7,478 million (2012: RUB 6,597 million), including:

- property tax in the amount of RUB 6,004 million (2012: RUB 5,246 million), including accrual provision for estimated liabilities for property tax;
- insurance contributions to the Pension Fund of the Russian Federation, Social Insurance Fund of the Russian Federation and obligatory medical insurance funds in the amount of RUB 1,442 million (2012: RUB 1,321 million), including contributions related to estimated liabilities on future payment of employee vacations earned but not used;
- other taxes and levies in the amount of RUB 32 million (2012: RUB 30 million).

Relations with tax authorities

In 2013, tax authorities performed a field tax audit covering 2009-2011 which resulted in additionally assessed taxes of RUB 394 million. As of 31 December 2013, these tax claims are contested through pre-trial procedures in the Federal Tax Service of Russia.

The Russian tax system is characterised by a large number of taxes and frequent changes in regulations. Russian tax legislation is subject to varying interpretations and changes, which can occur frequently. The laws often include unclear and contradictory wording and allow varying interpretation of the same issue. As a consequence, tax authorities often have different views on interpretation of the same regulatory documents at different levels. Therefore, it is probable that transactions and activities that have not been challenged in the past and the tax accounting treatment of some of the Company's income and expenses may be challenged. As a result, significant additional taxes, penalties and late payment interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

In December 2012, the Company entered into an agreement with the Federal Tax Service on extended communication, i.e. horizontal monitoring. Under the agreement, the tax authority will monitor the Company's business transactions on-line which will allow the Company to agree its position on tax issues in advance and decrease the uncertainty in interpretation and application of the tax law.

As of 31 December 2013, the Company's management believe that their interpretation of the relevant legislation was appropriate, tax liabilities are recorded in full and the Company's tax and currency positions will be sustained.

3.11 Dividends

The Company's annual general meeting of shareholders held on 28 June 2013 (Minutes No. 11) made the decision to pay dividends on the Company's ordinary shares for 2012 in the amount of RUB 0.00955606 per 1 share for the total of RUB 3,676 million.

The Company's annual general meeting of shareholders held on 29 June 2012 (Minutes No. 8) made the decision to pay dividends on the Company's ordinary shares for 2011 in the amount of RUB 0.00789317 per 1 share for the total of RUB 2,500 million.

3.12 Earnings per share

Basic earnings per share reflect a portion of reporting period's profit that may be potentially distributed between the shareholders – owners of ordinary shares. It is calculated by dividing basic profit of the reporting year by the weighted average number of ordinary shares outstanding during the year. Basic profit is equal to net profit of the reporting year (Line 2400 of the statement of financial results).

Item	2013	2011
Basic profit for the reporting year (RUB million)	35,321	14,702
Weighted average number of ordinary shares, outstanding during the reporting year (shares)	381,935,404,392	317,183,526,761
Basic earnings per share (RUB)	0.09248	0.04635

Weighted average number of ordinary shares, outstanding during the reporting year was calculated as follows:

Item	2013
Number of ordinary shares outstanding as of 1 January 2013 (shares)	367,637,520,094
Number of shares of additional issue registered on 3 December 2013 which were placed in 2013 and paid by shareholders (see paragraph 3.3.1 of the Explanatory Notes) (shares)	18,617,944,796
Number of ordinary shares outstanding as of 1 December 2013 (shares)	386,255,464,890
Number of ordinary shares outstanding as of 31 December 2013 (shares)	386,255,464,890
Weighted average number of ordinary shares, outstanding in 2013 (shares) (367,637,520,094 shares * 2 months + 384,632,705,292 shares * 9 months + 386,255,464,890 * 1 month) / 12 months	381,935,404,392
Item	2012
Number of ordinary shares outstanding as of 1 January 2012 (shares)	316,729,533,428
Number of shares of additional issue registered on 16 August 2011 which were placed in 2012 and paid by shareholders (see paragraph 3.3.1 of the Explanatory Notes) (shares)	907,986,666
Number of ordinary shares outstanding as of 1 December 2012 (shares)	317,637,520,094
Number of ordinary shares outstanding as of 31 December 2012 (shares)	367,637,520,094
Weighted average number of ordinary shares, outstanding in 2012 (shares) (316,729,533,428 shares * 6 months + 317,637,520,094 shares * 6 months) / 12 months	317,183,526,761

In 2013 and 2012, the Company had no debt securities potentially convertible to shares.

ОАО RusHydro
Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

3.13 Related Parties

The Company's related parties are its subsidiaries and associates and other entities where the Company has indirect control or significant influence through its subsidiaries and associates.

The list of the Company's related parties is given on the web-site – www.rushydro.ru/investors/disclosure/affiliated

3.13.1 Controlling entity

As of 31 December 2013 the Company is controlled by the Russian Government (represented by the Federal Agency for Federal Property Management) which owns, 66.84% of the Company's ordinary shares (see paragraph 3.3.1 of the Explanatory Notes).

3.13.2 Sales to related parties

Total revenue from sales to related parties was:

Name of the buyer	2013	2012
Revenue from sales to subsidiaries, including:		
ОАО Far East Energy Company	5,436	5,162
ОАО Чувашская Энергия Продажи	1,386	522
ОАО Красноярскэнергобыт	931	782
ОАО Рязанская Энергия Продажи	650	284
ООО ЕСК Башкортостана	412	290
Other subsidiaries	262	274
Revenue from sales to related parties, including:		
ОАО Красноярская ГЭС	1,077	925
Total sales to related parties	10,154	8,239

Sales to related parties include, among others, sales of electricity and capacity in the regulated sector of WEM at tariffs determined by the Federal Tariff Service and in the competitive sector at commercial prices established in accordance with the Wholesale Market Rules and Regulation of the Russian Government No. 109 of 26 February 2004, On Pricing of Electric and Heating Energy in the Russian Federation, and Regulation on the Company's sales policy for operating generation assets in the price zones of the wholesale electricity (capacity) market (minutes of the meeting of the Management Board No. 528 of 17 September 2010).

3.13.3 Purchases from related parties

The cost of services provided by related parties was:

Supplier	2013	2012
Repair and technical maintenance services, including:		
Subsidiaries		
ОАО Hydroremont-BKK	2,087	1,004
ОАО Турбoremont-BKK	414	967
ОАО SShGER	191	426
ОАО Electroremont-BKK	125	414
ОАО REMIC	21	173
Other	157	37
Total repair and maintenance services	2,995	3,021
Electricity purchases	4	4
Other services of third parties	1,618	1,093
Total purchases from related parties	4,617	4,118

3.13.4 Settlements with non-state pension fund

Non-state Pension Fund of Electrical Energy Industry is the non-state pension fund for implementation of the non-governmental pension security program for the Company's employees.

The total amount of contributions to the pension fund was RUB 443 million and RUB 619 million for 2013 and 2012, respectively.

3.13.5 Settlements with related parties

As of 31 December 2013, 2012 and 2011, accounts receivable from related parties to the Company less doubtful debt provision were (see paragraph 3.2.2 of the Explanatory Notes):

Type of accounts receivable	31 December 2013	31 December 2012	31 December 2011
Short-term interest-free promissory notes received	22,453	72,350	74,998
Short-term interest-free loans issued	5,500	42,272	14,495
Long-term interest-free promissory notes received	25,689	25,689	25,642
Accounts receivable from subsidiaries as part of additional issues before title for the shares issued is transferred to the Company	98,530	10,714	-
Long-term interest-free loans issued	16,548	9,030	31,422
Accounts receivable related to other sales	1,090	774	835
Other settlements with related parties	7,054	6,290	2,191
Total accounts receivable from related parties	176,864	167,119	149,583

Terms and conditions of settlements with related parties provide for the Company to make advance payments on transactions with individual related parties. As of 31 December 2013 balances include advances issued for the amount of RUB 6,257 million (31 December 2012: RUB 4,420 million, 31 December 2011: RUB 1,647 million).

Doubtful debt provision for related parties' accounts receivables as of 31 December 2013 was RUB 364 million (31 December 2012: RUB 379 million; 31 December 2011: RUB 520 million).

As of 31 December 2013, 2012 and 2011, the Company's accounts payable to other related parties were:

	31 December 2013	31 December 2012	31 December 2011
Subsidiaries	1,404	1,095	1,367
Associates	24	-	1
Total accounts payable to related parties	1,428	1,095	1,368

The whole amount accounts payable to related parties is payable in cash.

3.13.6 Related parties' debt within investments

As of 31 December 2013, 2012 and 2011, The Company's investments include the following amounts due from related parties (see paragraphs 3.1.2 and 3.2.3 of the Explanatory Notes):

Type of financial investments	31 December 2013	31 December 2012	31 December 2011
Loans issued to related parties	38,586	31,050	16,036
Other investments	40	1,500	1,500
Total related parties' debt within investments	38,626	32,550	17,536
Total debt within long-term investments (Line 1170 of the Balance sheet)	33,018	18,760	16,036
Total debt within short-term investments (Line 1240 of the Balance sheet)	5,608	13,790	1,500

Interest income on loans issued to related parties and promissory notes received from related parties:

Entity	2013	2012
Subsidiaries, including:	2,518	2,096
OAO Far East Generating Company	840	249
OAO Zagorskaya GAES-2	513	405

ОАО RusHydro**Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results**

(in millions of Russian Roubles unless otherwise stated)

Entity	2013	2012
ОАО ESK RusHydro	263	269
ОАО Hydroinvest	166	311
ЗАО Malaya Dmitrovka	116	258
Other	620	604
Total interest income	2,518	2,096

3.13.7 Income from investments in other companies (related parties)

Income from investments in other companies includes income from investments in subsidiaries in the amount of RUB 381 million for 2013 (2012: RUB 269 million).

3.13.8 Remuneration to key management personnel

The Company's key management personnel includes members of the Board of directors and Management Board and also includes heads of the Company's business divisions.

The remuneration to the members of the Board of directors is calculated according to the *Regulations on the payment of remuneration to OAO RusHydro's directors* approved by the Annual General Meeting of Shareholders held on 30 June 2010 (Minutes No. 5).

Remuneration is paid to members of the Management Board and other management personnel of the Company for their services in management positions and is made up of a contractual salary and performance bonuses depending on the results for the period calculated based on key performance indicators approved by the Company's Board of directors.

The list of members of the Company's Board of directors and Management Board is included in paragraph 1.1 of the Explanatory Notes).

In 2013 and 2012, the Company paid remuneration to key management personnel within the limits set out in their employment agreements for the total amount of RUB 1,110 million and RUB 1,509 million, respectively (excluding insurance contributions).

3.13.9 Cash flows between the Company and subsidiaries/associates

Item	Line code	2013	2012
Cash flows from operating activities			
Receipts, including:	4110	7,556	6,424
sales of products, goods, work and services	4111	7,439	6,331
lease payments, licence payments, royalties, commission and other payments	4112	107	62
other receipts	4119	10	31
Payments, including:	4120	(4,542)	(4,375)
suppliers (contractors) – raw materials, work and services	4121	(4,445)	(4,285)
other payments	4129	(97)	(90)

dividends, interest on debt investments and similar proceeds from equity participation in other organisations	4214	4,041	1,312
Payments, including:	4220	(82,134)	(48,842)
acquisition, creation, modernisation, reconstruction and preparation for use of non-current assets	4221	(6,807)	(9,979)
purchase of shares (interest) in other entities	4222	(54,928)	(2,897)
acquisition of debt securities (rights of claiming cash from third parties), issue of loans to third parties	4223	(20,399)	(35,966)
Net cash flows from investing activities	4200	(32,308)	(29,036)

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Item	Line code	2013	2012
Cash flows from financing activities			
Payments, including:	4320	(77)	(61)
dividend payments or other distribution of profit to owners (participants)	4322	(77)	(61)
redemption (buy-back) of promissory notes and other debt securities, loan repayment	4323	-	-
Net cash flows from financing activities	4300	(77)	(61)
Net cash flows for the reporting period	4400	(29,371)	(27,048)

3.14 Segment Information

The Company does not identify any reporting segments in its operations, as the Company's core business activity is production of electricity and capacity – their share in the revenue from sales is 99.5%. The Company does not identify trading of purchased electricity and capacity in the wholesale energy and capacity market (WEM) as a separate type of activity. The Company is also involved in other activities that are not material and do not form separate reporting segments.

3.15 Contingent liabilities

As of 31 December 2013, the Company had outstanding issued guarantees to the third parties' creditors and pledged assets for the total amount of RUB 73,670 million (31 December 2012: RUB 54,590 million, 31 December 2011: RUB 38,858 million) (see paragraph 3.6.3 of the Explanatory Notes). According to the Company's management expectations, no material liabilities will arise in connection with these guarantees.

A significant number of legal claims may be filed following the accident at Sayano-Shushenskaya GES in August 2009. The subject of such claims may include:

- compensation of damage caused to life and health, compensation of moral damage;
- compensation of losses from termination of contracts;
- other legal proceedings.

Moreover, the prosecutor's office and other oversight bodies examined operations of the Company, and this also may result in additional claims filed against the Company and its employees.

The Russian transfer pricing legislation was amended effective from 1 January 2012. The new rules are more detailed and better aligned with the international principles developed by the Organisation for Economic Cooperation and Development (OECD). The new legislation allows tax authorities to assess additional taxes for controlled transactions (transactions between related parties and some transactions between unrelated parties) if such transactions are not on an arm's length basis. The Company's management believe that the prices applied by the Company are at the market level and the Company has implemented internal control procedures to ensure compliance with transfer pricing law.

Since currently there is no practice for application of the new rules, the outcome of any disputes with tax authorities over applied prices cannot be estimated reliably but may have a material effect on the Company's financial results and operations.

3.16 Financial risk management

The primary objectives of the financial risk management function are to provide reasonable assurance of achieving the Company's goals by developing a methodology of risk identification, analysis and assessment, as well as to establish risk limits, and then ensure that exposure to risks stays within these limits and if the limits are exceeded – to treat this risk accordingly.

Market risks

The Company is subject to market risks that arise from open positions in foreign currencies, interest bearing assets and liabilities, all of which are exposed to general and specific market movements. The Company establishes acceptable risk limits and monitors them on a daily basis.

OAo RusHydro
Explanatory Notes to the 2013 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

However, this approach may not prevent losses incurred due to overlimits caused by significant market fluctuations.

Currency risk. The Company sells its produced electricity and capacity in the Russian domestic market at prices denominated in national currency, therefore, the Company's operations are subject to insignificant currency risk. The Company's financial position, its liquidity, sources of financing and performance largely are not impacted by currency exchange rates as the Company's operations are planned and carried out in such a way that all its assets and liabilities are denominated in the national currency.

Information on the Company's exposure to currency risk is presented in line with its use for the preparation of RusHydro Group's IFRS financial statements as defined in IFRS 7:

	Monetary financial assets	Monetary financial liabilities	Net balance sheet position
31 December 2013			
US Dollars	779	-	799
Euro	54	(3,280)	(3,226)
Total	833	(3,280)	(2,477)
31 December 2012			
US Dollars	266	(1,894)	(1,628)
Euro	26	(2,400)	(2,374)
Total	292	(4,294)	(4,002)
31 December 2011			
US Dollars	105	(2,008)	(1,903)
Total	105	(2,008)	(1,903)

The above analysis includes only monetary assets and liabilities. Investments in shares and non-monetary assets are not considered to give rise to significant currency risk.

Changes in exchange rates have no significant influence on the Company's financial position.

Interest rate risk. The Company's operating profits and cash flows from operating activity are substantially independent of the changes in market interest rates.

The effect of changes in the average market interest rates on the value of the Company's investments is insignificant as the rates of return on the Company's investments are fixed.

The fixed and floating interest rate loans received by the Company (see paragraph 3.4.1 of the Explanatory Notes) expose it to interest rate risks.

The Company also receives loans with floating interest rates based on MOSPRIME, Euribor, OeKB rates. The influence of changes in these rates on the Company's profit is insignificant.

The Company's monitors interest rate risk for its financial instruments. Effective interest rates as of the end of the period are presented in paragraph 3.4.1 of the Explanatory Notes.

To mitigate the interest rate risk, the Company takes the following measures:

- monitors the credit market to identify favourable terms of financing;
- diversifies credit portfolio by raising fixed and floating rate loans.

Price risk. The price risk determines the possible changes / fluctuations in the fair value or future cash flows due to changes in market prices (excluding changes leading to interest rate or currency risk).

The table below includes the Company's investments exposed to the price risk.

Category of investments	31 December 2013	31 December 2012	31 December 2011
Equity investments for which current market value can be determined, including:	2,079	5,128	7,484
OAo Inter RAO UES	2,027	5,077	7,428
OAo Irkutskenergo	33	11	10
OAo Krasnoyarskaya GES	19	40	46

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Category of investments	31 December 2013	31 December 2012	31 December 2011
Equity investments to subsidiaries measured at current market value but not revalued as of the reporting date	20,204	17,239	17,239
Equity investments for which current market value cannot be determined	87,758	52,533	53,324
Total equity investments (see paragraph 3.1.2 of the Explanatory Notes)	110,041	74,900	78,047

Current market value of quoted securities is determined by market prices established on the stock exchange OAO MICEX-RTS (www.rts.micex.ru), according to the 'Procedure for determining market value of securities, estimated price of securities and the threshold for the fluctuations of securities' market price for the purpose of Chapter 23 of the Russian Tax Code' approved by Order of the Federal Service for Financial Markets No. 10-65/pz-n of 9 November 2010.

Credit risk

Credit risk is the possibility of the Company's losses resulting from the counterparty's inability to meet its obligations under the contract. Exposure to credit risk arises as a result of the Company's sales of products on credit terms and other transactions with counterparties giving rise to financial assets.

Although collectability of receivables can be influenced by economic factors, management believe that there is no significant risk of loss to the Company beyond the provision for impairment of receivables already recorded.

Due to the absence of an independent assessment of customers' creditworthiness, the Company performs such an assessment at the contracting stage taking into account the customer's financial position and credit history. The Company regularly monitors existing receivables and undertakes actions to collect them and minimize losses.

Cash has been placed in financial institutions, which are considered at the time of deposit to have minimal risk of default. The Company approves deposit banks as well as rules for making cash deposits. The Company performs regular review of financial institutions, monitors their ratings assigned by independent agencies as well as other performance indicators of these financial institutions.

Summary information on cash deposits and their equivalents including names of banks and other financial institutions and their ratings as of the end of the reporting period is provided in paragraph 3.2.4 of the Explanatory Notes.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities.

Efficient liquidity risk management implies maintaining sufficient cash and marketable securities, and ensuring the availability of additional funding through an adequate amount of committed credit facilities. The Group follows the balanced model of working capital financing when both long-term and short-term sources of finance are used. The Company places available cash to short-term financial instruments, mainly, bank deposits and short-term bank promissory notes. Short-term liabilities are represented mainly by trade accounts payable.

The Company has implemented controls over the contracting process by using standard financial procedures that include standard payment structure, standard payment time, standard correlation between the advance and final settlement amounts, etc. This way the Company controls the maturity structure of capital.

The ageing analysis for long term borrowings is presented in paragraph 3.4.1 of the Explanatory Notes.

3.17 Subsequent events

There are no significant events which have affected or could affect the Company's financial position, cash flows or its performance in the period between the reporting date and the date of signing the financial statements for 2013.

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Auditor's Report

To the Shareholders of Open Joint-Stock Company Hydro-Generating Company – RusHydro:

We have audited the attached financial statements of Open Joint-Stock Company Hydro-Generating Company – RusHydro (hereinafter – OJSC RusHydro) which comprise the balance sheet as of 31 December 2014, and statement of financial results, statement of changes in equity and statement of cash flows for the year ended 31 December 2014 and notes to the balance sheet and statement of financial results (hereinafter all the reports together are referred to as the “financial statements”).

OJSC RusHydro's responsibility for the financial statements

OJSC RusHydro's management is responsible for the preparation and fair presentation of these financial statements in accordance with the reporting rules established in the Russian Federation and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The auditor's responsibility

Our responsibility is to express an opinion as to whether the financial statements are fairly presented based on our audit. We conducted our audit in accordance with Russian Federal Auditing Standards and International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management of OJSC RusHydro, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient to provide a basis for our audit opinion on the financial statements.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of OJSC RusHydro as of 31 December 2014 and the results of its operations and its cash flows for the year then ended in accordance with the reporting rules established in the Russian Federation.

Auditor's Report

Emphasis of matter

Without modifying our opinion on the fairness of the financial statements we draw attention to Note 3.1.2 Long-term investments (balance sheet line 1170) to the financial statements which describes the reasons for non-revaluation of quoted financial investments in shares of OAO RAO Energy Systems of East, OAO Yakutskenergo and OAO Far East Energy Company at their current market values.

As of 31 December 2014 the amount of unrecognised decrease in the market value as compared to the carrying value of these investments is RUB 13,535 million, as of 31 December 2012 – RUB 12,394 million.

I. General information

1.1 Information about the Company

Principal activities of open joint stock company Federal Hydro Generating Company - RusHydro (ОАО RusHydro, hereinafter - the Company) are the generation and sale of electricity (power). The Russian Government is the Company's major shareholder.

The Company's registered address is: 43 Dubrovinskogo str., bld. 1, Krasnoyarsk, Krasnoyarsk Territory, Russian Federation, 660017. The Company's postal address: 7, Malaya Dmitrovka str., Moscow, Russian Federation, 127006.

As of 31 December 2014 the Company employed 5,838 people (as of 31 December 2013 – 6,305 people).

The Company's shares are traded on OAO MICEX-RTS stock exchange (<http://moex.com>). Level 1 American depositary receipts, each of which corresponds to 100 ordinary shares of the Company are traded on the Main Market of London Stock Exchange and over-the-counter market of the USA.

As of 31 December 2014 the ownership share of the Russian Federation in the Company's share capital amounted to 66.84%.

As of 31 December 2014 the Company has 19 branches registered in the Russian Federation, including: branch Bureyskaya GES, branch Volzhskaya GES, branch Votkinskaya GES, Dagestan branch, branch Zhigulevskaya GES, branch Zagorskaya GAES, branch Zeiskaya GES, Kabardino-Balkarsky branch, branch Kamskaya GES, Karachaevo-Cherkessky branch, branch Cascade of Verkhne-Volzhsky GES, branch Cascade of Kuban GES, branch Corporate Energy University, branch Nizhegorodskaya GES, branch Novosibirskaya GES, branch Saratovskaya GES, branch Sayano-Shushenskaya GES named after P.S. Neporozhny, Severo-Osetinsky branch, branch Cheboksarskaya GES.

Membership of the Company's Board of directors as of 31 December 2014 is as follows:

- Mikhail Poluboyarinov, Chairman of the Board of Directors, First Deputy Chairman, Management Board Member, Vnesheconombank;
- Viktor Danilov-Danilyan, Deputy chairman of the Board of Directors, Director, Water Engineering Institute, Russian Academy of Sciences, Chairman of the Audit Committee and the Nominations and Reimbursement Committee;
- Boris Ayuev, Chairman of the Management Board, OJSC System Operator of UES;
- Maxim Bystrov, Chairman of the Management Board, OJSC TSA, Chairman of the Investments Committee;
- Eduard Volkov, General Director, Power Engineering Institute;
- Evgeny Dod, Chairman of the Management Board, General director, OJSC RusHydro;
- Viktor Zimin, Chairman of the Government, Republic of Khakassia;
- Larisa Kalanda, State Secretary-Vice President, OJSC NK Rosneft, acting General Director, OJSC ROSNEFTEGAZ;
- Vyacheslav Kravchenko, Deputy Minister of Energy of the Russian Federation;
- Denis Morozov, Director from the Russian Federation in the Board of Directors of European Bank for Reconstruction and Development (EBRD);
- Vyacheslav Pivovarov, Chief Executive Officer, LLC Altera Capital;
- Sergey Shishin, Senior Vice-President, OJSC VTB Bank;
- Andrey Shishkin, Vice President, OJSC Rosneft.

According to the decision made by the Company's general meeting of shareholders held on 27 June 2014 (Minutes No 12) Eduard Volkov, Larisa Kalanda, Vyacheslav Kravchenko and Andrey Shishkin were elected to the Board of Directors; the powers of Christian Andreas Berndt, Andrey Bugrov, Sergey Ivanov and Vladimir Stolyarenko were terminated.

As of 31 December 2014 the Company's Management Board includes:

- Evgeny V. Dod, Chairman of the Management Board, General director,

- Boris Bogush, First Deputy General Director, Chief engineer,
- Mikhail Mantrov, First Deputy General Director,
- George Rizhinashvili, First Deputy General Director,
- Vladimir Tokarev, First Deputy General Director.

According to the decision made by the Company's Board of directors held on 28 October 2014 (Minutes No 205) Vladimir Tokarev was elected to the Company's Management Board; the powers of Management Board's members Rakhmetulla Alzhanov, Vladimir Pekhtin, Sergey Tsoy, Sergey Abrashin, Konstantin Bessmertny, Sergey Voskresensky, Yury Gorbenko, Evgeny Gorev, Stanislav Savin and Sergey Tolstoguzov were terminated.

As of 31 December 2014 members of the Company's Internal Audit Commission included:

- Alexander Bogashov, Department Advisor at the Ministry of Energy of Russia,
- Denis Kant Mandal, Acting Head of department at the Federal Property Management Agency,
- Igor Repin, Deputy Executive Director, Investor protection association,
- Vladimir Hvorov, Department Leading Expert in the Russian Ministry of Economic Development,
- Andrey Yudin, Deputy Head of department at the Ministry of Energy of Russia.

According to the decision made by the Company's annual general meeting of shareholders held on 27 June 2014 (Minutes No 12) Alexander Bogashov, Denis Kant Mandal, Igor Repin and Andrey Yudin were elected to the Internal Audit Commission; the powers of Anna Drokov, Leonid Neganov, Maria Tikhonova and Alan Khadziyev were terminated.

1.2 The Company's operating environment

The Russian economy displays certain characteristics of an emerging market. It is particularly sensitive to oil and gas price fluctuations. The legal, tax and customs frameworks continue to develop and are subject varying interpretation.

Worldwide politic and economic events including situation in Ukraine and oil prices reduction may have a negative influence on the Russian economy, specifically in terms of further depreciation of the rouble, increase of interest rates, loss of liquidity and difficulties with international financing. These events including actual and future international sanctions concerning certain Russian companies and individuals and related uncertainty and volatility of the financial markets may have a negative effect on the Russian financial and corporate sectors in particular on the Company's activity and financial position consequences of which are hard to predict. Future economic and regulatory situation, internal and external business environment may differ from Company management's current expectations.

The Company's operations are to a greater or lesser degree, exposed to various types of risks (financial, legal, country and regional, reputation, etc.).

The Company's risk management policy specifies the continuous efforts to identify risks, assess them and control and also develop and implement actions for addressing the risks, business continuity management in accordance with international and national standards of risk management (COSO ERM 2004, ISO 31000, professional standard "Risk management of an organisation", etc.).

Financial risks

Financial risk includes market risk (currency risk, interest rate risk and other price risks), credit risk and liquidity risk.

Information about the Company's exposure to financial risks, their reasons and risk management tools is presented in paragraph 3.16 of the Explanatory Notes.

Legal risks

The reasons for legal risks are associated with potential changes in legal and regulatory base including currency and customs regulations, tax legislation and others.

Legal risks in domestic market related to regulation of electricity generation and its sale/purchase, which represent the Company's principal activities, can significantly impact the Company's position by decreasing its net profit.

Legal risks in external market related to currency and customs regulation are insignificant due to insignificant volume of foreign trade transactions the Company participates in, which are managed through legal support and control of these transactions and liability insurance.

To manage the legal risks the Company employed experienced lawyers, monitors legislation and makes amendments in the regulatory base.

Country and regional risks

The reasons for country and regional risks are associated with political and economic situation, the geographic features of the country or the region where the entity operates and (or) is registered as a taxpayer.

Exposure to country risk may be indirectly assessed by credit rating with some assumptions (less political risks for business). Rating of Russia was reduced from BBB at positive forecast to BBB- at negative forecast (according to Fitch rating agency), to BB+ to negative forecast (according to Standard & Poor's rating agency), from Baa3 to Ba1 (according to Moody's rating agency) following the results of 2014 year due to the external factors such as oil prices reduction and depreciation of the rouble. This is clearly a negative factor but is related to anti-Russian sanctions. The country risk level may differ depending on the continuity or termination of this policy.

February 2015 Moody's rating agency decreased the Company's rating from Ba1 to Ba2 at negative forecast.

Investor's' comprehension of the country risks reduces the net volume of foreign investment in Russia and has a negative influence on the Russian economy. As well as Russia produces and exports large amounts of gas and oil, the Russian economy is especially vulnerable to the changes of international prices of energy resources; the reduction of gas and oil prices significantly affects the Russian economy development. These events may restrict the access of the Company to the capital and have an adverse impact on consumer purchasing power.

In the crisis environment experienced by the financial market and reduction of manufacturing output there is a risk of decrease in electricity demand that may result in reduction of sales and decrease in the Company's revenue and also a risk of increase in accounts receivable due to non-payments by the consumers of electricity.

The management believes that it has been taking all necessary measures to mitigate the impact of these events on its activities: optimisation of the obtained cash use, assessment of the buyers' solvency, diversification of resources use and others.

Due to enhancement of the state control over energy industry the Company pays considerable attention to transparency and confidence of control procedures relating to budget funds expenditure within the Company's investment programme and also develops and improves the corporate internal control system and risk management. The company takes the required steps to prevent negative influence of the above risks on its operations.

The Russian regions where the Company performs its operations are characterised by peaceful political situation. Probability of war conflicts, strikes, introduction of the state of emergency in these regions is low except for entities located in North-Caucasus Federal District.

However, changes in the Company's business environment in Russia and in the regions of the Company's presence, the nature and frequency of such changes and related risks are hard to predict and so are their effects on the Company's operations in the future. Such risks are largely beyond the Company's control due to their global scale. If the situation is destabilised in Russia or in any Russian regions, the Company will implement crisis management strategies to minimise the risk of the negative effect of the situation on the Company to the fullest extent possible.

To manage the risks the Company is implementing a complex action plan to enhance safety of the Company's facilities under which the existing plan on ensuring safety at the power plants, including those under construction is amended.

Reputation risks

Reputation risks are associated with a decrease in the number of an entity's customers as a result of negative perception of the quality of products, works, services sold, the ability to meet the deadlines for products delivery, work performance, etc.

The Company assesses its exposure to these risks as low due to the fact that the Company sells electricity and capacity in the wholesale market and has high and sustainable reputation in the market.

To manage these risks the Company analyses key indicators of reputation risks based on the forecast of changes in the share of positive references in mass media, control over compliance with production and market discipline, cooperating actively with all stakeholders to maintain high reputation.

Besides the Company takes measures to prevent corruption. The code of conduct, regulations on the procedure of the employer's notification about inducement of personnel to unlawful acts, gifts, conflict of interests arrangement procedures etc. are adopted by the Company. The "Trust line" acts on an on-going basis.

The Company works closely with Ministry of energy, Federal tax service, Federal financial monitoring service within the anti-corruption and control of fraud activities.

Other risks

To manage the risks the Company focuses on other operating risks including industry risk, production risk, risk of hydraulicity, risks associated with compliance with legislation on labour safety, risks of industrial safety, environmental risks and risks associated with the third parties' activities and others.

The reasons for these risks are associated with the industry-specific factors that are relevant to the operations, condition of property, plant and equipment. There is an exposure to these risks, degree of possibility of events is at statistically average or low levels. On a permanent basis, the Company implements actions for monitoring the risks and decreasing the probability of their occurrence and severity of the potential adverse consequences including assignment of responsibility, control, diversification and insurance.

II. Accounting policies

These statutory financial statements have been prepared on the basis of the following accounting policies:

2.1 Basis of presentation

The Company's statutory financial statements are prepared in accordance with the accounting and reporting rules currently effective in the Russian Federation provided for by the Federal Law "On Accounting" and "Regulation on Accounting and Reporting in the Russian Federation" as well as other accounting regulations approved by the Russian Ministry of Finance.

Assets and liabilities are stated at actual cost, except for property, plant and equipment and investments for which the current market value can be determined, and assets against which impairment provisions have been duly formed, as well as estimated liabilities.

2.2 Assets and liabilities denominated in foreign currency

Business transactions in foreign currencies were recorded using the official Rouble exchange rate as of the date of the relevant transaction. Cash on hand and in bank accounts (bank deposits), cash and payment documents, accounts receivable (except for advances received and issued and prepayments) including loans receivable and payable, denominated in foreign currencies are recorded in the financial statements in the amounts calculated based on the official currency exchange rates effective as of the reporting date. The exchange rates were as follows: USD 1 = RUB 56.2584 as of 31 December 2014 (31 December 2013: USD 1 = RUB 32.7292, 31 December 2012: USD 1 = 30.3727), EUR 1 = RUB 68.3427 as of 31 December 2014 (31 December 2013: EUR 1 = RUB 44.9699, 31 December 2012: EUR 1 = RUB 40.2286).

Exchange differences arising during the year from translation (including those as of the reporting date) of foreign currency-denominated assets and liabilities payable in foreign currencies or Russian roubles were reported in the statement of financial results as other income or expenses.

2.3 Accounting for assets and liabilities

In the balance sheet, investments, accounts receivable and accounts payable, including bank credits and estimated liabilities, are treated as short-term if the term of their circulation (maturity) does not exceed 12 months after the reporting date. Other assets and liabilities are recognised as long-term.

Interest on loans issued and other investments are recorded in the balance sheet line 1230 "Accounts receivable"; interest on bank credits and loans received are recorded in the balance sheet line 1510 "Borrowings".

Advances to the suppliers of equipment and capital construction contractors are recognised in line 1230 "Accounts receivable".

Advances issued and received are recorded in the balance sheet including VAT.

VAT on advances issued and received is recognised on a gross basis in the balance sheet line 1260 "Other current assets", 1450 "Other liabilities" and 1550 "Other liabilities", respectively.

Deferred tax asset and deferred tax liability are recognized on the balance sheet on a net basis.

2.4 Property, plant and equipment, construction-in-progress and income-bearing investments in tangible assets

Property, plant and equipment are accounted for in accordance with the Russian Accounting Regulation "Accounting for property, plant and equipment" (RAR 6/01).

Property, plant and equipment include land, buildings, facilities, machinery, equipment, transport vehicles and other assets whose useful lives are over 12 months.

Property, plant and equipment are recognized at their historical cost equal to actual acquisition (construction, production) cost.

The acquired property, plant and equipment with historical cost of below RUB 40 thousand per unit which were initially recognised after 1 January 2011 are accounted for within inventories; property, plant and equipment which were initially recognised before 1 January 2011 were accounted for within inventories, if their historical cost did not exceed RUB 20 thousand per unit.

Real property assets which have been constructed, put into operation and are actually used but the title to which was not registered under the procedure established by the effective legislation are accounted for within property, plant and equipment in a separate line.

Property, plant and equipment are recognised on the balance sheet at cost less depreciation accumulated from the date of their independent valuation for merging subsidiaries and associates (hereinafter - SAC) into the Company in 2008 or over the whole period of their operation, if they were put into operation after merging SAC into the Company.

The Company does not perform the revaluation of property, plant and equipment items.

Useful lives of the acquired property, plant and equipment including those which had been in operation before the acquisition, received as a contribution to the share capital or under legal succession in connection with restructuring, are established by the review committee for commissioning of a facility based on the Classification of the Company's property, plant and equipment when PP&E item is initially recognised. Useful lives of assets which were in use in prior periods are determined with consideration to the number of years (months) they were used by the previous owner.

The adopted standard useful lives by groups of property, plant and equipment in accordance with the Classification of the Company's property, plant and equipment are presented below.

Property, plant and equipment group	Useful lives of property, plant and equipment (years) on the balance sheet
Facilities and transmission equipment	3 to 100
Machinery and equipment	1 to 40
Buildings	7 to 75
Other	1 to 20

Depreciation of property, plant and equipment is accrued on a straight-line basis proceeding from their historical values and depreciation rates calculated based on their useful lives.

Depreciation is not accrued on:

- land plots and natural resources;
- housing assets commissioned prior to 1 January 2006 (similar assets acquired after 1 January 2006 are depreciated in accordance with the generally accepted procedure);
- fully depreciated assets that are still on the balance sheet.
- assets that are temporarily shutdown for more than three months and during the restoration period which exceeds twelve months.

Gains and losses on disposal of property, plant and equipment are recorded in the statement of financial results within other income and expenses.

Construction-in-progress includes real estate assets under construction, which have not been put into operation, equipment to be installed and other investments in non-current assets which are not included in PP&E. Equipment which does not require installation, stored in the warehouse and intended for assets under construction are recorded within construction-in-progress in a separate line.

These items are recognised in the balance sheet line 1150 "Property, plant and equipment".

Interest on borrowings raised for the purposes directly related to acquisition, construction and/or manufacture of investment assets, accrued prior to initial recognition of the assets is included in their historical cost; that accrued after the initial recognition of the assets are recognised in the statement of financial results within other expenses.

Interest on borrowings raised for the purposes not related to acquisition, construction and/or manufacture of investment assets, but actually used to purchase the investment assets are included in the cost of investment assets in proportion to the share of the above borrowings in total amount of borrowings raised for the purposes not related to acquisition, construction, manufacture of investment assets.

Income-bearing investments in tangible assets represent PP&E items acquired for leasing out to generate income.

These assets are recognised at their historical cost determined under the procedure used for general PP&E items.

Leased PP&E items are recognised in off-balance-sheet accounts at cost specified in the lease agreement/determined based on the acceptance certificate. If the lease agreement and acceptance certificate do not specify the cost of these assets, property, plant and equipment are recorded in the off-balance-sheet accounts at the following values:

- land plots having the cadastral value - at their cadastral value;
- other PP&E items - in the amount of lease payments inclusive of VAT under lease agreement including the repurchase price of the leasing item.

2.5 Investments

Investments are accounted for in accordance with the Russian Accounting Regulation "Accounting for investments" (RAR 19/02).

Investments include:

- contributions to the share capital of other entities (including subsidiaries);
- debt securities (including bonds, promissory notes);
- deposits in credit institutions except for short-term deposits classified as cash equivalents (paragraph 2.9 of the Explanatory Notes);
- loans issued to other entities;
- government and municipal securities and other investments.

Investments are initially recognised at their actual cost of acquisition.

The Company's actual costs to purchase investments represent the historical cost of investments purchased at a charge.

The historical cost of investments in the Company's share capital is presented by their monetary value agreed by the Company's founders, if not specified otherwise by the Russian legislation.

Investments, the current market value of which can be determined under the established procedure, are recognised on the balance sheet at their current market value as of the end of each reporting period (on a quarterly basis). The difference between the value of these investments as of the current reporting date and their prior value is recorded within other income and expenses.

Current market value of the securities which are traded by the institutors of trading is determined at market prices established at OAO MICEX-RTS (<http://moex.com>).

Investments for which no current market value is determinable are recorded on the balance sheet at their carrying (book) value, except for investments for which there are indications that the decline in their value (impairment) is significant and non-temporary as of the reporting date.

Investments are tested for their impairment once a year as of 31 December of the reporting year, if there are indications of impairment.

The Company accrues the impairment provision for the amount of difference between carrying (book) value and estimated value of the investments with regard to investments for which significant and constant impairment indicators are proved by impairment test. The estimated value of investments is determined based on the data about net assets, revenue, composition of expenses, schedule of projects financing and other factors.

Despite of the fact that well-grounded judgements are applied to determine the estimated value of investments, there are unavoidable limitations as in any valuation technique. Therefore, the estimated value represents the Company management's best estimate based on all the information available as of the reporting date. Future events will also have impact on determining the estimated value and impact of such events can be significant for the Company's financial statements.

Difference between the historical cost and nominal value of debt securities for which current market value is not determinable, is recorded on a straight-line basis during the period of their circulation and is recognised in the Company's financial results within other income (expenses). When investments for which current market value is not determinable are disposed, they are carried at book value of each unit of these investments except for issuance securities (shares, bonds) which are disposed under FIFO; when investments for which current market value is determinable under the established procedure are disposed - based on the latest valuation.

The Company discloses information about measurement at discounted value, the amount of the discounted value of debt securities of other related parties and loans issued to them.

Income and expenses associated with investments are reported within other income or expenses. Interest on loans issued and other income from investments are recognised in the balance sheet line 1230 "Accounts receivable".

2.6 Inventories

Inventories are accounted for in accordance with the Russian Accounting Regulation "Accounting for inventories" (RAR 5/01).

Inventories are accounted for at their actual cost of acquisition (production).

If market value of inventories as of the end of the reporting year is below their historical cost including due to on-going (long-term) price reduction, Company makes a provision in the amount of inventory impairment which is charged against increase in other expenses. Such inventories are recognised on the balance sheet net of the inventories' impairment provision.

The average cost method is applied to determine the material expenses when writing-off inventories used to produce goods (provide services).

2.7 Expenses of future periods

Expenses incurred by the Company in the reporting period but related to future reporting periods (payments under voluntary and mandatory insurance of property and employees, one-off payments to purchase licenses and other expenses) are recorded as expenses of future periods. These expenses are written-off for the purpose intended on a straight-line basis during the periods which they relate to.

Expenses of future periods to be written-off during the period exceeding twelve months are recognised on the balance sheet as non-current assets in line 1190 "Other non-current assets"; those to be written-off during twelve months - in line 1210 "Inventories".

2.8 Accounts receivable

Trade receivables are accounted for in the amount of services provided, works performed, good dispatched at justified prices and established tariffs. Settlements with other debtors are recognised for accounting and reporting purposes based on the contractual prices.

Accounts receivable which are overdue or unlikely to be repaid by the contractual deadlines and are not secured by guarantees, pledges or otherwise, are recognised on the balance sheet net of

doubtful debt provision. The provision is based on the conservative assessment made by the Company's management with regard to the portion of receivables which is unlikely to be repaid.

Doubtful debts provision is made on a quarterly basis as of the end of the respective period. The provision amount is separately determined based on the unbiased information about solvency of the specific debtor and assessment of probability of receivables repayment in full or partially.

Accrual (release) of doubtful debts provision increases other expenses (income).

Uncollectable receivables are written-off when recognized as such. These receivables are recorded in off-balance-sheet accounts over five years after the debt is written off for monitoring whether there is a possibility of their collection in case of any changes in the debtor's property status.

2.9 Cash equivalents and presentation of cash flows in the statement of cash flows

Cash equivalents comprise current highly liquid investments, which are readily convertible into a predictable amount of cash and are exposed to an insignificant risk of changes in value.

The Company recognises short-term bank deposits with a maturity of up to three months (not longer than 91 days) within cash equivalents if they are treated as funds used for settlements and repayment of liabilities, not intended for investment and other purposes.

The Company's cash flows which cannot be clearly attributed to cash flows from operating, investing or financing activities are included in the cash flows from operating activities in the statement of cash flows. Such cash flows include receipts and payments related to financial instruments of forward deals.

The following items are presented on a net basis in the statement of cash flows:

- indirect taxes within receipts from buyers and customers and payments to suppliers and contractors;
- cash flows used for investing activities and received on repayment of short-term bank deposits (with a maturity of more than three months) within the same reporting period, if they are characterised by quick return, large amounts and short-term maturity.

Cash receipts and payments do not include cash flows changing the structure of cash equivalents, but not changing their total amount.

2.10 Share capital, additional and reserve capital

The Company's share capital has been recorded in the amount of the nominal value of ordinary shares purchased by shareholders. The share capital is equal to the amount specified in the Company's Charter.

When the share capital is increased through placement of additional shares, transactions associated with the formation of the share capital are accounted for when the respective changes made in the Company's constituent documents are registered.

The Company's additional capital includes share premium resulted from placement of the Company's shares at price exceeding their nominal value and total of additional capital of subsidiaries, associates merged into the Company during the 2008 reorganisation.

In accordance with legislation the Company forms a reserve fund in the amount of 5% of the share capital. The amount of mandatory annual deductions to reserve fund is 5% of the Company's net profit until it reaches the specified level.

2.11 Loans and bank credits received

Loans and bank credits are accounted for in accordance with the Russian Accounting Regulation "Accounting for loans and bank credits" (RAR 15/2008).

Loans payable are stated inclusive of interest payable as of the end of the reporting period according to the loan agreements.

Interest is accrued on a monthly basis at the end of each reporting period. If a lender provides for interest calculation attributable to different reporting periods, the amount of interest shall be allocated and included in the amount payable separately for each month.

Additional expenses incurred in connection with borrowings are charged to expenses of future periods with subsequent straight-line inclusion in other expenses over the repayment period.

2.12 Estimated liabilities, contingent liabilities and contingent assets

Estimated liabilities

The Company recognises estimated liability, which meets the recognition criteria established in the Russian Accounting Regulation "Estimated liabilities, contingent liabilities and contingent assets" (RAR 8/2010).

The Company recognises an estimated liability for earned but unused employee vacations, which is determined as of the end of the reporting year with reference to the number of unused vacation days of each employee at the reporting date and employee's average salary, inclusive of insurance contributions.

Contingent liabilities and contingent assets

Contingent liabilities and contingent assets are not recorded on the balance sheet, but instead are disclosed in the Explanatory Notes to the balance sheet and statement of financial results.

Contingent liability (contingent asset) arises as a result of past business events when existence of a liability (asset) of the Company at the reporting date depends on occurrence (non-occurrence) of future uncertain events, which are beyond the Company's control.

Contingent liability is disclosed in the Explanatory Notes to financial statements, except where the likelihood of a decrease in economic benefits associated therewith is remote. Contingent asset is disclosed in the Explanatory Notes when the inflows associated therewith are probable. There is a need to disclose its estimated amount or a range of estimated amounts, if such values are identifiable.

2.13 Revenue recognition

Revenue from sales of products (provision of services) is recognized on an accrual basis (as the products/services are delivered/provided and relevant settlement documents presented to buyers). Revenue is presented net of value added tax and other similar mandatory charges.

Other revenues of the Company include:

- proceeds from sale of property, plant and equipment, investments and other assets;
- interest received in connection with providing the Company's cash for use, interest for the bank's use of cash sitting on the Company's bank accounts in the bank and interest on the acquired interest-bearing notes of the third parties - in accordance with interest provision in the note when presenting it for payment. The Company recognises the above income in the statement of financial results in line 2320 "Interest income";
- income from participation in share capital of other entities (dividends). is recognised by Company when announced and included in the statement of financial results in line 2310 "Income from participation in other entities";
- income from transactions with derivatives when the respective trading positions are closed;
- fines, penalties and interest for breaching contractual terms;
- prior year profit identified in the reporting year (considering the requirements of the Russian Accounting Regulation "Correction of errors in accounting and reporting" (RAR 22/2010);
- other proceeds (income) according to the Russian Accounting Regulation "Income of an organisation" (RAR 9/99) (including income in the form of insurance indemnity).

2.14 Recognition of expenses

Accounting for expenses is regulated by the Russian Accounting Regulation "Expenses of an organisation" (RAR 10/99) under which the Company's expenses are divided into general expenses and other expenses.

Administrative expenses are written-off against the cost of goods sold (services provided).

General expenses are recognised in the reporting period wherein they were incurred irrespective of the actual closure of accounts payable.

Expenses shall be accounted for irrespective of the intention to generate revenue or other income and their form.

Other expenses include:

- expenses incurred in disposal and other write-off of property, plant and equipment, investments and other assets;
- interest paid by the Company for provided cash (bank credit, loans); the Company recognises these expenses in the statement of financial results in line 2330 "Interest expense";
- expenses incurred in payment of services provided by credit institutions;
- doubtful debts provision calculated on the basis of the reporting period results in accordance with the Company's accounting policies (see paragraph 2.8 of the Explanatory Notes);
- expenses from transactions with derivatives when the respective trading positions are closed;
- fines, penalties and interest for breaching contractual terms, compensation of losses caused by the Company;
- prior year losses identified in the reporting period (considering the requirements of the Russian Accounting Regulation "Correction of errors in accounting and reporting" (RAR 22/2010));
- charity and social security;
- expenses incurred as a result of extraordinary events in business operations (natural disaster, fire, accident, etc.)
- other expenses according to RAR 10/99.

2.15 Changes in the accounting policies

There are no significant changes in the Company's accounting policies for 2014 and 2015 based on the Russian Accounting Regulation "Accounting policies of an organisation" (RAR 1/2008).

The procedure of net assets' cost determination was changed from the financial statements for 2014 year in relation to enactment of Minfin of RF order dd 28 August 2014 No 84n "Concerning approval of the procedure of net assets' cost determination".

The difference in the net asset calculation compared to the Calculation of Net Assets of Joint Stock Companies, approved by Order of the Russian Ministry of Finance and Federal Commission for the Securities Market No.10n, 03-6/pz, of 29.01.2003, is that new procedure specifies exception of the income of future periods related to the receipt of government grants or donated assets from the calculation of liabilities. Other types of the income of future periods are not applicable for exception from the calculation of liabilities.

The use of this new procedure doesn't result in adjustment of the line 3600 "Net assets" of the Statement of changes in equity as of 31 December 2013 and 2012.

III. Disclosure of material indicators

3.1 Non-current assets (Section I of the balance sheet)

3.1.1 Property, plant and equipment (line 1151 of the balance sheet), construction-in-progress (line 1152 of the balance sheet), income-bearing investments in tangible assets (line 1160 of the balance sheet)

PP&E group	Net book value		
	31 December 2014	31 December 2013	31 December 2012
Line 1151 Property, plant and equipment, including:			
Facilities and transmission equipment	188,410	189,486	191,295
Machinery and equipment	98,216	77,084	61,930

* Investment in ОАО Yakutskenergo (29.80%) is recorded within subsidiaries as the Company has control over these entities indirectly via other subsidiaries.

Key factors affected changes in the value of investments in subsidiaries, associates and other entities in 2014 are as follows:

- acquisition of additionally issued shares of subsidiaries for the total of RUB 104,455 million, including ОАО Zagorskaya GAES-2 for the amount of RUB 46,144 million, ОАО Zaramagskie GES for the amount of RUB 15,312 million, ОАО Hydroinvest for the amount of RUB 9,550 million, ОАО ESK RusHydro for the amount of RUB 8,968 million,

ОАО Уст-Среднеканская ГЭС for RUB 8,389 million, ОАО Нижне-Бурейская ГЭС for RUB 8,265 million, АО Ленинградская ГАЭС for RUB 4,208 million, ЗАО Гидро-Инженеринг Сибиря for the amount of RUB 1,992 million, ЗАО Малая Дмитровка for the amount of RUB 939 million and other companies for the amount of RUB 688 million;

- acquisition of additionally issued shares of subsidiaries whose shares were transferred for trust management to ОАО РАО ЕС of the east for the total of RUB 16,312 million, including ЗАО Благовещенская ТЕС for the amount of RUB 6,301 million, ЗАО Якутск ГРЭС-2 for the amount of RUB 5,637 million and ЗАО "ССТГ в г. Советская Гавань" for the amount of RUB 4,374 million;
- acquisition of share in the share capital of ООО Верхнебурейская МГЭС for the amount of RUB 819 million;
- assessment of investments that have current market value with recognition of a loss amounting to RUB 574 million (see paragraph 3.16 of the Explanatory Notes) including a loss amounting to RUB 582 million related to ОАО ИНТЕР РАО shares.

Investments in subsidiaries that have current market value

As of 31 December 2014, 31 December 2013 and 31 December 2012, investments included shares of the Company's subsidiaries, i.e. ОАО РАО Энергосистемы Востока, ОАО Якутскэнерго and ОАО Дальний Восток Энергетическая Компания, received in 2011–2013 as a result of the additional issue of the Company's shares which are recognised on the Company's balance sheet. These investments are recorded at the value agreed with the founders and determined on the basis of the market valuation performed by an independent appraiser totalling 20,204 million as of 31 December 2014 (as of 31 December 2013: 20,204 million; as of 31 December 2012: 17,239 million). This valuation exceeds the current market value of the shares as of 31 December 2014, 31 December 2013 and 31 December 2012 by RUB 13,535, RUB 12,394 million and RUB 9,887 million, respectively.

The Company's management plans to get benefits from investments in ОАО РАО Энергосистемы Востока, ОАО Якутскэнерго and ОАО Дальний Восток Энергетическая Компания by controlling their business operations rather than as a result of fluctuations in their market value. Thus, according to the Company's management, current market quotes do not fairly reflect the fair value of the controlling shareholdings in these companies as the number of shares traded in the market is not representative; not more than 1% of total shares issued are in circulation on a daily basis.

In view of these circumstances and considering that the Company has no plans to sell these investments, in accordance with paragraph 6 of the Russian Accounting Regulation "Accounting reports of an organisation" (RAR 4/99), approved by order No. 43n of the Russian Ministry of Finance of 6 July 1999, the Company decided against performing revaluation of its investments in shares of ОАО РАО Энергосистемы Востока, ОАО Якутскэнерго and ОАО Дальний Восток Энергетическая Компания at the current market value from acquisition date.

The Company's management analysed the models of expected cash flows and factors that may show that there are indications of impairment of investments and came to a decision that these assets are not impaired as of 31 December 2014.

The amount of unrecognised change in the market value as compared to the carrying amount as of 31 December 2014 is RUB 13,535 million (as of 31 December 2013: RUB 12,394 million; as of 31 December 2012: RUB 9,887 million). The Company's net assets would have amounted to RUB 704,994 million, if it included the above unrecognised change in the value (as of 31 December 2013: RUB 612,026 million, as of 31 December 2012: RUB 582,887 million).

Impairment of investments in subsidiaries, associates and other entities for which current market value is not determinable

The Company's management analysed the negative trends related to a number of subsidiaries, which is presented below. The management performed the analysis of investments to the share capital of the entities listed below for possible signs of impairment, and also analysed possible impairment of other assets related to these subsidiaries, including those recorded within accounts receivable (see paragraph 3.2.2 of the Explanatory Notes).

ОАО Zagorskaya HAEPP-2. In September 2013, Zagorskaya HAEPP-2 which is currently under construction suffered from the flooding of a section of the HAEPP building from the lower reservoir. Due to the technical complexity of identifying the losses as a result of the accident, management are not able to estimate the amount of expenses needed to rectify the accident consequences and write off the damaged items of construction in progress.

Assets in relation to ОАО Zagorskaya HAEPP-2 on the balance sheet of the Company as of 31 December 2014 are as follows:

- within long-term investments: shares of ОАО Zagorskaya HAEPP-2 for the amount of RUB 55,924 million and interest-bearing loan for the amount of RUB 7,029 million;
- within other accounts receivable for additional shares issued but not yet transferred to the Company in the course of ОАО Zagorskaya HAEPP-2's additional share issue: accounts receivable for the amount of RUB 4,767 million, interest receivable accrued on loans issued for the amount of RUB 650 million and interest-free loan for the amount of RUB 452 million (see paragraph 3.2.2 of the Explanatory Notes).

The analysis of recoverability of these assets performed by the Company as of 31 December 2014 was based on the following key factors:

- Construction works and the assets are insured. In accordance with the insurance contracts and under the current Russian law, the acknowledgement of the fact that the accident at Zagorskaya HAEPP-2 which is currently under construction is the insurable event and subsequent payment of compensation is only due after the thorough analysis of the accident reasons by insurance companies based on the report on investigation of the causes of the flooding. February 2015 ОАО AlfaStrakhovanie, one of the insurance companies maintained the insurance of construction risks, acknowledged this accident as an insurable event. ОАО SOGAZ, insured the equipment installed at the plant, also recognised the accident as an insurable event. The final amount of compensation is not yet defined.
- Management plans to perform recovery work and complete construction of Zagorskaya HAEPP-2. As of December 2014 there is significant uncertainty in terms of the expenses to be incurred on recovery of damage caused by the flooding at Zagorskaya HAEPP-2. However, these expenses can be significant. Capacity supply contracts were concluded in respect of Zagorskaya HAEPP-2. There are specific rules for the price setting in respect of new HPPs (including pumped-storage power plants) being constructed: the price is set in a manner that guarantees payback period of 20 years for all CAPEX invested in construction.
- Following the decision of the regulatory body NP Market Council of 16 December 2013 the commissioning date for generating assets of Zagorskaya HAEPP-2 and the start date of fulfilment of obligations under the committed capacity supply contracts for new HPPs (including pumped-storage power plants) was transferred from the beginning of 2014 to the beginning of 2017. As these dates were adjusted for ОАО Zagorskaya HAEPP-2 is not subject to any penalties for under-supplied capacity under the above contracts.

Based on the analysis of factors that might indicate impairment of assets related to Zagorskaya HAEPP-2 construction project, the Company's management concluded that there were no such indicators as of 31 December 2014.

No negative trends which may result in impairment of other shareholdings were observed.

Provision for impairment of investments for which current market value is not determinable amounts to RUB 79 million (as of 31 December 2013: RUB 58 million, as of 31 December 2012: RUB - 832 million). Original cost of long-term investments for which provision for impairment of investments was made amounts to RUB 111 million as of 31 December 2014 (as of 31 December 2013 - RUB 96 million, as of 31 December 2012 – RUB 874 million).

Other	598	440	281	
Total long-term loans issued	34,039	33,018	18,760	

As of 31 December 2014 the balance sheet line 1170 "Investments" includes the following long-term loans issued:

- loan to ОАО Far East Generating Company amounting to RUB 10,038 million to refinance liabilities maturing by 3 December 2018 and 15 September 2021;
- loans to ОАО Zagorskaya GAES-2 in the total amount of RUB 7,029 million issued to finance expenses related to investment project ОАО Zagorskaya GAES-2 maturing by 05 February 2018;
- loan to ОАО Far East Distribution Grid Company amounting to RUB 6,630 million to refinance liabilities and finance working capital maturing by 14 March 2016, 3 December 2018 and 14 October 2025;
- loan to ОАО Sakhaenergo in the total amount of RUB 3,476 million issued to refinance liabilities maturing by 03 December 2018;
- loans to ОАО Nizhne-Bureyskaya GES in the total amount of RUB 2,300 million issued to finance expenses related to investment project «Nizhne-Bureyskaya GES» maturing by 15 April 2016, 5 February 2018 and 25 December 2019;
- loans to ОАО Ust-Srednekanskaya GES in the total amount of RUB 1,747 million issued to finance expenses related to investment project «Ust-Srednekanskaya GES» maturing by 5 February 2018;
- loan to ЗАО Tekhnopark Rummyantsevo in the total amount of RUB 1,292 million issued to refinance liabilities maturing by 30 November 2022;
- loan to ОАО Teploenergосervice in the total amount of RUB 929 million issued to refinance liabilities maturing by 03 December 2018.

There are no indicators of a prolonged decline in the value of the above investments.

3.1.3 Other non-current assets (line 1190 of the balance sheet)

Line 1190 "Other non-current assets" includes expenses of future periods to be written-off from expense account during the period beyond 12 months of the reporting date.

Breakdown of total expenses of future periods by types is presented in the table below:

OAo RusHydro
Explanatory Notes to the 2014 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

Narrative	31 December 2014	31 December 2013	31 December 2012
Project documentation on the construction of Cheboksarskaya GES related to uplifting water reservoir level	1,620	1,620	1,526
Software and licenses	1,461	1,239	823
Borrowing costs	1,175	647	715
Other	458	393	332
Total expenses of future periods, including:	4,714	3,899	3,396
Long-term expenses of future periods which are subject to writing-off from expense account during the period beyond 12 months of the reporting date (within the balance sheet line 1190)	3,538	2,987	2,772
Short-term expenses of future periods which are subject to writing-off from expense account during 12 months of the reporting date (within the balance sheet line 1210)	1,176	912	624

As a result of works performed to uplift the level of Cheboksary water reservoir it is planned to increase the production capacity of Cheboksary GES and eliminate the increased depreciation of equipment and hydraulic engineering installations. If the Company becomes aware that it won't obtain the expected additional economic benefits, the above expenses of future periods will be written-off against other expenses.

3.2 Current assets (Section II of the balance sheet)

3.2.1 Inventories (line 1210 the balance sheet)

Narrative	31 December 2014	31 December 2013	31 December 2012
Raw, materials and other inventories	2,241	1,813	1,428
Short-term expenses of future periods which are subject to writing-off from expense account during 12 months of the reporting date (see paragraph 3.1.3 of the Explanatory Notes)	1,176	912	624
Other	20	136	3
Total line 1210 "Inventories"	3,437	2,861	2,055

Raw, materials and other inventories are measured at actual cost of acquisition. As of 31 December 2014 the provision for their impairment amounted to RUB 158 million (31 December 2013: RUB 105 million, 31 December 2012: RUB 20 million).

3.2.2 Accounts receivable (line 1230 of the balance sheet)

(a) Long-term accounts receivable (payments expected beyond 12 months of the reporting date)

Total long-term accounts receivable were RUB 62,341 million, 80,323 million and 75,630 million as of 31 December 2014, 2013 and 2012, respectively.

Breakdown by types of long-term accounts receivable is as follows:

Type of long-term accounts receivable	31 December 2014	31 December 2013	31 December 2012
Advances issued to suppliers of equipment and capital construction contractors	31,095	35,074	37,296
Interest-free promissory notes received	27,563	27,040	26,633
Interest-free loans issued	1,503	16,817	9,235
Lease receivables	495	927	1,431
Buyers and customers	409	103	128
Other long-term accounts receivable	1,276	362	907

Notes to the statement of cash flows

Cash flows required for the purposes of supporting the existing scope of the Company's operations are presented within current operations. Cash flows related to expansion of the Company's business are included in investing activities.

Cash flows spent on investments and received on repayment of cash equivalents (excluding accrued interest) are not included in the cash flow statement.

Cash flows spent on investments and received on repayment of short-term bank deposits (with a maturity of more than three months) within the same reporting period, are recorded on a net basis in line 4219 "Other receipts" or line 4229 "Other payments" of the cash flow statement if they have such characteristics as quick return, large amount and short-term maturity.

Breakdown for lines "Other receipts" and "Other payments" of the statement of cash flows is presented below:

Item	2014	2013
Other receipts from operating activities (line 4119), including:		
Value added tax	1,406	2,504
Penalties, interest and fines recognised or for which court rulings on collection have been received	709	1,877
Receipt of proceeds of insurance and compensation for losses	54	117
	-	76

3.3 Equity and reserves (Section III of the balance sheet)

3.3.1 Share capital (line 1310 of the balance sheet)

As of 31 December 2014, 2013 and 2012, the Company's share capital is registered according to the established procedure and fully paid:

Share capital composition	Number of shares at 31 December 2014	Number of shares at 31 December 2013	Number of shares at 31 December 2012
Ordinary shares with nominal value of RUB 1 per share	386,255,464,890	317,637,520,094	317,637,520,094

As of 31 December 2014, the following shareholders are registered in the register of shareholders:

Shareholder	Type of shareholder	Number of shares	Ownership share, %
Russian Federation represented by the Federal Agency for State Property Management	beneficial owner	258,161,535,606	66.84%
Non-Banking Credit Organisation ZAO National Settlement Depository	nominee holder	112,435,510,802	29.11%
ООО Depository and Corporate Technologies	nominee holder	8,370,726,663	2.17%
Other		7,287,691,819	1.88%
Total		386,255,464,890	100.00%

Additional issue in 2012-2014

The Company's extraordinary general meeting of shareholders held on 16 November 2012 (Minutes No. 9) made the decision to increase the Company's share capital by placing 110,000,000,000 additional ordinary registered shares with the nominal value of RUB 1 each through public offering with payment in cash and non-monetary assets. Non-monetary assets include ordinary registered shares of the following joint stock companies: OAO RAO Energy Systems of the East, OAO Ust-Srednekanskaya GES, OAO SEC, OAO Irkutskenergo, OAO Irkutsk Electric Grid Company.

The Company's Board of directors approved the decision on additional issue of the Company's securities on 22 November 2012 (Minutes No.166). The Company's Board of directors approved the placing price of the Company's additional shares – RUB 1 each – on 10 December 2012 (Minutes No.169).

On 3 December 2012, the Federal Service of Financial Markets (hereinafter FSFM of Russia) registered the additional issue of the Company's 110,000,000,000 ordinary registered shares No. 1-01-55038-E-041D.

26 November 2013 is the actual completion date of the placement. FSFM of Russia registered the Report based on the results of additional issue of shares on 26 December 2013. Changes in the Company's founding documents are registered on 28 January 2014.

68,617,944,796 shares were actually placed as a result of this issue, which represents 62.38% of the issue's total number of securities

As part of this issue Company had been received as payment:

- blocks of shares of energy sector companies (paragraph 3.1.2 of the Explanatory Notes);
- cash in the total amount of RUB 50,022, including cash from Russian Federation represented by the Federal Agency for State Property Management in the amount of RUB 50,000 million for funding construction of electricity assets in the Russian Far East (see paragraphs 3.1.2 and 3.2.3 of the Explanatory Notes).

As of 31 December 2014, 622 million shares of the total number of ordinary shares are owned by the Company's Management Board members (31 December 2013: 651 million shares, 31 December 2012: 593 million shares). Subsidiaries and associates own 21,787 million shares of the Company (31 December 2013: 8,704 million shares, 31 December 2012: 8,704 million shares).

3.3.2 Revaluation of non-current assets (line 1340 of the balance sheet)

As of 31 December 2014, the amount of accumulated revaluation of non-current assets is RUB 53,111 million (31 December 2013: RUB 53,325 million, 31 December 2012: RUB 53,578 million). This metric consists of the amounts of revaluation accumulated by subsidiaries and associates which the Company acquired as part of the 2008 restructuring process.

The amount of accumulated revaluation was decreased by RUB 214 million in 2014 due to disposal of items of property, plant and equipment revalued earlier (2013: RUB 253 million,).

3.3.3 Additional paid-in capital (line 1350 of the balance sheet)

As of 31 December 2014, 2013 and 2012, the Company's additional paid capital was RUB 58,424 million, RUB 58,424 million and RUB 58,424 million, respectively, and consisted of share premium of the Company and subsidiaries and associates which the Company acquired as part of the 2008 restructuring process.

3.3.4 Reserve capital (line 1360 of the balance sheet)

As of 31 December 2014, 2013 and 2012, the Company's reserve capital was RUB 8,240 million, RUB 6,474 million and RUB 5,739 million, respectively.

In accordance with the decision of the Company's annual general meeting of shareholders of 27 June 2014 (Minutes No. 12), the Company allocated 5% of its net profit for 2013 in the amount of RUB 1 766 million to the reserve capital.

3.4 Non-current liabilities (Section IV of the balance sheet)

3.4.1 Long-term borrowings (line 1410 of the balance sheet)

Balance sheet line 1410 "Borrowings" includes long-term loans payable:

Lender / creditor	31 December 2014	31 December 2013	31 December 2012
OAO Sberbank of Russia	33,389	30,613	-
Russian bonds issued in February 2013	20,000	20,000	-

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

OAO RusHydro

Explanatory Notes to the 2014 Balance sheet and Statement of Financial Results

(in millions of Russian Roubles unless otherwise stated)

Lender / creditor	31 December 2014	31 December 2013	31 December 2012
Russian bonds issued in April 2011	15,000	15,000	15,000

EM Falcon Ltd	-	-	1,500
Total line 1410 "Borrowings"	92,262	97,965	49,866

In March 2014 the Company contracted a loan with Crédit Agricole Corporate and Investment Bank Deutschland in the total amount of Euro 190 million for 15 years for financing the modernisation of hydroturbines of Saratovskaya GES.

In April 2014 the Company received RUB 2,776 million under the agreement on non-revolving credit facility with OAO Sberbank of Russia to finance operational, financing and investing activities including refinancing of credits and loans.

In 2014 the Company also received RUB 3,530 million under the loan agreement with EBRD concluded in 2013 for 12 years to refinance current liabilities of OAO FEDGC, a member of RAO Energy Systems of the East Group and support upgrading the Company's distribution networks. June 2014 the loan agreement was amended: the amount of loan was divided into 3 tranches with different interest rates and maturity periods.

The key provisions of the contracts were as follows:

Lender / creditor	Agreement effective year	Redemption year	Amount in million units (in the currency of the loan)	Currency	Loan interest rate
Bayerische Landesbank	2012	2024 / 2025*	16	Euro	Euribor 6M + 0.85%
Crédit Agricole Corporate and Investment Bank Deutschland	2014	2029	190	Euro	Euribor 6M + 0.625%
RusHydro Finance Ltd	2010	2015	20,000	Russian Roubles	7.875%
UniCredit Bank Austria AG	2011	2026	128	Euro	3.35%**

ОАО RusHydro
Explanatory Notes to the 2014 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

*** Bonds maturity is 10 years with the right of bond holders of early redemption in 5 years after the date of issue,

**** Variable quarterly interest rate determined due to agreement's conditions.

As of 31 December 2014, the total amount of long-term loans to be repaid within 12 months of the reporting date and reclassified to short-term category was RUB 20,053 million (31 December 2013: RUB 3,329 million.) (see paragraph 3.5.1 of the Explanatory Notes).

The credit facilities under the agreement with EBRD concluded in 2006 in the amount of RUB 2,984 million as of 31 December 2013 were prepaid in full in 2014.

Besides the credit limits from Bayerische Landesbank (BayernLB), UniCredit Bank Austria AG, Crédit Agricole Corporate and Investment Bank Deutschland and EBRD which are not used in full as of 31 December 2014, the Company didn't have open unused credit lines.

Ageing analysis:

Due for repayment	31 December 2014	31 December 2013	31 December 2012
From 1 to 2 years	15,483	21,676	3,329
From 2 to 3 years	1,272	16,693	21,663

3.6 Off-balance-sheet valuables

3.6.1 Leased property, plant and equipment

As of 31 December 2014, the total rented property, plant and equipment are RUB 34,097 million (31 December 2013: RUB 33,754 million, 31 December 2012: RUB 33,906 million).

In 2014, the Company did not receive any property, plant and equipment under lease contracts. In 2014, no lease items were recognised on the Company's balance sheet under concluded contracts.

The Company will make lease payments of RUB 37 million (including VAT) for property, plant and equipment received under lease contracts over the period until they expire, including payment of RUB 25 million in 2015. In 2014, the Company accrued RUB 706 million (excluding VAT) and paid

ОАО RusHydro

ОАО RusHydro

Explanatory Notes to the 2014 Balance sheet and Statement of Financial Results

(in millions of Russian Roubles unless otherwise stated)

For a number of agreements for delivery of equipment and capital construction with Voith Hydro GmbH & Co KG, ОАО Silovye Mashiny, Alstom Hydro France, ООО Energy Standard, ООО Alstom, ЗАО А-security and others the Company received bank guarantees for return, in full or in part, of the advances issued to these entities or due fulfilment of the contractual scope of work by these entities.

According to property sales contracts bearing interest for payment by instalments to be made by ОАО Transport company RusHydro, the sold property for RUB 491 million was pledged.

3.6.3 Collateral for liabilities and payments issued

The Company issued the following collaterals and guarantees:

Creditor	Debtor	31 December 2014	31 December 2013	31 December 2012
GC Vnesheconombank	ОАО Boguchanskaya GES	49,133	46,632	40,973
ОАО ТЕК Mosenergo	ЗАО Yakutskaya GRES-2	15,000	-	-
ОАО Bank of Moscow	ОАО Far East Generating Company	7,042	7,001	6,208
ОАО VTB Bank	ОАО Far East Energy Company	4,921	-	-
GC Vnesheconombank	ЗАО Boguchansky Aluminium Smelter	4,615	4,615	4,615

ОАО Bank of Moscow	ОАО Sakhalinenergo	499	700	701
Solios Environnement S. A., ALSTOM Grid SAS (AREVA T&D S. A.), ЗАО Commerzbank (Eurasija)	ЗАО Boguchansky Aluminium Smelter	134	82	929
Other	Other	1,197	658	1,164
Total collateral for liabilities and payments issued		104,104	73,670	54,590

In 2014 the Company issued guarantees:

- in terms of liabilities of ЗАО Yakutskaya GRES-2 under the construction agreement with ОАО ТЕК Mosenergo and the letter of credit agreement with ЗАО ING Bank (Eurasia). Maturity date – 31 December 2015 and 14 August 2015 respectively.
- In terms of liabilities of ОАО Far East Energy Company under the credit agreement with ОАО VTB Bank. The guarantee covers the amount of credit and interest accrued. Maturity date – 30 November 2015.

In 2014 the amount of the guarantee issued in 2013 for liabilities of ЗАО International Energy Corporation under the credit agreement significantly increased. The guarantee covers the amount of credit and interest accrued. Maturity date – 10 September 2027.

Guarantees issued by the Company for liabilities of ОАО Boguchanskaya GES under its loan agreement with GC Vnesheconombank include:

- total liabilities of ОАО Boguchanskaya GES under the loan agreement, including accumulated interest in the amount of RUB 28,106 million as of 31 December 2014 (31 December 2013: RUB 25,605 million);
- pledge of ОАО Boguchanskaya GES's interest-free promissory notes for the total of RUB 21,027 million (see Note 3.2.2 of the Explanatory Notes) and pledge of shares for the total of RUB 14 thousand.

RUSAL Group undertakes to reimburse the Company for 50 per cent of liabilities settled under this guarantee by the Company for ОАО Boguchanskaya GES.

3.7 Income and expenses on operating activities (statement of financial results)

3.7.1 Revenue (line 2110 of the statement of financial results)

Revenue from sales of electricity and capacity has the largest percentage in the Company's revenue structure (98.8%).

Item	2014	2013
Sale of electricity	76,532	78,975
Sale of capacity	30,678	29,251
Sale of heat	144	141
Other	1,124	427
Total line 2110 "Revenue"	108,478	108,794

The Company sells a major part of its produced electricity and capacity (99.9%) on the wholesale electricity and capacity market, where sales are made at non-regulated prices (except for sales at regulated tariffs in the RF Far East non-pricing zone and volumes produced for selling to households or equivalent consumer categories).

3.7.2 Cost of sales (line 2120 of the statement of financial results)

Item	2014	2013
Purchased electricity and capacity	17,975	16,696
Depreciation and amortisation	13,038	11,853
Wages and social insurance contributions	10,635	8,357
Property tax	6,123	6,004
Repairs and maintenance	3,615	3,308
Fees for administering the wholesale market of electricity and capacity (ОАО SO UES, ОАО ARS, ЗАО CFR)	2,770	2,672
Third party services	2,624	1,863
Fire and other security services	1,660	1,434
Insurance expenses	1,185	1,328
Lease expenses	1,140	1,038
Water usage expenses, water tax	836	967
Lease of power equipment	706	1,097
Other expenses	3,157	2,256
Total line 2120 "Cost of sales"	65,464	58,873

Operating expenses include contributions to non-state pension fund ОАО NPF of Electrical Energy Industry. The Company's responsibility to provide the personnel with pension facilities is limited by the amount of financial resources paid in pension fund; this determines the type of pension plan for the Company's personnel as the defined benefit plan.

Operating expenses broken down by cost elements are as follows:

Item	2014	2013
Material expenses	22,605	21,166
Payroll expenses	8,911	6,915

Social contributions	1,724	1,442
Depreciation and amortisation	13,038	11,853
Other costs	19,186	17,497
Total for elements of costs	65,464	58,873
Change in balances of work in progress, finished goods, etc. (increase [-] / decrease [+])	-	-
Total expenses incurred on operating activities	65,464	58,873

3.8 Expenses on purchase and use of energy resources

Type of energy resource	Total costs							
	2014				2013			
	Purchase	Use			Purchase	Use		
for production purposes*		for internal needs	losses	for production purposes*		for internal needs	losses	
Electricity** and capacity, including:								
	3,361	2,512	785	64	2,862	2,005	791	66
Electricity	3,352	2,512	776	64	2,857	2,005	786	66
Capacity	9	-	9	-	5	-	5	-

* Electricity consumption in normal pump operation by Zagorskaya GAES (Zagorskaya GAES branch) and Kuban GAES (Cascade of Kuban GES branch).

** This category does not include expenses for electricity purchased to fulfil obligations under electricity sales contracts and to balance the system which were RUB 14,614 million in 2014 and RUB 13,834 million in 2013 (see paragraph 3.7.2 of the Explanatory Notes).

3.9 Other income and expenses (line 2340 and line 2350 of the statement of financial results)

3.10 Taxes

Value Added Tax

Total VAT calculated with due account of recovered tax amounts was RUB 31,915 million in the reporting year (2013: RUB 32,149 million), including:

- VAT calculated on sales of goods (work, services) is RUB 19,727 million (2013: RUB 19,639 million);
- VAT calculated on the amounts of received payment or partial payment for goods (work, services) to be delivered in the future is RUB 10,114 million (2013: RUB 10,797 million);
- recoverable amount of tax is RUB 2,074 million (2013: RUB 1,713 million).

Total VAT recoverable in the reporting period was RUB 25,214 million (2013: RUB 23,529 million), including:

- VAT recoverable invoiced to the taxpayer on acquisition of goods (work, services), property rights in Russia was RUB 12,040 million (2013: RUB 10,182 million);
- VAT calculated on the amounts of received payment or partial payment for goods (work, services) to be deducted from their delivery date was RUB 10,115 million (2013: RUB 10,797 million);
- VAT calculated on the amounts of payment or partial payment for goods (work, services) to be delivered in the future was RUB 1,940 million (2013: RUB 2,390 million);
- VAT recovered in 2014 which was paid earlier when the goods were imported to the Russian customs territory was RUB 1,106 million (2013: RUB 151 million);
- other recoverable VAT was RUB 13 million (2013: RUB 9 million).

The Company decreases the calculated VAT by the amount invoiced on purchase of goods (work, services) in Russia, according to tax legislation.

Corporate income tax

Income tax calculated on the basis of the accounting profit (theoretical income tax charge) for the reporting year was RUB 7,989 million (2013: RUB 9,342 million).

The Company applied tax rate of 20% in the calculation of income tax based on accounting profit received by the Company's branches (excluding profits received by branches Kamskysya GES and Votkinskaya GES that apply 15.5% rate).

According to the tax accounting data, the taxable profit for 2014 was RUB 34,525 million (2013: RUB 49,764 million).

In the reporting year, the amount of non-temporary differences which affected the theoretical income tax charge adjustment for the purposes of income tax calculated for tax accounting purposes (current income tax) was RUB 6,059 million (2013: RUB 12,492 million).

The above non-temporary differences arise from differences in recognising certain income and expenses for accounting and income tax purposes.

Non-temporary differences resulted in permanent tax assets amounted to RUB 5,186 million for 2014 (2013: 4,107 million), including:

- income from reversal of doubtful debt provision in the amount of RUB 2,080 million (2013: RUB 1,292 million);
- income from participation in other entities (dividends) in the amount of RUB 382 for 2014 (2013: RUB 408 million);
- other non-temporary differences in the amount of RUB 2,724 million (2013: RUB 2,317 million).

Non-temporary differences resulted in the permanent tax liability amounted to RUB 11,245 million for 2014 (2013: 16,509 million), including:

- depreciation of RUB 3,885 million (2013: RUB 3,926 million);
- charges to doubtful debt provision in the amount of RUB 1,206 million (2013: RUB 2,260 million);
- charity donations in the amount of RUB 1,294 million (2013: RUB 1,321 million);

- decrease in investments measured at current market value in the amount of RUB 574 million (2013: RUB 3,119 million);
- expenses related to sale, disposal or other transactions with assets in the amount of RUB 413 million (2013: RUB 826 million);
- financial support and other social payments to employees in the amount of RUB 297 million (2013: RUB 292 million);
- other non-temporary differences in the amount of RUB 3,576 million (2013: RUB 4,765 million).

The total amount of deductible temporary differences, which affected the adjustment of the theoretical income tax charge for the purpose of the current income tax calculated for tax accounting purposes, was RUB 418 million (2013: RUB 49 million), including those originated – RUB 999 million (2013: RUB 1,258 million) and settled – RUB 581 million (2013: RUB 1,209 million).

Total amount of taxable temporary differences that affected the theoretical income tax expense adjustment for the purpose of the income tax calculation for tax accounting purposes, was RUB 12,274 million (2013: RUB 10,092 million), including those originated – RUB 17,979 million (2013: RUB 16,552 million) and settled – RUB 5,705 million (2013: RUB 6,460 million).

In 2014, movement in deductible and taxable temporary differences was mainly due to:

- different useful lives of property, plant and equipment for accounting and income tax purposes;
- recognition of depreciation premium on items of property, plant and equipment for income tax purposes;
- application of multiplying factor for accrual of depreciation charges on property, plant and equipment used in operations in a hostile environment with a high turnover for tax accounting purposes in prior periods;
- capitalisation of interest on borrowings in the cost of investment assets for accounting purposes;
- including the costs of insurance in the value of investment assets in the accounting records of the Company.

Deferred tax assets and deferred tax liabilities were:

Item	31 December 2014	31 December 2013	31 December 2012
Deferred income tax assets	(2,343)	(2,260)	(2,318)
Deferred tax liabilities	12,015	9,444	7,570
Total line 1420 "Deferred tax liabilities"	9,672	7,184	5,252

Other taxes and levies

In 2014, operating expenses include other taxes and levies in the amount of RUB 7,872 million (2013: RUB 7,478 million), including:

- property tax in the amount of RUB 6,123 million (2013: RUB 6,004 million), including accrual provision for estimated liabilities for property tax;
- insurance contributions to the Pension Fund of the Russian Federation, Social Insurance Fund of the Russian Federation and obligatory medical insurance funds in the amount of RUB 1,724 million (2013: RUB 1,442 million), including contributions related to estimated liabilities on future payment of employee vacations earned but not used;
- other taxes and levies in the amount of RUB 25 million (2013: RUB 32 million).

Relations with tax authorities

In 2013, tax authorities performed a field tax audit covering 2009-2011 which resulted in additionally assessed taxes of RUB 394 million. As of 31 December 2014, these tax claims are challenged in court.

Russian tax legislation active or effective as of the end of the reporting period allows varying interpretation of the separate facts of the Company's economic life. As a consequence, the position of the Company's management in terms of taxes and documents substantiates this position may be challenged by tax authorities. The tax control in Russian Federation gets stringent resulting in increase of tax inspections risk. These inspections may cover 3 calendar years preceding the year when the decision about inspection was made. In some cases the earlier periods may be examined.

As of 31 December 2014, the Company's management believe that their interpretation of the relevant legislation was appropriate, tax liabilities are recorded in full and the Company's tax and currency positions will be sustained.

3.11 Dividends

The Company's annual general meeting of shareholders held on 27 June 2014 (Minutes No. 12) made the decision to pay dividends on the Company's ordinary shares for 2013 in the amount of RUB 0.01358751 per 1 share for the total of RUB 5,248 million.

The Company's annual general meeting of shareholders held on 28 June 2013 (Minutes No. 11) made the decision to pay dividends on the Company's ordinary shares for 2012 in the amount of RUB 0.00955606 per 1 share for the total of RUB 3,676 million.

3.12 Earnings per share

Basic earnings per share reflect a portion of reporting period's profit that may be potentially distributed between the shareholders – owners of ordinary shares. It is calculated by dividing basic profit of the reporting year by the weighted average number of ordinary shares outstanding during the year. Basic profit is equal to net profit of the reporting year (Line 2400 of the statement of financial results).

Item	2014	2013
Basic profit for the reporting year (RUB million)	30,729	35,321
Weighted average number of ordinary shares, outstanding during the reporting year (shares)	386,255,464,890	381,935,404,392
Basic earnings per share (RUB)	0,07956	0,09248

Weighted average number of ordinary shares, outstanding during the reporting year was calculated as follows:

Item	2014
Number of ordinary shares outstanding as of 1 January 2014 (shares)	386,255,464,890
Number of ordinary shares outstanding as of 1 December 2014 (shares)	386,255,464,890
Number of ordinary shares outstanding as of 31 December 2014 (shares)	386,255,464,890
Weighted average number of ordinary shares, outstanding in 2014 (shares) (386,255,464,890 * 12 months) / 12 months	386,255,464,890
Item	2013
Number of ordinary shares outstanding as of 1 January 2013 (shares)	367,637,520,094
Number of shares of additional issue registered on 3 December 2012 which were placed in 2013 and paid by shareholders (see paragraph 3.3.1 of the Explanatory Notes) (shares)	18,617,944,796
Number of ordinary shares outstanding as of 1 December 2013 (shares)	386,255,464,890
Number of ordinary shares outstanding as of 31 December 2013 (shares)	386,255,464,890
Weighted average number of ordinary shares, outstanding in 2013 (shares) (367,637,520,094 shares * 2 months + 384,632,705,292 shares * 9 months + 386,255,464,890 * 1 month) / 12 months	381,935,404,392

In 2014 and 2013, the Company had no debt securities potentially convertible to shares.

ОАО RusHydro

(in millions of Russian Roubles unless otherwise stated)

3.13 Related Parties

The Company's related parties are its subsidiaries and associates and other entities where the Company has indirect control or significant influence through its subsidiaries and associates.

The list of the Company's related parties is given on the web-site – www.rushydro.ru/investors/disclosure/affiliated

3.13.1 Controlling entity

As of 31 December 2014 the Company is controlled by the Russian Government (represented by the Federal Agency for Federal Property Management) which owns, 66.84% of the Company's ordinary shares (see paragraph 3.3.1 of the Explanatory Notes).

3.13.2 Sales to related parties

Total revenue from sales to related parties was:

Name of the buyer	2014	2013
Revenue from sales to subsidiaries, including:		
ОАО Far East Energy Company	5,530	5,436
ОАО Чувашская Энергосбытовая Компания	1,081	1,386
ОАО Красноярскэнерго	864	931
ОАО Рязанская Энергосбытовая Компания	688	650
ОАО Транспортная Компания RusHydro	434	-
ООО ЕСК Башкортостана	378	412
Other subsidiaries	311	262
Revenue from sales to related parties, including:		
ОАО Красноярская ГЭС*	475	1,077
Total sales to related parties	9,761	10,154

*ОАО Красноярская ГЭС was the related party until 15 July 2014

Sales to related parties include, among others, sales of electricity and capacity in the regulated sector of WEM at tariffs determined by the Federal Tariff Service and in the competitive sector at commercial prices established in accordance with the Wholesale Market Rules and Regulation of the Russian Government No. 109 of 26 February 2004, On Pricing of Electric and Heating Energy in the Russian Federation, and Regulation on the Company's sales policy for operating generation assets in the price zones of the wholesale electricity (capacity) market (minutes of the meeting of the Management Board No. 528 of 17 September 2010).

3.13.3 Purchases from related parties

The cost of services provided by related parties was:

Supplier	2014	2013
Repair and technical maintenance services, including:		
Subsidiaries		
ОАО Ремонтно-механическая Компания	3,041	2,087

3.13.4 Settlements with non-state pension fund

Non-state Pension Fund of Electrical Energy Industry is the non-state pension fund for implementation of the non-governmental pension security program for the Company's employees. The total amount of contributions to the pension fund was RUB 252 million and RUB 443 million for 2014 and 2013, respectively.

3.13.5 Settlements with related parties

As of 31 December 2014, 2013 and 2012, accounts receivable from related parties to the Company less doubtful debt provision were (see paragraph 3.2.2 of the Explanatory Notes):

Type of accounts receivable	31 December 2014	31 December 2013	31 December 2012
Short-term interest-free promissory notes received	18,846	22,453	72,350
Short-term interest-free loans issued	26,325	5,500	42,272
Long-term interest-free promissory notes received	25,689	25,689	25,689
Accounts receivable from subsidiaries as part of additional issues before title for the shares issued is transferred to the Company	11,805	98,530	10,714
Long-term interest-free loans issued	1,183	16,548	9,030
Accounts receivable related to other sales	1,458	1,090	774
Other settlements with related parties	8,491	7,054	6,290
Total accounts receivable from related parties	93,797	176,864	167,119

Terms and conditions of settlements with related parties provide for the Company to make advance payments on transactions with individual related parties. As of 31 December 2014 balances include advances issued for the amount of RUB 5,116 million (31 December 2013: RUB 6,257 million, 31 December 2012: RUB 4,420 million).

Doubtful debt provision for related parties' accounts receivables as of 31 December 2014 was RUB 48 million (31 December 2013: RUB 364 million; 31 December 2012: RUB 379 million).

As of 31 December 2014, 2013 and 2012, the Company's accounts payable to the related parties were:

	31 December 2014	31 December 2013	31 December 2012
Subsidiaries	914	1,404	1,095
Associates	30	24	-
Total accounts payable to related parties	944	1,428	1,095

The whole amount accounts payable to related parties is payable in cash.

3.13.6 Related parties' debt within investments

As of 31 December 2014, 2013 and 2012, The Company's investments include the following amounts due from related parties (see paragraphs 3.1.2 and 3.2.3 of the Explanatory Notes):

Type of financial investments	31 December 2014	31 December 2013	31 December 2012
Loans issued to related parties	44,178	38,586	31,050

TRANSLATOR'S EXPLANATORY NOTE: This version of our report/the accompanying documents is a translation from the original, which was prepared in Russian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Type of financial investments	31 December 2014	31 December 2013	31 December 2012
Other investments	-	40	1,500
Total related parties' debt within investments	44,178	38,626	32,550

3.13.7 Income from investments in other companies (related parties)

Income from investments in other companies includes income from investments in subsidiaries in the amount of RUB 380 million for 2014 (2013: RUB 381 million).

3.13.8 Remuneration to key management personnel

The Company's key management personnel includes members of the Board of directors and Management Board and also includes heads of the Company's business divisions.

The remuneration to the members of the Board of directors is calculated according to the *Regulations on the payment of remuneration to OAo RusHydro's directors* approved by the Annual General Meeting of Shareholders held on 30 June 2010 (Minutes No. 5).

Remuneration is paid to members of the Management Board and other management personnel of the Company for their services in management positions and is made up of a contractual salary and performance bonuses depending on the results for the period calculated based on key performance indicators approved by the Company's Board of directors.

The list of members of the Company's Board of directors and Management Board is included in paragraph 1.1 of the Explanatory Notes).

In 2014 and 2013, the Company paid remuneration to key management personnel within the limits set out in their employment agreements for the total amount of RUB 1,644 million and RUB 1,110 million, respectively. The insurance contributions amounted to RUB 179 million for 2014 (2013: 127 million).

3.13.9 Cash flows between the Company and subsidiaries/associates

Item	Line code	2014	2013
Cash flows from operating activities			
Receipts, including:	4110	7,655	7,556
sales of products, goods, work and services	4111	7,522	7,439

Net cash flows from financing activities	4300	-	(77)
Net cash flows for the reporting period	4400	(42,295)	(29,371)

3.14 Segment Information

The Company does not identify any reporting segments in its operations, as the Company's core business activity is production of electricity and capacity – their share in the revenue from sales is 98.8%. The individuals credentialed to make the decisions concerning allocation of the resources within the Company and assess the results of its performance analyse the Company's activity as a whole segment.

3.15 Contingent liabilities

As of 31 December 2014, the Company had outstanding issued guarantees to the third parties' creditors and pledged assets for the total amount of RUB 104,104 million (31 December 2013: RUB 73,670 million, 31 December 2012: RUB 54,590 million) (see paragraph 3.6.3 of the Explanatory Notes). According to the Company's management expectations, no material liabilities will arise in connection with these guarantees.

Moreover, the prosecutor's office and other oversight bodies examined operations of the Company, and this also may result in additional claims filed against the Company and its employees.

The Russian transfer pricing legislation is aligned with the international principles developed by the Organisation for Economic Cooperation and Development (OECD). The legislation allows tax authorities to assess additional taxes for controlled transactions (transactions between related parties and some transactions between unrelated parties) if such transactions are not on an arm's length basis. The Company's management has implemented internal control procedures to ensure compliance with transfer pricing law.

Tax liabilities arising as a result of operations between the Company and its subsidiaries are determined based on the actual transaction price. There is a probability that the prices may be disputed as practice for application of the transfer rules changes. The effect of such course of events cannot be estimated reliably but may have a material effect on the Company's financial results and/or operations.

3.16 Financial risk management

The primary objectives of the financial risk management function are to provide reasonable assurance of achieving the Company's goals by developing a methodology of risk identification, analysis and assessment, as well as to establish risk limits, and then ensure that exposure to risks stays within these limits and if the limits are exceeded – to treat this risk accordingly.

Market risks

The Company is subject to market risks that arise from open positions in foreign currencies, interest bearing assets and liabilities, all of which are exposed to general and specific market movements. The Company establishes acceptable risk limits and monitors them on a daily basis. However, this approach may not prevent losses incurred due to overlimits caused by significant market fluctuations.

There was the significant rise in the exchange rate and depreciation of the Russian rouble in the latter half of the year 2014 but the Company's financial position, its liquidity, sources of financing and performance largely are not impacted by currency exchange rates and interest rates.

Currency risk. The Company sells its produced electricity and capacity in the Russian domestic market at prices denominated in national currency, settlements with resources suppliers, charge and acceptance of payments from the customers are made specifically in Russian roubles. Liabilities of the Company are denominated in national currency; share of liabilities denominated in foreign currency is amounted to less than 15%. As a result effect of changes in currency exchange rates on the Company's financial position and activities is estimated as insignificant. The Company's operations are planned and carried out in such a way that all its assets and liabilities are denominated in the national currency.

Information on the Company's exposure to currency risk is presented in line with its use for the preparation of RusHydro Group's IFRS financial statements as defined in IFRS 7:

	Monetary financial assets	Monetary financial liabilities	Net balance sheet position
31 December 2014			
US Dollars	1,700	-	1,700
Euro	2,321	(13,446)	(11,125)
Total	4,021	(13,446)	(9,425)
31 December 2013			
US Dollars	779	-	799
Euro	54	(3,280)	(3,226)
Total	833	(3,280)	(2,477)
31 December 2012			
US Dollars	266	(1,894)	(1,628)
Euro	26	(2,400)	(2,374)
Total	292	(4,294)	(4,002)

The above analysis includes only monetary assets and liabilities. Investments in shares and non-monetary assets are not considered to give rise to significant currency risk.

Changes in exchange rates have no significant influence on the Company's financial position.

Interest rate risk. The Company's operating profits and cash flows from operating activity are substantially independent of the changes in market interest rates.

The effect of changes in the average market interest rates on the value of the Company's investments is insignificant as the rates of return on the Company's investments are fixed.

The fixed and floating interest rate loans received by the Company (see paragraph 3.4.1 of the Explanatory Notes) expose it to interest rate risks.

The Company also receives loans with floating interest rates based on MOSPRIME, Euribor, OeKB rates. The influence of changes in these rates on the Company's profit is insignificant.

The Company monitors interest rate risk for its financial instruments. Effective interest rates as of

ОАО RusHydro
Explanatory Notes to the 2014 Balance sheet and Statement of Financial Results
(in millions of Russian Roubles unless otherwise stated)

the end of the period are presented in paragraph 3.4.1 of the Explanatory Notes.

To mitigate the interest rate risk, the Company takes the following measures:

- monitors the credit market to identify favourable terms of financing;
- diversifies credit portfolio by raising fixed and floating rate loans.

Price risk. The price risk determines the possible changes / fluctuations in the fair value or future cash flows due to changes in market prices (excluding changes leading to interest rate or currency risk).

The table below includes the Company's investments exposed to the price risk.

Category of investments	31 December 2014	31 December 2013	31 December 2012
Equity investments for which current market value can be determined, including:	1,505	2,079	5,128
ОАО Inter RAO	1,445	2,027	5,077
ОАО Irkutskenergo	25	33	11
PAO Krasnoyarskaya GES	35	19	40
Equity investments to subsidiaries measured at current market value but not revalued as of the reporting date	20,204	20,204	17,239
Equity investments for which current market value cannot be determined	208,604	87,758	52,533
Total equity investments (see paragraph 3.1.2 of the Explanatory Notes)	230,313	110,041	74,900

Current market value of quoted securities is determined by market prices established on the stock exchange ОАО MICEX-RTS (www.rts.micex.ru), according to the 'Procedure for determining market value of securities, estimated price of securities and the threshold for the fluctuations of securities' market price for the purpose of Chapter 23 of the Russian Tax Code approved by Order of the Federal Service for Financial Markets No. 10-65/pz-n of 9 November 2010.

Credit risk

Credit risk is the possibility of the Company's losses resulting from the counterparty's inability to meet its obligations under the contract. Exposure to credit risk arises as a result of the Company's sales of products on credit terms and other transactions with counterparties giving rise to financial assets.

Although collectability of receivables can be influenced by economic factors, management believe that there is no significant risk of loss to the Company beyond the provision for impairment of receivables already recorded.

Due to the absence of an independent assessment of customers' creditworthiness, the Company performs such an assessment at the contracting stage taking into account the customer's financial position and credit history, using internal rating. The Company regularly monitors existing receivables and undertakes actions to collect them and minimize losses.

Cash has been placed in financial institutions, which are considered at the time of deposit to have minimal risk of default. The Company approves deposit banks as well as rules for making cash deposits. The Company performs regular review of financial institutions, monitors their ratings assigned by independent agencies as well as other performance indicators of these financial institutions.

Summary information on cash deposits and their equivalents including names of banks and other financial institutions and their ratings as of the end of the reporting period is provided in paragraph 3.2.4 of the Explanatory Notes.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities.

Efficient liquidity risk management implies maintaining sufficient cash and marketable securities, and ensuring the availability of additional funding through an adequate amount of committed credit facilities. The Group follows the balanced model of working capital financing when both long-term and short-term sources of finance are used. The Company places available cash to short-term financial instruments, mainly, bank deposits and short-term bank promissory notes. Short-term liabilities are represented mainly by trade accounts payable.

The Company has implemented controls over the contracting process by using standard financial procedures that include standard payment structure, standard payment time, standard correlation between the advance and final settlement amounts, etc. This way the Company controls the maturity structure of capital.

The ageing analysis for long term borrowings is presented in paragraph 3.4.1 of the Explanatory Notes.

3.17 Subsequent events

There are no significant events which have affected or could affect the Company's financial position, cash flows or its performance in the period between the reporting date and the date of signing the financial statements for 2014.

Independent Auditor's Report

To the Shareholders and Board of Directors of Open Joint Stock Company Federal Hydro-Generating Company – RusHydro (OJSC RusHydro)

We have audited the accompanying consolidated financial statements of OJSC RusHydro and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 31 December 2014 and the consolidated statements of income, comprehensive income, changes in equity and cash flows for 2014, and notes comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the fair presentation of these consolidated financial statements based on our audit. We conducted our audit in accordance with Russian Federal Auditing Standards and International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to express an opinion on the fair presentation of these consolidated financial statements.

Independent Auditor's Report (Continued)

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2014, and its financial performance and its cash flows for 2014 in accordance with International Financial Reporting Standards.

The accompanying notes are an integral part of these Consolidated Financial Statements

Note 1. The Group and its operations

These Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards for the year ended 31 December 2014 for OJSC RusHydro (hereinafter referred to as “the Company”) and its subsidiaries (hereinafter referred to as the “Group”).

The Company was incorporated and is domiciled in the Russian Federation. The Company is a joint stock company limited by shares and was set up in accordance with Russian regulations.

The Group’s primary activities are generation and sale of electricity and capacity on the Russian wholesale and retail markets, as well as generation and sale of heat energy.

Economic environment in the Russian Federation. The Russian Federation displays certain characteristics of an emerging market, including relatively high inflation and high interest rates. The Russian economy is particularly sensitive to changes in oil and gas prices.

The legal, tax and regulatory frameworks continue to develop and are subject to frequent changes and varying interpretations. Decline in oil prices, ongoing political tension in the region and international sanctions against certain Russian companies and individuals have had and may continue to have a negative impact on the Russian economy, including weakening of the Russian Rouble and making it harder to raise international funding.

During 2014 year:

- exchange rate set by the Central Bank of the Russian Federation fluctuated between RR 32.6587 and RR 67.7851 per USD and between RR 45.0559 and RR 84.5890 per Euro;
- key interest rate set by the Central Bank of the Russian Federation increased from 5.5 percent p.a. to 17.0 percent p.a. including an increase from 12.0 percent p.a. to 17.0 percent p.a. on 16 December 2014.

Currently the financial markets continue to be volatile and are characterised by frequent significant price movements and increased trading spreads. Subsequent to 31 December 2014:

- exchange rate set the Central Bank of the Russian Federation fluctuated between RR 56.2376 per USD and RR 69.6640 per USD and between RR 64,0504 and RR 78,7900 per Euro;
- key interest rate set by the Central Bank of the Russian Federation decreased from 17.0 percent p.a. to 14.0 percent p.a.;
- bank lending activity decreased as banks are reassessing the business models of their borrowers and their ability to withstand the increased lending and exchange rates;
- in January 2015 Russia’s credit rating was downgraded by Fitch Ratings to BBB-, whilst Standard & Poor’s cut it to BB+, putting it below investment grade for the first time in a decade. In February 2015 Moody’s Investors Service also downgraded Russia’s sovereign rating one notch below investment grade to Ba1. Fitch Ratings still have Russia as investment grade. However, all these rating agencies indicated a negative outlook, meaning further downgrades are possible.

In February 2015 Moody’s Investors Service also downgraded the Company’s rating from Ba1 to Ba2 with negative outlook.

These and other events may have a material impact on the Group’s operations, its prospective financial position, operational results and business perspectives. Management is unable to foresee the outcome of such impact at this stage, but believes it takes all the necessary measures to support the sustainability and development of the Group’s business.

Relations with the Government and current regulation. As at 31 December 2014 the Russian Federation owned 66.84 percent of the total voting ordinary shares of the Company (31 December 2013: 66.84 percent).

The Group’s major customer base includes a large number of entities controlled by, or related to the Government. Furthermore, the Government controls contractors and suppliers, which provide the Group with electricity dispatch, transmission and distribution services, and a number of the Group’s fuel and other suppliers (Note 6).

In addition, the Government affects the Group’s operations through:

- participation of its representatives in the Company’s Board of Directors;
- regulation of tariffs for electricity, capacity and heating;
- approval and monitoring of the Group’s investment programme, including volume and sources of financing.

Economic, social and other policies of the Russian Government could have a material effect on operations of the Group.

Overview of the electricity and capacity market. Capacity and electricity, while interrelated, are treated as separate economic products. The capacity market represents the obligation and ability to keep sufficient generation capability in reserve in order to satisfy a target level of potential demand, while the sale of electricity represents the actual delivery of electricity to the purchaser.

The Russian electricity and capacity market consists of wholesale and retail markets.

Participants of the wholesale market include: generating companies, electricity sales companies (including guaranteeing suppliers), electricity export / import operator, Federal Grid Company (in terms of electricity purchases to cover transmission losses), large electricity consumers. Participants of the wholesale market can act as electricity and capacity sellers and buyers.

Participants of the retail markets include: consumers, providers of public utilities, guaranteeing suppliers, electricity sales (supply) companies, electricity generators of retail markets, grid companies, participants of electricity dispatch.

Wholesale electricity and capacity market. The wholesale electricity and capacity market operates in accordance with the Resolution of the Russian Government No. 1172 dated 27 December 2010.

A wholesale market for electricity and capacity functions on the territory of the regions, which are integrated in pricing areas. European Russia and Urals are included in the first pricing area, Siberia is included in the second pricing area. In non-pricing areas (Arkhangelsk and Kaliningrad regions, Komi Republic, regions of the Far East), where the competitive market relationships are not possible due to technological reasons, sales of electricity and capacity are carried out based on regulated tariffs.

In the isolated energy systems which are not technically integrated into the country's unified energy system, there is no electricity and capacity wholesale market and electricity is supplied through the regulated markets.

Wholesale electricity market

The wholesale electricity market has a number of sectors varying in contractual terms, conditions and delivery time frames: sector of regulated contracts, day-ahead market, sector of unregulated bilateral contracts and the balancing market.

During 2013 and 2014 the electricity traded in pricing zones of wholesale market was sold at unregulated prices excluding of volumes designated for delivery to population, groups of customers equivalent to population and customers located in North Caucasus and Republic of Tyva.

Electricity and capacity supply tariffs for the Russian Federation are calculated using the price indexing formulas determined by the Federal Tariff Service (hereinafter referred to as "the FTS").

Electricity and capacity supply volumes are determined based on the estimated consolidated balance of electricity production and supply prepared by the FTS, so that for the electricity and capacity generator supply under regulated contracts does not exceed 35 percent of the total electricity and capacity supply to the wholesale market determined by the decision on balance for such generator.

Electricity volumes that are not covered by the regulated contracts are sold at unregulated prices on the day-ahead market (DAM) and balancing market (BM).

DAM is a competitive selection of seller and buyer price bids on the day ahead of actual electricity supply, including prices and volumes for each of 24 hours. The selection is managed by the Commercial Operator of the wholesale market (OJSC ATS). On DAM, the price is determined by balancing the demand and supply, and such price is applied to all market participants. To mitigate the price manipulation risk, DAM introduced a system encouraging the participants to submit competitive price bids – in accordance with the trading rules, the lowest price bids for electricity supply are satisfied first.

Price indices and trade volumes in DAM are published daily on the web-site of OJSC ATS.

Electricity volumes sold under bilateral contracts and on DAM constitute scheduled electricity consumption. However, actual consumption is inevitably different from the planned one. Deviations from scheduled production / consumption are traded on a real-time basis on BM, and the System Operator of the wholesale market (OJSC SO UES) holds additional tenders to select bids every three hours.

Under unregulated bilateral contracts, the market participants independently determine supply counter parties, prices and volumes.

Wholesale capacity market

The Resolution of the Russian Government No. 89 dated 24 February 2010 approved amendments to regulations of the electricity and capacity market providing for organisation of long-term capacity market.

Capacity is traded based on the following trading mechanisms:

- purchase / sale of capacity under capacity sales contracts, concluded as a result of capacity competitive selection of bids;
- purchase / sale of capacity under unregulated contracts, including concluded through the exchange;
- purchase / sale of capacity under contracts to provide capacity and under sale contracts of new nuclear power plants and hydroelectric power plants, similar to capacity sale contracts;
- purchase / sale of capacity produced by forced generators;
- purchase / sale of capacity under regulated contracts (within the volumes for delivery to population and groups of customers equivalent to population);
- purchase / sale of capacity of generating facilities selected by additional screening of investment projects performed when capacity selected through capacity competitive selection of bids in any area does not guarantee meeting the demand for capacity;
- purchase / sale of capacity of generating facilities determined upon the results of competitive selection of investment projects on developing the prospective technological capacity reserves.

During 2013 and 2014, similar to trading operations with electricity, capacity is supplied under regulated contracts only in the volumes required for supply to the population, equivalent consumer categories and consumers operating in some parts of the wholesale market pricing zones, consisting Russian constituent territories as determined by the Russian Government (North Caucasus and Republic of Tyva).

During 2013 and until May 2014 the volumes of capacity of hydropower plants located in the second pricing area (Siberia) were supplied for tariffs approved by the FTS. According to the Resolution of the Russian Government No. 374 dated 28 April 2014 approving changes to the regulations of the wholesale electricity and capacity market since 1 May 2014 35 percent of capacity are supplied for tariffs and 65 percent – at the price of capacity competitive selection of bids. The Resolution also provides phased increase in share of capacity of hydropower plants located in the second pricing area (Siberia) supplied at the price of capacity competitive selection of bids to 80 percent by 1 January 2016, to 100 percent by 1 January 2017.

In the capacity market, capacity tenders are held based on the demand estimated for the respective supply period by OJSC SO UES. If the actual demand for capacity is above the forecast one, additional tender selection may be held for adjusting it.

The tender first selects capacity commissioned under capacity supply contracts (CSC) entered into with heating generation sites and contracts with nuclear power plants and hydropower plants similar to CSC. Non-selected capacity that failed to pass through the tender is not paid for, excluding the capacity of the generating sites that are required to maintain the technological operating modes of the energy system or supply heat (“forced” generators). The capacity of “forced” generators is paid for using the tariff set up by the FTS.

Non-pricing zone of the Far East

Territories of the Amur Region, Primorsky Region, Khabarovsk Region, Jewish Autonomous Region and the Southern District of the Sakha Republic (Yakutia) are integrated into a single non-pricing zone of the wholesale electricity and capacity market of the Far East. There are specific features of managing electricity and capacity trading operations due to limitations in the competition among electricity suppliers and grid-imposed limitations for electricity flow.

Tariffs for electricity supplied by the Far East energy companies to the consumer (end-consumer tariffs) are approved by regional regulatory authorities based on the threshold tariff levels approved by the FTS for the regulated period.

The threshold tariff levels for electricity supplied to population or equivalent consumer categories and other consumers in the Russian constituent territories are determined by the FTS in accordance with the forecast of social and economic development in the Russian Federation for the regulated period.

The single buyer wholesale market model is implemented in the Far East non-pricing zone. Suppliers of the wholesale market supply electricity and capacity to the wholesale market using the tariffs established for them by the FTS.

The single buyer purchases electricity and capacity on the wholesale market at indicative prices calculated

by OJSC ATS based on the tariffs for suppliers of wholesale market approved by the FTS.

OJSC ATS makes sure settlements between the electricity generators and buyers. Functions of the single buyer are assigned to OJSC DEK on the territory of Amur Region, Jewish Autonomous Region, Khabarovsk Region, Primorsky Region and the Southern District of the Sakha Republic (Yakutia).

However there are regions with only retail market operations – they are isolated energy systems of Kamchatsky Region, Magadan Region, Chukotsk Autonomous Region, Western and Central Regions of Sakha Republic (Yakutia) and Sakhalin Region where systems are not technically integrated into the unified energy system.

Retail electricity market. In the retail electricity markets the sales of electricity purchased on the wholesale electricity and capacity market and electricity of generating companies which are not participants of the wholesale market are carried out.

The retail market rules were approved by Resolution of the Government No. 442 dated 4 May 2013 “On functioning of retail electricity markets, complete and (or) partial constraint of electricity consumption” (hereinafter referred to as “the retail market rules”).

In the territories of the constituent regions of the Russian Federation integrated into pricing zones of the wholesale market electricity is sold at unregulated prices except for electricity sales to population and equivalent consumer categories.

Electricity is supplied to population and groups of customers equivalent to population at regulated prices (tariffs) approved by executive authorities of the constituent regions of the Russian Federation in terms of state tariff regulation.

Regulated prices are established based on forecast of social and economic development of Russian Federation for the next year approved by the Government. The FTS determines the threshold levels for regulated tariffs for electricity supplied to population and equivalent consumer categories.

The guaranteeing suppliers sell electricity at unregulated prices within the threshold limits of unregulated prices determined and applied according to the retail market rules. Electricity sales (supply) companies sell electricity at unregulated prices. Electricity generators in the retail markets sell electricity at unregulated prices except for sales of electricity to guaranteeing supplier.

In the territories of the constituent regions of the Russian Federation integrated into non-pricing zones of the wholesale market for determination of prices for electricity supplied to final customers in the retail markets principles of prices translation of wholesale market are applied. Translation of prices of wholesale market is performed for all final customers except for population and equivalent consumer categories.

Translation prices calculated by electricity sales companies according to the Rules of application of the prices (tariffs) are determined based on regulated tariffs set up for the respective group of customers and cost of purchase of electricity and capacity by guaranteeing supplier (electricity sales company) in the wholesale market. Population and equivalent consumer categories pay for electricity under the tariffs set up by executive authorities of the constituent regions of the Russian Federation.

In the territories of isolated energy systems – sales of electricity to all consumer categories are carried out at regulated prices approved by the FTS and executive authorities of the constituent regions of the Russian Federation in terms of state tariff regulation in the territories where such energy systems are located.

Heating market. Operations of the heating market are regulated by Federal Law No.190-FZ “On Heating” dated 27 July 2010 and Resolution of the Government No. 1075 dated 22 October 2013 “On pricing of heating supply”.

The Group’s entities that are included into the segment RAO Energy System of the East Group are participants on the retail heating markets in the territories of their presence. Heat energy is supplied on the centralised basis from the heat power plants and boiling houses operated by the energy systems. And a number of energy systems are involved in supplies of heat, generating and distributing heat energy, while others – just generate heat energy.

Heating market provides for:

- supply of heat and heat transfer public utilities relating to hot water and heating supply needs;
- supply of heat for the entities’ technological needs.

According to the Russian legislation, sales of heat energy are fully regulated.

Prices (tariffs) for heat supplied by utilities for all consumer groups are approved by executive authorities in the Russian constituent regions responsible for state regulation of prices (tariffs) within the threshold limits of tariffs approved by the FTS.

Service fee for maintenance of spare heat capacity when there is no heat consumption and fee for connection to the system of heating supply are also regulated by executive authorities in the Russian constituent regions responsible for state regulation of prices.

Market of services for provision of system reliability. Types of services for provision of system reliability (hereinafter referred to as “the system services”), rules of their rendering, pricing mechanism and procedure of selection of the constituents of the utilities industry rendering such services and electricity consumers were introduced by Resolution of the Government No. 117 dated 3 March 2010.

Functions of selection of the constituents of the utilities industry rendering system services, conclusion of contracts with such constituents and service charge as well as coordination of actions of participants of the system services market are assigned to OJSC SO UES.

System services market is commissioned to provide functioning of the economic mechanisms stimulating maintenance and development of equipment in United Energy System (UES) of Russia with specific optional features for all constituents:

- ability to participate in standardized primary frequency regulation;
- ability to participate in automated secondary frequency regulation at heat power plants;
- reactive power regulation with use of generation equipment of the power plants which are not participating in generating of active capacity;
- operation of elements of emergency control system in UES of Russia created for the purpose of increase of carrying capacity in controlled sections of electric grid.

From the outlined system services the Group provides services for reactive power regulation with use of generation equipment of the hydroelectric power plants which are not used for electricity generation during the period of rendering the services.

Renewable-based power generation. Russian Government's order No. 449 of 28 May 2014 *On incentive mechanisms for using renewables in the wholesale electricity and capacity market* and Russian Government's Resolution No. 861-r of 28 May 2014 approved the pricing rules for capacity of renewable (“Renewables”) power generation assets and mechanisms and key parameters of support for renewable-based power generation in Russia.

The basic mechanism of support is as follows:

- The Russian Government set out annual limits for capacity commissioning for each of three technologies until 2020: wind, distributed power generation (5 to 25 mW) and solar energy.
- The government established the capital expenditure ceilings, localisation requirements, installed capacity utilisation benchmarks (ICUB) and operating expenses.
- ATS performs the annual competitive selection of capacity for the term of 4 years out of the assets of wholesale market zones 1 and 2 based on the minimal capital expenditure criterion.
- The tender winners sign a capacity supply contract (Renewable CSC), which guarantees the minimum capacity payments to investors over 15 years from the commissioning date.
- The contract provides for penalties for violating the terms and conditions set out in Renewable CSC (failure to meet the commissioning deadlines and localisation requirements, and under-supply of capacity).

On 19 September 2014, ATS published the results of the first tender for the construction of renewable energy projects.

The adoption of the above regulatory framework by the Russian Government guarantees economic efficiency of investments in renewable power generation projects.

In 2014 the Group's bids in the tender for the construction of renewable energy projects are selected by ATS.

Following the results of the tender contracts to provide capacity of qualified renewable energy projects are concluded.

Note 2. Summary of significant accounting policies

Basis of preparation. These Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards (hereinafter referred to as “IFRS”) under the historical cost convention, as modified by the financial instruments initially recognised at fair value, revaluation of property, plant and equipment and available-for-sale financial assets. The principal accounting policies applied in the preparation of these Consolidated Financial Statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

Each company of the Group individually maintains its own books of accounts and prepares its statutory financial statements in accordance with Russian standards of accounting (hereinafter referred to as "RSA"). The accompanying consolidated financial statements are based on the statutory records with adjustments and reclassifications made for the purpose of fair presentation in accordance with IFRS.

Functional and presentation currency. The functional currency of the Company and its subsidiaries, and the Group's presentation currency, is the national currency of the Russian Federation, Russian Rubles.

Consolidated financial statements. Subsidiaries are those investees, including structured entities, that the Group controls because the Group (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns.

The existence and effect of substantive rights, including substantive potential voting rights, are considered when assessing whether the Group has power over another entity. For a right to be substantive, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Group may have power over an investee even when it holds less than majority of voting power in an investee. In such a case, the Group assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Group from controlling an investee. Subsidiaries are consolidated from the date on which control is transferred to the Group (acquisition date) and are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries other than those acquired from parties under common control. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest.

The Group measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis at the non-controlling interest's proportionate share of net assets of the acquiree.

Goodwill is measured by deducting the fair value of the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held immediately before the acquisition date. Any negative amount ("negative goodwill") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs related to the acquisition and incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt as part of the business combination are deducted from the carrying amount of the debt and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between the Group's entities are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Company and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Company. Non-controlling interest forms a separate component of the Group's equity.

Purchases and sales of non-controlling interests. The Group applies the economic entity model to account for transactions with owners of non-controlling interest. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Group recognises the difference between sales consideration and carrying amount of non-controlling interest sold as a capital transaction directly in equity.

Acquisition of subsidiaries from parties under common control. Acquisitions of subsidiaries from parties under common control are accounted for using the predecessor values method. The assets and liabilities of the subsidiary transferred under common control are at the predecessor entity's carrying amounts. The predecessor entity is considered to be the highest reporting entity in which the subsidiary's IFRS financial information was consolidated. Related goodwill inherent in the predecessor entity's original acquisitions is

also recorded in these consolidated financial statements. Any difference between the carrying amount of net assets, including the predecessor entity's goodwill, and the consideration for the acquisition is accounted for in these consolidated financial statements as an adjustment to merger reserve within equity. Under this method the consolidated financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented, i.e. retrospectively except for acquisition of subsidiaries acquired exclusively with a view for resale which are accounted for using predecessor values method prospectively from the acquisition date.

Investments in associates and joint ventures. Investments in associates and joint ventures are accounted for using the equity method of accounting, based upon the percentage of ownership held by the Group. Associates are entities over which the Company has significant influence but not control, generally accompanying a shareholding of between 20 and 50 percent of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. Dividends received from associates reduce the carrying value of the investment in associates. Other post-acquisition changes in the Group's share of net assets of an associate are recognised as follows: (i) the Group's share of profits or losses of associates is recorded in the consolidated profit or loss for the year as profit or loss in respect of associates and joint ventures, (ii) the Group's share of other comprehensive income is recognised in other comprehensive income and presented separately, and (iii) all other changes in the Group's share of the carrying value of net assets of associates are recognised in profit or loss within the profit or loss in respect of associates and joint ventures.

However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is defined by making of decisions about the relevant activities required the unanimous consent of the parties sharing control.

The Group discontinues the use of the equity method from the date on which it ceases to have joint control over, or have significant influence on joint ventures and associates.

Unrealised gains on transactions with associates and joint ventures are eliminated to the extent of the Group's interest in the entity.

Disposals of subsidiaries, associates or joint ventures. When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are recycled to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

Intangible assets and goodwill. The Group's intangible assets other than goodwill have definite useful lives and primarily include customer base acquired in business combination (Note 10), which is amortised over 5 years, and capitalised computer software. Intangible assets are amortised using the straight-line method over their useful lives. If impaired, the carrying amount of intangible assets is written down to the higher of value in use and fair value less costs to sell. Goodwill is carried at cost less accumulated impairment losses, if any. The Group tests goodwill for impairment at least annually and whenever there are indications that goodwill may be impaired. Goodwill is allocated to the cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the business combination. Such units or groups of units represent the lowest level at which the Group monitors goodwill and are not larger than an operating segment.

Gains or losses on disposal of an operation within a cash generating unit to which goodwill has been allocated include the carrying amount of goodwill associated with the operation disposed of, generally measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit which is retained.

Financial instruments – key measurement terms. Depending on their classification financial instruments are carried at fair value or amortised cost as described below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees are used to measure fair value of certain financial instruments for which external market pricing information is not available. The Group uses such valuation techniques of fair value which are the most acceptable in the circumstances and as much as possible use the observable basic data.

Fair value measurements are analysed by level in the fair value hierarchy as follows:

- level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities;
- level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices);
- level 3 measurements are valuations not based on solely observable market data (that is, the measurement requires significant unobservable inputs).

For disclosure of information on fair value the Group classified assets and liabilities on the basis of an appropriate level of hierarchy of fair value as it is stated above (Note 31).

Amortised cost is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related items in the statement of financial position.

The effective interest method is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

Classification of financial assets. Financial assets have the following categories: (i) loans and receivables; (ii) available-for-sale financial assets; (iii) financial assets held to maturity and (iv) financial assets at fair value through profit or loss. The description of categories of financial assets of the Group is given below.

Loans and receivables are unquoted non-derivative financial assets with fixed or determinable payments.

Derivative financial instruments. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in profit or loss for the year. The Group does not apply hedge accounting.

All other financial assets are included in the *available-for-sale* category, which includes investment securities which the Group intends to hold for an indefinite period of time and which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Classification of financial liabilities. Financial liabilities have the following measurement categories: (i) financial liabilities at fair value through profit or loss and (ii) other financial liabilities. All financial liabilities of the Group including loans are categorised as other and carried at amortized cost.

Available-for-sale financial assets. Available-for-sale financial assets are carried at fair value. Interest income on available-for-sale debt securities is calculated using the effective interest method and recognised in profit or loss for the year as finance income. Dividends on available-for-sale equity instruments are recognised in profit or loss for the year as finance income when the Group's right to receive payment is

established and it is probable that the dividends will be collected. All other elements of changes in the fair value are recognised in other comprehensive income until the investment is derecognised or impaired at which time the cumulative gain or loss is reclassified from other comprehensive income to finance income in profit or loss for the year.

Impairment losses are recognised in profit or loss for the year when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of available-for-sale financial assets. A significant or prolonged decline in the fair value of an equity security below its cost is an indicator that it is impaired. The cumulative impairment loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that asset previously recognised in profit or loss – is reclassified from other comprehensive income to finance costs in profit or loss for the year. Impairment losses on equity instruments are not reversed and any subsequent gains are recognised in other comprehensive income. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through current period's profit or loss.

Foreign currency translation. Monetary assets and liabilities, which are held by the Group's entities and denominated in foreign currencies at the end of the reporting period, are translated into Russian Rubles at the exchange rates prevailing at that date. Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transaction. Gains and losses resulting from the settlement of such transactions and translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

As at 31 December 2014, the official rate of exchange, as determined by the Central Bank of the Russian Federation, between Russian Ruble and US Dollar (hereinafter referred to as "USD") was RR 56.26: USD 1.00 (31 December 2013: RR 32.73: USD 1.00), between Russian Ruble and Euro was RR 68.34: EUR 1.00 (31 December 2013: RR 44.97: EUR 1.00).

Property, plant and equipment. Property, plant and equipment except for office buildings and land are stated at revalued amounts less accumulated depreciation and provision for impairment (where required). Office buildings and land owned by the Group are stated at cost.

Property, plant and equipment except for office buildings and land are subject to revaluation with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Increases in the carrying amount arising on revaluation are credited to other comprehensive income and increase the revaluation surplus in equity. Decreases that offset previous increases of the same asset are recognised in other comprehensive income and decrease the previously recognised revaluation surplus in equity; all other decreases are charged to profit or loss for the year. Any accumulated depreciation at the date of revaluation is eliminated against the gross amount of the asset.

The revaluation surplus included in equity is transferred directly to retained earnings when the revaluation surplus is realised on disposal of the asset.

The Group charges deferred tax liabilities directly to other comprehensive income in respect of revaluation of property, plant and equipment that are recorded directly in other comprehensive income.

Costs of minor repairs and maintenance are expensed when incurred. Cost of replacing major parts or components of property, plant and equipment items are capitalised and the replaced part is retired.

Social assets are not capitalised if they are not expected to result in future economic benefits to the Group. Costs associated with fulfilling the Group's social responsibilities are expensed as incurred.

Depreciation. Depreciation on items of property, plant and equipment (except for land) is calculated using the straight-line method over their estimated useful lives.

The useful lives of property, plant and equipment are subject to annual assessment by management and if expectations differ from previous estimates, the changes of useful lives are accounted for as a change in an accounting estimate prospectively.

The average useful lives of property, plant and equipment by type of facility, in years, were as follows:

Type of facility	Average useful lives
Production buildings	25–80
Facilities	10–100
Plant and equipment	5–40
Other	3–30

Depreciation is charged once an asset is available for service. Land and assets under construction are not depreciated.

Impairment of property, plant and equipment. Impairment reviews for property, plant and equipment are carried out when there is an indication that impairment may have occurred, or where it is otherwise required to ensure that property, plant and equipment are not carried above their estimated recoverable amounts (Note 7). If such indication exists, management estimates the recoverable amount which is determined as the higher of an asset's fair value less costs to sell and its value in use. Fair value less costs to sell represents the amount that can be generated through the sale of assets. Value in use represents the present value of expected future cash flows discounted on a pre-tax basis, using the estimated cost of capital of the cash-generating unit.

The carrying amount of the asset is reduced to the recoverable amount and the impairment loss is recognised in profit or loss for the year to the extent it exceeds the previous revaluation surplus in equity. An impairment loss recognised for an asset in prior years is reversed where appropriate if there has been a change in the estimates used to determine the asset's value in use or fair value less costs to sell.

Investment property. Investment property is property held by the Group to earn rental income which is not occupied by the Group (Note 10). Investment properties are stated at cost. If any indication exists that investment properties may be impaired, the Group estimates the recoverable amount as the higher of value in use and fair value less costs to sell. The carrying amount of an investment property is written down to its recoverable amount through a charge to profit or loss for the year. An impairment loss recognised in prior years is reversed if there has been a subsequent change in the estimates used to determine the asset's recoverable amount.

Cash and cash equivalents. Cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less. Cash and cash equivalents are carried at amortised cost using the effective interest method.

Trade and other receivables. Trade and other receivables are carried at amortised cost using the effective interest method.

Impairment of financial assets carried at amortised cost. Impairment losses are recognised in profit or loss when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of the financial asset and which have an impact on the amount or timing of the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If the Group determines that no objective evidence exists that impairment was incurred for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. The primary factors that the Group considers in determining whether a financial asset is impaired are its overdue status and realisability of related collateral, if any. The following other principal criteria are also used to determine whether there is objective evidence that an impairment loss has occurred: (i) any portion or instalment is overdue and the late payment cannot be attributed to a delay caused by the settlement systems; (ii) the counterparty experiences a significant financial difficulty as evidenced by its financial information that the Group obtains; (iii) the counterparty considers bankruptcy or a financial reorganisation; (iv) there is adverse change in the payment status of the counterparty as a result of changes in the national or local economic conditions that impact the counterparty; or (v) the value of collateral, if any, significantly decreases as a result of deteriorating market conditions.

If the terms of an impaired financial asset held at amortised cost are renegotiated or otherwise modified because of financial difficulties of the counterparty, impairment is measured using the original effective interest rate before the modification of terms. The renegotiated asset is then derecognised and a new asset is recognised at its fair value only if the risks and rewards of the asset substantially changed. This is normally evidenced by a substantial difference between the present values of the original cash flows and the new expected cash flows.

Impairment losses are always recognised through an allowance account to write down the asset's carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred) discounted at the original effective interest rate of the asset. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account through profit or loss for the year.

Uncollectible assets are written off against the related impairment loss provision after all the necessary procedures to recover the asset have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the impairment loss account within the profit or loss for the year.

Prepayments. Prepayments are carried at cost less provision for impairment. A prepayment is classified as non-current when the goods or services relating to the prepayment are expected to be obtained after one year, or when the prepayment relates to an asset which will itself be classified as non-current upon initial recognition. Prepayments to acquire assets are transferred to the carrying amount of the asset once the Group has obtained control of the asset and it is probable that future economic benefits associated with the asset will flow to the Group. Other prepayments are written off to profit or loss when the goods or services relating to the prepayments are received. If there is an indication that the assets, goods or services relating to a prepayment will not be received, the carrying value of the prepayment is written down accordingly and a corresponding impairment loss is recognised in profit or loss for the year.

Inventories. Inventories are recorded at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less selling expenses. Cost of inventory that is expensed is determined on the weighted average basis.

Non-current assets classified as held for sale. Discontinued operations. Non-current assets and disposal groups (which may include both non-current and current assets) are classified in the consolidated statement of financial position as “non-current assets classified as held for sale” if their carrying amount will be recovered principally through a sale transaction (including loss of control of a subsidiary holding the assets) within 12 months after the reporting period. Assets are reclassified when all of the following conditions are met: (i) the assets are available for immediate sale in their present condition; (ii) the Group’s management approved and initiated an active programme to locate a buyer; (iii) the assets are actively marketed for a sale at a reasonable price; (iv) the sale is expected within one year; and (v) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn.

Non-current assets or disposal groups classified as held for sale in the current period’s consolidated statement of financial position are not reclassified or re-presented in the comparative consolidated statement of financial position to reflect the classification at the end of the current period.

A disposal group is a group of assets (current and / or non-current) to be disposed of, by sale or otherwise, together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction. Goodwill is included if the disposal group includes an operation within a cash-generating unit to which goodwill has been allocated on acquisition. Non-current assets are assets that include amounts expected to be recovered or collected more than 12 months after the reporting period. If reclassification is required, both the current and non-current portions of an asset are reclassified.

Held for sale disposal groups as a whole are measured at the lower of their carrying amount and fair value less costs to sell. Held for sale property, plant and equipment are not depreciated or amortised. Reclassified non-current financial instruments and deferred taxes are not subject to the write down to the lower of their carrying amount and fair value less costs to sell.

Liabilities directly associated with the disposal group that will be transferred in the disposal transaction are reclassified and presented separately in the consolidated statement of financial position.

A discontinued operation is a component of the Group that either has been disposed of, or that is classified as held for sale, and: (i) represents a separate major line of business or geographical area of operations; (ii) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or (iii) is a subsidiary acquired exclusively with a view to resale. Earnings and cash flows of discontinued operations, if any, are disclosed separately from continuing operations with comparatives being re-presented.

Disposal groups or non-current assets that ceases to be classified as held for sale are measured at the lower of (i) its carrying amount before the asset or disposal group was classified as held for sale, adjusted for any depreciation, amortisation or revaluations that would have been recognised had the asset or disposal group not been classified as held for sale, and (ii) its recoverable amount at the date of the subsequent decision not to sell.

Income taxes. Income taxes have been provided for in the financial statements in accordance with legislation enacted or substantively enacted by the end of the reporting period. The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year except if it is recognised in other comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in other comprehensive income or directly in equity.

Current tax is the amount expected to be paid to, or recovered from, the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxes other than on income are recorded within operating expenses. Taxable profits or losses are based on estimates if financial statements are authorised prior to filing relevant tax returns.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax liabilities are not recorded for temporary differences on initial recognition of goodwill and subsequently for goodwill which is not deductible for tax purposes. Deferred tax balances are measured at tax rates enacted or substantially enacted at the end of the reporting period which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised.

Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis. Deferred tax assets and liabilities are netted only within the individual companies of the Group.

The Group controls the reversal of temporary differences relating to taxes chargeable on dividends from subsidiaries or on gains upon their disposal. The Group does not recognise deferred tax liabilities on such temporary differences except to the extent that management expects the temporary differences to reverse in the foreseeable future.

Uncertain tax positions. The Group's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period, and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period.

Debt. Debt is recognised initially at its fair value. Fair value is determined using the prevailing market rate of interest for a similar instrument, if significantly different from the transaction price. In subsequent periods, debt is stated at amortised cost using the effective interest method; any difference between the fair value of the proceeds (net of transaction costs) and the redemption amount is recognised in the consolidated income statement as an interest expense over the period of the debt obligation.

Capitalisation of borrowing costs. Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalised as part of the costs of those assets, if the commencement date for capitalisation is on or after 1 January 2009.

The commencement date for capitalisation is when (i) the Group incurs expenditures for the qualifying asset; (ii) it incurs borrowing costs; and (iii) it undertakes activities that are necessary to prepare the asset for its intended use or sale.

Capitalisation of borrowing costs continues up to the date when the assets are substantially ready for their use or sale. The Group capitalises borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalised are calculated at the group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalised.

Interest payments capitalised as part of the cost of an assets are classified as cash outflows from financing activities.

Employee benefits. Wages, salaries, contributions to the Russian Federation state pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits (such as health services) are accrued in the year in which the associated services are rendered by the employees of the Group.

Pension and post-employment benefits. Defined benefit plans. The Group operates defined benefit plans that cover the majority of its employees. Defined benefit plans define the amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service, minimum tariff rate of remuneration and others.

The net liability recognised in the statement of financial position in respect of defined benefit pension plans operated by the Group is the present value of the defined benefit obligation at the end of the reporting period less fair value of plan assets.

The defined benefit obligations are calculated by independent actuary using the projected unit credit method. The present value of the defined benefit obligations are determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid associated with the operation of the plans, and that have terms to maturity approximating the terms of the related pension liabilities.

Actuarial gains and losses arising from remeasurement of pension benefit obligations are recognised in other comprehensive income. Past service cost is immediately recognised in profit or loss within operating expenses.

Defined contribution plans. For defined contribution plans, the Group pays contributions and has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. In the normal course of business the Group contributes to the Russian Federation defined contribution state pension scheme on behalf of its employees. Mandatory contributions to the governmental pension scheme are expensed when incurred and included in employee benefit expenses and payroll taxes in the consolidated income statement.

Other post-employment benefit obligations. The Group pays a one-off financial aid on occasion of an employee's jubilee. The amount of the benefit depends on one or more factors, such as the age, length of service in the company and salary used in the Group companies and others.

For the purpose of calculating benefit obligations of these types, actuarial gains and losses arising as a result of adjustments or changes in actuarial assumptions are recognised within profit or loss in the consolidated statement of income in the period when they arise. All other aspects of accounting for these obligations are similar to those of accounting for defined benefit obligations.

Finance lease liabilities. Where the Group is a lessee in a lease which transferred substantially all the risks and rewards incidental to ownership to the Group, the assets leased are capitalised in property, plant and equipment at the commencement of the lease at the lower of the fair value of the leased asset and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of future finance charges, are included in borrowings. The interest cost is charged to profit or loss over the lease period using the effective interest method. The assets acquired under finance leases are depreciated over their useful life or the shorter lease term if the Group is not reasonably certain that it will obtain ownership by the end of the lease term.

Operating leases. Where the Group is a lessee in a lease which does not transfer substantially all the risk and rewards incidental to ownership from the lessor to the Group, the total lease payments, including those on expected termination, are charged to profit or loss on a straight-line basis over the period of the lease.

When assets are leased out under an operating lease, the lease payments receivable are recognised as rental income on a straight-line basis over the lease term.

Environmental liabilities. Liabilities for environmental remediation are recorded where there is a present obligation, the payment is probable and reliable estimates exist.

Revenue recognition. Revenue is recognised on the delivery of electricity and heat, provisioning for capacity, supply of non-utility services and on the dispatch of goods during the period. Revenue from retail operations is recognised on delivery of electricity and heat to the customer. Revenue amounts are presented exclusive of value added tax.

Revenue transactions under free bilateral contracts are shown net of related purchases of equivalent electricity volumes which the market participant is obliged to make in accordance with the industry regulations. Additional turnover in the amount of RR 10,064 million for the year ended 31 December 2014 (for the year ended 31 December 2013: RR 10,198 million) is shown net for presentation purposes to reflect the economic substance of transactions.

Government grants. Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions. Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight line basis over the expected lives of the related assets. Government grants are included in cash flows from operating activities.

Earnings per share. The earnings per share are determined by dividing the profit attributable to ordinary

shareholders of the Company by the weighted average number of ordinary shares outstanding during the reporting period, excluding the average number of treasury shares held by the Group.

Share capital. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the placement value over the par value of shares issued is recorded as share premium in equity.

Treasury shares. Where the Company or its subsidiaries purchase the Company's equity instruments, the consideration paid, including any directly attributable incremental costs, net of income taxes, is deducted from equity attributable to the Company's owners until the equity instruments are reissued, disposed of or cancelled. In case the consideration paid is non-cash asset, the treasury shares received are recognised at the fair value of this asset. Where such shares are subsequently sold or reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's owners.

Dividends. Dividends are recognised as a liability and deducted from equity at the end of the reporting period only if they are declared (approved by shareholders) before or at the end of the reporting period. Dividends are disclosed when they are declared after the end of the reporting period, but before the consolidated financial statements are authorised for issue.

Social expenditure. To the extent that the Group's contributions to social programmes benefit the community at large without creating constructive obligations to provide such benefits in the future and are not restricted to the Group's employees, they are recognised in the income statement as incurred.

Financial guarantees. Financial guarantees are irrevocable contracts that require the Group to make specified payments to reimburse the holder of the guarantee for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantees are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight-line basis over the life of the guarantee. At the end of each reporting period, the guarantees are measured at the higher of (i) the remaining unamortised balance of the amount at initial recognition, and (ii) the best estimate of expenditure required to settle the obligation at the end of the reporting period.

Segment reporting. Segments are reported in a manner consistent with the internal reporting provided to the Group's chief operating decision maker. Segments whose revenue, result or assets are ten percent or more of all the segments are reported separately.

Critical accounting estimates and judgments in applying accounting policies

The Group makes estimates and assumptions that affect the amounts recognised in the Consolidated Financial Statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgments, apart from those involving estimations, in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the Consolidated Financial Statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Impairment of non-financial assets. At each reporting date management assesses whether there is any indication of impairment of property, plant and equipment. If any such indication exists, management estimates the recoverable amount, which is determined as the higher of an asset's fair value less costs to sell and its value in use. The carrying amount of the asset is reduced to the recoverable amount and the impairment loss is recognised in the consolidated income statement to the extent it exceeds any previous revaluation surplus held in equity. An impairment loss recognised for an asset in prior years may be reversed if there has been a positive change in the estimates used to determine the asset's value in use or fair value less costs to sell.

Accounting for impairment of non-financial assets includes impairment of property, plant and equipment and impairment of investments in associates.

The effect of these critical accounting estimates and assumptions is disclosed in Notes 7 and 8.

Recognition of deferred tax assets. At each reporting date management assesses recoverability of deferred tax assets arising from operating losses and asset impairments in the context of the current economic environment, particularly when current and expected future profits have been adversely affected by market conditions. Management considers first the future reversal of existing deferred tax liabilities and then considers future taxable profits when evaluating deferred tax assets. The assessment is made on a tax payer basis. The future taxable profits and the amount of tax benefits that are probable in the future are

based on the medium term business plans of the Group companies prepared by management and extrapolated results thereafter.

Management considered the recoverability of recognised deferred tax assets, including those on tax losses carried forward, as probable (Note 16).

Useful life of property, plant and equipment. The estimation of the useful life of an item of property, plant and equipment is a matter of management judgment based upon experience with similar assets and other factors. In determining the useful life of an asset, management considers the expected usage, estimated technical obsolescence, physical wear and tear, warranty terms as well as the environment in which the asset is operated. Changes in any of these conditions or estimates may result in adjustments for future depreciation rates which can affect the reported income.

Discontinued operations. In November 2014 management made the announcement of the decision not to sell OJSC DRSK. Based on the above facts, OJSC DRSK was no longer classified as a discontinued operation and as at 31 December 2014 the assets and liabilities of OJSC DRSK were recognised at their recoverable amount at the date of the decision not to sell and a loss in the amount of RR 5,450 million was recognised: RR 4,804 million in profit and loss and RR 646 million (net of tax of RR 144 million) in other comprehensive loss. The recoverable amount of property, plant and equipment of OJSC DRSK at the date of decision not to sell OJSC DRSK comprised RR 23 786 million (Note 7).

Reclassifications

Certain reclassifications have been made to prior year data to conform to the current year presentation. These reclassifications are not material.

Adoption of New or Revised Standards and Interpretations

The following new standards and interpretations became effective from 1 January 2014:

“Offsetting Financial Assets and Financial Liabilities” – Amendments to IAS 32 (issued in December 2011 and effective for annual periods beginning on or after 1 January 2014). The amendment added application guidance to IAS 32 to address inconsistencies identified in applying some of the offsetting criteria. This includes clarifying the meaning of ‘currently has a legally enforceable right of set-off’ and that some gross settlement systems may be considered equivalent to net settlement. The standard clarified that a qualifying right of set off (a) must not be contingent on a future event and (b) must be legally enforceable in all of the following circumstances: (i) in the normal course of business, (ii) the event of default and (iii) the event of insolvency or bankruptcy. The amended standard did not have any material impact on the Group’s consolidated financial statements.

“Amendments to IFRS 10, IFRS 12 and IAS 27 – Investment entities” (issued on 31 October 2012 and effective for annual periods beginning 1 January 2014). The amendment introduced a definition of an investment entity as an entity that (i) obtains funds from investors for the purpose of providing them with investment management services, (ii) commits to its investors that its business purpose is to invest funds solely for capital appreciation or investment income and (iii) measures and evaluates its investments on a fair value basis. An investment entity is required to account for its subsidiaries at fair value through profit or loss, and to consolidate only those subsidiaries that provide services that are related to the entity’s investment activities. IFRS 12 was amended to introduce new disclosures, including any significant judgements made in determining whether an entity is an investment entity and information about financial or other support to an unconsolidated subsidiary, whether intended or already provided to the subsidiary. The amended standard did not have any material impact on the Group’s consolidated financial statements.

IFRIC 21 – “Levies” (issued on 20 May 2013 and effective for annual periods beginning 1 January 2014). The interpretation clarifies the accounting for an obligation to pay a levy that is not income tax. The obligating event that gives rise to a liability is the event identified by the legislation that triggers the obligation to pay the levy. The fact that an entity is economically compelled to continue operating in a future period, or prepares its financial statements under the going concern assumption, does not create an obligation. The same recognition principles apply in interim and annual financial statements. The application of the interpretation to liabilities arising from emissions trading schemes is optional. The interpretation did not have a material impact on the Group’s consolidated financial statements.

Amendments to IAS 36 – “Recoverable amount disclosures for non-financial assets” (issued in May 2013 and effective for annual periods beginning 1 January 2014; earlier application is permitted if IFRS 13 is applied for the same accounting and comparative period). The amendments remove the requirement to disclose the recoverable amount when a CGU contains goodwill or indefinite lived intangible assets but there has been no impairment. The amended standard did not have any material impact on the Group’s

consolidated financial statements.

Amendments to IAS 39 – “Novation of Derivatives and Continuation of Hedge Accounting” (issued in June 2013 and effective for annual periods beginning 1 January 2014). The amendments allow hedge accounting to continue in a situation where a derivative, which has been designated as a hedging instrument, is novated (i.e. parties have agreed to replace their original counterparty with a new one) to effect clearing with a central counterparty as a result of laws or regulation, if specific conditions are met. The amended standard did not have any material impact on the Group’s consolidated financial statements.

Note 3. New accounting pronouncements

The following new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2015 or later approved for adoption in the Russian Federation and which the Group has not early adopted:

Accounting for Acquisitions of Interests in Joint Operations – Amendments to IFRS 11 (issued on 6 May 2014 and effective for the periods beginning on or after 1 January 2016). This amendment adds new guidance on how to account for the acquisition of an interest in a joint operation that constitutes a business. The Group does not expect the amendment to have significant impact on its consolidated financial statements.

Clarification of Acceptable Methods of Depreciation and Amortisation – Amendments to IAS 16 and IAS 38 (issued on 12 May 2014 and effective for the periods beginning on or after 1 January 2016). In this amendment, the IASB has clarified that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The Group does not expect the amendment to have significant impact on its consolidated financial statements.

Amendments to IAS 19 – “Defined benefit plans: Employee contributions” (issued in November 2013 and effective for annual periods beginning 1 July 2014). The amendment allows entities to recognise employee contributions as a reduction in the service cost in the period in which the related employee service is rendered, instead of attributing the contributions to the periods of service, if the amount of the employee contributions is independent of the number of years of service. The amendment is not expected to have any significant impact on the Group’s consolidated financial statements.

Annual Improvements to IFRSs 2012 (issued in December 2013 and effective for annual periods beginning on or after 1 July 2014, unless otherwise stated below). The improvements consist of changes to seven standards. IFRS 2 was amended to clarify the definition of a “vesting condition” and to define separately “performance condition” and “service condition”. The amendment is effective for share-based payment transactions for which the grant date is on or after 1 July 2014. IFRS 3 was amended to clarify that (i) an obligation to pay contingent consideration which meets the definition of a financial instrument is classified as a financial liability or as equity, on the basis of the definitions in IAS 32, and (ii) all non-equity contingent consideration, both financial and non-financial, is measured at fair value at each reporting date, with changes in fair value recognised in profit and loss. Amendments to IFRS 3 are effective for business combinations where the acquisition date is on or after 1 July 2014. IFRS 8 was amended to require (i) disclosure of the judgements made by management in aggregating operating segments, including a description of the segments which have been aggregated and the economic indicators which have been assessed in determining that the aggregated segments share similar economic characteristics, and (ii) a reconciliation of segment assets to the entity’s assets when segment assets are reported. The basis for conclusions on IFRS 13 was amended to clarify that deletion of certain paragraphs in IAS 39 upon publishing of IFRS 13 was not made with an intention to remove the ability to measure short-term receivables and payables at invoice amount where the impact of discounting is immaterial. IAS 16 and IAS 38 were amended to clarify how the gross carrying amount and the accumulated depreciation are treated where an entity uses the revaluation model. IAS 24 was amended to include, as a related party, an entity that provides key management personnel services to the reporting entity or to the parent of the reporting entity (“the management entity”), and to require to disclose the amounts charged to the reporting entity by the management entity for services provided. The Group is currently assessing the impact of the amendments on its consolidated financial statements.

Annual Improvements to IFRSs 2013 (issued in December 2013 and effective for annual periods beginning on or after 1 July 2014). The improvements consist of changes to four standards. The basis for conclusions on IFRS 1 is amended to clarify that, where a new version of a standard is not yet mandatory but is available for early adoption; a first-time adopter can use either the old or the new version, provided the same standard is applied in all periods presented. IFRS 3 was amended to clarify that it does not apply to the accounting for

the formation of any joint arrangement under IFRS 11. The amendment also clarifies that the scope exemption only applies in the financial statements of the joint arrangement itself. The amendment of IFRS 13 clarifies that the portfolio exception in IFRS 13, which allows an entity to measure the fair value of a group of financial assets and financial liabilities on a net basis, applies to all contracts (including contracts to buy or sell non-financial items) that are within the scope of IAS 39 or IFRS 9. IAS 40 was amended to clarify that IAS 40 and IFRS 3 are not mutually exclusive. The guidance in IAS 40 assists preparers to distinguish between investment property and owner-occupied property. Preparers also need to refer to the guidance in IFRS 3 to determine whether the acquisition of an investment property is a business combination. The Group is currently assessing the impact of the amendments on its consolidated financial statements.

IFRS 15, Revenue from Contracts with Customers (issued on 28 May 2014 and effective for the periods beginning on or after 1 January 2017). The new standard introduces the core principle that revenue must be recognised when the goods or services are transferred to the customer, at the transaction price. Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements. When the consideration varies for any reason, minimum amounts must be recognised if they are not at significant risk of reversal. Costs incurred to secure contracts with customers have to be capitalised and amortised over the period when the benefits of the contract are consumed. The amendment is not expected to have any significant impact on the Group's consolidated financial statements.

The following new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2015 or later that are not yet adopted in the Russian Federation and which the Group has not early adopted.

IFRS 9 "Financial Instruments: Classification and Measurement" (amended in July 2014 and effective for annual periods beginning on or after 1 January 2018). Key features of the new standard are:

- Financial assets are required to be classified into three measurement categories: those to be measured subsequently at amortised cost, those to be measured subsequently at fair value through other comprehensive income (FVOCI) and those to be measured subsequently at fair value through profit or loss (FVPL).
- Classification for debt instruments is driven by the entity's business model for managing the financial assets and whether the contractual cash flows represent solely payments of principal and interest (SPPI). If a debt instrument is held to collect, it may be carried at amortised cost if it also meets the SPPI requirement. Debt instruments that meet the SPPI requirement that are held in a portfolio where an entity both holds to collect assets' cash flows and sells assets may be classified as FVOCI. Financial assets that do not contain cash flows that are SPPI must be measured at FVPL (for example, derivatives). Embedded derivatives are no longer separated from financial assets but will be included in assessing the SPPI condition.
- Investments in equity instruments are always measured at fair value. However, management can make an irrevocable election to present changes in fair value in other comprehensive income, provided the instrument is not held for trading. If the equity instrument is held for trading, changes in fair value are presented in profit or loss.
- Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The key change is that an entity will be required to present the effects of changes in own credit risk of financial liabilities designated at fair value through profit or loss in other comprehensive income.
- IFRS 9 introduces a new model for the recognition of impairment losses – the expected credit losses (ECL) model. There is a "three stage" approach which is based on the change in credit quality of financial assets since initial recognition. In practice, the new rules mean that entities will have to record an immediate loss equal to the 12-month ECL on initial recognition of financial assets that are not credit impaired (or lifetime ECL for trade receivables). Where there has been a significant increase in credit risk, impairment is measured using lifetime ECL rather than 12-month ECL. The model includes operational simplifications for lease and trade receivables.
- Hedge accounting requirements were amended to align accounting more closely with risk management. The standard provides entities with an accounting policy choice between applying the hedge accounting requirements of IFRS 9 and continuing to apply IAS 39 to all hedges because the standard currently does not address accounting for macro hedging.

The Group is currently assessing the impact of the new standard on its consolidated financial statements.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28 (issued on 11 September 2014 and effective for annual periods beginning on or after 1 January 2016). These amendments address an inconsistency between the requirements in IFRS 10 and those in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognised when a transaction involves a business. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if these assets are held by a subsidiary. The Group is currently assessing the impact of the amendments on its consolidated financial statements.

Annual Improvements to IFRSs 2014 (issued on 25 September 2014 and effective for annual periods beginning on or after 1 January 2016). The amendments impact four standards. IFRS 5 was amended to clarify that change in the manner of disposal (reclassification from "held for sale" to "held for distribution" or vice versa) does not constitute a change to a plan of sale or distribution, and does not have to be accounted for as such. The amendment to IFRS 7 adds guidance to help management determine whether the terms of an arrangement to service a financial asset which has been transferred constitute continuing involvement, for the purposes of disclosures required by IFRS 7. The amendment also clarifies that the offsetting disclosures of IFRS 7 are not specifically required for all interim periods, unless required by IAS 34. The amendment to IAS 19 clarifies that for post-employment benefit obligations, the decisions regarding discount rate, existence of deep market in high-quality corporate bonds, or which government bonds to use as a basis, should be based on the currency that the liabilities are denominated in, and not the country where they arise. IAS 34 will require a cross reference from the interim financial statements to the location of "information disclosed elsewhere in the interim financial report". The Group is currently assessing the impact of the amendments on its consolidated financial statements.

Disclosure Initiative Amendments to IAS 1 (issued in December 2014 and effective for annual periods on or after 1 January 2016). The Standard was amended to clarify the concept of materiality and explains that an entity need not provide a specific disclosure required by an IFRS if the information resulting from that disclosure is not material, even if the IFRS contains a list of specific requirements or describes them as minimum requirements. The Standard also provides new guidance on subtotals in financial statements, in particular, such subtotals (a) should be comprised of line items made up of amounts recognised and measured in accordance with IFRS; (b) be presented and labelled in a manner that makes the line items that constitute the subtotal clear and understandable; (c) be consistent from period to period; and (d) not be displayed with more prominence than the subtotals and totals required by IFRS standards. The amendment is not expected to have any significant impact on the Group's consolidated financial statements.

Investment Entities: Applying the Consolidation Exception Amendment to IFRS 10, IFRS 12 and IAS 28 (issued in December 2014 and effective for annual periods on or after 1 January 2016). The Standard was amended to clarify that an investment entity should measure at fair value through profit or loss all of its subsidiaries that are themselves investment entities. In addition, the exemption from preparing consolidated financial statements if the entity's ultimate or any intermediate parent produces consolidated financial statements available for public use was amended to clarify that the exemption applies regardless whether the subsidiaries are consolidated or are measured at fair value through profit or loss in accordance with IFRS 10 in such ultimate or any intermediate parent's financial statements. The amendment is not expected to have any significant impact on the Group's consolidated financial statements.

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

Note 4. Principal subsidiaries

All principal subsidiaries are incorporated and operate in the Russian Federation. Differences between the ownership interest and voting interest held by some subsidiaries represent the effect of preference shares and / or effects of indirect ownership, or non-corporate partnership (LLC).

The Group operates in the three main reportable segments one of which is presented by the Group's parent company – OJSC RusHydro (Note 5). The principal subsidiaries are presented below according to their allocation to the reportable segments as at 31 December 2014 and 31 December 2013.

ESC RusHydro subgroup segment

ESC RusHydro subgroup segment includes the Group's subsidiaries which sell electricity to final customers. All the entities included in this segment with the exception of OJSC ESC RusHydro have the guaranteeing supplier status and are obliged to sign contracts on supplies with all final consumers of their region upon their request.

	31 December 2014		31 December 2013	
	% of ownership	% of voting	% of ownership	% of voting
OJSC ESC RusHydro	100.00%	100.00%	100.00%	100.00%
OJSC Krasnoyarskenergosbyt	65.81%	65.81%	65.81%	69.40%
OJSC Ryazan Power Distributing Company	90.52%	90.52%	90.52%	90.52%
OJSC Chuvashskaya energy retail company	100.00%	100.00%	100.00%	100.00%
LLC ESC Bashkortostan	100.00%	-	100.00%	-

RAO Energy System of East subgroup segment

RAO Energy System of East subgroup segment consists of OJSC RAO Energy System of East and its subsidiaries that generate, distribute and sell electricity and heat in the Far East region of the Russian Federation and render transportation, distribution, construction, repair and other services.

Principal subsidiaries of this segment are presented below:

	31 December 2014		31 December 2013	
	% of ownership	% of voting	% of ownership	% of voting
OJSC RAO Energy System of East*	85.92%	86.20%	85.92%	86.20%
OJSC DEK**	44.92%	52.17%	44.92%	52.17%
OJSC DGK**	44.92%	100.00%	44.92%	100.00%
OJSC DRSK**	44.92%	100.00%	44.92%	100.00%
OJSC Kamchatskenergo	84.83%	98.74%	84.83%	98.74%
OJSC Magadanenergo***	42.10%	49.00%	42.10%	64.39%
OJSC Sakhalinenergo	47.72%	55.55%	47.72%	55.55%
OJSC Yakutskenergo	72.21%	79.16%	72.21%	79.16%

* Voting and ownership percent interests in OJSC RAO Energy System of East include 1.80 percent interest held by the Group's subsidiary LLC Vostok-Finance.

** Principal subsidiaries included in DEK subgroup.

*** Control over OJSC Magadanenergo is achieved by the majority of votes on the shareholders meeting because the remaining part of the shares not owned by the Group are distributed among a large number of shareholders the individual stakes of which are insignificant.

Other segments

Other segments include:

- the Group's subsidiaries with production and sale of electricity and capacity;
- the Group's subsidiaries primarily engaged in research and development related to the utilities industry and construction of hydropower facilities;
- the Group's subsidiaries engaged in repair, upgrade and reconstruction of equipment and hydropower facilities;
- the Group's subsidiaries engaged primarily in hydropower plants construction;
- minor segments which do not have similar economic characteristics.

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

Increase / (decrease) in cash and cash equivalents	4,263	1,733	(89)	2,128

The rights of the non-controlling shareholders of the presented subgroups are determined by the Federal Law "On Joint Stock Companies" and the charter documents of OJSC RAO Energy System of East and OJSC DEK.

Note 5. Segment information

Operating segments are components of the Group engaged in operations from which they may earn revenue and incur expenses, including revenue and expenses relating to transactions with other components of the Group. The individual financial information of the segments is available and is regularly reviewed by the chief operating decision maker (CODM) to make operating decisions about resources to be allocated and the performance of segments' operating activities.

Information concerning the Group is considered by the groups of operations which are consolidated in the following separate reportable segments: OJSC RusHydro (Group's parent company), OJSC ESC RusHydro subgroup, RAO Energy System of East subgroup and other segments (Note 4). Transactions of other segments are not disclosed as reportable segments as the performance is based on quantitative indicators for the periods presented.

Management of operating activities of segments is performed with direct participation of individual segment managers accountable to the CODM. Segment managers on a regular basis submit for approval to the CODM results of operating activities and financial performance of segments. The CODM approves the annual business plan at the level of reportable segments as well as analyses actual financial performance of segments. Management bears responsibility for execution of approved plan and management of operating activities at the level of segments.

The segments' operational results are estimated on the basis of EBITDA, which is calculated as operating

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

profit / loss excluding depreciation of property, plant and equipment and intangible assets, impairment of property, plant and equipment, impairment of available-for-sale financial assets, accounts receivable, long-term promissory notes, loss on disposal of property, plant and equipment, loss on remeasurement of net assets of subsidiary acquired exclusively with a view for resale, curtailment in pension payment and pension plan and other non-monetary items of operating expenses. This method of definition of EBITDA may differ from the methods applied by other companies. CODM believes that EBITDA represents the most useful means of assessing the performance of ongoing operating activities of the Company and the Group's subsidiaries, as it reflects the earnings trends without showing the impact of certain charges.

Segment information also contains capital expenditures and the amount of debt as these indicators are analysed by the CODM. Intersegment debt's balances are excluded.

Other information provided to the CODM complies with the information presented in the consolidated financial statements.

Intersegment sales are carried out at market prices.

Segment information for the years ended 31 December 2014 and 31 December 2013 and as at 31 December 2014 and 31 December 2013 is presented below:

Note 6. Related party transactions

Parties are generally considered to be related if the parties are under common control or if one party has the ability to control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

The Group's principal related parties for the year ended 31 December 2014 were joint ventures, associates of the Group (Note 8) and government-related entities.

Joint ventures

The Group had the following balances with its joint ventures:

	Note	31 December 2014	31 December 2013
Promissory notes	10	5,203	4,741
Loans issued		1,492	533

The Group had the following transactions with its joint ventures:

	Year ended 31 December 2014	Year ended 31 December 2013
Sales of electricity and capacity	146	179
Other revenue	569	818
Purchased electricity and capacity	1,049	411

Associates

The Group had the following balances with its associates:

	Year ended 31 December 2014	Year ended 31 December 2013
Trade and other receivables	293	198
Accounts payable	352	26

The Group had the following transactions with its associates:

	Year ended 31 December 2014	Year ended 31 December 2013
Sales of electricity and capacity	2,671	3,040
Other revenue	150	409
Construction services	285	3,193
Purchased electricity and capacity	161	319

Government-related entities

In the normal course of business the Group enters into transactions with the entities controlled by the Government.

The Group had transactions during the years ended 31 December 2014 and 31 December 2013 and balances outstanding as at 31 December 2014 and 31 December 2013 with the following government-related banks: SC Vnesheconombank, OJSC Sberbank of Russia, OJSC Gazprombank, OJSC VTB Bank, PJSC VTB24, OJSC Bank of Moscow, OJSC Rosselkhozbank (Notes 11, 14, 18). All transactions are carried out on market rates.

The Group's sales of electricity, capacity and heat to government-related entities comprised approximately 30 percent of total sales of electricity, capacity and heat for the year ended 31 December 2014 (for the year ended 31 December 2013: approximately 28 percent). Sales of electricity and capacity under the regulated contracts are conducted directly to the consumers, within the day-ahead market (DAM) – through commission agreements with OJSC Centre of Financial Settlements (hereinafter referred to as "CFS"). Electricity and capacity supply tariffs under the regulated contracts and electricity and heating supply tariffs in non-pricing zone of the Far East are approved by FTS and by regional regulatory authorities of the Russian Federation. On DAM the price is determined by balancing the demand and supply and such price is applied to all market participants. Sales of heat are subject to tariff regulations (Note 1). During the period the Group received government subsidies in amount of RR 12,428 million (in 2013 in the amount of RR 13,246 million) (Note 23).

The Group's purchases of electricity, capacity and fuel from government-related entities comprised

approximately 25 percent of total expenses on purchased electricity, capacity and fuel for the year ended 31 December 2014 (for the year ended 31 December 2013: approximately 27 percent).

Electricity distribution services provided to the Group by government-related entities comprised approximately 60 percent of total electricity distribution expenses for the year ended 31 December 2014 (for the year ended 31 December 2013: approximately 62 percent). The distribution of electricity is subject to tariff regulations.

Key management of the Group. Key management of the Group includes members of the Board of Directors of the Company, members of the Management Board of the Company, heads of the business subdivisions of the Company and their deputies, key management of subsidiaries of RAO Energy System of East subgroup segment.

Remuneration to the members of the Board of Directors of the Company for their services in their capacity and for attending Board meetings is paid depending on the results for the year and is calculated based on specific remuneration policy approved by the Annual General Shareholders Meeting of the Company.

Remuneration to the members of the Management Board and to other key management of the Group is paid for their services in full time management positions and is made up of a contractual salary and performance bonuses depending on the results of the work for the period based on key performance indicators approved by the Board of Directors of the Company.

Main compensation for Key management of the Group generally is short-term excluding future payments under pension plans with defined benefits. Pension benefits for key management of the Group are provided on the same terms as for the rest of employees.

Short-term remuneration paid to the key management of the Group for the year ended 31 December 2014 comprised RR 2,365 million (for the year ended 31 December 2013: RR 1,715 million).

As at 31 December 2014 included in the net book value of the property, plant and equipment are office buildings and plots of land owned by the Group in the amount of RR 7,869 million (31 December 2013: RR 8,014 million) which are stated at cost.

Assets under construction represent the expenditures for property, plant and equipment that are being constructed, including hydropower plants under construction, and advances to construction companies and suppliers of property, plant and equipment. As at 31 December 2014 such advances amounted to RR 51,785 million (31 December 2013: RR 49,577 million).

Additions to assets under construction included capitalised borrowing costs in the amount of RR 9,347 million, the capitalisation rate was 8.77 percent (for the year ended 31 December 2013: RR 6,502 million, the capitalisation rate was 8.09 percent).

Additions to assets under construction included capitalised depreciation in the amount of RR 149 million (for the year ended 31 December 2013: RR 1,056 million).

Other property, plant and equipment include motor vehicles, land, computer equipment, office fixtures and other equipment.

Management of the Group considers that the carrying amount of property, plant and equipment as at 31 December 2014 and 31 December 2013 does not differ materially from their fair value at the end of the reporting period.

Process of fair value of property, plant and equipment assesement

Management of the Group determines the fair value of property, plant and equipment according to the following procedures.

The Group's property, plant and equipment are mainly represented by specialised property: the Group's key assets are represented by unique hydro engineering structures and power equipment manufactured under certain technical specifications for each power plant; such equipment is rarely sold in the market.

The Group's management determines the value of the specialised property on a regular basis, using the cost approach. The cost approach is based on the economic concept which implies that a buyer will pay no more for an asset than it would cost to develop or obtain another asset with the same functionality. The total costs of replacement or reproduction of the analysed asset resulting from such measurement are decreased by the amount of physical, functional and economic depreciation.

The replacement costs are determined based on specialised reference books, regulatory documents, construction rates, manufacturer's prices in effect as of the valuation date; physical and functional depreciation is measured based on the age of the assets, their actual condition and operating mode, etc.

To determine the economic depreciation of specialised assets, the Group's management calculates the recoverable amount using the income approach. It is based on discounted cash flow method, and the Group uses certain assumptions when building the cash flow forecast. In particular, these assumptions are used to determine the expected cash flows, capital expenditures and discount rates for each cash generating unit. The Group's management determines the forecast horizon, and net cash inflows from the asset's operation are calculated for each period of this horizon. The recoverable amount of the cash generating unit is determined by recalculating the discounted net cash flows. The Group's management believes that the Group subsidiaries and Company's branches are separate cash generating units.

When the recoverable amount of the cash generating unit is higher than the replacement cost less physical and functional depreciation of property, plant and equipment included in this cash generating unit, it is concluded that there is no economic depreciation. If this is not the case and if the recoverable amount is less than the carrying amount of cash generating unit, the economic impairment is determined as the difference between the recoverable amount and the carrying amount.

Impairment of property, plant and equipment as at 31 December 2014 and 31 December 2013

The following key assumptions were used when the cash flow testing was performed for the years ended 31 December 2014 and 31 December 2013:

Key assumptions used in the cash flow testing	Year ended 31 December 2014	Year ended 31 December 2013
Information used	Actual operating results for 2014 and business plans for 2015–2020	Actual operating results for 2013 and business plans for 2014–2017
Forecast period*	For existing plants 10 years (2015–2024) For plants under construction - 20 years after commissioning and before the completion of capacity sale contracts (2015–2038) For cash-generating units of the Far East - 11-25 years (2015–2040)	For existing plants 10 years (2014–2023) For plants under construction - 20 years after commissioning and before the completion of capacity sale contracts (2014–2037) For cash-generating units of the Far East - 11-25 years (2014–2039)
Forecasted growth rates in terminal period	4.0 – 4.1 percent, depending on the length of the forecast period	3.0 – 3.9 percent, depending on the length of the forecast period
Discount rate before tax (based on weighted average cost of capital)	14.4 – 17.8 percent (RR)	12.4 – 14.0 percent (RR)
Forecast of electricity and capacity tariffs in the isolated energy systems and in non-pricing zone of the Far East	Based on methodology of tariffs calculation adopted by regulatory authority	
Forecast of electricity and capacity prices in competitive market	Based on the forecast of OJSC ATS and forecast rates on energy prices growth prepared by the Ministry of Economic Development of RF	
Forecast of capacity prices related to competitive capacity selection	For 2015 – based on the results of competitive capacity selection, except for stations, where regulated tariffs are used For 2016–2024 – adjusted on consumer index price and forecasts of CJSC Energy Forecasting Agency	For 2014 – based on the results of competitive capacity selection, except for stations, where regulated tariffs are used For 2015–2023 – adjusted on consumer index price
Forecast of electricity and capacity volumes	Based on the Company's management assessment of future trends in the business	
Forecast of capital expenditures	Based on the management valuation of capital expenditures on modernisation and reconstruction programme	

* Management considers that a forecast period greater than five years is appropriate as the wholesale electricity and capacity market is expected to change significantly over the forecast period and cash flow projections will not be stabilised within five years. However a forecast period of cash flows was defined by remaining useful life of assets tested. For hydroelectric power plants this period exceeds 100 years due to the fact that key asset is a dam. In this regard the recoverable amount of assets was defined based on cash flows during the forecast period and terminal values.

The values assigned to the key assumptions represent management's assessment of future trends in the business and are based on both external and internal sources.

Loss was recognized mainly in respect of receipt of fixed assets as a cash-generating unit means impaired in prior periods. As a result, impairment loss in the amount of RR 8,991 million was recognised in Consolidated Income Statement and decrease of previous revaluation reserve in the amount of RR 7,746 million (before income tax of RR 1,549 million) – in other comprehensive loss.

The net book value of property, plant and equipment of the Group decreased for the total amount of RR 16,737 million, the effects relate mainly to the following cash-generating units:

- Saratovskaya HPP – impairment loss in the amount of RR 3,642 million and decrease of previous revaluation reserve in the amount of RR 7,612 million;
- Cascade of Kubanskiye HPPs – impairment loss in the amount of RR 1,871 million and decrease of previous revaluation reserve in the amount of RR nil million;
- Zeiskaya HPP – impairment loss in the amount of RR 755 million and decrease of previous revaluation reserve in the amount of RR 1 million;
- Zagorskaya GAES – impairment loss in the amount of RR 609 million and decrease of previous revaluation reserve in the amount of RR nil million.

The sensitivity analysis of the recoverable amounts of cash-generating units for the key assumptions is presented in Note 31.

For the year ended 31 December 2014 revaluation of reserve for ash dump obligations (Note 28) due to discount rate increase resulted in impairment loss reduction in the amount of RR 107 million and other comprehensive income in the amount of RR 22 million.

As at 31 December 2013 net book value of property, plant and equipment decreased for the total amount of RR 43,541 million. As a result, impairment loss in the amount of RR 18,995 million was recognised in Consolidated Income Statement and decrease of previous revaluation reserve in the amount of RR 24,546 million (before income tax of RR 4,909 million) – in other comprehensive loss.

The carrying amount of each class of property, plant and equipment that would have been recognised had the assets been carried under the cost model is as follows:

	Production buildings	Facilities	Plant and equipment	Assets under construction	Other	Total
Net book value as at 31 December 2014	28,409	103,047	124,524	231,039	1,914	488,933
Net book value as at 31 December 2013	27,834	107,607	101,344	192,075	4,235	433,095

Events on Zagorskaya GAES-2. On 17 September 2013 there was a partial flooding at Zagorskaya GAES-2 which is under construction in the Moscow Region. The flooding of the GAES building originated from the lower reservoir via functional joints of the station block and a newly formed cavity in the right junction of the GAES-2 building foundation (hereinafter "the technical incident").

Currently management of the Group cannot reliably estimate expenses that may be necessary to eliminate consequences of the technical incident and write-off damaged assets under construction items. However, these expenses may be material for the Group. Construction and assembly works as well as property, including equipment, are insured and management of the Group continue working with the insurance companies.

As of today OJSC AlfaStrakhovanie and OJSC SOGAZ have recognized the technical incident at Zagorskaya GAES-2 as an insured event. The maximum insurance amount under the contract with OJSC SOGAZ is RR 2.6 billion and under the contract with OJSC AlfaStrakhovanie it is RR 1.2 billion. Negotiations are under way with OJSC Ingosstrakh who together with OJSC AlfaStrakhovanie is the insurer of risks associated with the construction and assembly work but has not yet finalized the insured event recognition process.

Works at the station block of Zagorskaya GAES-2 are being carried on along with the negotiations on the insurance indemnity. In 2014 the station unit was stabilized, a stock-take of equipment was performed as well as the inspection for damage. The Group specialists in cooperation with the engaged independent expert, the German engineering company Lahmeyer International, have come to the conclusion that in the circumstances the method of compensation grouting would be the optimal recovery technique. Under this method the GAES building is to be levelled by increasing the bank yard under it.

As at 31 December 2014 total construction costs for Zagorskaya GAES-2 amounted to RR 62,121 million.

Management of the Group believes that there are no indications of property, plant and equipment impairment as at 31 December 2014 there were capacity supply contracts concluded in respect of new power generation facilities of Zagorskaya GAES-2, that guarantee the payback period of 20 years for all capital expenses invested in construction in the period.

Leased equipment. As at 31 December 2014 the net book value of assets held under finance lease and included in property, plant and equipment was RR 4,639 million (31 December 2013: RR 4,564 million). Assets held under finance lease were mainly represented by plant and equipment.

Operating lease. The Group leases a number of land areas owned by local governments and production buildings under non-cancellable operating lease agreements. Land lease payments are determined by lease agreements. The land areas leased by the Group are the territories on which the Group's hydropower plants and other assets are located. According to the Land Code of the Russian Federation such land areas are limited in their alienability and cannot become private property. The Group's operating leases typically run for an initial period of 5-49 years with an option to renew the lease after that date. Lease payments are reviewed regularly.

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

The future payments under non-cancellable operating leases in accordance with rates as at the reporting period end are as follows:

	31 December 2014	31 December 2013
Less than one year	2,174	2,290
Between one and five years	4,169	3,635
After five years	40,028	35,332
Total	46,371	41,257

Pledged assets. As at 31 December 2014 RR 3 million of property, plant and equipment have been pledged as collateral for borrowings (31 December 2013: RR nil million).

Note 8. Investments in associates and joint ventures

The Group's interests in associates and joint ventures and its carrying value were as follows:

	Place of business	% held		Carrying value	
		31 December 2014	31 December 2013	31 December 2014	31 December 2013

Associates

OJSC Irkutsk Electronetwork Company (OJSC IENC)

OJSC IENC maintains 0.4–500 kW electric grids of the Irkutsk region with the total length of over 40,000 km and more than 8,900 transforming substations with total capacity of over 26,000 MVA. The core activities of OJSC IENC are provision of services of electricity transmission via electric grids in the interests of large consumers and utilities companies, i.e. entities operating in the wholesale electricity and capacity market. OJSC IENC is controlled by EN+ Group.

The Group's investments in OJSC IENC represent its strategic assets and allow the Group to use them in the acquisition and asset exchange transactions; in addition, they represent a source of dividends.

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

(in millions of Russian Rubles unless noted otherwise)

OJSC Sakhalin Energy Company (OJSC SEC)

OJSC SEC is the customer-developer of a number of electricity sector assets in the Sakhalin region as part of the federal special purpose program Economic and Social Development of the Far East and Transbaikalia until 2014 and the oblast's special purpose program Power Sector Development in the Sakhalin Region until 2010 and for the Long-term Period until 2020. OJSC SEC's major investment project was the Construction of Power Generating Unit No. 4 at Yuzhno-Sakhalinsk Thermal Power Plant-1, which is operated by OJSC Sakhalinenergo, the Group's subsidiary, under a lease agreement. Other OJSC SEC's shareholders, in addition to the Group, are the Russian Government and the government of the Sakhalin region represented by the Ministry of Land and Property Affairs of Sakhalin region

The Group's investments in OJSC SEC represent strategic assets which allow a more efficient joint operation of the assets of Sakhalinenergo and OJSC SEC.

The Group's share in OJSC SEC changed as a result of the additional share issues of OJSC SEC. As at 31 December 2014 the Group's share in OJSC SEC comprised 36.09 percent.

PJSC Krasnoyarskaya HPP

In July 2014 25 percent minus 1 share of PJSC Krasnoyarskaya HPP were transferred by the Group's subsidiary OJSC HydroInvest to OJSC EuroSibEnergo in exchange of 3.39 percent of treasury shares (Note 15). Remaining 0.12 percent of shares of PJSC Krasnoyarskaya HPP were reclassified to available-for-sale financial assets.

Summarised financial information for significant associates for the years ended 31 December 2014 and 31 December 2013 and as at 31 December 2014 and 31 December 2013:

Joint ventures*BoGES Group and BALP Group*

Starting from 2006 the Company and RUSAL Group have been jointly implementing the BEMA project based on an agreement for mutual financing, completion and subsequent operation of Boguchanskaya HPP, with an installed capacity of 2,997 MW, and Boguchansky aluminium plant, with a capacity of 600,000 tonnes of aluminium per annum. Within the BEMA project on parity basis joint ventures BoGES Ltd (Cyprus) and BALP Ltd (Cyprus) were formed, which have controlling interests in OJSC Boguchanskaya HPP and CJSC Boguchansky Aluminium Plant.

BoGES Ltd and OJSC Boguchanskaya GES together form BoGES Group. BALP Ltd and CJSC Boguchansky Aluminium Plant together form BALP Group.

BoGES Ltd and BALP Ltd provide corporate governance of Boguchanskaya HPP and Boguchansky Aluminium Plant in line with the parity of interests of the investors and are not engaged in other operations.

Starting from November 2012, Boguchanskaya HPP sells electricity and capacity to large consumers and utilities companies, having commissioned hydroelectric generating units of Boguchanskaya HPP and having the status of an entity operating in the wholesale electricity and capacity market.

The construction of Boguchansky Aluminium Plant is ongoing. Boguchansky Aluminium Plant will become a key consumer of energy generated by Boguchanskaya HPP. The plant's production complex will include electrolytic, casting and anode production facilities.

Carrying value as at 31 December 2014	1,048	-	1,140	2,188

The Group has issued guarantees for CJSC Boguchansky Aluminium Plant in favour of its suppliers for future equipment deliveries and for OJSC Boguchanskaya HPP for the loan facility in favour of the State Corporation Vnesheconombank (Note 28).

In accordance with investment programme of the Company the Group has to invest RR 3,449 million for the period 2015–2017 in construction Boguchanskaya HPP (RR 142 million for the period 2014–2016), as well as RR 13,373 million for the period 2015–2017 in construction Boguchansky Aluminium Plant (RR 25,257 million for the period 2014–2016).

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

Note 9. Available-for-sale financial assets

	31 December 2014		31 December 2013	
	% of ownership	Fair value	% of ownership	Fair value
OJSC Inter RAO	4,92%	3,654	4.92%	5,132
OJSC Russian Grids	0,28%	212	0.28%	356
OJSC FGC UES	0,13%	76	0.13%	150
Other	-	190	-	156
Total available-for-sale financial assets		4,132		5,794

The fair values of available-for-sale financial assets were calculated based on quoted market prices, for those which are not publicly traded fair values were estimated by reference to the discounted cash flows of the investees (Note 31).

For the year ended 31 December 2014 an impairment of available-for-sale financial assets in respect of shares of OJSC Inter RAO was recognised in profit or loss in the amount of RR 1,478 million (for the year ended 31 December 2013: RR 7,594 million).

Loss arising on other available-for-sale financial assets for the year ended 31 December 2014 totaled RR 261 million was recorded within other comprehensive income in amount of RR 42 million, net of tax, (for the year ended 31 December 2013: RR 586 million, net of tax) and in profit or loss in amount of RR 303 million (for the year ended 31 December 2013: RR 350 million).

Note 10. Other non-current assets

	31 December 2014	31 December 2013

Other					43	93
Total long-term promissory notes					6,158	5,644

* Banks' ratings are presented as at 31 December 2014. The ratings of several banks decreased after the year end.

Promissory notes of OJSC Boguchanskaya HPP. As at 31 December 2014 the amortised cost of interest-free long-term promissory notes of OJSC Boguchanskaya HPP (payable not earlier than 31 December 2029 with total nominal value of RR 21,027 million) pledged as collateral to the State Corporation Vnesheconombank amounted to RR 5,203 million (31 December 2013: RR 4,741 million) (Note 8).

Promissory notes of CJSC Boguchansky Aluminium Plant. As a result of the performed analysis as at 31 December 2013, management of the Group concluded that promissory notes of CJSC Boguchansky Aluminium Plant are highly probable not recoverable and recognised an impairment loss of RR 1,633 million (including unwinding of discount for the period). As at 31 December 2014 there were no indicators for reversal of impairment of these promissory notes.

Dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs. As at 31 December 2014 the carrying value of dams of Bratskaya, Ust'-Ilimskaya and Irkutskaya HPPs owned by the Group received in 2011 in the course of additional share issue of the Company was RR 5,478 million. The recoverable amount of these dams is

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

estimated by management based on future cash flows. Key assumption as at 31 December 2014 used for the cash flows analysis is estimation of the annual consideration, received from OJSC Irkutskenergo and respective to market value of right of temporary ownership and use this property.

Goodwill and customer base. Presented below is the carrying value of goodwill:

	Year ended 31 December 2014	Year ended 31 December 2013
Gross book value as of 1 January	3,013	3,013
Accumulated impairment losses as of 1 January	(2,084)	(2,084)
Carrying amount as of 1 January	929	929
Impairment loss	-	-
Carrying amount as of 31 December	929	929
Gross book value as of 31 December	3,013	3,013
Accumulated impairment losses as of 31 December	(2,084)	(2,084)

Goodwill of OJSC Institute Hydroproject. Goodwill of RR 929 million was recognised at the date of the acquisition of OJSC Institute Hydroproject in October 2010 as the Group was able to receive economic benefits from the expected synergy from the high qualification of engineering specialists and long-term relationships between OJSC Institute Hydroproject and customers, including the Group entities.

As at 31 December 2014 and 31 December 2013, the Group tested goodwill related to OJSC Institute Hydroproject for its potential impairment. For the testing purposes, OJSC Institute Hydroproject was considered as a single cash generating asset.

Presented below are key assumptions used for the impairment testing purposes for the years ended 31 December 2014 and 31 December 2013:

Key assumptions used for the impairment testing purposes	For the year ended 31 December 2014	For the year ended 31 December 2013
Information used	Actual performance for 2014 and results of business plans for 2015-2019	Actual performance for 2013 and results of business plans for 2014-2018
Forecast period	5 years	5 years
Growth interest rate after the forecast period	4.3 percent	3.6 percent
Discount rate	16.1 percent	13.9 percent
Net cash inflow after the forecast period	Minimum expectation: RR 167 million in 2015, RR 175 million in 2016, RR 182 million in 2017, RR 193 million in 2018, RR 201 million in 2019	Minimum expectation: RR 216 million in 2014, RR 179million in 2015, RR 200 million in 2016, RR 234 million in 2017, RR 243 million in 2018
Net cash inflow after the forecast period	Minimum expectation: RR 178 million per year	Minimum expectation: RR 250 million per year

Based on the above assumptions, as at 31 December 2014 and 31 December 2013 the recoverable amount of OJSC Institute Hydroproject as a cash generating asset exceeded the carrying amount – there is no economic impairment.

Customer base of LLC ESC Baskortostan. As at 31 December 2014 and 31 December 2013 the Group tested customer base of LLC ESC Baskortostan for potential impairment. For the testing purposes LLC ESC Baskortostan was considered as a single cash generating unit.

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

(in millions of Russian Rubles unless noted otherwise)

Presented below are key assumptions used for the impairment testing purposes:

Key assumptions used for the impairment testing purposes	For the year ended 31 December 2014	For the year ended 31 December 2013
Information used	Actual performance for 2014 and results of business plans for 2015-2019	Actual performance for 2013 and results of business plans for 2014-2018
Forecast period*	10 years (2015-2024)	10 years (2014-2023)
Growth interest rate after the forecast period	4.0 percent	2.3 percent
Discount rate	15.2 percent	14.2 percent
Forecast electricity sales	Based on management forecast	
Forecast electricity tariffs	2015 – based on tariffs set by regulators 2016-2024 – based on the consumer price index	2014 – based on tariffs set by regulators 2015-2023 – based on the consumer price index

* The management believes that the forecast period exceeding five years is more reliable as the electricity and capacity market is expected to undergo significant changes during the forecast period, and cash flows will not flatten out within five years.

As at 31 December 2014 and 31 December 2013 the recoverable amount of LLC ESC Baskortostan exceeded the carrying amount – no loss on impairment related to the customer base of LLC ESC Baskortostan was recognised.

Note 11. Cash and cash equivalents

	31 December 2014	31 December 2013
Cash at bank	14,960	10,744
Cash equivalents (contractual interest rate: 9.25-29.40%)	19,417	23,712
Cash in hand	17	16
Total cash and cash equivalents	34,394	34,472

Cash equivalents held as at 31 December 2014 and 31 December 2013 comprised short-term bank deposits with original maturities of three months or less.

Cash and cash equivalents balances denominated in US Dollars as at 31 December 2014 were RR 767 million (31 December 2013: RR 252 million). Cash and cash equivalents balances denominated in Euros as at 31 December 2014 were RR 2,310 million (31 December 2013: RR 682 million).

RusHydro Group

* Banks' ratings are presented as at 31 December 2014. The ratings of several banks decreased after the year end.

Note 12. Accounts receivable and prepayments

	31 December 2014	31 December 2013
Trade receivables	50,931	45,716
Provision for impairment of trade receivables	(18,643)	(15,374)
Trade receivables, net	32,288	30,342
VAT recoverable	8,683	8,059
Advances to suppliers and other prepayments	3,957	4,612
Provision for impairment of advances to suppliers and other prepayments	(670)	(460)
Advances to suppliers and other prepayments, net	3,287	4,152
Other receivables	6,637	5,350
Provision for impairment of other receivables	(2,883)	(2,518)
Other receivables, net	3,754	2,832
Total accounts receivable and prepayments	48,012	45,385

The provision for impairment of accounts receivable has been determined based on specific customer identification, customer payment trends, subsequent receipts and settlements and the analysis of expected future cash flows (Note 2). The Group believes that the Group's subsidiaries will be able to realise the net receivable amount through direct collections and other non-cash settlements, and the carrying value approximates their fair value.

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

Movements in the impairment provision for accounts receivables and prepayments are as follows:

	Year ended 31 December 2014	Year ended 31 December 2013
As at 1 January	18,352	14,465
Charge for the year	8,893	7,241
Reversal of impairment	(3,346)	(2,754)
Trade receivables written-off as uncollectible	(1,626)	(618)
Disposal of impairment provision due to disposal of subsidiaries	(77)	-
Transfer of assets of the subsidiary acquired with a view for resale	-	18
As at 31 December	22,196	18,352

The ageing analysis of trade and other finance accounts receivable is as follows:

	31 December 2014	Provision as at 31 December 2014	31 December 2013	Provision as at 31 December 2013
Not past due	26,143	(967)	23,855	(547)
Past due for less than 3 months	6,229	(953)	5,021	(897)
Past due for 3 months to 1 year	8,139	(3,838)	8,344	(4,854)
Past due for more than 1 year	16,127	(15,768)	13,183	(11,594)
Total	56,638	(21,526)	50,403	(17,892)

The majority of trade debtors which are neither past due nor impaired could be aggregated in several groups based on similarities in their credit quality: large industrial consumers – participants of the wholesale and retail electricity and capacity market as well as public sector entities and population.

The Group does not hold any accounts receivable pledged as collateral.

Note 13. Inventories

	31 December 2014	31 December 2013
Fuel	13,229	13,329
Materials and supplies	6,383	6,249
Spare parts	2,085	1,524
Other materials	645	536
Total inventories before provision for impairment	22,342	21,638
Provision for impairment of inventories	(209)	(189)
Total inventories	22,133	21,449

There are no inventories pledged as collateral for borrowings as at 31 December 2014 and as at 31 December 2013.

Note 14. Other current assets

	31 December 2014	31 December 2013
Deposits and promissory notes	40,122	52,406
Loans issued	1,484	530

* Banks' ratings are presented as at 31 December 2014. The ratings of several banks decreased after the year end.

Note 15. Equity

	Number of issued and fully paid ordinary shares (Par value of RR 1.00)
As at 31 December 2014	386,255,464,890
As at 31 December 2013	386,255,464,890
As at 31 December 2012	317,637,520,094

Additional share issue 2012–2013. On 16 November 2012 the Extraordinary General Meeting of shareholders of the Company adopted a resolution to make a placement of 110,000,000,000 ordinary shares with a par value of RR 1.00 by open subscription with cash and non-cash considerations. On 10 December 2012 the Board of Directors of the Company determined the placement price of RR 1.00 per share.

As part of this issue the Group received:

- in 2012 the funds in amount RR 50,000 million from the Russian Federation to fund construction of four heat power plants in the Far East region;
- in 2013 19.54 percent shares of OJSC RAO Energy System of East, 24.54 percent shares of OJSC SEC, 14.83 percent shares of OJSC Ust'-Srednekanskaya HPP, 42.75 percent shares of OJSC IENC, 0.08 percent shares of OJSC Irkutskenergo.

68,617,944,796 shares were actually placed as a result of the issue, which represents 62.38 percent of the additional issue's total number of securities.

The Report based on the results of additional share issue was registered by the Bank of Russia on 26 December 2013.

Treasury shares. As at 31 December 2014 treasury shares were represented by 21,786,611,933 ordinary shares in the amount of RR 26,092 million (31 December 2013: 8,703,807,839 ordinary shares in the amount of RR 10,662 million).

In July 2014 3.39 percent of treasury shares were received by the Group's subsidiary OJSC HydroInvest from OJSC EuroSibEnergo in exchange of 25 percent minus 1 share of PJSC Krasnoyarskaya HPP (Note 8).

Treasury shares carry voting rights in the same proportion as other ordinary shares. Voting rights of ordinary shares of the Company held by entities within the Group are effectively controlled by management of the Group.

Transactions with the Government and companies under common control. The change of merge reserve for the year ended 31 December 2013 in the amount of RR 7,859 million relates to assets that were received in 2013 from the Russian Federation and companies under common control in the course of additional share issue 2012–2013.

As a result of the increase in Group's share in OJSC RAO Energy System of East non-controlling interest decreased by RR 6,563 million and retained earnings of the Group increased in the same amount.

As a result of the increase in Group's share in OJSC Ust'-Srednekanskaya HPP non-controlling interest increased by RR 293 million and retained earnings of the Group decreased by the same amount due to increase of share of Group's shareholders in losses accumulated by OJSC Ust'-Srednekanskaya HPP.

Effect of changes in non-controlling interest of subsidiaries. During 2014 the placement of additional share issue of OJSC Ust'-Srednekanskaya HPP and OJSC Zaramag HS were registered. As a result non-controlling interest increased by RR 78 million due to increase of share in losses of OJSC Ust'-Srednekanskaya HPP and OJSC Zaramag HS previously absorbed by shareholders of the Group.

In 2013 in the course of additional share issue 2012–2013 the Group also has received shares of OJSC RAO Energy System of East from shareholders which are not controlled by the Government. As a result non-controlling interest decreased by RR 2,671 million and retained earnings of the Group increased by RR 1,812 million.

Dividends. In accordance with the Russian legislation the Company and its subsidiaries distribute profits as dividends on the basis of financial statements prepared in accordance with Russian accounting standards.

On 27 June 2014 the Company declared dividends for the year ended 31 December 2013 of RR 0.0136 per share in the total amount of RR 5,248 million (RR 5,130 million excluding dividends to subsidiaries).

On 28 June 2013 the Company declared dividends for the year ended 31 December 2012 of RR 0.0096 per share in the total amount of RR 3,675 million (RR 3,594 million excluding dividends to subsidiaries).

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

(in millions of Russian Rubles unless noted otherwise)

Dividends in favour of non-controlling interest holders were declared by the Group's subsidiaries in the amount of RR 80 million for the year ended 31 December 2014 (for the year ended 31 December 2013: RR 160 million).

Note 16. Income tax

Income tax expense is as follows:

	Year ended 31 December 2014	Year ended 31 December 2013
Current income tax expense	7,450	10,248
Deferred income tax / (benefit)	610	(6,056)
Total income tax expense	8,060	4,192

The income tax rate applicable to the majority of the Group's entities for the year ended 31 December 2014 is 20 percent (for the year ended 31 December 2013: 20 percent).

A reconciliation between the expected and actual income tax expense is provided below:

	Year ended 31 December 2014	Year ended 31 December 2013
Profit before income tax	32,191	25,185
Theoretical tax expense at a statutory rate of 20 percent	(6,438)	(5,037)
Tax effect of items which are not deductible or assessable for taxation purposes	(1,469)	(2,335)
Change in unrecognised deferred tax assets in respect of investments in associates and joint ventures (Note 8)	(68)	511
Unrecognised deferred tax assets related to impairment of available-for-sale financial assets (Note 9)	(334)	(1,589)
(Increase) in other unrecognised deferred tax assets / Use of other deferred tax assets unrecognised in previous periods	(1,053)	1,695
Write-off of deferred tax related to subsidiary acquired exclusively with a view for resale (Note 2)	-	1,873
Other	1,302	690
Total income tax expense	(8,060)	(4,192)

The total amount of deductible temporary differences for which deferred income tax assets have not been recognised by the Group as at 31 December 2014 comprised RR 51,960 million (31 December 2013: RR 46,574 million). These temporary differences mainly relate to accumulated impairment of property, plant and equipment, assets under construction and pension liabilities of several Group's subsidiaries.

Deferred income tax. Differences between IFRS and statutory taxation regulations in the Russian Federation give rise to temporary differences between the carrying amount of certain assets and liabilities for financial reporting purposes and their tax bases. The tax effect of the movements in these temporary differences is detailed below and is recorded at the rate of 20 percent (for the year ended 31 December 2013: 20 percent).

RusHydro Group

Under existing Group' structure tax losses and current income tax assets of different Group's entities may not be offset against current income tax liabilities and taxable profits of other Group's entities and, accordingly, taxes may be accrued even where there is a consolidated tax loss. Therefore, deferred income tax assets and liabilities are offset only when they relate to the same taxable entity and the entity has legal rights to offset it.

(in millions of Russian Rubles unless noted otherwise)

Note 17. Pension benefit obligations

The tables below provide information about the benefit obligations and actuarial assumptions used for the years ended 31 December 2014 and 31 December 2013.

Amounts recognised in the Group's Consolidated Statement of Financial Position among other non-current liabilities (Note 19):

	31 December 2014	31 December 2013
Fair value of plan assets	(986)	(856)
Present value of defined benefit obligations	7,874	9,243
Net liability	6,888	8,387

The movements in the defined benefit liability for the years ended 31 December 2014 and 31 December 2013 are presented in the tables below:

	Present value of defined benefit obligations	Fair value of plan assets	Total
At 1 January 2014	9,243	(856)	8,387
Recognition assets related to the OJSC DGK agreements	-	(35)	(35)
Current service cost	407	-	407
Interest expense / (income)	725	(70)	655
Past service cost	343	-	343
Curtailment in pension payment	(501)	-	(501)
Remeasurement effects (for other long-term benefits):			
Actuarial gain - changes in actuarial assumptions	(74)	-	(74)
Actuarial loss - experience adjustment	203	-	203
Recognised in profit or loss for the year ended 31 December 2014	1,103	(70)	1,033
Remeasurements (for post-employment benefits):			
Actuarial loss - change in demographic assumptions	72	-	72
Actuarial gain - change in financial assumptions	(2,190)	-	(2,190)
Actuarial loss - experience adjustments	361	18	379
Recognised other comprehensive income for the year ended 31 December 2014 before income tax charge of RR 347 million	(1,757)	18	(1,739)
Employer contributions for funded pension plan	-	(270)	(270)
Benefit payments (Funding NSPF pensions)	(400)	227	(173)
Benefit payments (Non-funded pension plan)	(315)	-	(315)
At 31 December 2014	7,874	(986)	6,888

In July 2014 OJSC DGK decided to reduce payments to the pensioners. As a result the Group recognised RR 501 million gain for the year ended 31 December 2014 (Note 24).

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

	Present value of defined benefit obligations	Fair value of plan assets	Total
At 1 January 2013	10,482	(824)	9,658
Reclassification of plan assets	-	67	67
Current service cost	442	-	442
Interest expense / (income)	628	(57)	571
Past service cost	9	-	9
Curtailment in pension plan	(1,609)	-	(1,609)
Remeasurement effects (for other long-term benefits):			
Actuarial gain - changes in actuarial assumptions	(17)	-	(17)
Actuarial gain - experience adjustment	(23)	-	(23)
Recognised in profit or loss for the year ended 31 December 2013	(570)	(57)	(627)
Remeasurements (for post-employment benefits):			
Actuarial loss - change in demographic assumptions	249	-	249
Actuarial gain - change in financial assumptions	(1,131)	-	(1,131)
Actuarial loss / (gain) - experience adjustments	824	(68)	756
Recognised other comprehensive income for the year ended 31 December 2013 before income tax charge of RR 25 million	(58)	(68)	(126)
Employer contributions for funded pension plan	-	(156)	(156)
Benefit payments (Funding NSPF pensions)	(325)	182	(143)
Benefit payments (Non-funded pension plan)	(286)		(286)
At 31 December 2013	9,243	(856)	8,387

In March 2013 OJSC DGK decided to cancel the defined benefit pension plan. The pension liability of the plan on cancellation date was RR 2,458 million. Following the defined benefit pension plan cancellation lump sum payment liabilities have increased for RR 315 million and periodical retirement payments liabilities have increased for RR 534 million. These payments were included in collective agreement and were alternatives for defined benefit pension plan. As a result the Group recognised RR 1,609 million curtailment gain for the year ended 31 December 2013.

Principal actuarial assumptions for the Group are as follows:

	31 December 2014	31 December 2013
Nominal discount rate	13.00%	7.90%
Inflation rate	7.00%	5.10%
Wage growth rate	8.50%	6.60%
Staff turnover	Staff turnover depending on age based on statistics for three years	
Mortality table	Russia-2011*	Russia-2011

* Taking into account the pull down adjustment calculated based on statistical data of mortality for employees of the Group of age till 60 years old for years 2012–2013

The sensitivity of the defined benefit obligation to changes in the principal actuarial assumptions as at 31 December 2014 is presented below:

	Change in assumption	Effect on net liability	Effect on net liability, %
Nominal discount rate	+ 1%	(568)	- 7%
	- 1%	654	8%
Inflation rate	+ 1%	358	4%
	- 1%	(319)	- 4%
Wage growth rate	+ 1%	334	4%
	- 1%	(289)	- 3%
Staff turnover	+ 3%	(321)	- 4%
	- 3%	402	5%
Mortality Rates	+ 10%	(532)	- 6%
	- 10%	764	9%

The Group expects to contribute RR 599 million to the defined benefit plans in 2015.

The weighted average duration of the defined benefit obligation of the Group is 8 years.

Retirement benefit plan parameters and related risks. The Group has liabilities under retirement benefit plans in Russia. The retirement benefit plan includes benefits of the following types: lump sum payment upon retirement, jubilee benefits paid at certain age or upon completion of a certain number of years of service, financial aid and compensation to cover funeral expenses in the event of an employee's or pensioner's death, financial aid provided to pensioners, pension benefits paid to former employees through the non-state pension fund (hereinafter referred to as the "NPF").

The amount of benefits depends on the period of the employees' service (years of service), salary level over the recent years preceding retirement, predetermined fixed amount or minimum tariff rate of remuneration or salary or a combination of these factors.

As a rule, the above benefits are indexed according to the inflation rate and salary growth for benefits that depend on the salary level, excluding the retirement benefits paid through NPF, which are not indexed for the inflation rate at the time the payment is made (following the retirement of employees, all risks are borne by NPF).

In addition to the inflation risk, all retirement benefit plans of the Group are exposed to mortality and survival risks.

Plan assets held on NPF's accounts are governed in accordance with the local legislation and regulatory practices.

The Group and NPF are severally liable for plans management, including investments decisions and the contribution schedule.

NPF invests the Group's funds in a diversified portfolio. When investing pension savings and placing the pension reserves, NPF is guided by the Russian legislation that provides a strict regulation with respect to the possible list of financial instruments and restricts their utilisation, which also leads to diversification and reduces investment risks.

The Group transfers the obligation to pay lifelong non-state pension benefits to the Group's former employees to NPF and funds these obligations when awarding the pension. Therefore, the Group insures the risks related to payment of non-state pensions (investment risks and survival risks).

Less current portion of non-current			(39,937)	(9,057)
Less current portion of finance lease liabilities			(913)	(1,007)
Total non-current debt			119,187	131,890

* The bonds mature in 10 years with a put option to redeem them in 2018 and 2016 respectively.

** Fixed interest rate applied to 90 percent of the credit facility, to the rest 10 percent of the facility the quarterly variable export finance rate published by OeKB (Oesterreichische Kontrollbank AG) less 0.25 percent is applied.

Crédit Agricole Corporate and Investment Bank Deutschland. In March 2014 the Group concluded the loan agreement with Crédit Agricole Corporate and Investment Bank Deutschland for total amount of EUR 190 million for a period of 15 years for financing the upgrade of hydroturbines of Saratovskaya HPP.

OJSC Sberbank of Russia. In April 2014 the Group obtained RR 2,776 million under the agreement of non-revolving credit line with OJSC Sberbank of Russia for financing of the operating, financial and investment activities including of refinancing of loans and borrowings.

European Bank for Reconstruction and Development (hereinafter referred to as "EBRD"). In April 2014 the Group concluded the loan agreement with EBRD amounting RR 3,530 million for a period of 12 years to refinance the current liability of OJSC DRSK included in RAO Energy System of East subgroup.

RusHydro Group

Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014

(in millions of Russian Rubles unless noted otherwise)

Note 26. Earnings per share

	Year ended 31 December 2014	Year ended 31 December 2013
Weighted average number of ordinary shares issued (thousands of shares)	371,494,140	309,873,684
Profit for the period attributable to the shareholders of OJSC RusHydro	25,606	19,767
Earnings per share attributable to the shareholders of OJSC RusHydro – basic and diluted (in Russian Rubles per share)	0.0689	0.0638

Note 27. Capital commitments

Capital commitments. In accordance with investment programme of the Company and separate investment programmes of subsidiaries of RAO Energy System of East subgroup segment, the Group has to invest RR 341,208 million for the period 2015-2017 for reconstruction of the existing and construction of new power plants (RR 324,878 million for the period 2014-2016). Currently there are plans on revision of investment programs of the Company and subsidiaries of the Group.

Capital commitments of the Group as at 31 December 2014 are as follows: 2015 year – RR 144,745 million, 2016 year – RR 113,936 million, 2017 year – RR 82,527 million.

Future capital expenditures are mainly related to reconstruction of equipment of power plants: Saratovskaya HPP in the amount of RR 17,290 million, Zhigulevskaya HPP in the amount of RR 13,949 million, Volzhskaya HPP in the amount of RR 16,709 million; and to construction of power plants: Yakutskaya GRES-2 in the amount of RR 21,842 million, Nizhne-Bureiskaya HPP in the amount of RR 18,137 million, Sakhalin GRES-2 in the amount of RR 15,787 million, HPP in Sovetskaya Gavan in the amount of RR 15,051 million.

Note 28. Contingencies

Social commitments. The Group contributes to the maintenance and upkeep of the local infrastructure and the welfare of its employees, including contributions toward the development and maintenance of housing, hospitals, transport services, recreation and other social needs in the geographical areas in which it operates.

Insurance. The Group holds limited insurance policies in relation to its assets, operations, public liability or other insurable risks. Accordingly, the Group is exposed for those risks for which it does not have insurance.

Legal proceedings. The Group's subsidiaries are parties to certain legal proceedings arising in the ordinary course of business. In the opinion of management, there are no current legal proceedings or other claims outstanding, which, upon final disposition, will have a material adverse effect on the position of the Group.

Tax contingencies. Russian tax legislation which was enacted or substantively enacted at the end of the reporting period, is subject to varying interpretations when being applied to the transactions and activities of the Group. Consequently, tax positions taken by management and the formal documentation supporting the tax positions may be challenged by tax authorities, in particular, the way of accounting for tax purposes of some income and expenses of the Group as well as deductibility of input VAT from suppliers and contractors. Russian tax administration is gradually strengthening, including the fact that there is a higher risk of review of tax transactions without a clear business purpose or with tax incompliant counterparties. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year when decisions about the review was made. Under certain circumstances reviews may cover longer periods.

The Russian transfer pricing legislation is to a large extent aligned with the international transfer pricing principles developed by the Organisation for Economic Cooperation and Development (OECD). This legislation provides the possibility for tax authorities to make transfer pricing adjustments and impose additional tax liabilities in respect of controlled transactions (transactions with related parties and some types of transactions with unrelated parties), provided that the transaction price is not arm's length.

During the year ended 31 December 2014 the Group's subsidiaries had controlled transactions and transactions which highly probably will be considered by tax authorities to be controlled based on the results of the year 2014. Management has implemented internal controls to be in compliance with the new transfer pricing legislation.

Tax liabilities arising from transactions between companies are determined using actual transaction prices. It is possible, with the evolution of the interpretation of the transfer pricing rules, that such transfer prices could

be challenged. The impact of any such challenge cannot be reliably estimated; however, it may be significant to the financial position and/or the overall operations of the Group.

Management believes that as at 31 December 2014 its interpretation of the relevant legislation was appropriate and the Group's tax position would be sustained.

Environmental matters. The Group's subsidiaries and their predecessor entities have operated in the utilities industry in the Russian Federation for many years. The enforcement of environmental regulation in the Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group's subsidiaries periodically evaluate their obligations under environmental regulations. Group accrued assets retirement obligation for ash dumps used by the Group which is included in other non-current liabilities and other accounts payable and comprised RR 653 million as at 31 December 2014 (31 December 2013: RR 693 million).

Potential liabilities might arise as a result of changes in legislation and regulation or civil litigation. The impact of these potential changes cannot be estimated but could be material. In the current enforcement climate under existing legislation, management believes that there are no significant liabilities for environmental damage.

Guarantees. The Group has issued guarantees for CJSC Boguchansky Aluminium Plant in favour of its suppliers for future equipment deliveries and for OJSC Boguchanskaya HPP in favour of the State Corporation Vnesheconombank for the loan facility:

Counterparty	31 December 2014	31 December 2013
<i>for OJSC Boguchanskaya HPP:</i>		
State Corporation Vnesheconombank	28,106	25,605
<i>for CJSC Boguchansky Aluminium Plant:</i>		
ALSTOM Grid SAS	134	82
Total guarantees issued	28,240	25,687

Note 29. Financial risk management

The risk management function within the Group is carried out in respect of financial and operational risks. Financial risk comprise market risk (including currency risk, interest rate risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to provide reasonable assurance for achievement of the Group's objectives by establishing Group's overall framework, identifying, analyzing and evaluating risks, establishing risk limits, and then ensuring that exposure to risks stays within these limits and in case of exceeding these limits to impact on the risks.

In order to optimise the Group's exposure to risks, the Company constantly works on their identification, assessment and monitoring, as well as the development and implementation of activities which impact on the risks, business continuity management and insurance, seeks to comply with international and national standards of advanced risk management (COSO ERM 2004, ISO 31000 and others), increases the culture of risk management and continuously improves risk management.

Credit risk. Credit risk is the risk of financial loss for the Group in the case of non-fulfillment by the Contractor of the obligations on the financial instrument under the proper contract. Exposure to credit risk arises as a result of the Group's sales of products on credit terms and other transactions with counterparties giving rise to financial assets.

The Group's maximum exposure to credit risk by class of assets is reflected in the carrying amounts of financial assets in the Note 32.

Although collection of receivables could be influenced by economic factors, management believes that there is no significant risk of loss to the Group beyond the provision for impairment of receivables already recorded.

There is no independent rating for the Group's customers and therefore the Group considers the credit quality of customers at the contract execution stage. The Group considers their financial position and credit history. The Group monitors the existing receivables on a continuous basis and takes actions regularly to ensure collection or to minimise losses.

To reduce the credit risk in the wholesale electricity and capacity markets the Group has introduced marketing policy and procedure to calculate internal ratings of counterparties in the unregulated market, based on the frequency of default, and to establish limits based on the rating of the customers' portfolio.

The Group's management reviews ageing analysis of outstanding trade receivables and follows up on past due balances. Management therefore considers it appropriate to provide past due accounts receivable and other information about credit risk as disclosed in Note 12.

Cash has been deposited in the financial institutions with no more than minimal exposure to the default risk at the time of account opening. Management of the Group approved the list of banks for deposits, as well as rules for their placement. Moreover, management constantly evaluates the financial condition, ratings assigned by independent agencies, background and other factors of such banks.

The tables in Notes 10, 11 and 14 show deposits with banks and other financial institutions and their ratings at the end of the reporting period.

Credit risk for financial guarantees is defined as the possibility of sustaining a loss as a result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The Group uses the same credit policies in assuming conditional obligations as it does for other financial instruments, through established credit approvals, risk control limits and monitoring procedures.

The Group's maximum exposure to credit risk for financial guarantees was RR 28,240 million as at 31 December 2014 (31 December 2013: RR 25,687 million) (Note 28).

Market risk. The Group takes on exposure to market risks. Market risks arise from open positions in (i) foreign currencies, (ii) interest bearing assets and liabilities, all of which are exposed to general and specific market movements. Management sets limits on the value of risk that may be accepted, which is monitored on a regular basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Sensitivities to market risks included below are based on a change in a factor while holding all other factors constant. In practice this is unlikely to occur and changes in some of the factors may be correlated.

Currency risk. Electricity and capacity produced by the Group is sold on the domestic market of the Russian Federation at the prices fixed in Russian Rubles. Hence, the Group does not have significant foreign currency exchange risk. The financial condition of the Group, its liquidity, financing sources and the results of operations do not considerably depend on currency rates as the Group operations are planned to be performed in such a way that its assets and liabilities are to be denominated in the national currency.

The table below summarises the Group's exposure to foreign currency exchange rate risk:

	31 December 2014			31 December 2013		
	Monetary financial assets	Monetary financial liabilities	Net balance sheet position	Monetary financial assets	Monetary financial liabilities	Net balance sheet position
USD	3,300	(5,464)	(2,164)	782	(2,232)	(1,450)
EUR	2,310	(12,292)	(9,982)	682	(2,988)	(2,306)
Other	25	-	25	15	-	15
Total	5,635	(17,756)	(12,121)	1,479	(5,220)	(3,741)

The above analysis includes only monetary assets and liabilities. Equity investments and non-monetary assets are not considered to give rise to any material currency risk.

There is no significant effect of the changes of foreign currency rates on the Group's financial position.

Interest rate risk. The Group's operating profits and cash flows from operating activities are not dependent largely on the changes in the market interest rates. Borrowings issued at variable rates (Note 18) expose the Group to cash flow interest rate risk.

The Group obtains debt financing with floating rates, which are established on the basis of the MOSPRIME, Euribor, Libor rates.

As at 31 December 2014, had interest rates at that date been 6 percent higher (31 December 2013: 0.5 percent higher), with all other variables held constant, profit for the year ended 31 December 2014 and the amount of capital that the Group managed as at 31 December 2014 would have been RR 2 093 million (31 December 2013: RR 182 million) lower, mainly as a result of higher interest expense on variable interest liabilities.

The Group monitors interest rates for its financial instruments. Effective interest rates are disclosed in Note 18.

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

(in millions of Russian Rubles unless noted otherwise)

For the purpose of interest risk reduction the Group makes the following arrangements:

- credit market monitoring to identify favourable credit conditions,
- diversification of credit portfolio by raising of borrowings with fixed rates and floating rates.

Liquidity risk. Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

Prudent liquidity risk management includes maintaining sufficient cash and marketable securities and the availability of funding from an adequate amount of committed credit facilities. The Group adheres to the balanced model of financing of working capital – both at the expense of short-term sources and long-term sources. Temporarily free funds are placed into short-term financial instruments, mainly bank deposits and short-term bank promissory notes. Current liabilities are represented mainly by the accounts payable to suppliers and contractors.

The Group has implemented a control system under its contract conclusion process by introducing and applying typical financial arrangements which include standardised payment structure, payment deadlines, percentage ratio between advance and final settlement, etc. In such a manner the Group controls capital maturity.

The table below shows liabilities as at 31 December 2014 by their remaining contractual maturity. The amounts disclosed in the maturity table are the contractual undiscounted cash flows, including gross finance lease obligations (before deducting future finance charges). Such undiscounted cash flows differ from the amount included in the Consolidated Statement of Financial Position because this amount is based on the discounted cash flows.

The maturity analysis of financial liabilities as at 31 December 2014 is as follows:

	2015 year	2016 year	2017 year	2018 year	2019 year	Starting from year 2020
Liabilities						
Current and non-current debt	67,650	30,036	10,676	44,154	12,325	64,984
Trade payables (Note 20)	33,290	-	-	-	-	-
Financial guarantees (Note 28)	842	636	771	1,008	1,269	23,714
Dividends payable (Note 20)	88	-	-	-	-	-
Finance lease liabilities (Note 18)	979	449	367	192	127	3,169
Net settled derivatives	103	118	65	36	20	7
Total future payments, including principal and interest payments	102,952	31,239	11,879	45,390	13,741	91,874
Liabilities of disposal group	496	-	-	-	-	-

The maturity analysis of financial liabilities as at 31 December 2013 is as follows:

	2014 year	2015 year	2016 year	2017 year	2018 year	Starting from year 2019
Liabilities						
Current and non-current debt	31,678	51,943	26,024	9,466	47,280	38,020
Trade payables (Note 20)	30,968	-	-	-	-	-
Financial guarantees (Note 28)	-	727	579	702	919	22,760
Dividends payable (Note 20)	85	-	-	-	-	-
Finance lease liabilities (Note 18)	1,044	778	334	244	64	-
Net settled derivatives	(14)	10	13	8	7	8
Total future payments, including principal and interest payments	63,761	53,458	26,950	10,420	48,270	60,788

Note 30. Management of capital

Compliance with Russian legislation requirements and capital cost reduction are key objectives of the Group's capital risk management.

The following capital requirements have been established for joint stock companies by the legislation of the Russian Federation:

- share capital cannot be lower than 1,000 minimum shares on the date of the company's registration;
- if the share capital of the entity is more than the statutory net assets of the entity, such entity must decrease its share capital to the value not exceeding its net assets;
- if the minimum allowed share capital is more than the statutory net assets of the entity, such entity is subject to liquidation.

As at 31 December 2014 and 31 December 2013 the Company was in compliance with the above share capital requirements.

The Group's objectives in respect of capital management are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The amount of capital that the Group managed as at 31 December 2014 was RR 595,151 million (31 December 2013: RR 596,707 million).

Consistent with others in the energy industry, the Group monitors the gearing ratio, that is calculated as the total debt divided by the total capital. Debt is calculated as a sum of non-current and current debt, as shown in the Consolidated Statement of Financial Position. Total capital is equal to the total equity, as shown in the Consolidated Statement of Financial Position. The gearing ratio was 0.30 as at 31 December 2014 (31 December 2013: 0.25).

Note 31. Fair value of assets and liabilities

Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) Level 1 are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) Level 2 measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) Level 3 measurements are valuations not based on observable market data (that is, unobservable inputs).

a) Recurring fair value measurements

Recurring fair value measurements are those that the accounting standards require or permit in the statement of financial position at the end of each reporting period.

The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

31 December 2014	Level 1	Level 2	Level 3	Total
Financial assets				
Available-for-sale financial assets	4,055	-	77	4,132
Non-financial assets				
Property, plant and equipment (except for construction in progress, office buildings and land)	-	-	451,262	451,262
Total assets recurring fair value measurements	4,055	-	451,339	455,394
31 December 2013				
Financial assets				
Available-for-sale financial assets	5,766	-	28	5,794
Non-financial assets				
Property, plant and equipment (except for construction in progress, office buildings and land)	-	-	437,737	437,737
Total assets recurring fair value measurements	5,766	-	437,765	443,531

The Group had no liabilities measured at fair value as at 31 December 2014 and 31 December 2013.

RusHydro Group**Notes to the Consolidated Financial Statements as at and for the year ended 31 December 2014**

(in millions of Russian Rubles unless noted otherwise)

The valuation technique, inputs used in the fair value measurement for significant Level 3 measurements and related sensitivity to reasonably possible changes in those inputs are as follows at 31 December 2014:

	Fair value	Valuation technique	Significant unobservable inputs	Reasonable change	Sensitivity of fair value measurement
Non-financial assets					
Property, plant and equipment (except for construction in progress, office buildings and land)	451,262	Replacement cost and discounted cash flows	Electricity and capacity prices Discount rate Capital expenditures	-10% +1% +10%	(19,894) (31,072) (19,382)
Total recurring fair value measurements at Level 3	451,262				(60,348)

The above tables disclose sensitivity to valuation inputs for property, plant and equipment as changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly.

There were no changes in valuation technique for Level 3 recurring fair value measurements during the years ended 31 December 2014 and 31 December 2013.

(b) Assets and liabilities not measured at fair value but for which fair value is disclosed

Financial assets carried at amortised cost. The Group considers that the fair value of cash, short term deposits (Level 1 of the fair value hierarchy) and accounts receivable (Level 3 of the fair value hierarchy) approximates their carrying value. The fair value of long term accounts receivable, other non-current and current assets is estimated based on future cash flows expected to be received including expected losses (Level 3 of the fair value hierarchy), the fair value of these assets approximates their carrying value.

Liabilities carried at amortised cost. The fair value of floating rate liabilities approximates their carrying value. The fair value of bonds is based on quoted market prices (Level 1 of the fair value hierarchy). Fair value of the fixed rate liabilities is estimated based on expected cash flows discounted at current interest rates for new instruments with similar credit risk and remaining maturity (Level 3 of the fair value hierarchy).

The fair value of current liabilities carried at amortised cost approximates their carrying value.

As at 31 December 2014 the carrying value of bonds exceeded their fair value by RR 2,527 million. As at 31 December 2013 fair value of bonds approximated their carrying value.

As at 31 December 2014 the carrying value of non-current fixed rate debt exceeded their fair value by RR 7,319 million. As at 31 December 2013 fair value of non-current fixed rate debt approximated their carrying value.

Note 32. Presentation of financial instruments by measurement category

The following table provides a reconciliation of classes of financial assets with the measurement categories of IAS 39, *Financial Instruments: Recognition and Measurement* as at 31 December 2014:

	Loans and receivables	Available-for-sale financial assets	Total
Assets			
Other non-current assets (Note 10)	7,297	-	7,297
Promissory notes	6,158	-	6,158
Deposits	585	-	585
Long-term loans issued	373	-	373
Net settled derivatives	181	-	181
Available-for-sale financial assets (Note 9)	-	4,132	4,132
Trade and other receivables (Note 12)	35,113	-	35,113
Trade receivables	32,288	-	32,288
Promissory notes receivable	13	-	13
Other financial receivables	2,812	-	2,812
Other current assets (Note 14)	41,703	-	41,703
Deposits and promissory notes	40,122	-	40,122
Short-term loans issued	1,484	-	1,484
Net settled derivatives	97	-	97
Cash and cash equivalents (Note 11)	34,394	-	34,394
Total financial assets	118,507	4,132	122,639
Non-financial assets			760,467
Non-current assets and assets of disposal group classified as held for sale			664
Total assets			883,770

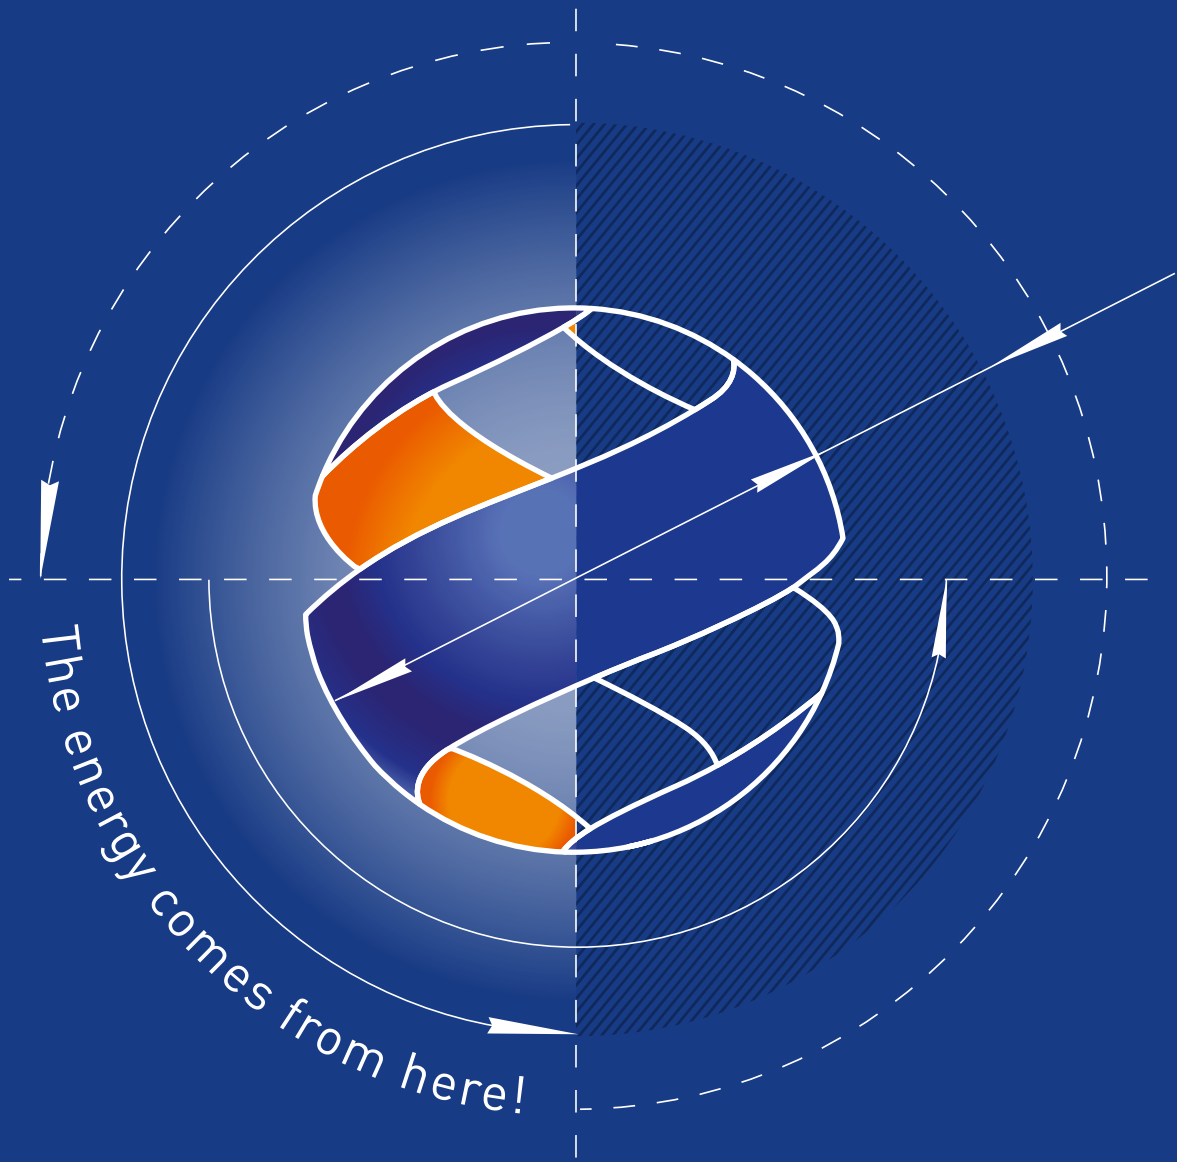

All of the Group's financial liabilities are carried at amortised cost. Financial liabilities are represented mainly by the current and non-current debt (Note 18), trade payables and other account payable (Note 20).

The following table provides a reconciliation of financial assets with the measurement categories as at 31 December 2013:

	Loans and receivables	Available-for-sale financial assets	Total
Assets			
Other non-current assets (Note 10)	5,915	-	5,915
Promissory notes	5,644	-	5,644
Deposits	38	-	38
Long-term loans issued	196	-	196
Net settled derivatives	37	-	37
Available-for-sale financial assets (Note 9)	-	5,794	5,794
Trade and other receivables (Note 12)	32,511	-	32,511
Trade receivables	30,342	-	30,342
Promissory notes receivable	1	-	1
Other financial receivables	2,168	-	2,168
Other current assets (Note 14)	52,936	-	52,936
Deposits and promissory notes	52,406	-	52,406
Short-term loans issued	530	-	530
Cash and cash equivalents (Note 11)	34,472	-	34,472
Total financial assets	125,834	5,794	131,628
Non-financial assets			724,484
Total assets			856,112

Note 33. Subsequent events

There were no significant subsequent events that can influence the Group's financial position, cash flows or operating results which took place during the period between reporting date and date of signing of the Group's consolidated financial statements for the year ended 31 December 2014 prepared in accordance to IFRS.

The energy comes from here!
