Part 2e. Description of Environment

Provide a **high-level** description of the environment covered by this assessment.

For example:

- *Connections into and out of the cardholder data environment (CDE).*
- *Critical system components within the CDE, such as POS devices, databases, web servers, etc., and any other necessary payment components, as applicable.*

The Company processes e-commerce transactions for its customers.

The Company captures PAN, EXPDATE and CVV2/CVC2 via self-developed web application Billing. Web application Billing only shows payment service provider Yandex, LLC cardholder data input form in the iFrame, method eligible for SAQ-A. Then cardholder data is sent to the service TRUST of the PCI DSS compliant e-commerce payment gateway Yandex, LLC for transaction authorization.

The web application does not store cardholder data after capture, so the Company can only impact the security of the source of the iframe containing payment form in its web application.
